QUALITATIVE AND QUANTITATIVE EVOLUTION OF INITIAL VOWELS IN BALTO-SLAVIC

BALTICA & BALTO-SLAVICA

BRILL This volume offers a discussion of the phonological, accentological and morphological development of the Baltic languages and their Indo-European origins. The first half of this book is about Baltic historical phonology and morphology and the second half is about Prussian. The emphasis is on the relative chronology of sound changes and on the development of the flexional and derivational categories of nouns, pronouns and verbs. It is argued that the Balto-Slavic acute tone was a glottal stop which developed from the Indo-European laryngeals and from Winter's law and that the original circumflex continues other vocalic sequences. Special points of attention are the gen.pl. endings, ē and ī/jā stems, and thematic and athematic present endings. The second half of the book contains a comparative analysis of the three Prussian catechisms, resulting in the conclusion that they represent three consecutive stages of a real linguistic system. It includes a discussion of the Prussian accent shift, initial vowels, diphthongs, infinitives, verb classes, participles and traces of ablauting paradigms. The final part of the book offers a full linguistic interpretation of the three Prussian catechisms on the basis of the preceding chapters, followed by a list of references and a word index. The book is of interest to Balticists, Slavicists, Indo-Europeanists, and other historical linguists.

SELECTED WRITINGS ON SLAVIC AND GENERAL LINGUISTICS

BRILL The larger part of the present volume is about Slavic historical linguistics while the second part is about more general issues and methodological aspects. The initial chapters contain a revision of the author's Slavic Accentuation and a discussion of the Slovene evidence for the Late Proto-Slavic accentual system and of the Kiev Leaflets. These are complemented by an extensive review of Garde's theory and an introductory article about the work of earlier authors for those who are unfamiliar with the subject. Then follows a discussion of changes in the vowel system, Bulgarian developments, final syllables in Slavic, early changes in the consonant system, and of Halle and Kiparsky's review of Garde's book. This results in a relative chronology of 70 stages from Proto-Indo-European to Slavic. The following chapters deal with the progressive palatalization, the accentuation of West and South Slavic languages, various aspects of the Old Slovene manuscripts, the chronology of nominal paradigms, and other issues under discussion in recent publications. The second part of the present volume contains a number of case studies exemplifying specific theoretical problems, most of them of a semantic nature. The synchronic studies deal with Russian and Japanese syntax and semantics, the diachronic studies with tonogenesis in different languages and with semantic reconstruction in Altaic and Chinese.

LANGUAGE IN TIME AND SPACE

A FESTSCHRIFT FOR WERNER WINTER ON THE OCCASION OF HIS 80TH BIRTHDAY

Walter de Gruyter The honoree of this Festschrift has for many years now marked modern trends in diachronic and synchronic linguistics by his own publications and by stimulating those of numerous others. This collection of articles presents data-oriented studies that integrate modern and traditional approaches in the field, thus reflecting the honoree's contribution to contemporary linguistics. The articles relate to comparative data from (early) Indo-European languages and a variety of other languages and discuss the theoretical implications of phenomena such as linguistic universals, reconstruction, and language classification.

PROTO-SLAVIC INFLECTIONAL MORPHOLOGY

A COMPARATIVE HANDBOOK

BRILL In this volume, Thomas Olander offers a historical analysis of the inflectional endings of Proto-Slavic, comparing them with the corresponding endings in related languages and reconstructing the Proto-Indo-European point of departure.

HANDBOOK OF COMPARATIVE AND HISTORICAL INDO-EUROPEAN LINGUISTICS

Walter de Gruyter GmbH & Co KG This book presents the most comprehensive coverage of the field of Indo-European Linguistics in a century, focusing on the entire Indo-European family and treating each major branch and most minor languages. The collaborative work of 120 scholars from 22 countries, Handbook of Comparative and Historical Indo-European Linguistics combines the exhaustive coverage of an encyclopedia with the in-depth treatment of individual monographic studies.

PERSPECTIVES ON LANGUAGE STRUCTURE AND LANGUAGE CHANGE

STUDIES IN HONOR OF HENNING ANDERSEN

John Benjamins Publishing Company This volume centers on three important theoretical concepts for the study of language change and the ways in which language structure emerges and turns into new structure: reanalysis, actualization, and indexicality. Reanalysis is a part of ongoing everyday language use, a process through which language is reproduced and changed. Actualization refers to the processes through which a reanalyzed structure spreads throughout single communities and society. Indexicality covers the way in which parts of a linguistic system can point to other parts of the system, both syntagmatically and paradigmatically. The inclusion of indexicality leads to fine-grained analysis in morphology, word order, and constructional syntax.

