### **OUR COMMON AGENDA - REPORT OF THE SECRETARY-GENERAL**

---

[United Nations](#) On the seventy-fifth anniversary of the United Nations, the world has faced its biggest shared test since the Second World War in the coronavirus disease (COVID-19) pandemic. Yet while our welfare, and indeed the permanence of human life, depend on us working together, international cooperation has never been harder to achieve. This report answers a call from UN Member States to provide recommendations to advance our common agenda and to respond to current and future challenges. Its proposals are grounded in a renewal of the social contract, adapted to the challenges of this century, taking into account younger and future generations, complemented by a new global deal to better protect the global commons and deliver global public goods. Through a deepening of solidarity—at the national level, between generations, and in the multilateral system—Our Common Agenda provides a path forward to a greener, safer and better future.

### **UNDERSTANDING ASYLUM, HUMAN RIGHTS AND REFUGEE LAW**

---

[Routledge](#) While the 21st century bears witness to several conflicts leading to mass displacement, the conflict in Syria has crystallised the need for a solid legal framework and legal certainty. This book analyses the relevant legal instruments for the provision of a protection status for persons fleeing to Europe from conflict and violence. It focuses on the conceptualisation of conflict and violence in the countries of origin and the different approaches taken in the interpretation of them in the 1951 Refugee Convention, the Recast

Qualification Directive of the European Union and the European Convention on Human Rights. It traces the hierarchical order of protection granted, starting with refugee protection status, to subsidiary protection status and finally with the negative protection from non-refoulement. Recent case law and asylum status determination practices of European countries illustrate the obstacles in the interpretation as well as the divergence in the application of the legal instruments. The book fills an important gap in examining the current practices of key actors, including the United Nations High Commissioner for Refugees and European states, tracing changes in national and international policies and revealing discrepancies towards contemporary approaches to conflicts. It refines the interaction and cross-fertilisation of the different relevant fields of European asylum law, human rights law and the laws of armed conflict in order to further the development of a harmonised protection regime for conflict-induced displacement.

## **THE CRIME OF DESTRUCTION AND THE LAW OF GENOCIDE**

---

### **THEIR IMPACT ON COLLECTIVE MEMORY**

---

Routledge This highly original work provides a thought-provoking and valuable resource for researchers and academics with an interest in genocide, criminology, international organizations, and law and society. In her book, Caroline Fournet examines the law relating to genocide and explores the apparent failure of society to provide an adequate response to incidences of mass atrocity. The work casts a legal perspective on this social phenomenon to show that genocide fails to be appropriately remembered due to inherent defects in the law of genocide itself. The book thus connects the social response to the legal theory and practice, and trials in particular. Fournet's study illustrates the shortcomings of the Genocide Convention as a means of preventing and punishing genocide as well as its consequent failure to ensure the memory of this heinous crime.

### **PIONEER ON THE ENVIRONMENTAL IMPACT OF WAR**

---

Springer Science & Business Media Since the 1960s the environment has become an issue of increasing public concern in North America and elsewhere. Triggered by the Second Indochina War (Vietnam Conflict) of 1961-1975, and further encouraged by the International Conference on the Human Environment, held in Stockholm in 1972, the environmental impact of war emerged and grew as a topic of research in the natural and the social sciences. And in the late 1980s this led additionally to a focus and debate on environmental security. Arthur Westing, a forest ecologist, was a major pioneer contributing and framing both of those debates conceptually, theoretically, and empirically, starting with *Harvest of Death: Chemical Warfare in Vietnam and Cambodia* (1972) (co-authored with wildlife biologist E.W. Pfeiffer and others). As a Senior Researcher at the Stockholm and Oslo International Peace Research Institutes (SIPRI and PRIO), and as a Professor of Ecology at Windham and Hampshire Colleges, Westing authored and edited books on *Ecological Consequences of the Second Indochina War* (1976), *Weapons of Mass Destruction and the Environment* (1977), *Warfare in a Fragile World: Military Impact on the Human Environment* (1980), *Herbicides in War: the Long-term Ecological and Human Consequences* (1984), *Environmental Warfare: a Technical, Legal and Policy Appraisal* (1984), *Explosive Remnants of War: Mitigating the Environmental Effects* (1985), *Global Resources and International Conflict: Environmental Factors in Strategic Policy and Action* (1986), *Cultural Norms, War and the Environment* (1988), *Comprehensive Security for the Baltic: an Environmental Approach* (1989), and *Environmental Hazards of War: Releasing Dangerous Forces in an Industrialized World* (1990) --- as well as authoring numerous UN reports, book chapters, and journal articles. This volume combines six of his pioneering contributions on the environmental consequences of warfare in Viet Nam and in Kuwait, on the environmental impact of nuclear war, and on legal constraints and military guidelines for protecting the environment in wartime

