The Report: Abu Dhabi 2014

Oxford Business Group Although the emirate's economic growth can be primarily attributed to its vast hydrocarbons resources, it has also made progress diversifying into new sectors such as manufacturing, tourism, aerospace, defence, finance and logistics. In addition to its economic investments, Abu Dhabi has also made major contributions to social welfare as well as infrastructure, which has been identified as the bedrock for future growth. The government has played a key role in the expansion of the security, aerospace and defence industry over the past decade in an effort to strengthen the UAE's defence capabilities and as a means of boosting economic diversification. Despite challenges such as a high level of regional competition, most local defence and aviation firms expect to see continued expansion for years to come. The evidence suggests that the emirate has succeeded in nurturing new economic sectors and is on track to meet its goals. The oil and gas sector accounted for 56.5% of Abu Dhabi's GDP at current prices in 2012, followed by construction (9.6%), manufacturing (5.9%) and real estate (4.4%).

The Report: Abu Dhabi 2015

Oxford Business Group Hydrocarbons revenues still form the bulk of Abu Dhabi's GDP and while falling prices are a concern, the emirate has been moving steadily towards its economic diversification targets in line with Abu Dhabi Economic Vision 2030. The past 10 years has seen the non-oil sector expand strongly on the back of business-friendly government policies, as a result of which non-oil sector growth now outpaces that of the oil sector. Outside of hydrocarbons, construction and manufacturing represent the biggest GDP contributors in the emirate, with the construction sector poised to enter a period of renewed expansion and manufacturing identified as a key area for future growth, leveraging the emirate's natural resources, growing downstream capabilities and strategic location. Elsewhere Abu Dhabi's financial sector continues to assert itself and the expected 2015 launch of Abu Dhabi Global Market, the UAE's second financial free zone, is expected to boost activity in the sector. Meanwhile visitor numbers to Abu Dhabi continue to rise, with around 3.5m arrivals in 2014, up 25% on the previous year. This growth is expected to continue as major infrastructure upgrades continue apace. These include the expansion of Abu Dhabi International Airport and the development of the 1200-km wide Etihad rail project.

International Financial Statistics Yearbook, 2014

International Monetary Fund This chapter presents a report on International Financial Statistics (IFS). The country tables normally include data on a country's exchange rates, IMF position, international liquidity, monetary statistics, interest rates, prices, production, labor, international transactions, government accounts, national accounts, and population. Selected series, including data on Fund accounts, international reserves, and international trade, are drawn from the country tables and published in world tables as well. Exchange rates in IFS are classified into three broad categories, reflecting the role of the authorities in determining the rates and/or the multiplicity of the exchange rates in a country. In IFS, exchange rates are expressed in time series of national currency units per SDR (the

unit of account for the IMF) and national currency units per US dollar, or vice versa. The country tables, euro area tables, and world tables provide measures of effective exchange rates, compiled by the IMF's Research Department, Strategy, Policy, and Review Department, Statistics Department, and area departments.

The Report: Dubai 2014

Oxford Business Group In many respects 2014 marked the transition from strong recovery to promising growth for Dubai. With many exciting projects in the pipeline, not least the hosting of Expo 2020, the emirate is continuing to build on its reputation as a dynamic and international centre for business. Already a regional and global centre for business and finance, Dubai's reputation has been bolstered by the MSCI's decision to upgrade the UAE from frontier to emerging market status in 2014, while the emirate's successful Expo 2020 bid is expected to generate myriad opportunities for private investors across a range of sectors. Construction is thriving once again, driven in large part by strong retail sector growth, with various projects, including plans for the world's largest mall, indicating that the sector will maintain its position as the emirate's biggest GDP contributor moving forward. The transport and logistics framework is set for major expansion in the coming years as well, furthering cementing the emirate's status as a leading transport and logistics hub not just regionally, but globally too. The continued development of Dubai's retail and hospitality offerings, alongside the upgrades to its airports, should help to ensure robust growth in visitor numbers from both the region and further afield.

