The Three Pillars of Radicalization Needs, Narratives, and Networks [Oxford University Press, USA](#) **What fuels radicalization? Is deradicalization a possibility? The Three Pillars of Radicalization: Needs, Narratives, and Networks** addresses these crucial questions by identifying the three major determinants of radicalization that progresses into violent extremism. The first determinant is the need: individuals' universal desire for personal significance. The second determinant is narrative, which guides members in their "quest for significance." The third determinant is the network, or membership in one's group that validates the collective narrative and dispenses rewards like respect and veneration to members who implement it. In this book, Arie W. Kruglanski, Jocelyn J. Bélanger, and Rohan Gunaratna present a new model of radicalization that takes into account factors that activate the individual's quest for significance. Synthesizing varied empirical evidence, this volume reinterprets prior theories of radicalization and examines major issues in deradicalization and recidivism, which will only become more relevant as communities continue to negotiate the threat of extremism. **Religion and International Relations in the Middle East MDPI** The volume has a twofold purpose: first, to question main presuppositions and perceptions regarding religion and international politics in the Middle East and, second, to reflect on the role(s) of religion in the regional order. The first part deals with the contribution of religion to a post-Western turn in International Relations in the Middle East and beyond. It discusses the postsecular conceptual framework in order to expand their approaches to the analysis of the Middle East and addresses the search for religion's "suitable place" within International Relations, taking as a starting point the social changes in the world and the postulated "Mesopotamian turn" in International Relations. The second part focuses on the role of state-like non-state actors. ISIS challenged the international order because, contrary to revolutionary states

in the past, it negates the foundations of the Westphalian system. At the same time, the rise of ISIS had a tremendous impact on the jihadi (sub) system. The third part studies the impact of religion on foreign and security policy (Israel, UAE, UK, and Saudi Arabia). It explores how religion has been shaping each stage of the decision-making process, the position that religion holds in perceptions of stability in the post-2011 era, and the politics of “moderate Islam”, arguing that even though “moderate Islam” has been devised for creating “soft power”, it serves “sharp power” as well. **The Hedge Fund Compliance and Risk Management Guide** [John Wiley & Sons](#) **Security of Flood Defenses** [Walter de Gruyter GmbH & Co KG](#) **This book presents new approaches to security risk analysis and scenario building on the basis of water works such as flood barriers and storm surge barriers. Defending flood barriers is not only important because of climate change and rising sea levels, but also due to the vulnerability of fresh water supplies and the increasing number of people living in vulnerable low-lying river and sea deltas.** **Unreconciled Poems 1991-2013; A Bilingual Edition** [Farrar, Straus and Giroux](#) **Selected poems from the critically acclaimed author of Submission and The Elementary Particles** **A shimmering selection of poems chosen from four collections of one of France’s most exciting authors, Unreconciled shines a fresh light on Michel Houellebecq and reveals the radical singularity of his work. Drawing on themes that are similar to the ones in his novels, these poems are a journey into the depths of individual experience and universal passions. Divided into five parts, Unreconciled forms a narrative of love, hopelessness, catastrophe, dedication, and—ultimately—redemption. In a world of supermarkets and public transportation, indifferent landscapes and lonely nights, Houellebecq manages to find traces of divine grace even as he exposes our inexorable decline into chaos. Told through forms and rhythms that are both ancient and new, with language steeped in the everyday, Unreconciled stands in the tradition of Baudelaire while making a bold new claim on contemporary verse. It reveals that in addition to his work as an incisive novelist, Houellebecq is one of our most perceptive poets with a vision of our era that brims with tensions that cannot—and will not—be reconciled.** **21 Lessons for the 21st Century** [Random House](#) **#1 NEW YORK TIMES BESTSELLER • In Sapiens, he explored our past. In Homo Deus, he looked to our future. Now, one of the most innovative thinkers on the planet turns to the present to make sense of today’s most pressing issues. “Fascinating . . . a crucial global conversation about how to take on the problems of the twenty-first century.”—Bill Gates, The New York Times Book Review NAMED ONE OF THE BEST BOOKS OF THE YEAR BY FINANCIAL TIMES AND PAMELA PAUL, KQED** **How do computers and robots change the meaning of being human? How do we deal with the epidemic of fake news? Are nations and religions still relevant? What should we teach our children? Yuval Noah Harari’s 21 Lessons for the 21st Century is a probing and visionary investigation into today’s most urgent issues as we move into the uncharted territory of the future. As technology advances faster than our understanding of it, hacking becomes a tactic of war,**

