MIND EXPANDING: TEACHING FOR THINKING AND CREATIVITY IN PRIMARY EDUCATION

TEACHING FOR THINKING AND CREATIVITY IN PRIMARY EDUCATION

McGraw-Hill Education (UK) There is considerable interest in education around the world in flexible thinking and learning skills but very little consensus as to the nature of these skills and how best to promote them in schools. This book puts forward a clear and practical framework for understanding thinking, creativity and learning to learn as the fruits of engagement in dialogue. It also outlines in detail how this framework can be applied to teaching across the curriculum at both primary and secondary level, drawing on the best practices associated with the teaching thinking; creativity; and learning to learn movements explaining their success in terms of dialogic theory. In particular the book incorporates aspects of a number of thinking skills approaches, such as Lipman's Philosophy for Children approach, as well as features of contemporary innovations in education such as assessment for learning and the development of creativity. Each chapter opens with a vignette to set the scene and continue into a light and popularly written exposition of theory, before moving on to a description of practice and concluding with practical guidelines for how to teach for thinking and creativity in schools and classrooms. The first six chapters in the book have more of a focus on

developing core theoretical themes and the following six chapters in the second half of the book focus more on practice-led themes. The relationship between theory and practice is treated as flexible and dynamic, theory being developed by practice as much as practice implementing theory.

PREK-12 ENGLISH LANGUAGE PROFICIENCY STANDARDS

Teachers of English to **The revised PreK-12 English Language Proficiency Standards** build on the World-Class Instructional Design and Assessments (WIDA) Consortium's English Language Proficiency Standards for English Language Learners in Kindergarten through Grade 12 (Wisconsin, 2004). The WIDA Consortium is a group of ten states, formed in 2002

with federal monies, that has developed comprehensive English language proficiency standards. This volume also uses grade-level clusters that reflect current educational configurations in the United States. Each of the five language proficiency standards is divided into the four language domains of listening, speaking, reading and writing. The five levels of language proficiency reflect characteristics of language performance at each developmental stage and include: starting (L1), emerging (L2), developing (L3), expanding (L4), and bridging (L5).

TEACHER LANGUAGE AWARENESS

Cambridge University Press The possession of an adequate level of teacher language awareness (TLA) is an essential attribute of any competent L2 teacher. The author sets out to explore the nature of TLA with particular reference to grammar, and to examine the relationship between teachers' language awareness and their handling of language-related issues in their teaching. The purpose of the book is to encourage those involved in language education to think more deeply about TLA: its importance, its nature, and its impact upon teaching (and, potentially, upon learning). The book aims to make teachers more aware of the significance of their handling of language, and to help teacher educators to adopt a more principled approach to the planning of those parts of their programmes associated with TLA.

VALUES, AIMS AND PURPOSES

with an extensive set of aims and purposes. In this book, leading experts in the teaching of school subjects examine the significance of the new aims for the reform of the curriculum. In two general introductory chapters John White discusses the validity of the aims and how they might be realized in schools. The remainder of the book focuses on subject specific areas and how these need to be brought into line with the new aims, so as to produce a more relevant and enjoyable curriculum experience for pupils, including more opportunities for choice of activities. The book concludes with suggestions about how government policy on the curriculum should now succeed. This portrayal of the school curriculum today and how it could be developed in line with the new aims will be of interest to those studying education with a particular focus on the areas of curriculum, assessment, school management, philosophy of education and the history of education.
