Capitalist Nigger

The Road To Success – A Spider Web Doctrine

Jonathan Ball Publishers Capitalist Nigger is an explosive and jarring indictment of the black race. The book asserts that the Negroid race, as naturally endowed as any other, is culpably a non-productive race, a consumer race that depends on other communities for its culture, its language, its feeding and its clothing. Despite enormous natural resources, blacks are economic slaves because they lack the 'devil-may-care' attitude and the 'killer instinct' of the Caucasian, as well as the spider web mentality of the Asian. A Capitalist Nigger must embody ruthlessness in pursuit of excellence in his drive towards achieving the goal of becoming an economic warrior. In putting forward the idea of the Capitalist Nigger, Chika Onyeani charts a road to success whereby black economic warriors employ the 'Spider Web Doctrine' – discipline, self-reliance, ruthlessness – to escape from their victim mentality. Born in Nigeria, Chika Onyeani is a journalist, editor and former diplomat.

Integral Innovation

New Worldviews

Taylor & Francis Technology plays a critical role in transforming societies and economies through enhancing efficiency, connectivity and access to resources and services. The challenge remains how to harness technologies to achieve sustainable development without causing harm to human and natural capitals. Professor Odeh Rashed Al-Jayyousi argues that science, technology and innovation (STI) are underpinned by social choices and, hence, a transition to a sustainable green economy is defined by individuals' and institutions' decisions on how to use and apply these STI developments. It is, therefore, important to examine closely the ways in which social institutions and processes in the "integral worlds" (the different perspectives of reality) shape the priorities of technologies and the conditions under which their potential benefits can be reaped. He states that in order for technological innovation to provide a guarantee of sustainable economic development, it is necessary that a transfer of technology to developing countries becomes a basic principle of national development policies, and that they, in turn, are open to adopting an explicit long-term application of technological innovation. Integral Innovation: New Worldviews presents a conceptual framework for the evolution of technology and innovation from a historical and cultural perspective. It provides an analysis of the role of innovation and technology in sustainable development and introduces a number of international case studies, which shed light on the social learning processes for knowledge co-creation and innovation culture. It is essential reading for those interested in innovation and technology management.

Handbook of Communication in the Legal Sphere

Walter de Gruyter GmbH & Co KG This volume explores communication and its implications on interpretation, vagueness, multilingualism, and multiculturalism. It investigates cross-cultural perspectives with original methods, models, and arguments emphasizing national, EU, and international perspectives. Both traditional fields of investigations along with an emerging new field (Legal Visual Studies) are discussed. Communication addresses the necessity of an ongoing interaction between jurilinguists and legal professionals. This interaction requires persuasive, convincing, and acceptable reasons in justifying transparency, visual analyses, and dialogue with the relevant audience. The book is divided into five complementary sections: Professional Legal Communication; Legal Language in a Multilingual and Multicultural Context; Legal Communication in the Courtroom; Laws on Language

and Language Rights; and Visualizing Legal Communication. The book shows the diversity in the understanding and practicing of legal communication and paves the way to an interdisciplinary and cross-cultural operation in our common understanding of legal communication. This book is suitable for advanced students in Linguistics and Law, and for academics and researchers working in the field of Language and Law and jurilinguists.

The Fascinating King's Gambit

Trafford on Demand Pub The Fascinating King's Gambit by Thomas Johansson This work is probably the first book devoted to investigating the entire Bishop's Gambit. But that is not all! A complete in depth repertoire against black's different ways of declining white's pawn offer is also provided. A great service for those who may want to take up this opening with the white pieces! The author laboured with the analytical work for nearly two years, aiming to create one of the best theoretical guides to the King's Gambit ever written. - But if he fulfilled this ambition can of course, only be determined by the reader! What can not be denied is that Johansson shares a multitude of theoretical novelties and insights with his readers. Basically offering them access to an almost unexplored world which until now has been reserved for a relatively small crowd of strong King's Gambiteers. From the author of The King's Gambit for the Creative Aggressor! Instead of going on and on about the content of this book, let me just quote a very famous King's Gambiteer, grandmaster David Bronstein. 'You want to play the King's Gambit? Well, Black can draw after 3.Nf3. Play 3.Bc4 if you want to win!' Visit the author's website at: http://hem.passagen.se/tjmisha/countdown.html