and the world feels more polarized than ever, Harari addresses the challenge of navigating life in the face of constant and disorienting change and raises the important questions we need to ask ourselves in order to survive. In twenty-one accessible chapters that are both provocative and profound, Harari builds on the ideas explored in his previous books, untangling political, technological, social, and existential issues and offering advice on how to prepare for a very different future from the world we now live in: How can we retain freedom of choice when Big Data is watching us? What will the future workforce look like, and how should we ready ourselves for it? How should we deal with the threat of terrorism? Why is liberal democracy in crisis? Harari's unique ability to make sense of where we have come from and where we are going has captured the imaginations of millions of readers. Here he invites us to consider values, meaning, and personal engagement in a world full of noise and uncertainty. When we are deluged with irrelevant information, clarity is power. Presenting complex contemporary challenges clearly and accessibly, *21 Lessons for the 21st Century* is essential reading. "If there were such a thing as a required instruction manual for politicians and thought leaders, Israeli historian Yuval Noah Harari's *21 Lessons for the 21st Century* would deserve serious consideration. In this collection of provocative essays, Harari . . . tackles a daunting array of issues, endeavoring to answer a persistent question: 'What is happening in the world today, and what is the deep meaning of these events?'"—BookPage (top pick) *The Quest for Core Values in the Application of Legal Norms Essays in Honor of Mordechai Kremnitzer* [Springer Nature](#) *Towards a Political Economy of Degrowth* [Rowman & Littlefield](#) *Bringing degrowth into dialogue with critical social theories, covering previously unexplored geographical contexts and discussing some of the most contested concepts in degrowth, the book hints at informed paths towards socio-ecological transformation.* *Advances in Artificial Intelligence, Software and Systems Engineering Proceedings of the AHFE 2021 Virtual Conferences on Human Factors in Software and Systems Engineering, Artificial Intelligence and Social Computing, and Energy, July 25-29, 2021, USA* [Springer Nature](#) *This book addresses emerging issues concerning the integration of artificial intelligence systems in our daily lives. It focuses on the cognitive, visual, social and analytical aspects of computing and intelligent technologies, and highlights ways to improve the acceptance, effectiveness, and efficiency of said technologies. Topics such as responsibility, integration and training are discussed throughout. The book also reports on the latest advances in systems engineering, with a focus on societal challenges and next-generation systems and applications for meeting them. Further, it covers some cutting-edge issues in energy, including intelligent control systems for power plant, and technology acceptance models. Based on the AHFE 2021 Conferences on Human Factors in Software and Systems Engineering, Artificial Intelligence and Social Computing, and Energy, held virtually on 25-29 July, 2021, from USA, this book provides readers with extensive information on current research and future*

