Fibres

Microscopy of Archaeological Textiles and Furs

Fibres used in the manufacture of archaeological textiles are full of information. Unfolded microscopically, analysis of such textiles and furs has become an important field of archaeological study. Fibre type and even fibre processing may become visible. Scanning electron microscopy has made analysis of metal-replaced and charred finds possible, something that was not determinable by light microscopy. Examination under the SEM has enabled a new world to become visible and is so presented in this book. A variety of archaeological examples and their modern day counterparts are assembled as well as a chapter devoted to the historical background of each fibre and its use in Europe.

Overcoming School Refusal

A practical guide for teachers, counsellors, caseworkers and parents

Australian Academic Press School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

Early and Late Mosinee

Handbook of Avian Hybrids of the World

Oxford University Press With more than 5,000 works cited, Handbook of Avian Hybrids of the World is the greatest compendium of information ever published on hybridization in birds. Worldwide in scope, it provides information on all reported avian crosses, not only those occurring in captivity, but also in a natural setting (approximately 4,000 crosses are covered). This book is a basic reference, intended both for the serious birder and the professional biologist. McCarthy's work fills a need for reference material that takes into

account the last half century of data. It will be of interest to workers in a wide variety of fields, ranging from animal behavior to genetics, ecology, zoology, and systematics. In fact, it will make fascinating reading for anyone interested in birds and the natural world.

E-FOOD: Closing the Online Enforcement Gap in the EU Platform Economy

Springer Nature Retail is 'going digital,' and grocery shopping is no exception. While some businesses are relying on their corporate website to make the sale, both traditional brick-and-mortar and new disruptive business models are increasingly using online marketplaces to offer their products online. European Union law has been gradually updated to reflect this new reality, with Intellectual Property Rights legislation and Consumer Law leading the way toward a suitable regulatory framework in the Platform Economy. However, the EU has not devised a comprehensive strategy for tackling the challenges posed by the online sale of physical consumer goods, such as effective public enforcement in online environments. In fact, sector-specific legislation, including Food Law, largely ignores online transactions. In this context, the book evaluates the impact that online marketplaces are having on European Union sector-specific legislation and its e-nforcement. The goal is to assess whether the existing regulatory and policy framework are sufficient for promoting compliance and bridging the enforcement gap in the digital single market. Focusing on the e-food market, the book presents a state-of-the-art overview of how online marketplaces are altering EU law and its enforcement by public authorities.

Transcription Factor Protocols

Springer Science & Business Media The effort to sequence the human genome is now moving toward a conclusion. As all of the protein coding sequences are described, an increasing emphasis will be placed on understanding gene function and regulation. One important aspect of this analysis is the study of how transcription factors regulate transcriptional initiation by RNA polymerase II, which is responsible for transcribing nuclear genes encoding messenger RNAs. The initiation of Class II transcription is dependent upon transcription factors binding to DNA elements that include the core or basal promoter elements, proximal promoter elements, and distal enhancer elements. General initiation factors are involved in positioning RNA polymerase II on the core promoter, but the complex interaction of these proteins and transcriptional activators binding to DNA elements outside the core promoter regulate the rate of transcriptional initiation. This initiation process appears to be a crucial step in the modulation of mRNA levels in response to developmental and environmental signals. Transcription Factor Protocols provides step-by-step procedures for key techniques that have been developed to study DNA sequences and the protein factors that regulate the transcription of protein encoding genes. This volume is aimed at providing researchers in the field with the well-detailed protocols that have been the hallmark of previous volumes of the Methods in Molecular Biology series.

EU Environmental Law

Edward Elgar Publishing EU Environmental Law discusses the reality for legal practice throughout the EU, as environmental law of the Member States is becoming ever less 'national'. Consequentially European environmental regulation is becoming more complex and

interrelated, making it an emerging field of study for European law graduates, and an area of increasing exposure to the legal profession. This book gives readers a thorough overview of core European environmental law, with a section on the basic framework and principles, as well as on substantive law issues giving insight into the legislation in the different sectors and the most topical developments.

