GUIDE TO UNCONVENTIONAL COMPUTING FOR MUSIC

Springer This pioneering text/reference explores how innovative new modes of computation may provide exciting new directions for future developments in the music industry, guiding the reader through the latest research in this emerging, interdisciplinary field. This work includes coverage of electronic music compositions and performances that incorporate unconventional interfacing, hacking and circuit bending. Features: presents an introduction to unconventional computing in music; discusses initiatives involving biophysical electronic music, the work of self-styled silicon luthiers, and the intersection of music and quantum computing; introduces the memristor, a new electronic component with the potential to revolutionize how computers are built; reviews experiments and practical applications of biological memristors in music; describes IMUSIC, an unconventional tone-based programming language, which enables the programming of computers using musical phrases; includes review questions at the end of each chapter.

ACHIEVING MUSICAL SUCCESS IN THE STRING CLASSROOM

Oxford University Press, USA Achieving Musical Success in the String Classroom describes a fully pragmatic pedagogical approach toward developing complete musicianship in beginning through advanced level string players by incorporating the ideas of Mimi Zweig, Paul Rolland, and Shinichi Suzuki. Author Karel Butz's philosophical assumptions are explained regarding the structure and purpose of string teaching contributing to a high level of musical artistry among students. Introductory through advanced string concepts relating to instrument set-up, posture, left and right hand development, music theory, aural skills, assessment procedures, imagery in playing, the development individual practice and ensemble skills, and effective rehearsal strategies are explained in a sequential approach that benefit the classroom teacher and student. In addition, several score examples, sample lesson plans, grading rubrics as well as videos of Butz demonstrating his pedagogical ideas and techniques with musicians are included.

SACK YOUR BOSS

THE ULTIMATE GUIDE TO ESCAPE YOUR 9-5

Rodwellbeing Publishing

Have you reached that point in your job where you're thinking 'enough is enough'?

In this book, Christian Rodwell, the Founder of Escape The Rat Race, shows that there is a proven process anyone who is currently employed but looking to start their own business can follow: 'The choices for someone wishing to exit a corporate 9-5 job and start a new business are numerous and this can easily lead to overwhelm, confusion....and over-analysing the options for so long that you end up taking no action at all. Finding enough time to fit your new business around your full time job and family commitments will also be a challenge, which is why I've dedicated an entire chapter to show you ways to overcome this.' Not everyone who wishes to quit the rat race and start a business knows exactly what business would be best suited to them initially. This book will help you to get to know yourself better, identifying your motives for wanting to sack your boss and answering the question, 'what would I would love to do each day if money were no object?'. Christian Rodwell has been through all of these challenges himself, and has worked with over 1000 other '#escapees' who are on the same journey. Christian illustrates within this book his process for helping such individuals map out their very own '9-5 escape plan' - 'The Five Step Freedom Formula™'. 'I'll guide you through the steps you need to take before you identify what your winning strategy is for starting a business you love. At the end of this book, you'll have all of the answers ready to complete your very own 90 Day Escape Plan, a specific and personalised personal development plan which I have put together for you.' It can be downloaded for free, by visiting: www.fivestepfreedomformula.com

Does this reflect how you feel right now about your current work/life balance? ★ You feel trapped in a cycle of getting up to go to work each day, trading your time for money ★ You lack fulfilment doing work you're not passionate about in order to make other people more successful ★ You're frustrated because you know that you are capable of achieving greatness, but feel as if your current situation is holding you back ★ You've been struggling to get ahead financially and break free of bad debt ★ You're fed up with standing on busy platforms wrestling for space with the rest of the herd every morning ★ You're fed up with the internal company politics which you have to endure every day ★ You feel limited by your earning potential and question if you're ever going to be in a position where you feel truly wealthy ★ You never have any spare time to yourself to do the things you really want to or spend enough time with the people that mean the most to you ★ You're fed up with having to ask permission from somebody else to allow you time off to do what's important to you ★ You want to explore the world and be able to generate an income without being tied to any one specific location ★ You know that there is a better quality of life waiting for you Did you answer 'yes' to any of the above? 'If escaping the rat race is something you want to do, then take heart. This is something I have done for myself and I work with people every week who are in the process of doing the same.' Based around a proven five-step formula, the author guides readers through every step of gaining true clarity on their life goals, focusing their attention on achieving them - and making that bold transition from frustrated employee to unstoppable entrepreneur. 'They'll face everything from their deepest fears and hesitations, to a true and frank appraisal of their finances - all intended to cut out fluff so they can crack on with productively taking action on building that business they've always dreamed of. The 90-day "escape plan" I share is unlike anything they've seen before, but I can almost guarantee it

will change their life'.

MUSIC

THE DEFINITIVE VISUAL HISTORY

Penguin Humans have always made music and this authoritative and lavishly illustrated guide is your companion to its fascinating history across the globe. Music - that mysterious alchemy of harmonies, lyrics, and rhythm - is a constant in our lives. Discover how music has evolved with human society, accompanying our leisure, religious rituals, and popular festivities. Watch its development during prehistory and before musical notation, when melodies were memorized or improvised. Enjoy galleries of historical instruments such as dulcimers, shawms, psalteries, and tabor pipes. The universal language of music is expressed in an astonishing number of styles today, and Music presents its evolution around the globe, including the classical European tradition of JS Bach, the passionate sounds of Spain's flamenco, and the sonic power of electronica and heavy rock. With spectacular timelines of key events and profiles of musicians from Amadeus Mozart to David Bowie, Music is an unrivaled and comprehensive reference. Whether you are into the Blues, Brahms, or Bhangra, it is essential reading and guaranteed to hit the right note.