Islam and Sustainable Development

New Worldviews

Gower Publishing, Ltd. In Islam and Sustainable Development, Odeh Al-Jayyousi addresses the social, human and economic dimensions of sustainability from an Islamic perspective. Islam is sometimes viewed as a challenge, threat and risk to the West, but here we are reminded that the celebration of cultural diversity is a key component in Islamic values. Promoting common understanding between East and West, this American-educated, Middle Eastern-based author offers something broader and deeper than conventional Western ways of thinking about sustainability and presents new insights inspired by Islamic worldviews. Drawing on his roles as both academic researcher and senior development practitioner, Professor Al-Jayyousi applies his deep understanding of Islamic values to contemporary environmental, financial and social conflicts and crises and defines a framework for sustainability embracing local, regional and global perspectives. He also addresses how education might produce innovation, knowledge creation and development to support a new paradigm for sustainability that re-defines what constitutes good life, beyond consumerism and the production of waste. This book will interest policy makers, development and donor communities, funding agencies and banks in the Islamic World and beyond, as well as those with a professional interest in planning and in environmental and conservation issues. Scholars of Islamic and Middle Eastern studies and more broadly, those with an academic interest in cultural and religious studies, will find that this book in Gower's Transformation and Innovation Series is perhaps the most substantial work yet on sustainable development from an Islamic perspective.

Heart-life in Song

The Neighbor

Three Inquiries in Political Theology

University of Chicago Press In Civilization and Its Discontents, Freud made abundantly clear what he thought about the biblical injunction, first articulated in Leviticus 19:18 and then elaborated in Christian teachings, to love one's neighbor as oneself. "Let us adopt a naive attitude towards it," he proposed, "as though we were hearing it for the first time; we shall be unable then to suppress a feeling of surprise and bewilderment." After the horrors of World War II, the Holocaust, Stalinism, and Yugoslavia, Leviticus 19:18 seems even less conceivable—but all the more urgent now—than Freud imagined. In The Neighbor, three of the most significant intellectuals working in psychoanalysis and critical theory collaborate to show how this problem of neighbor-love opens questions that are fundamental to ethical inquiry and that suggest a new theological configuration of political theory. Their three extended essays explore today's central historical problem: the persistence of the theological in the political. In "Towards a Political Theology of the Neighbor," Kenneth Reinhard supplements Carl Schmitt's political theology of the enemy and friend with a political theology of the neighbor based in psychoanalysis. In "Miracles Happen," Eric L. Santner extends the book's exploration of neighbor-love through a bracing reassessment of Benjamin and Rosenzweig. And in an impassioned plea for ethical violence, Slavoj Žižek's "Neighbors and Other Monsters" reconsiders the idea of excess to rehabilitate a positive sense of the inhuman and challenge the influence of Levinas on contemporary ethical thought. A rich and suggestive account of the interplay between love and hate, self and other, personal and political, The Neighbor will prove to be a touchstone across the humanities and a crucial text for understanding the persistence of political theology in secular modernity.

Learning Strategies

Routledge Originally published in 1986, designed for teachers and those concerned with the education of primary and secondary school pupils, Learning Strategies presented a new approach to 'learning to learn'. Its aim was to encourage teachers to start thinking about different approaches to harnessing the potential of young learners. It was also relevant to

adult learners, and to those who teach them. Thus, although about learning, the book is also very much about teaching. Learning Strategies presents a critical view of the study skills courses offered in schools at the time, and assesses in non-technical language what contributions could be made to the learning debate by recent developments in cognitive psychology. The traditional curriculum concentrated on 'information' and developing skills in reading, writing, mathematics and specialist subjects, while the more general strategies of how to learn, to solve problems, and to select appropriate methods of working, were too often neglected. Learning to learn involves strategies like planning ahead, monitoring one's performance, checking and self-testing. Strategies like these are taught in schools, but children do not learn to apply them beyond specific applications in narrowly defined tasks. The book examines the broader notion of learning strategies, and the means by which we can control and regulate our use of skills in learning. It also shows how these ideas can be translated into classroom practice. The final chapter reviews the place of learning strategies in the curriculum.

