French Politicians and Elections 1951-1969 *CUP Archive* A series of essays, originally published in 1970, surveying French elections in the Fourth and Fifth Republics. **Data Confrontation Seminar, 1969 Comparative Socio-Political Data The Enemy's House Divided** *UNC Press Books* The observations of young Robert De Gaulle (mostly written from inside a German prison camp during World War I) analyzes the German blunders during the Great War and sets the stage for De Gaulle's ideology and strategy in the next European conflict. **(Military History) Discours Et Messages Vers Le Terme 1966-1969 Posters, Propaganda, and Persuasion in Election Campaigns Around the World and Through History** *Peter Lang* How effective are election campaign posters? Providing a unique political history, this book traces the impact that these posters - as well as broadsides, banners, and billboards - have had around the world over the last two centuries. It focuses on the use of this campaign material in the United States, as well as in France, Great Britain, Germany, South Africa, Japan, Mexico, and many other countries. The book examines how posters evolved and discusses their changing role in the twentieth century and thereafter; how technology, education, legislation, artistic movements, advertising, and political systems effected changes in election posters and other campaign media, and how they were employed around the world. This comprehensive and original overview of this campaign material includes the first extensive review of the research literature on the topic. **Posters, Propaganda, and Persuasion** will be useful to scholars and students interested in communications, politics, history, advertising and marketing, art history, and graphic design. **Memoirs of Hope: Renewal and Endeavor** *Simon & Schuster* **The National Front and French Politics The Resistible Rise of Jean-Marie Le Pen** *Springer* 'Jonathan Marcus...stands out from most of his colleagues in the media by making a case for the non-alarmists. His National Front and French Politics is a thoughtful study, which in the end, provides a more effective refutation of the myths peddled by Le Pen than would an angry pamphlet.' - Henri Astier, Times Literary Supplement 'Jonathan Marcus's comprehensive account provides plenty of analysis to go with the factual background to the rise of Le Pen and the NF. There are particularly good chapters on the many strands of far-right opinion, from collaborators to extreme Catholics who eventually found a home with the new party.' - Andrew Bell, BBC Worldwide 'I am convinced that the book will be extremely valuable to all English-speaking students of contemporary French politics.' - Stanley Hoffmann, Harvard University **The extreme right-wing National Front is now France's fourth largest political party. At the 1988 Presidential election, its leader Jean-Marie Le Pen obtained over 14 per cent of the popular vote. Le Pen's xenophobic anti-immigrant message has attracted significant support in France. This book examines the rise of Le Pen's party, and its impact on the French political scene. How far is it a threat to French democracy? And is the National Front now a permanent feature of French politics? A searching analysis of how the will of the voters is translated into authoritative political decision making, this book not only uncovers political truths about contemporary France but also provides a model for the study of other popular forms of government. The authors set out to find an answer to the perplexing question of how representative government operates in France in the seemingly unstable context of multiparties. By interviewing voters as well as legislators in 1967 and in 1968 after the great upheaval, and by monitoring policies of the National Assembly from 1967 to 1973, the authors test relationships between public opinion and decision making. They are able to sort out the abiding political cues that orient the French voter, to establish the normal electoral processes, to gauge the nature of mass perceptions of the political options available to voters, and to interpret the strikes, riots, and demonstrations of 1968 as a channel of communication parallel to the electoral process itself. Lucid in style, methodologically sophisticated, and often comparative in approach, **Political Representation in France** is a seminal work for political scientists, sociologists, and historians. **Felled Oaks; Conversation with De Gaulle Decolonization in Britain and France The Domestic Consequences of International Relations** *Princeton University Press* Professor Kahler focuses on organizations below the state, investigating party competition and sensitivity to political change produced by the characteristics of commercial firms. In addition, he explores transmission of external shocks to the domestic polity by the state itself and the domestic politics of settler societies under external threat. Originally published in 1984. The aim of this book, first published in 1973, is to trace the Development of Christian Democracy in France from its origins in the 1830s to the present day, discussing its theories and its importance in French history and politics, with particular (but by no means exclusive) reference to the Fourth Republic (1946-58) when the MRP was one of the key centre parties. Dr Irving provides a thorough analysis of MRP, its economic, foreign and colonial policies, and gives reasons for the relative decline of French Christian Democracy in the 1960s. This French movement has been little understood in Britain and a thorough history has been badly needed. This study will be valuable to all those who, in the context of a United Europe, wish to understand the political forces at work at its conception. It will be valuable especially to students of modern history and politics. **The Uncertain Foundation France at the Liberation 1944-47** *Springer* France's liberation was expected to trigger a decisive break both with the Vichy régime and with the pre-war Third Republic. What happened was an untidy patchwork of unplanned continuities and false starts. This volume analyses the complex process of regime change, economic renewal, social transformation, and adjustment to a fast-evolving world. **The Edge of the Sword** *Greenwood Publishing Group* **The Government and Politics of France** *Routledge* The Government and Politics of France 4th Edition continues to provide students with a comprehensive and incisive introduction to the intricacies of French politics and government. Written by two leading authorities on the subject, this widely used textbook has been fully revised and up-dated to take into account the many changes that have occurred since the last edition was published. Coverage includes: * French political traditions * constitution and the Fifth Republic * the executive * the Parliament * parties and the party system * the Administration * interest groups * local politics * the impact of the EU. **Political Leadership in France From Charles de Gaulle to Nicolas Sarkozy** *Springer* Gaffney analyzes how de Gaulle came to power in 1958: The drama surrounding the Fourth Republic's collapse, and the focus upon an exceptional individual meant that de Gaulle was able to confer a particular style of leadership on the Fifth Republic. The five Presidents who came after him have each capitalized on their own political 'persona.' **Problems of Communism France in the Hollande Presidency The Unhappy Republic** *Springer* An analysis of the first half of François Hollande's five-year presidential term that examines the strengths and weaknesses of presidential politics following the Left's return to power in 2012 and puts forward an interpretation of the underlying nature of contemporary French politics, and the French Fifth Republic. **Ideology And Politics: The Socialist Party Of France** *Routledge* This book explores the strengths and weaknesses of the French Socialist party—its history, ideology, organization, and constituency—as well as the reasons the party has remained a viable force in the French political system for over seventy years. **Replacing France The Origins of American Intervention in Vietnam** *University Press of Kentucky* Using recently released archival materials from the United States and Europe, **Replacing France: The Origins of American Intervention in Vietnam** explains how and why the United States came to assume control as the dominant western power in Vietnam during the 1950s. Acting on their conviction that American methods had a better chance of building a stable, noncommunist South Vietnamese nation, Eisenhower administration officials systematically ejected French military, economic, political, bureaucratic, and cultural institutions from Vietnam. Kathryn C. Statler examines diplomatic maneuvers in Paris, Washington, London, and Saigon to detail how Western alliance members sought to transform South Vietnam into a modern, westernized, and democratic ally but ultimately failed to counter the Communist threat. Abetted by South Vietnamese prime minister Ngo Dinh Diem, Americans in Washington, D.C., and Saigon undermined their French counterparts at every turn, resulting in the disappearance of a French presence by the time Kennedy assumed office. Although the United States ultimately replaced France in South Vietnam, efforts to build South Vietnam into a nation failed. Instead, it became a dependent client state that was unable to withstand increasing Communist aggression from the North. **Replacing France** is a fundamental reassessment of the origins of U.S. involvement in Vietnam that explains how Franco-American conflict led the United States to pursue a unilateral and ultimately imperialist policy in Vietnam. **The Handbook of Electoral System Choice** *Springer* The topic of electoral reform is an extremely timely one. The accelerated expansion of the number of new democracies in the world generates increasing demand for advice on the choice of electoral rules; at the same time, a new reformism in well established democracies seeks new formulae favouring both more representative institutions and more accountable rulers. The Handbook of Electoral System Choice addresses the theoretical and comparative issues of electoral reform in relation to democratization, political strategies in established democracies and the relative performance of different electoral systems. Case studies on virtually every major democracy or democratizing country in the world are included. **The French Communist Party A Critical History (1920-1984), from Comintern to "the Colours of France"** *Manchester University Press* **France and Her Army - Scholar's Choice Edition** This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. Radicalism In The Contemporary Age, Volume 3 Strategies And Impact Of Contemporary Radicalism *Routledge* To understand contemporary society, it has become more and more essential to understand the phenomenon of radicalism—the aspirations of radical movements, the strategies and tactics of radicalism, and the impact of radicalism on contemporary society. Charles de Gaulle *Routledge* In this new biography, Andrew Knapp concisely dissects each of the major controversies surrounding General Charles de Gaulle, leader of the Free French during the Second World War and President of France from 1959 to 1969. From the beginning of de Gaulle's military career in 1909 to an analysis of legacies and myths after his death in 1970, this study examines the path by which the French came to honour him as the greatest Frenchman of all time, and as the twentieth century's pre-eminent world statesman. In each chapter, Knapp analyses de Gaulle's participation in key events such as the development of France's resistance against Nazi Germany, the decolonisation of Algeria, the birth of the French Fifth Republic, and the gigantic upheaval of May 1968. Simultaneously, this study questions de Gaulle's actions and motives throughout his life. By exploring the justification of the contemporary 'de Gaulle myth', Knapp concludes by shedding new light on the influence of de Gaulle in the political culture of twenty-first-century France. Through careful analysis of primary sources as well as recent scholarship, this biography is an invaluable source for scholars and students of modern history, the history of France, political institutions, and international relations.

Political Parties and Elections in the French Fifth Republic The Extreme Right in France From Pétain to Le Pen *Routledge* A comprehensive new historical study of the extreme right in France, from the Vichy regime to the present day. The Front National has for some years been France's third political party and the most significant extreme-right force in Europe; its leader, Jean-Marie Le Pen, contested the second round of the 2002 presidential election with 5.5 million votes. This wide-ranging and authoritative book examines the resurgence of right-wing extremism in France from a historical perspective, tracing the political lineage of Le Pen and the FN through key figures and movements on the French extreme right since 1940. Part 1 devotes chapters to the Vichy regime, the aftermath of the Occupation, the Poujadist movement, the Algerian War, the 'Nouvelle Droite', and extreme-right ideology and activism in the 1960s and 1970s. Part 2 analyzes the electoral rise of the FN, its evolving programme and exploitation of salient issues, the geography and sociology of its electorate, its exercise of local power, and its impact on national political culture in contemporary France. The FN, it is argued, represents both the latest manifestation of a long tradition of right-wing radicalism and a complex new phenomenon within the changing social and political dynamics of France today. This is an essential book for all readers with an interest in French and European politics and modern history.
