We often tend to compartmentalize when teaching children. In real life, there aren't artificial barriers between "subjects." For example, when you are cooking or baking, you have to use the skills of reading, logical thinking, and measuring, just to name a few. In driving a car, you see and read road signs, read maps, and count miles. So why do we say to children, "This is math, this is language, this is about science and nature, and this is history"? The most natural and effective means to teach children is through life examples. Content, story, and the ability to show math in real life make a living math book! **Math 76 An Incremental Development** Saxon Math 7/6 **Math 65 An Incremental Development Mathematical Reasoning Level G** Saxon Math 2 Home School Teachers Edition Saxon Pub **Algebra 1 Common Core Student Edition Grade 8/9** Prentice Hall **Algebra 1 / 2** Saxon Publications Homeschool Algebra 1-2 Packet with test forms 31 test forms for homeschooling, full step by step solutions to all homeschool tests, answer key to all student text practices, problem sets, and additional topic practices.