Lacan on Love

An Exploration of Lacan's Seminar VIII, Transference

John Wiley & Sons Quintessentially fascinating, love intrigues and perplexes us, and drives much of what we do in life. As wary as we may be of its illusions and disappointments, many of us fall blindly into its traps and become ensnared time and again. Deliriously mad excitement turns to disenchantment, if not deadening repetition, and we wonder how we shall ever break out of this vicious cycle. Can psychoanalysis – with ample assistance from philosophers, poets, novelists, and songwriters – give us a new perspective on the wellsprings and course of love? Can it help us fathom how and why we are often looking for love in all the wrong places, and are fundamentally confused about "what love really is"? In this lively and wide-ranging exploration of love throughout the ages, Fink argues that it can. Taking within his compass a vast array of traditions – from Antiquity to the courtly love poets, Christian love, and Romanticism – and providing an in-depth examination of Freud and Lacan on love and libido, Fink unpacks Lacan's paradoxical claim that "love is giving what you don't have." He shows how the emptiness or lack we feel within ourselves gets covered over or entwined in love, and how it is possible and indeed vital to give something to another that we feel we ourselves don't have. This first-ever commentary on Lacan's Seminar VIII, Transference, provides readers with a clear and systematic introduction to Lacan's views on love. It will be of great value to students and scholars of psychology and of the humanities generally, and to analysts of all persuasions.

The Language of Politics

Springer Science & Business Media This study is the second of two I have done concerning how language is used to persuade others to believe things and to do things. The first, published by Aca demic Press, was The Language of Television Advertising, and was concerned with how advertisers use language in their efforts to sell products and services and how consumers could be expected to understand it. In this study, the focus is on how politicians use language to win elections and get others to accept their policies and programs and on how journalists report the suasive efforts of politicans. I combine an interest in the language of political reporting with an interest in the language of politics for a number of reasons. First, much of the suasive rhetoric of politicians is filtered through the minds of political journalists before it reaches the citizenry, and we can be reasonably sure that this rhetoric does not come out the way it went in. Second, the press plays a significant role in deter mining the nation's political agenda through its choices of what issues will be presented to the public, how these issues will be presented, and which voices will be heard speaking out on these issues. Third, political reporting can be suasive in effect, if not in intent, and it will be useful, I think, to understand how this is so.

Collision Course

Endless Growth on a Finite Planet

MIT Press The story behind the reckless promotion of economic growth despite its disastrous consequences for life on the planet. The notion of ever-expanding economic growth has been promoted so relentlessly that "growth" is now entrenched as the natural objective of collective human effort. The public has been convinced that growth is the natural solution to virtually all social problems—poverty, debt, unemployment, and even the environmental degradation caused by the determined pursuit of growth. Meanwhile, warnings by scientists that we live on a finite planet that cannot sustain infinite economic expansion are ignored or even scorned. In Collision Course, Kerryn Higgs examines how society's commitment to growth has marginalized scientific findings on the limits of growth, casting them as bogus predictions of imminent doom. Higgs tells how in 1972, The Limits to Growth—written by MIT researchers Donella Meadows, Dennis Meadows, Jorgen Randers, and William Behrens III—found that unimpeded economic growth was likely to collide with the realities of a finite planet within a century. Although the book's arguments received positive responses initially, before long the dominant narrative of growth as panacea took over. Higgs explores the resistance to ideas about limits, tracing the propagandizing of "free enterprise," the elevation of growth as the central objective of policy makers, the celebration of "the magic of the market," and the ever-widening influence of corporate-funded think tanks—a parallel academic universe dedicated to the dissemination of neoliberal principles and to the denial of health and environmental dangers from the effects of tobacco to global warming. More than forty years after The Limits to Growth, the idea that growth is essential continues to hold sway, despite the mounting evidence of its costs—climate destabilization, pollution, intensification of gross global inequalities, and depletion of the resources on which the modern economic edifice depends.