challenges in these fields, together with practical insights into the development of innovative services for various purposes. **Livres hebdo Elgar Introduction to Theories of Organizational Resilience** [Edward Elgar Publishing](#) With organizational environments becoming more unstable, uncertain and equivocal, the concept of resilience has become increasingly significant for management studies. Resilience connotes organizational, team and individual capacities to absorb external shocks and to learn from them, while simultaneously preparing for and responding to external jolts. This book pinpoints the essential aspects of managerial and organizational resilience and offers insights that stimulate critical thinking. As the concept of resilience is essentially made up of contrasting forces, the volume presents some innovative synthetic interpretation that allows a deeper comprehension of the phenomenon and provides managers and policy-makers with a solid basis for taking their decisions. **Arthropod Biology and Evolution Molecules, Development, Morphology** [Springer Science & Business Media](#) More than two thirds of all living organisms described to date belong to the phylum Arthropoda. But their diversity, as measured in terms of species number, is also accompanied by an amazing disparity in terms of body form, developmental processes, and adaptations to every inhabitable place on Earth, from the deepest marine abysses to the earth surface and the air. The Arthropoda also include one of the most fashionable and extensively studied of all model organisms, the fruit-fly, whose name is not only linked forever to Mendelian and population genetics, but has more recently come back to centre stage as one of the most important and more extensively investigated models in developmental genetics. This approach has completely changed our appreciation of some of the most characteristic traits of arthropods as are the origin and evolution of segments, their regional and individual specialization, and the origin and evolution of the appendages. At approximately the same time as developmental genetics was eventually turning into the major agent in the birth of evolutionary developmental biology (evo-devo), molecular phylogenetics was challenging the traditional views on arthropod phylogeny, including the relationships among the four major groups: insects, crustaceans, myriapods, and chelicerates. In the meantime, palaeontology was revealing an amazing number of extinct forms that on the one side have contributed to a radical revisitation of arthropod phylogeny, but on the other have provided evidence of a previously unexpected disparity of arthropod and arthropod-like forms that often challenge a clear-cut delimitation of the phylum. **Freedom in the World 2009 The Annual Survey of Political Rights & Civil Liberties** [Rowman & Littlefield](#) Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 193 countries and a group of select territories are used by policy makers, the media, international corporations, and civic activists and human rights defenders to monitor trends in democracy and track improvements

and setbacks in freedom worldwide. Press accounts of the survey findings appear in hundreds of influential newspapers in the United States and abroad and form the basis of numerous radio and television reports. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development. **Urban Resilience for Emergency Response and Recovery Fundamental Concepts and Applications** [Springer](#) This book introduces the concepts of Resilience-Based Design (RBD) as an extension of Performance-Based Design. It provides readers with a range of cutting-edge methodologies for evaluating resilience and clarifies the difference between resilience, vulnerability and sustainability. Initially, the book focuses on describing the different types of uncertainty that arise in the context of resilience evaluation. This is followed by an entire chapter dedicated to the analytical and experimental recovery functions. Then, starting from the definition of resilience provided by MCEER, an extension of the methodology is provided that introduces the seven dimensions of Community Resilience, summarized in the acronym PEOPLES. They are: Population and Demographics, Environmental/Ecosystem, Organized Governmental Services, Physical infrastructures, Lifestyle and Community Competence, Economic Development, and Socio-Cultural Capital. For each dimension, components and subcomponents are defined and the related indices are provided. Underlining the importance of the physical infrastructure dimension, the book provides several examples of applications for transportation, hydraulic, gas and power networks. The problem of interdependencies and the domino effect is also taken into account during the analysis. One of the book's closing chapters focuses on different methodologies for improving disaster preparedness and engineering mitigation strategies, while the last chapter describes the different computer platforms available on the market for evaluating Community Resilience. The book offers readers an extensive introduction to the concept of Resilience-Based Design, together with selected advanced applications for specialists. No prerequisite knowledge is needed in order to understand the book, and the Appendix offers valuable supplemental information on e.g. the probabilistic concepts. As such, the book offers a valuable resource for graduate students, young engineers and researchers who are interested in the topic, and can also be used as a supplementary text in graduate level Disaster Resilience courses. **From Media Hype to Twitter Storm News Explosions and Their Impact on Issues, Crises and Public Opinion** This anthology offers the first comprehensive

