Alternative Dispute Resolution and Domestic Violence Women, Divorce and Alternative Justice

Routledge **Dealing with the interface between the Alternative Dispute Resolution (ADR) movement and the phenomenon of domestic violence against women, this book examines the phenomenon of divorce disputes involving violence through the prism of 'alternative justice' and the dispute resolution mechanisms offered by the ADR movement. This book is the first academic treatise presenting the theoretical underpinnings of the correlation between the ADR movement and divorce disputes involving violence, and the potential contribution of this movement to the treatment of disputes of this nature. Through mapping the main values of the ADR movement, the book proposes a theoretical-analytical basis for understanding the inability of the legal system to deal with disputes of this nature, alongside a real alternative, in the form of the ADR mechanisms.**

Anthony Burgess, Covenant Theology, and the Place of the Law in Reformed Scholasticism

Reformation Heritage Books into the exegetical and theological underpinnings of the Westminster Confession's chapter on the law by delivering an in-depth analysis of Anthony Burgess's *Vindiciae Legis*. After a brief introduction to Burgess and his historical context, Casselli details the logical course of Burgess's book considering the law as given to Adam, the law given to Moses, and finally the proper relation between law and gospel. Along the way, Casselli opens up such controverted points as natural law, the covenant of works, the continuing obligation to the moral law, and the diverse administrations of one unified covenant of grace. What we see is a pastoral theology developed in a richly complex environment where technical distinctions were warranted given the polemical context; where the broad history of the Western catholic tradition was deeply respected; where a covenantal hermeneutic was consistently applied to Scripture; and where all theological formulations grew out of detailed linguistic exegesis of particular texts of Scripture in the context of the broader ecclesiastical community. Table of Contents: 1. Introduction 2. The Life of Anthony Burgess 3. Creation and Law 4. Law Given to Moses 5. Law and Gospel 6. Conclusions Appendix A - Sabbath Series Description Complementing the primary source material in the Principal Documents of the Westminster Assembly series, the *Studies on the Westminster Assembly* provides access to classic studies that have not been reprinted and to new studies, providing some of the best existing research on the Assembly and its members.

Houses from Books

Treatises, Pattern Books, and Catalogs in American Architecture, 1738-1950: A History and Guide

Penn State Press Many homes across America have designs based on plans taken from pattern books or mail-order catalogs. In *Houses from Books*, Daniel D. Reiff traces the history of published plans and offers the first comprehensive survey of their influence on the structure and the style of American houses from 1738 to 1950. *Houses from Books* shows that architectural publications, from Palladio's *I Quattro Libri* to Aladdin's *Readi-Cut Homes*, played a decisive role in every aspect of American domestic building. Reiff discusses the people and the firms who produced the books as well as the ways in which builders and architects adapted the designs in communities throughout the country. His book also offers a wide-ranging analysis of the economic and social conditions shaping American building practices. As architectural publication developed and grew more sophisticated, it played an increasingly prominent part in the design and the construction of domestic buildings. In villages and small towns, which often did not have professional architects, the publications became basic resources for carpenters and builders at all levels of expertise. Through the use of published designs, they were able to choose among a variety of plans, styles, and individual motifs and engage in a fruitful dialogue with past and present architects. *Houses from Books* reconstructs this dialogue by examining the links between the published designs and the houses themselves. Reiff's book will be indispensable to architectural historians, architects, preservationists, and regional historians. Realtors and homeowners will also find it of great interest. A catalog at the end of the book can function as a guide for those attempting to locate a model and a date for a particular design. *Houses from Books* contains a wealth of photographs, many by the author, that enhance its importance as a history and guide.

Setting-Up a Small Observatory: From Concept to Construction

Springer Science & Business Media **Arditti's approachable work covers the all the details of design, siting and construction - once a basic type has been decided upon. It is written in a way that is equally applicable to the USA and UK (where there are slightly different building regulations) and deals with matters that are basic to building and commissioning any amateur observatory. Uniquely, David Arditti also considers the aesthetics of amateur observatories - fitting them in with family and neighbors, and maybe disguising them as more common garden buildings if necessary. Every amateur astronomer who wants a purpose-built observatory (and let's face it, which one of them doesn't?) will find this book invaluable.**

Meter as Rhythm

20th Anniversary Edition

Oxford University Press **Drawing on insights from the modern "process" philosophy of Bergson, William James, and A. N. Whitehead, Christopher Hasty's Meter as Rhythm releases meter from its mechanistic connotations and recognizes it as a concrete, visceral agent of musical expression. Hasty reinterprets oppositions of law and freedom, structure and process, determinacy and indeterminacy to form a theory that engages diverse repertoires and aesthetic issues. The revised 20th anniversary edition facilitates the work's current contexts of application, from new subfields in ethnomusicology and music cognition to non-music fields like literary studies, physics, and biology.**