Nostradamus 2014: Prediction, Modeling and Analysis of Complex Systems

Springer The prediction of behavior of complex systems, analysis and modeling of its structure is a vitally important problem in engineering, economy and generally in science today. Examples of such systems can be seen in the world around us (including our bodies) and of course in almost every scientific discipline including such "exotic" domains as the earth's atmosphere, turbulent fluids, economics (exchange rate and stock markets), population growth, physics (control of plasma), information flow in social networks and its dynamics, chemistry and complex networks. To understand such complex dynamics, which often exhibit strange behavior, and to use it in research or industrial applications, it is paramount to create its models. For this purpose there exists a rich spectrum of methods, from classical such as ARMA models or Box Jenkins method to modern ones like evolutionary computation, neural networks, fuzzy logic, geometry, deterministic chaos amongst others. This proceedings book is a collection of accepted papers of the Nostradamus conference that has been held in Ostrava, Czech Republic in June 2014. This book also includes outstanding keynote lectures by distinguished guest speakers: René Lozi (France), Ponnuthurai Nagarathnam Suganthan (Singapore) and Lars Nolle (Germany). The main aim of the conference was to create a periodical possibility for students, academics and researchers to exchange their ideas and novel research methods. This conference establishes a forum for presentation and discussion of recent research trends in the area of applications of various predictive methods.

Routledge International Handbook of Social Work Education

Routledge The Routledge International Handbook of Social Work Education provides an authoritative overview of current understanding through coverage of key debates, exploring the state of play in particular social work education fields and reflecting on where the future might be taking us. The overall aim of the Handbook is to further develop pedagogic research and scholarship for social work education. Drawing on medical education as an exemplar, the contributors view social work education as a specialism and a field of expertise that counts in the same way as research programmes in more traditional areas of social work practice. The chapters are concerned with the theory and practice of social work education at all levels; they are accessible, conceptually clear, research based where appropriate, critically reflective and ethically underpinned. The Handbook is organised into seven sections that reflect the proposed themes and sub-themes covering: Social work education in context: the western drivers Emerging and re-emerging social work education The scholarship of learning and teaching New insights into field education New directions in learning and teaching Future challenges in social work education This handbook presents a contribution to the process of exchange and dialogue which is essential to global social work education. It brings together professional knowledge and lived experience, both universal and local, and will be an essential reference for social work educators, researchers, students and professionals.

Molecular Mycorrhizal Symbiosis

John Wiley & Sons Recent years have seen extensive research in the molecular underpinnings of symbiotic plant-fungal interactions. Molecular Mycorrhizal Symbiosis is a timely collection of work that will bridge the gap between molecular biology, fungal genomics, and ecology. A more profound understanding of mycorrhizal symbiosis will have broad-ranging impacts on the fields of plant biology, mycology, crop science, and ecology. Molecular Mycorrhizal Symbiosis will open with introductory chapters on the biology, structure and phylogeny of the major types of mycorrhizal symbioses. Chapters then review different molecular mechanisms driving the development and functioning of mycorrhizal systems and molecular analysis of mycorrhizal populations and communities. The book closes with chapters that provide an overall synthesis of field and provide perspectives for future research. Authoritative and timely, Molecular Mycorrhizal Symbiosis, will be an essential reference from those working in plant and fungal biology.

Technical Assistance Report-External Sector Statistics Mission (September 30-October 11, 2010)

International Monetary Fund The contents of this report constitute technical advice provided by the staff of the IMF to the authorities of the Republic of Uzbekistan in response to their request for technical assistance. The main objective of the mission was to assist the Central Bank of the Republic of Uzbekistan in improving the collection, processing, and dissemination of balance of payments, international investment position, and gross external debt statistical data, including improvement of the International Transactions Reporting System, as well as implementation of a medium-term program for further development. After the Republic of Uzbekistan authorities embarked on a course toward greater openness in the country, Uzbekistan made some progress in improving the production and dissemination of statistical data, but in addition to the gains that were seen, the mission noted a number of deficiencies in the External sector statistics compilation system. It is imperative to correct the methodology for calculating operations involving reinvested income for financial corporations and reflect the results obtained in the balance of payments.