Integral Ubuntu Leadership

Routledge The four worlds as we know them today, the North, West, South and East, are out of balance. The West and the North generally dominate on a global scale while the South and the East lag behind. This also happens at individual, societal and organisational levels. It is clear that there is a need to change the way we lead our organisations in business and the way we think about leading in politics. Here is a comprehensive exploration of the Integral Leadership challenges of the twenty-first century. The author combines the African philosophy of Ubuntu or humanness, the cornerstone of African thought and life, with the concept of Integral Leadership, with particular reference to Lessem and Schieffer's combining, in their 2010 book Integral Research and Innovation, of nature and community, culture and spirituality, science and technology, and politics and economies. This connectedness in the new paradigm of wholeness and relatedness goes beyond the relationships of human beings alone and involves experiences with nature and community. Leadership is viewed from an indigenous and exogenous perspective, bringing together a newly Integral approach, which will also introduce industry ecology and knowledge ecology as an evolution of the Ubuntu philosophy. The author offers a unique forum through which to commit to paper the operationalisation of the Integral Ubuntu Leadership model in catalysing development efforts and in CARE-ing for communities and societies.

Heidegger and the Will

On the Way to Gelassenheit

Northwestern University Press The problem of the will has long been viewed as central to Heidegger's later thought. Focusing on this problem, this book aims to clarify key issues from the philosopher's later period, and demonstrates how his so-called "turn" is not a simple "turnaround" from voluntarism to passivism.

Routledge Handbook of Research Methods in Military Studies

Routledge This volume offers an overview of the methodologies of research in the field of military studies. As an institution relying on individuals and resources provided by society, the military has been studied by scholars from a wide range of disciplines: political science, sociology, history, psychology, anthropology, economics and administrative studies. The methodological approaches in these disciplines vary from computational modelling of conflicts and surveys of military performance, to the qualitative study of military stories from the battlefield and veterans experiences. Rapidly developing technological facilities (more powerful hardware, more sophisticated software, digitalization of documents and pictures) render the methodologies in use more dynamic than ever. The Routledge Handbook of Research Methods in Military Studies offers a comprehensive and dynamic overview of these developments as they emerge in the many approaches to military studies. The chapters in this Handbook are divided over four parts: starting research, qualitative methods, quantitative methods, and finalizing a study, and every chapter starts with the description of a well-published study illustrating the methodological issues that will be dealt with in that particular chapter. Hence, this Handbook not only provides methodological know-how, but also offers a useful overview of military studies from a variety of research perspectives. This Handbook will be of much interest to students of military studies, security and war studies, civil-military relations, military sociology, political science and research methods in general.

Ethics in Higher Education

Higher education serves many purposes, one of which is to prepare college and university students with the knowledge, skills and dispositions necessary for employment. Some would argue that this is the primary and even sole purpose of collegiate education. However, many also contend that university education is intended to broaden students' minds and enable them to question, investigate and think critically in order to be productive and engaged citizens. Regardless of the lens through which higher education is viewed, within any of these purposes is the need for ethical practices in teaching, learning, student engagement, and overall operational structures. Truly, in every facet of university life, ethical practices exist. If institutions of higher education are the places where, in part, the global future is shaped, then it is imperative that these same organizations be the exemplars of

ethical practices.The Practice of Ethics in Higher Education includes chapters that explore and examine topics such as teaching of ethics, ethical practices on campus, ethics of clinical practices, ethics and leadership in the academy, ethics in hiring practices at colleges/universities, ethics and campus-sponsored research, as well as other topics relevant to higher education. In addition to drawing attention to the successes and challenges regarding ethical practices in higher education, this book aims to encourage future research initiatives and collaborations.

Captain America and the Nationalist Superhero

Metaphors, Narratives, and Geopolitics

Temple University Press Nationalist superheroes—such as Captain America, Captain Canuck, and Union Jack—often signify the "nation-state" for readers, but how do these characters and comic books address issues of multiculturalism and geopolitical order? In his engaging book Captain America and the Nationalist Superhero, geographer Jason Dittmer traces the evolution of the comic book genre as it adapted to new national audiences. He argues that these iconic superheroes contribute to our contemporary understandings of national identity, the righteous use of power, and the role of the United States, Canada, and Britain in the world. Tracing the nationalist superhero genre from its World War II origins to contemporary manifestations throughout the world, Captain America and the Nationalist Superhero analyzes nearly one thousand comic books and audience responses to those books. Dittmer also interviews key comic book writers from Stan Lee and J. M. DeMatteis to Steve Englehart and Paul Cornell. At a time when popular culture is saturated with superheroes and their exploits, Captain America and the Nationalist Superhero highlights the unique relationship between popular culture and international relations.
