**Parentology Everything You Wanted to Know about the Science of Raising Children but Were Too Exhausted to Ask Simon and Schuster** An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

**Triumph Spitfire and GT6 The Complete Story Crowood** For a whole generation of car enthusiasts, Triumph was the manufacturer to turn to when buying a sports car. Whether it was a Spitfire or GT6 - or the more costly TR models - this Coventry manufacturer was the sports car king during the twentieth century. Now that these machines are fully fledged classics, nothing has changed. While the Spitfire has the MGB as a formidable adversary, the GT6 is still in a class of its own. *Triumph Spitfire and GT6* details the history and development of these classic cars, with specification guides for each of the five Spitfire derivatives and three GT6 models. Topics covered include the development and production of the five Spitfire derivatives from 1962 - 1980, the Spitfire 4, 4 Mk2, Mk3, MkIV and 1500; the GT6 models from 1966-1973, the Mk1, Mk2 and Mk3; the Spitfire and GT6 in motorsport - 24 Hours Le Mans, Alpine Rally and Tour de France, and racing in the US; full buying guide and tips on modifying, with colour and trim options, and details of optional extras available for each model. Also includes an insight into what the press thought of each Spitfire and GT6 derivative, with pages devoted to how the cars were marketed. Superbly illustrated with 291 colour photographs.

**The Motor Motor Cycling and Motoring AB Bookman's Weekly For the Specialist Book World Triumph Spitfire and GT6 Setting the Small Sports Car Standard** With more than 300, 000 built, the Triumph Spitfire is the bestselling Triumph sports car model ever produced. As the values of these cars have risen significantly in recent years, interest in these affordable sports cars has also increased. This concise but comprehensive book is therefore the ideal guide for those who want to read about the history and development of these iconic sports cars. Introduced at the London Motor Show in 1962, the Triumph Spitfire was designed to compete in the small sports car market against models such as the Austin-Healey Sprite. Based on an adapted Triumph Herald chassis, the Triumph Spitfire's swooping lines were designed by Italian designer Giovanni Michelotti. In this highly readable book, John Nikas describes all the technical and design developments that took the Triumph Spitfire through five separate models, from the Triumph Spitfire 4 (Mark 1) to the Triumph Spitfire 1500. The book also covers the competition models.

**PC World Radio-electronics Mastering Purchasing Management for Inbound Supply Chains CRC Press** Importing finished products, components, and raw materials has become the status quo in today's increasingly competitive business landscape. The lessons of inbound supply, however, can be very costly if learned through a trial-and-error approach—especially foreign purchasing. By not understanding the parameters of landed costs alone, purchasing managers can cause serious and expensive disruptions to their supply chain. Leaving little to chance, *Mastering Purchasing Management for Inbound Supply Chains* details the fundamentals regarding logistics and compliance. It emphasizes the importance of bonded warehouses and cost modeling and presents case studies from a wide range of industries that illustrate best practices in imports, logistics, and landed cost modeling. International trade expert Thomas Cook provides valuable insights for avoiding common foreign trade zone pitfalls. He also explains the best ways to handle and minimize landed costs, including duties, shipping costs, and transfer pricing. This comprehensive purchasing guide covers the

potential risks and complications involved with U.S. Customs (CBP), freight, INCO terms, and title and payment issues. Complete with a multitude of references to additional information in print and on the Web, the text provides the well-rounded understanding needed to avoid costly mistakes and make purchasing one of the strongest links in your global supply chain. **Frontiers of Assembly and Manufacturing Selected papers from ISAM'09' Springer Science & Business Media** The technologies for product assembly and manufacturing evolve along with the advancement of enabling technologies such as material science, robotics, machine intelligence as well as information and communication. Furthermore, they may be subject to fundamental changes due to the shift in key product features and/or - gineering requirements. The enabling technologies emerging offer new opportunities for moving up the level of automation, optimization and reliability in product assembly and ma- facturing beyond what have been possible. We see assembly and manufacturing becoming more Intelligent with the perception-driven robotic autonomy, more flexible with the human-robot coupled collaboration in work cells, and more in- grated in scale and complexity under the distributed and networked frameworks. On the other hand, the shift in key product features and engineering requirements dictates the new technologies and tools for assembly and manufacturing to be - veloped. This may be exemplified by a high complexity of micro/nano system products integrated and packaged in 3D with various heterogeneous parts, com- nents, and interconnections, including electrical, optical, mechanical as well as fluidic means. **The Autocar A Journal Published in the Interests of the Mechanically Propelled Road Carriage Ulrich's International Periodicals Directory** Contains essential bibliographic and access information on serials published throughout the world. **SPSS Manual For Introduction to the Practice of Statistics 4e Macmillan Evoking a Sense of Place Long Island Studies Heart of the Lakes Pub Weedopedia An A to Z Guide to All Things Marijuana Simon and Schuster** Discover everything you've ever wanted to know about marijuana all in one place with this authoritative A-to-Z guide to cannabis! This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in Millionaire by Thirty, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future. **Ollie the Stomper Houghton Mifflin Harcourt** Fans of the Gossie & Friends books will enjoy little Ollie and his big personality as he finds his way in the barnyard.