ENCYCLOPEDIA OF LINGUISTICS

Taylor & Francis Utilizing a historical and international approach, this valuable two-volume resource makes even the more complex linguistic issues understandable for the non-specialized reader. Containing over 500 alphabetically arranged entries and an expansive glossary by a team of international scholars, the Encyclopedia of Linguistics explores the varied perspectives, figures, and methodologies that make up the field.

LANGUAGE CONTACTS IN PREHISTORY

STUDIES IN STRATIGRAPHY. PAPERS FROM THE WORKSHOP ON LINGUISTIC STRATIGRAPHY AND PREHISTORY AT THE FIFTEENTH INTERNATIONAL CONFERENCE ON HISTORICAL LINGUISTICS, MELBOURNE, 17 AUGUST 2001

John Benjamins Publishing Every language includes layers of lexical and grammatical elements that entered it at different times in the more or less distant past. Hence, for periods preceding our earliest historical documentation, linguistic stratigraphy – the systematic study of such layers – may yield information about the prehistory of a given tradition of speaking in a variety of ways. For instance, irregular phonological reflexes may be evidence of the convergence of diverse dialects in the formation of a language, and layers of material from different source languages may form a record of changing cultural contacts in the past. In this volume are discussed past problems and current advances in the stratigraphy of Indo-European, African, Southeast Asian, Australian, Oceanic, Japanese, and Meso-American languages.

DIE SLAVISCHEN SPRACHEN / THE SLAVIC LANGUAGES. HALBBAND 2

Walter de Gruyter GmbH & Co KG The present second volume completes the handbook Die slavischen Sprachen "The Slavic languages. Ein internationales Handbuch zu ihrer Struktur, ihrer Geschichte und ihrer Erforschung. An International Handbook of their History, their Structure and their Investigation". While the general conception is continued, the present volume now contains articles concerning inner and outer language history as well as problems of sociolinguistics, contact linguistics, standardology and language typology.

THE OXFORD GUIDE TO THE URALIC LANGUAGES

Oxford University Press This volume brings together leading scholars and junior researchers to provide a comprehensive account of the Uralic language family, a group of languages spoken in northern Eurasia. It will be an essential reference for students and researchers specializing in the Uralic languages and for typologists and comparative linguists more broadly.

THE CIRCUM-BALTIC LANGUAGES

TYPOLGY AND CONTACT

John Benjamins Publishing The area around the Baltic Sea has for millennia been a meeting-place for people of different origins. Among the circum-Baltic languages, we find three major branches of Indo-European – Baltic, Germanic, and Slavic, the Baltic-Finnic languages from the Uralic phylum and several others. The circum-Baltic area is an ideal place to study areal and contact phenomena in languages. The present set of two volumes look at the circum-Baltic languages from a typological, areal and historical perspective, trying to relate the intricate patterns of similarities and dissimilarities to the societal background. In Volume I, surveys of dialect areas and language groups bear witness to the immense linguistic diversity in the area with special attention to less well-known languages and language varieties and their contacts.

THE INDO-EUROPEAN LANGUAGES

Taylor & Francis The Indo-European Languages presents a comprehensive survey of the individual languages and language subgroups within this language family. With over four hundred languages and dialects and almost three billion native speakers, the Indo-European language family is the largest of the recognized language groups and includes most of the major current languages of Europe, the Iranian plateau and the Indian subcontinent. Written by an international team of experts, this comprehensive, single-volume tome presents in-depth discussions of the historical development and specialized linguistic features of the Indo-European languages. This unique resource remains the ideal reference for advanced undergraduate and postgraduate students of Indo-European linguistics and languages, but also for more experienced researchers looking for an up-to-date survey of separate Indo-European branches. It will be of interest to researchers and anyone with an interest in historical linguistics, linguistic anthropology and language development.

ACCENT MATTERS

PAPERS ON BALTO-SLAVIC ACCENTOLOGY

BRILL The accentual systems of the Baltic and Slavic languages continue to intrigue scholars of general and historical linguistics. They play an important role in the reconstruction of the linguistic ancestor of Baltic and Slavic, but also in the typological study of accentual systems. This volume contains contributions related to the accentology of the Baltic and Slavic languages by leading scholars in the field. They discuss the accentual systems that are attested in Baltic and Slavic dialects and texts, and the historical developments that led to these systems. The volume further contains contributions on similar accentual systems and developments in other languages, such as Abkhaz and the Mordvinian languages. A number of papers also deal with the role of the Balto-Slavic accents in the reconstruction of Proto-Indo-European. The volume reflects the progress that has been made in the field of Baltic and Slavic accentuation during the last decades. It forms a major source for anyone interested in the latest developments and insights in the study of accentuation.