overview of media hype, a phenomenon often dismissed as ephemeral and unimportant. Despite that reputation, media storms actually do play an important role in political issues, scandals, and crises, sometimes creating an important shift in public opinion over the course of only a few hours. This book provides an overview of theoretical, conceptual, and methodological issues related to media hype through close explorations of case studies from around the world. **The Rough Guide to France** [Rough Guides](#) From cosmopolitan Paris to the sunny Cote d'Azur, from historical Normandy to the rocky Pyrenes, this new edition updates the best of towns, attractions, and landscapes of every region. 100 maps. of color photos. **Ferrari 1947-1997 the Official Book** [Nada](#) Reprint of the prestigious volume published on the occasion of the fiftieth anniversary of the House of Maranello and sponsored by Ferrari itself. The imposing work is subdivided in two large sections. The technical part is by Karl Ludvigsen and details the technological innovations introduced by Ferrari from 1947 up to now; the historical part is by Gianni Cancellieri and recalls, decade after decade, Ferrari's history from the industrial, sport and human viewpoint. The appendix includes the silhouettes of all the cars built by Ferrari, the list of the men that in these fifty years have contributed in building the myth of the Prancing Horse (presidents, technicians, teams, drivers and so on). **Paris in the Dark Going to the Movies in the City of Light, 1930-1950** [Duke University Press](#) In **Paris in the Dark** Eric Smoodin takes readers on a journey through the streets, cinemas, and theaters of Paris to sketch a comprehensive picture of French film culture during the 1930s and 1940s. Drawing on a wealth of journalistic sources, Smoodin recounts the ways films moved through the city, the favored stars, and what it was like to go to the movies in a city with hundreds of cinemas. In a single week in the early 1930s, moviegoers might see Hollywood features like King Kong and Frankenstein, the new Marlene Dietrich and Maurice Chevalier movies, and any number of films from Italy, Germany, and Russia. Or they could frequent the city's ciné-clubs, which were hosts to the cinéophile subcultures of Paris. At other times, a night at the movies might result in an evening of fascist violence, even before the German Occupation of Paris, while after the war the city's cinemas formed the space for reconsolidating French film culture. In mapping the cinematic geography of Paris, Smoodin expands understandings of local film exhibition and the relationships of movies to urban space. **International Conference on Innovative Computing and Communications Proceedings of ICICC 2021, Volume 2** [Springer Nature](#) This book includes high-quality research papers presented at the Fourth International Conference on Innovative Computing and Communication (ICICC 2021), which is held at the Shaheed Sukhdev College of Business Studies, University of Delhi, Delhi, India, on February 20-21, 2021. Introducing the innovative works of scientists, professors, research scholars, students and industrial experts in the field of computing and communication, the book promotes the transformation of fundamental research into institutional and industrialized research and the conversion of applied exploration into real-

time applications. **Decisions and Reports** *Décisions Et Rapports* [Council of Europe](#) P&S 2 Frb04 Mark and Gert (Manuf)

Less than a week later, a novel coronavirus, was identified. In February, the disease it caused was named COVID-19. Even now, as the global infection rate crosses 1,00,000 and the death toll surpasses 3000, we are yet to understand the threat posed by this new coronavirus. There is no vaccination to prevent it, and no antiviral to cure the sick. While high numbers are being reported daily, agencies may still be unaware of many cases. The symptoms of Coronavirus are dangerously similar to that of the common flu: fever, coughing, breathlessness, tiredness, headache and muscle pain. But in India, that has such a high population density, we will have to do more than just stick to Namaste to greet each other. It seems that a crippling pandemic is inevitable. While some of us may find it easier to resign ourselves to fate, what we need most right now is credible and comprehensive information from professionals that can help us understand what the Coronavirus is, and how we can prepare and protect ourselves against it. This is the first book that addresses the history, evolution, facts and myths around the pandemic. **The Coronavirus** is a timely must-read for everyone keen on understanding its impact and fallout. **Woman at Point Zero** [Zed Books](#) "All the men I did get to know, every single man of them, has filled me with but one desire: to lift my hand and bring it smashing down on his face. But because I am a woman I have never had the courage to lift my hand. And because I am a prostitute, I hid my fear under layers of make-up." --Excerpt **The Bugatti Queen** [Simon and Schuster](#) Born in 1900 to a soon-to-be-widowed postmaster's wife in a small French village, Hélène Delangle's background offered no suggestion of the extraordinary life she was to lead. The first step was to leave the country behind and head to the city -- in this case, a Paris in the grip of an intoxicating 1920s blend of creativity and debauchery. She became a dancer, and then a stripper. But the demi-monde of gauze veils and admirers was not enough. A visit to the Actors' Championships, a uniquely French meeting of the theatrical