INTERACTIVE COMPOSITION

STRATEGIES USING ABLETON LIVE AND MAX FOR LIVE

Oxford University Press, USA Interactive Composition empowers readers with all of the practical skills and insights they need to compose and perform electronic popular music in a variety of popular styles. The book begins by introducing all of the tools involved in creating interactive compositions through the software Ableton Live and Max for Live. The following chapters then put the tools to use by both describing particular musical styles and also teaching readers how to compose and perform within these styles using the software. As readers progress through the book, they will learn to use the software to facilitate their own unique compositional objectives. This book takes readers through all of the steps in designing interactive music compositions. It is geared toward both beginners as well as intermediate and advanced readers, and so readers with even little experience working with digital audio software will quickly learn how to design powerful systems that facilitate their unique compositional ideas. A particular feature of this book is that it discusses the historical context of several electronic music styles used by DJs, electronic musicians, and other artists, and then describes, using software, the technical process used in the composition and performance of these styles. Each chapter leads readers to create an original composition in a given style and also discusses the techniques that can be used to perform the piece in an idiomatic fashion.

THE NEW LAW OF LAND REGISTRATION

Bloomsbury Publishing This book is an examination of the law of land registration in England and Wales, in the light of the Land Registration Act 2002, and in particular at the way land registration is influenced by, and in turn influences, the evolution of land law as a whole. It examines the legal problems that have arisen in connection with land registration and considers the effect of the 2002 statute, drawing extensively upon the law in other jurisdictions and considering possibilities for future development. This is a book which will be essential reading for students, their teachers, and practitioners who will have to grapple with the intricacies of the new Act when it comes into force.

MUSIC HABITS - THE MENTAL GAME OF ELECTRONIC MUSIC PRODUCTION

FINISH SONGS FAST, BEAT PROCRASTINATION AND FIND YOUR CREATIVE FLOW

Independently Published Music Production can be an elusive art form for many, and the challenges that face someone who is new to this can easily create overwhelm and lead to complete paralysis. The goal of this book, is to cover music production from many different angles in a way that will change your thinking on the subject and build your confidence. Music making is a very mental and psychological game, and more often than not, all the technical stuff can hold you back from achieving your goals if you don't have the right creative habits in place first. With all the information available with a simple Google search, I wanted to really get to the heart of things that aren't being discussed nearly enough. I want to clear out all the garbage you may have been told and replace it with the essentials you can put to immediate use. Many people new to music may dive into forums and mindlessly watch video tutorials attempting to gather more and more information until they think they have enough to get going (hint: you never feel like you know enough). That would be like reading a whole encyclopedia and then being asked to recall only the important things that will get you from point A to point B. Even worse, much of the information you get will contradict the last thing you read. It's like finding a needle in a haystack only to be told it's the wrong needle. There is a much better approach. It's an approach that doesn't require you to know a lot to get started. You only need to know enough to get to the next step in your process. There is truly nothing stopping you from becoming a music producer. The ones who are successful now are the ones who started from nothing and chipped away at it until they found a way to express their unique voice. There are no gatekeepers making decisions on who is worthy and who isn't. The determining factor is you, your habits and your confidence in yourself. This book can be read from start to finish, or as a "choose your own adventure", going directly to what you think can help you most right now. Don't get caught up thinking you have to devour everything before getting started. That isn't necessary, and isn't the point of the book. The core concepts in the book will come up time & time again which should help you retain them & be able to recall them when the need arrives. By exploring these concepts from several angles you should gain a broad view of their many uses. My hope is that this book is used as a toolbox. You simply find the right tool that moves you forward and get back to work. So few people, who have more than enough information in their heads, ever start. Of those who do start, even fewer finish what they started and are satisfied with the results. I want you to be in that small group of finishers. Let's get started.

THE WORLD WIDE WEB AND CONTEMPORARY CULTURAL THEORY

Psychology Press First Published in 2000. Routledge is an imprint of Taylor & Francis, an informa company.

POPULAR MECHANICS

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Record live sound sources or built-in virtual instruments Arrange your tracks to edit, mix, and master Discover tips to speed the process and record on an iPad Make sense of the latest software updates A favorite among Logic Pro X beginners, this book is updated to reflect the ongoing changes added to enhance Logic Pro X's recording power.

WE STILL HERE

HIP HOP NORTH OF THE 49TH PARALLEL

McGill-Queen's Press - MQUP We Still Here maps the edges of hip-hop culture and makes sense of the rich and diverse ways people create and engage with hip-hop music within Canadian borders. Contributors to the collection explore the power of institutions, mainstream hegemonies, and the processes of historical formation in the evolution of hip-hop culture. Throughout, the volume foregrounds the generative issues of gender, identity, and power, in particular in relation to the Black diaspora and Indigenous cultures. The contributions of artists in the scene are front and centre in this collection, exposing the distinct inner mechanics of Canadian hip hop from a variety of perspectives. By amplifying rarely heard voices within hip-hop culture, We Still Here argues for its power to disrupt national formations and highlights the people and communities who make hip hop happen.