INTRODUCTION TO PROTO-INDO-EUROPEAN AND BALTO-SLAVIC ACCENTOLOGY

Cambridge Scholars Publishing This book offers a comprehensive introduction to Proto-Indo-European, Balto-Slavic and Proto-Slavic accentology; a branch of diachronic linguistics dealing with the development of syllable stress, intonation, and quantity at the word level. Of particular interest in the book is its detailed summary of the major approaches and solutions to accentology of the last thirty years. Furthermore, the book provides a comprehensive overview of the current state of research on accentuation of the Indo-European proto-language and the accentuation of Balto-Slavic languages. Such research is integral to our knowledge of how accentual patterns developed from the reconstructed proto-language to the modern Indo-European languages.

BALTO-SLAVIC ACCENTUAL MOBILITY

Walter de Gruyter Why does the accent jump back and forth in Russian words like golová 'head', acc. gólovu, gen. golový, dat. golové etc.? How come we find similar alternations in other Slavic languages and in a Baltic language like Lithuanian? The quest for the origin of the so-called "mobile accent paradigms" of Baltic and Slavic leads the reader through other Indo-European language branches such as Indo-Iranian, Greek and Germanic, all of which are relevant to the reconstruction of the Proto-Indo-European accentuation system. After the examination of the evidence for the reconstruction of the Proto-Indo-European accentuation system, focus is moved to the Baltic and Slavic accentuation systems and their relationship to each other and to Proto-Indo-European. A comprehensive history of research and numerous bibliographical references to earlier pieces of scholarship throughout the book make it a useful tool for anybody who is interested in Balto-Slavic and Indo-European accentology. Written in a simple style and constantly aiming at presenting old and new opinions on the various problems, the volume may serve as an introduction to this complicated field.

OLD CHURCH SLAVONIC GRAMMAR

Walter de Gruyter This description of the structure of Old Church Slavonic is intended to present fully the important data about the language, without citing all the minutiae of attested variant spellings. The facts have been treated from the point of view of structural linguistics, but pedagogical clarity has taken precedence over the conciseness required for elegant formal description.

CIRCUM-BALTIC LANGUAGES

VOLUME 1: PAST AND PRESENT

THE PREHISTORY OF THE BALTO-SLAVIC ACCENT

BRILL In The Prehistory of the Balto-Slavic Accent Jay Jasanoff offers a much-needed guide to the accentual changes that set Baltic and Slavic apart from the rest of the Indo-European family.

LANGUAGE MAPPING

PART I. PART II: MAPS

Walter de Gruyter The Handbook of Language Mapping aims to explore the core methodological and theoretical approaches of linguistic cartography. In both empirical and theoretical linguistics, the spatial variation of language is of increasing interest and the visualization of language in space is therefore also of growing significance. It is the precondition for correct data interpretation. But how does it work? What has to be considered when drawing a map? And how has the problem been tackled so far? This book provides answers to such questions by taking a closer look at the theoretical issues surrounding cartography and at the concrete practice of mapping. The fundamental issues raised are addressed particularly well, since linguistic geography is not only one of the domains with a lengthy tradition, it is also one of the most progressive fields in linguistics. At the same time, because of their visual primacy, linguistic maps directly confront the challenges of human perception and aesthetics. In this context, envisioning the fruits of language mapping is a fascinating and inspiring endeavor, not just for experts. With its accessible texts and wealth of full-color images, the handbook not only represents a comprehensive manual serving the interests of a variety of readers, it also fills a gap in the ongoing linguistic discourse.

ANCIENT INDO-EUROPEAN DIALECTS

PROCEEDINGS OF THE CONFERENCE ON INDO-EUROPEAN LINGUISTICS HELD AT THE UNIVERSITY OF CALIFORNIA, LOS ANGELES APRIL 25-27, 1963

Univ of California Press The first book to provide a rigorous and comprehensive view of the linguistic divisions of early Europe, Asia Minor, Northern India, and Chinese Turkestan. The unifying topic "Ancient Indo-European Dialects" was chosen with a view to utilizing to best advantage the many competences of the contributors in the extinct languages and language groups of early Europe, the Near East, and Central Asia. In this book each specialist treats the subdivision particularly suited to his research interest, yet is always conscious of and conversant with the entire sweep and continuity of the Indo-European language area. It is an effort at delimiting the historically and methodologically demonstrable subgroupings, including a critique of such time-worn combination as Italo-Celtic and Balto-Slavic, and incorporating the principles of modern dialectology in a diachronic application. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-

quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1966.

THE SLAVDOM. INDO-EUROPEAN MIGRATIONS

Litres Slavic peoples are based on Slavic languages that belong to the Indo-European language family. Modern Slavs are divided into 3 groups: eastern, southern and western. Slavic languages are especially close to the group of Baltic languages, even a special Slavic-Baltic community (2–1 millennia BC) stands out. In even more ancient times, Slavic languages (4–3 millennia BC) were most likely closely associated with Iranian languages.