Fully Charged

How Great Leaders Boost Their Organization's Energy and Ignite High Performance

Harvard Business Press As you're well aware, your individual energy ebbs and flows--leading to high and low productivity cycles. Fail to manage your energy correctly, and you risk falling into traps including inertia, complacency, and frenzied, unfocused activity that only erodes the quality of your life. The same holds true for your entire organization. In Fully Charged, Heike Bruch and Bernd Vogel provide tools and strategies to help you manage your company's collective energy. First, diagnose your company's "energy state" using the Organizational Energy Matrix. By assessing the intensity (high or low) and the quality (positive or negative) of the energy in your enterprise, you discover which of four energy states your company is experiencing. Second, move your company out of dangerous states characterized by complacency, cynicism, aggression, withdrawal, and other perils. By applying practices mastered by companies as diverse as Airbus, Novartis, SAP, and Tata Steel, you can shift your firm into a state of high, positive energy--in which everyone is emotionally engaged, mentally alert, and working swiftly and productively toward critical goals. Practical and backed by extensive research, Fully Charged reveals how to continually refresh your company's energy--so it's always ready to tackle the next period of high demand.

How Colleges Work

The Cybernetics of Academic Organization and Leadership

Jossey-Bass "One of the best theoretical and applied analyses of university academic organization and leadership in print. This book is significant because it is not only thoughtfully developed and based on careful reading of the extensive literature on leadership and governance, but it is also deliberately intended to enable the author to bridge the gap between theories of organization, on one hand, and practical application, on the other." —Journal of Higher Education

Enterprise 2.0 - The Art of Letting Go

iUniverse There is the idea of the different' company. A company that after more than 100 years is now turning its back on production based on the division of work. In his introduction, Götz Hamann, journalist for Die Zeit, describes the authors as engaged in an attack on capitalism'. Expert articles by such renowned authors as Andrew McAfee, Don Tapscott and David Weinberger are augmented by examples from Nokia, SAP and Vodafone in the quest to discover how Web 2.0 technologies can best be used as business tools, and how companies will need to change in order to survive as Enterprise 2.0 organizations. Not forgetting the question of whether it's worth it for company management. After all, Enterprise 2.0 necessarily implies that decision-makers must also let go' and give up their control. Yet are we really ready for this? CIO This book can () certainly be of help in illuminating a fundamental change taking place in the business world. ChangeX Online Journal for Change in Society and the Economy The changeover to new ways of thinking in the enterprise requires everyone to undergo a multifaceted learning process. Associated Press The Ideas Man (David Weinberger) is once again proposing a revolutionary thesis: purge your company of as much control as possible. A Nation of Provincials

The German Idea of Heimat

Univ of California Press "This elegant and original study adds greatly to our understanding of national and regional identities in modern German history and the ways that these were constructed. It is imaginatively researched, intelligently argued, and written

with panache. *A Nation of Provincials* is a major historical work that has much to contribute to larger contemporary debates about a 'usable' German past."--David Blackbourn, University of London "This impeccably and thoroughly researched study is an excellent example of historical scholarship. Applegate has quite imaginatively used a wide variety of primary and secondary sources. This is a pioneering work that will stand alone in its field for some time."--Gary D. Stark, University of Texas, Arlington

We Men Who Feel Most German

A Cultural Study of the Pan-German League, 1886-1914

Routledge Originally published in 1984 this volume presents the first systematic analysis of the cultural sources of the Pan German League's appeal and influence in Imperial Germany. It focuses on the symbolic dimensions of the League's literature and activities, in order to explain the attraction of the League's aggressive ideology to certain social groups. In addition it examines the relationship between the League and other patriotic societies in Imperial Germany and analyses the processes by which the organization succeeded, on the eve of the First World War, in mobilizing a broad 'national opposition' to the German government. The study draws on concepts from psychology and anthropology, and its documentary foundation includes archival material from both the former East and West Germany.

The Caspian Sea Encyclopedia

Springer Science & Business Media "The Caspian Sea Encyclopedia" is the second one in the new series of encyclopedias about the seas of the former Soviet Union published by Springer-Verlag. The first volume - "The Aral Sea Encyclopedia" was published by Springer in 2009. The series will be continued by "The Black Sea Encyclopedia" in 2010. Today the Caspian Sea is known to readers thanks to its oil and gas resources, sturgeon and caviar, significant sea-level variations, socio-economic and political problems. The Caucasus and Central Asia (http://eurodialogue.org/?les/fckeditor_?les/Caspian-s-map2.png) Introduction For more than 250 years the Caspian Sea was shared by two states: Russia (the Soviet Union) and Persia (Iran). After the disintegration of the USSR in 1992, the new independent states of Azerbaijan, Turkmenistan and Kazakhstan have radically changed the political and economic situation in the region. In addition to Russia and Iran, who had determined the situation on the Caspian for a long period, Azerbaijan, Turkmenistan and Kazakhstan are now interested parties, beginning a new stage in the historical development of the Caspian region. This increase in the number of the Caspian legal entities from two to five has given rise to a whole tangle of geopolitical, economic, international legal, ethnic and environmental problems, each of which demands its own approach and settlement mechanism.

