Technical Abstract Bulletin

Polo in the United States

A History

McFarland Though polo is commonly associated with Britain and South America, the sport also enjoys a strong following in the United States. This comprehensive history describes the evolution of polo in the U.S., from its beginnings in a New York City riding academy in 1876 to the 2010 Open Championship held in Florida. The principal early players and the first polo clubs are covered, as is American participation in the Olympics, polo at universities and colleges, women's polo, indoor polo, and polo in the military. Additionally, chapters also examine polo in the arts and in literature.

Sports Economics

Cambridge University Press Sports Economics, the most comprehensive textbook in the field by celebrated economist Roger D. Blair, focuses primarily on the business and economics aspects of major professional sports and the NCAA. It employs the basic principles of economics to address issues such as the organization of leagues, pricing, advertising and broadcasting as well as the labor market in sports. Among its novel features is the candid coverage of the image and integrity of players, teams, managers and the leagues themselves, including cases of gambling, cheating, misconduct and steroids. Blair explains how economic decisions are made under conditions of uncertainty using the well-known expected utility model and makes extensive use of present value concepts to analyze investment decisions. Numerous examples are drawn from the daily press. The text offers ample boxes to illustrate sports themes, as well as extensive use of diagrams, tables, problem sets and research questions.

Evolvements of Early American Foot Ball

Through the 1890/91 Season

AuthorHouse This book is a revision/extension to the author's first book. With the recent availability of digitized old newspapers and magazines, much more foot ball data have been found for the 1800s. The games are again divided into three basic forms of foot ball; but now are listed under the actual style names used at the times played. They are the Kicking Game/Association Football (now soccer), Carrying Game/Boston Rules Game/American Rugby Game/ English Rugby Union (now rugby) and the Ball-Control Game/American Collegiate Game/American Rugby Football (now football). Within these

basic forms, the games are listed under colleges, independent clubs and high schools. There is a chapter on leagues/conferences and the appendices contain team histories with the types of foot ball played.

Computational Methods in Nonlinear Structural and Solid Mechanics

Papers Presented at the Symposium on Computational Methods in Nonlinear Structural and Solid Mechanics

Elsevier Computational Methods in Nonlinear Structural and Solid Mechanics covers the proceedings of the Symposium on Computational Methods in Nonlinear Structural and Solid Mechanics. The book covers the development of efficient discretization approaches; advanced numerical methods; improved programming techniques; and applications of these developments to nonlinear analysis of structures and solids. The chapters of the text are organized into 10 parts according to the issue they tackle. The first part deals with nonlinear mathematical theories and formulation aspects, while the second part covers computational strategies for nonlinear programs. Part 3 deals with time integration and numerical solution of nonlinear algebraic equations, while Part 4 discusses material characterization and nonlinear fracture mechanics, and Part 5 tackles nonlinear interaction problems. The sixth part discusses seismic response and nonlinear analysis of concrete structure, and the seventh part tackles nonlinear problems for nuclear reactors. Part 8 covers crash dynamics and impact problems, while Part 9 deals with nonlinear problems of fibrous composites and advanced nonlinear applications. The last part discusses computerized symbolic manipulation and nonlinear analysis software systems. The book will be of great interest to numerical analysts, computer scientists, structural engineers, and other professionals concerned with nonlinear structural and solid mechanics.