International Monetary Fund This paper outlines a consolidated Medium-Term Fiscal Framework (MTFF), which is comprehensive and forward looking, could set a clear direction for fiscal policy for the country as a whole and better align resource allocation with local and national developments plans underpinned by goals embodied in the Vision 2021. High quality of public financial management systems overall is also key ingredient of an appropriate MTFF. The framework could consider explicitly expenditure needs in critical areas such as education and health care. Monitoring of contingent liabilities needs to be strengthened, including covering private and public partnerships (PPPs) and government related enterprises (GREs) including their global subsidiaries. Data sharing across all levels of governments, including the central bank, could also be strengthened. The federal government and the Emirates of Abu Dhabi and Dubai have started using MTFFs to inform their fiscal policy choices, albeit to different degrees.

Incomes are still relatively low compared to other emerging economies. Uzbekistan entered the COVID-19 crisis with relatively strong macro-economic fundamentals.

The Report: Abu Dhabi 2016

Oxford Business Group Subdued oil prices prompted a trimmed federal budget for 2016 as the UAE, like other countries in the region, tightened its belt in response to falling hydrocarbons revenues. However, a sustained focus on economic diversification and targeted investment in Abu Dhabi's key non-oil sectors in recent years means the emirate is well positioned to weather the storm. Looking forward, plans for future development are mapped out in Abu Dhabi Economic Vision 2030, a comprehensive economic policy document that aims to reduce dependence on oil and gas, thereby creating a more sustainable knowledge-based economy for the emirate and its inhabitants. Aided by hydrocarbons reserves that are among the world's largest and substantial financial resources, Abu Dhabi has built up a strong foundation to become a regional leader and an increasingly important global player in a wide variety of sectors, including oil and gas, financial services, health care, aviation and renewable energy.

Innovative risk management strategies in rural and agriculture finance

The Asian experience

Food & Agriculture Org. The regional study collects and analyzes recent innovative risk transfer and sharing strategies used by private or public financial institutions and enterprises leading agricultural investments in Asia. It makes an illustration of the channels through which recent strategies overcome obstacles for the delivery of various financial services to agribusinesses, such as long-term loans, savings, insurance, hedging instruments, and leasing. An explanation of the context in which these strategies seem to work is provided in addition to those constraints that currently limit further outreach to the agribusiness sector, specially to smaller agro-enterprises with growth potential where poorer rural households participate.

Understanding Working Memory

SAGE It is hard to conceive of a classroom activity that does not involve working memory - our ability to work with information. In fact, it would be impossible for students to learn without working memory. From following instructions to reading a sentence, from sounding out an unfamiliar word to calculating a math problem, nearly everything a student does in the classroom requires working with information. Even when a student is asked to do something simple, like take out their science book and open it to page 289, they have to use their working memory. Most children have a working memory that is strong enough to quickly find the book and open to the correct page, but some don't - approximately 10% in any classroom. A student who loses focus and often daydreams may fall in this 10%. A student who isn't living up to their potential may fall in this 10%. A student who may seem unmotivated may fall in this 10%. In the past, many of these students would have languished at the bottom of the class, because their problems seemed insurmountable and a standard remedy like extra tuition didn't solve them. But emerging evidence shows that many of these children can improve their performance by focusing on their working memory. Working memory is a foundational skill in the classroom and when properly supported it can often turn around a struggling student's prospects. This book will make sure you are able to spot problems early, work with children to improve their working memory and ensure they reach their full potential. How does the book work? Each of the following chapters includes a description of the learning difficulty (WHAT), followed by an inside look into the brain of a student with the disorder (WHERE), their unique working memory profile (WHY), and classroom strategies to support working memory (HOW). There are two types of strategies: general working memory strategies that can be applied to all students in your class, and specific working memory strategies for each learning difficulty. The final chapter (Chapter 9) provides the student with tools to empower them along their learning journey. The aim in supporting students with learning difficulties is not just to help them survive in the classroom, but to thrive as well. The strategies in the book can provide scaffolding and support that will unlock their working memory potential to boost learning. They are designed to be easily integrated within the classroom setting as a dimension of an inclusive curriculum and used in developing an individualized education program (IEP) for the student. The strategies recommended here can also complement existing programs that support a core deficit, such as a social skills program for a student with autistic spectrum disorder, or behavior modification for those with ADHD. Each chapter also includes: Try It box: Provides the reader with an opportunity to have a hands-on understanding of the material Science Flash box: Gives the reader a snapshot of current and interesting research related to each chapter Current Debate box: Discusses a controversial issue pertaining to the disorder What's new to this edition?