### A CULTURAL INTERPRETATION OF THE GENOCIDE CONVENTION

---

---

Routledge This book critiques the dominant physical and biological interpretation of the Genocide Convention and argues that the idea of "culture" is central to properly understanding the crime of genocide. Using Raphael Lemkin's personal papers, archival materials from the State Department and the UN, as well as the mid-century secondary literature, it situates the convention in the longstanding debate between Enlightenment notions of universality and individualism, and Romantic notions of particularism and holism. The author conducts a thorough review of the treaty and its preparatory work to show that the drafters brought strong culturalist ideas to the debate and that Lemkin's ideas were held widely in the immediate postwar period. Reconstructing the mid-century conversation on genocide and situating it in the much broader mid-century discourse on justice and society he demonstrates that culture is not a distraction to be read out of the Genocide Convention; it is the very reason it exists. This volume poses a forceful challenge to the materialist interpretation and calls into question decades of international case law. It will be of interest to scholars of genocide, human rights, international law, the history of international law and human rights, and treaty interpretation.

#### DAISAKU IKEDA'S PROPOSALS TO THE UN

---

---

Bloomsbury Publishing Every year since 1983 the Buddhist leader and thinker, Daisaku Ikeda, has issued a peace proposal that presents solutions to a variety of global problems. While the proposals themselves are both wide-ranging and specific (covering topics as diverse as counter-terrorism relations; the prohibition of child soldiers; denuclearization of the Arctic; and strategies to prevent global warming), the common denominator at their center is the role and effectiveness of the United Nations in addressing structural challenges and inequality. This substantial volume brings together, for the first time in one place, excerpts from the most topical and important of Ikeda's peace proposals. Themes like human security, the empowerment of women, nuclear disarmament and the centrality of dialogue are throughout informed by an unshakeable belief in the potential and promise of the UN's world mission, as well as by Ikeda's own experience of the cruelty of war and his articulation of Buddhism as a practical route to peace. The book makes a timely and vital contribution to ethics, peace studies and international relations.

### BASIC LEGAL DOCUMENTS

---

Eleven International Publishing This work offers a general & systematic collection of basic legal documents that will be a required tool for researchers & practitioners. Its looseleaf format ensures that it will remain up to date. Volume One, Part A contains principal legal instruments--the so-called 'classical instruments'--elaborated within the United Nations, & also includes a chapter on all space law disputes which have arisen up to the present. Part B deals with current problems. Volume Two, Part A deals with international organizations, Part B with international projects (short technical introductions precede the information about the present legal status in each case), & Part C deals with national legislation specifically concerning outer space issues. Each treaty & convention is followed by the status of each instrument, & each subchapter by a list of related basic legal literature. Space Law: Basic Legal Documents is regularly updated.

### GENOCIDE

---

Oxford University Press, USA Judge Mettraux's four-volume compendium, *International Crimes: Law and Practice*, will provide the most detailed and authoritative account to-date of the law of international crimes. It is a scholarly tour de force providing a unique blend of academic rigour and an insight into the practice of international criminal law. The compendium is un-rivalled in its breadth and depth, covering almost a century of legal practice, dozens of jurisdictions (national and international), thousands of decisions and judgments and hundreds of cases. This first volume discusses in detail the law of genocide: its definition, elements, normative status, and relationship to the other core international crimes. While the book is an invaluable tool for academics and researchers, it is particularly suited to legal practitioners, guiding the reader through the practical and evidential challenges associated with the prosecution of international crimes.

---

[Springer](#) The book describes the recent trends in space policy and the space sector overall. While maintaining a global scope with a European perspective, it links space policy with other policy areas, highlights major events, and provides insights on the latest data. The Yearbook includes the proceedings of ESPI's 12th Autumn Conference, which discussed the growing importance of Security in Outer Space and the stakes for civilian space programmes in the public and private sectors. Bringing together satellite operators, SMEs, European and American institutions, and think tanks, the Autumn Conference served as platform for fresh insights on security in outer space and the potential of transatlantic relations to address its challenges. The Yearbook also includes executive summaries of ESPI's work in 2017 as well as ESPI's 2017 Executive Briefs, covering topics such as suborbital spaceflight, super heavy lift launch vehicles, collaboration with China, and the delimitation of outer space. All in all, the book gives a detailed review of space policy developments worldwide, contextualised with information about national-level space industries and activity and broader political and economic conditions. The readership is expected to include the staff of space agencies, the space industry, and the space law and policy research community.