Regulatory RNAs in Prokaryotes

Springer Science & Business Media This book provides a comprehensive and up-to-date collection of review articles focusing on RNA-mediated regulation in prokaryotes. The various modes of action include the direct interaction with proteins, direct sensing of metabolites or of physical parameters, and the interaction with RNAs to stimulate or prevent binding of ribosomes or to stimulate degradation. Written by leading experts in the field, the book covers small RNA functions, RNA thermometers, riboswitches, the diversity of small RNA-guided CRISPR-Cas defense systems and selected RNA chaperons in both prokaryotic domains, bacteria and archaea. Recent advances towards the computational identification of regulatory RNAs and their targets are included and particular attention is paid to small RNA in pathogenic bacteria. This volume is the only one exclusively covering regulatory RNAs in the prokaryotic domains to date, making it essential literature for anyone interested in RNA function and gene regulation and a valuable resource for teaching these concepts.

The Aral Sea Encyclopedia

Springer Science & Business Media The "Aral Sea Encyclopedia" is the first one in the new series of encyclopedias about the seas of the former Soviet Union. Preparing it we faced certain difficulties. The thing is that this encyclopedia is a monument to the sea that is disappearing during our lifetime. The world community considers the situation with the Aral Sea and all changes that occurred in its whereabouts in the recent decades as one of the most serious, if not disastrous anthropogenic environmental crises of the 20th century. Before 1960, this was a water-abundant sea-lake that was fourth among world lakes after the Caspian Sea (USSR, Iran), the

Great Lakes (USA, Canada) and Victoria Lake (Africa). This was a real "pearl" among the sands of the largest deserts, the Karakums and the Kyzylkums. Navigation between the sea ports Muinak and Aralsk and fisheries famous for the Aral breams, barbells, sturgeons, shemaya, and others were developed here. One could find beautiful recreational zones and beaches here. The deltas of the Amudarya, the major river of Central Asia, and the Syrdarya bringing their waters into the Aral Sea were famous for their biodiversity, fishery, muskrat rearing, reed production. The local population found occupations related to the water infrastructure.

Diaries of Sir Daniel Gooch, Baronet

Dimensions of Energy in Shostakovich's Symphonies

Ashgate Publishing, Ltd. Shostakovich's music is often described as being dynamic, energetic. But what is meant by 'energy' in music? After setting out a broad conceptual framework for approaching this question, Michael Rofe proposes various potential sources of the perceived energy in Shostakovich's symphonies, describing also the historical significance of energeticist thought in Soviet Russia during the composer's formative years. The book is in two parts. In Part I, examples are drawn from across the symphonies in order to demonstrate energy streams within various musical dimensions. Three broad approaches are adopted: first, the theories of Boleslav Yavorsky are used to consider melodic-harmonic motion; second, Boris Asafiev's work, with its echoes of Ernst Kurth, is used to describe form as a dynamic process; and third, proportional analysis reveals numerous symmetries and golden sections within local and large-scale temporal structures. In Part II, the multi-dimensionality of musical energy is considered through case studies of individual movements from the symphonies. This in turn gives rise to broader contextualised perspectives on Shostakovich's work. The book ends with a detailed examination of why a piece of music might contain golden sections.

Halsted Plays Himself

Semiotext Fred Halsted's *L.A. Plays Itself* (1972) was gay porn's first masterpiece: a sexually explicit, autobiographical, experimental film whose New York screening left even Salvador Dalí repeatedly muttering "new information for me." Halsted, a self-taught filmmaker, shot the film over a period of three years in a now-vanished Los Angeles, a city at once rural and sleazy. Although his cultural notoriety at one point equaled that of Kenneth Anger or Jack Smith, Halsted's star waned in the 1980s with the emergence of a more commercial gay-porn industry. After the death from AIDS of his long-time partner, lover, spouse (and tormentor) Joey Yale in 1986, Halsted committed suicide in 1989. In *Halsted Plays Himself*, acclaimed artist and filmmaker William E. Jones documents his quest to capture the elusive public and private personas of Halsted--to zero in on an identity riddled with contradictions. Jones assembles a narrative of a long-gone gay lifestyle and an extinct Hollywood underground, when independent films were still possible,

and the boundary between experimental and pornographic was not yet established. The book also depicts what sexual liberation looked like at a volatile point in time--and what it looked like when it collapsed.