world with the race-track, opened her eyes to the glamorous combination of machines and speed. Quickly establishing herself as a racer of uncommon talent and audacity, the beautiful woman now known as Hellé Nice -- Hellish Nice to her British fans -- then caught the attention of none other than Ettore Bugatti, founder of the marque with which her name will always be associated. And yet, despite the fame and the fortune she amassed in an unprecedented career, she died penniless and alone, an old woman in a crumbling Nice flat surrounded only by memories. **THE BUGATTI QUEEN** is the story of a great pioneer of motor racing who happened to be a woman. Re-creating her rollercoaster career with great verve and panache, Miranda Seymour brilliantly shows us a life now forgotten -- and makes it unforgettable. **Portillo's Hidden History of Britain** [Michael O'Mara Books](#) Discover the hidden history of Britain through the stories of its 'lost' or abandoned places and buildings. **Portillo's Secret History of Britain** presents a compelling and wonderfully evocative history of Britain through the stories of its 'lost' or abandoned places and buildings. The chapters cover a variety of historical themes: Crime and Punishment, Health and Medicine, Defence and Warfare, and Entertainment and Leisure. Using a combination of his own investigations and archive research, plus memories and quotations from the contributors he interviewed for the series, Michael Portillo explains what the buildings were used for and by whom, why they were abandoned, and what they can tell us about our past. For example: * Learn what the ruins of London Road Fire and Police Station in Manchester reveal about the history of the emergency services in the last 100 years * How Bradford's art deco Odeon cinema encapsulates a century of film-making and movie-going With evocative text that brings each location vividly to life, Michael Portillo describes the building and its activities in its heyday and compares this past life with its faded grandeur or melancholic abandonment seen today. Filled with fascinating insights and observations, his narrative provides a compelling and original perspective on Britain's social and military history. **Portillo's Hidden History of Britain** features deserted villages, abandoned prisons, closed-down cinemas, empty hospitals, derelict military bases, sewers and much more. Complementing the text are 32 pages of atmospheric and informative photographs, including 'then' and 'now' images of the locations, which pointedly juxtapose their former glory with their present-day destitution. **After Charlie Hebdo** Terror, Racism and Free Speech [Zed Books Ltd.](#) As the world looked on in horror at the Paris terror attacks of January and November 2015, France found itself at the centre of a war that has split across nations and continents. The attacks set in motion a steady creep towards ever more repressive state surveillance, and have fuelled the resurgence of the far right across Europe and beyond, while leaving the left dangerously divided. These developments raise profound questions about a number of issues central to contemporary debates, including the nature of national identity, the limits to freedom of speech, and the role of both traditional and social media. **After Charlie Hebdo** brings together an international range of scholars to