**ROUTLEDGE HANDBOOK OF SPACE LAW**

---

[Taylor & Francis](#) This handbook is a reference work providing a comprehensive, objective and comparative overview of Space Law. The global space economy reached \$330 billion in 2015, with a growth rate of 9 per cent vis-à-vis the previous year. Consequently, Space Law is changing and expanding expeditiously, especially at the national level. More laws and regulations are being adopted by space-faring nations, while more countries are adapting their Space Laws and regulations related to activities in outer space. More regulatory bodies are being created, while more regulatory diversity (from public law to private law) is being instituted as increasing and innovative activities are undertaken by private entities which employ new technologies and business initiatives. At the international level, Space Law (both hard law and soft law) is expanding in certain areas, especially in satellite broadcasting and telecommunications. The Routledge Handbook of Space Law summarises the existing state of knowledge on a comprehensive range of topics and aspires to set the future international research agenda by indicating gaps and inconsistencies in the existing law and highlighting emerging legal issues. Unlike other books on the subject, it addresses major international and national legal aspects of particular space activities and issues, rather than providing commentary on or explanations about a particular Space Law treaty or national regulation. Drawing together contributions from leading academic scholars and practicing lawyers from around the world, the volume is divided into five key parts: • Part I: General Principles of International Space Law • Part II: International Law of Space Applications • Part III: National Regulation of Space Activities • Part IV: National Regulation of Navigational Satellite Systems • Part V: Commercial Aspects of Space Law This handbook is both practical and theoretical in scope, and may serve as a reference tool to academics, professionals and policy-makers with an interest in Space Law.

**ETHICS, OBLIGATION, AND THE RESPONSIBILITY TO PROTECT**

---

---

**CONTESTING THE GLOBAL POWER RELATIONS OF ACCOUNTABILITY**

---

[Routledge](#) This book critically examines arguments about 'obligation' and 'responsibility' in relation to the responsibility to protect (R2P) and situates it within wider moral argumentation concerning the role of culpability, answerability, and human rights in international affairs. It discusses the ways in which R2P has been imagined and contested in order to illuminate some possible trajectories through which its potential might be actualized. Crucial to the development of a more 'responsible' world politics will be the recognition that formal inter-state 'regimes' of responsibility will need to be embedded within wider social 'fields' of responsibility constituted by the participation of attentive and mobilized global citizens ready to hold elites accountable. This book provides novel ideas to better understand the role of rhetoric and moral argumentation in international relations. Much of the novel contribution comes in the form of its conceptual breakdown of the ambiguous concept of 'responsibility,' which often clouds clear understanding not only in international relations, but also in the specific debates over the ethics and practice of the international responsibility to protect regime. This book will be of much interest to students of the responsibility to protect, human rights, global governance, and international relations in general.

**HALF A CENTURY OF DEBATE**

---

[Springer Science & Business Media](#) What were all those diplomats and bureaucrats from all over the world doing at the United Nations over the past half century when they were not debating how to prevent countries from tearing at each other or how to feed and shelter victims of natural or man-made disasters around the globe? A lot in fact, at least in terms of time spent and the sweep of issues debated. A major category of them were discussing a whole range of economic questions since the inception of the organization, while a slightly different category, with some members only changing hats, were talking about social issues. Apart from operational activities, such as technical assistance to developing countries, and except for the well-publicized attempts at activism at as those on the environment or the status of international conferences such women, little is known outside the United Nations about the work of the organization in economic and social fields. Which is a pity. After all, the organization has often been given the dubious distinction of being the biggest talk show on earth. It is certainly pertinent to ask what it has been talking about over the last fifty-odd years.

**MILITARY ASSISTANCE ON REQUEST AND THE USE OF FORCE**

---

Oxford University Press In countries such as Syria, Iraq, South Sudan, and Yemen, internationally recognized governments embroiled in protracted armed conflicts, and with very little control over their territory, have requested direct military assistance from other states. These requests are often accepted by the other states, despite the circumvention of the United Nations Security Council and extensive violation of international humanitarian law and human rights. In this book, Erika De Wet examines the authority entitled to extend a request for (or consent to) direct military assistance, as well as the type of situations during which such assistance may be requested, notably whether it may be requested during a civil war. Ultimately, De Wet addresses the question of if and to what extent the proliferation of military assistance on the request of a recognized government is changing the rules in international law applying to the use of force.