assess the social and political impact of the Paris attacks in Europe and beyond. Cutting through the hysteria that has characterised so much of the initial commentary, it seeks to place these events in their wider global context, untangling the complex symbolic web woven around 'Charlie Hebdo' to pose the fundamental question - how best to combat racism in our supposedly 'post-racial' age? **Systemic Planning Principles and Methodology for Planning in a Complex World** **Goodnight Desdemona (Good Morning Juliet) (Play)** [Vintage Canada](#) **Goodnight Desdemona (Good Morning Juliet)** is an exuberant comedy and feminist revisioning of Shakespeare's Othello and Romeo and Juliet. It takes us from a dusty office in Canada's Queen's University, into the fraught and furious worlds of two of Shakespeare's best-known tragedies, and turns them upside-down. Constance Ledbelly is the beleaguered "spinster" academic, and unlikely heroine who embarks on a quest for Shakespearean origins and, ultimately, her own identity. When she deciphers an ancient and neglected manuscript, Constance is propelled through a very modern rabbit hole and lands smack in the middle of the tragic turning points of each play in turn. Her attempts to save first Desdemona, then Juliet, from their harrowing fates, result in a wild unpredictable ride through comedy and near-tragedy, as mild-mannered Constance learns to love, sword-fight, dance Renaissance-style, and master a series of disguises... **Goodnight Desdemona (Good Morning Juliet)** a gender-bendy, big-hearted and crazily intelligent romp, where irony and anger sing in perfect harmony with innocence and poignancy. **Jihad and Death The Global Appeal of the Islamic State** [Oxford University Press](#) How has ISIS been able to muster support far beyond its initial constituency in the Arab world and attract tens of thousands of foreign volunteers, including converts to Islam, and seemingly countless supporters online? In this compelling intervention into the debate about ISIS' origins and future prospects, the renowned French sociologist, Olivier Roy, argues that while terrorism and jihadism are familiar phenomena, the deliberate pursuit of death has produced a new kind of radical violence. In other words, we're facing not a radicalization of Islam, but the Islamization of radicalism. **Jihad and Death** is a concise dissection of the highly sophisticated narrative mobilised by ISIS: the myth of the Caliphate recast into a modern story of heroism and nihilism. According to Roy, this very contemporary aesthetic of violence is less rooted in the history of Islamic thought than it is entrenched in a youth culture that has turned global and violent. **Porsche 911 Forever Young** [Tpr Incorporated](#) With the aid of previously unpublished material and in-depth interviews author Aichele presents this endless and fascinating 911 history. For the first time, legendary F1 commentator Maurice Hamilton and

award-winning photographers Bernard and Paul-Henri Cahier bring the heroes of this iconic sport together, in a stunning photographic portrayal of the poise, skill and winning mindset that separates the fast from the furious, the elite from the talented. With exclusive quotes from icons such as Lewis Hamilton and Nico Rosberg, and including Maurice's historic interviews with the sport's lost heroes - including James Hunt and Ayrton Senna - *F1: The Champions* is a beautiful tribute to the most ferocious of sports and the incredible sportsmen who drive at the edge in pursuit of greatness.

Religion and International Relations [Springer](#) Discussions of religion in international relations have often focused narrowly on religious fundamentalism and on the potentially negative consequences of religious differences. This book attempts to take a more balanced and much broader view of the subject, bringing together new research-based studies by specialists from international relations, history and theology. Case-studies and thematic analyses examine both seldom-discussed issues - such as the political consequences of large-scale religious change - and review old themes in new ways.

Dealing with Terrorism: Empirical and Normative Challenges of Fighting the Islamic State The events surrounding the terrorist group officially known as the Islamic State (IS) have galvanized anti-terrorist efforts far beyond the first reactions after September 11, 2001, and led to varying state responses, especially in Europe, e.g., in addressing the phenomenon of foreign fighters. In "Dealing with Terrorism : Empirical and Normative Challenges for Fighting the Islamic State" an international panel of experts analyses current trends and new developments in legal systems and in law enforcement in Europe as well as in the USA and the Middle East. Offering a succinct overview with special focus on criminal law, police law, and European and international law, the book provides unique insights into what dealing with terrorism means to European and non-European countries. It includes material from non-English-speaking countries that is seldom available to a broader academic community. Its comparative approach offers readers three levels of understanding: by country, in terms of the European Union, and the international community as a whole. The book is geared at specialists in national and international institutions, scholars, and students in the field but will also be of great interest to the wider legal community. Its profound insights and expert perspectives enhance the ongoing national and international debate on public security issues by striking a balance between freedom and security.
