Legal Publishing in Antebellum America

Cambridge University Press **Legal Publishing in Antebellum America** presents a history of the law book publishing and distribution industry in the United States. Part business history, part legal history, part history of information diffusion, M. H. Hoeflich shows how various developments in printing and bookbinding, the introduction of railroads, and the expansion of mail service contributed to the growth of the industry from an essentially local industry to a national industry. Furthermore, the book ties the spread of a particular approach to law, that is, the 'scientific approach', championed by Northeastern American jurists to the growth of law publishing and law book selling and shows that the two were critically intertwined.

The International Business Environment

Oxford University Press, USA Will the expansion of the Chinese economy result in job losses in the USA? How can a natural disaster in Japan cause world stock markets to plummet? What impact does the Arab Spring have on the petroleum industry in the Middle East and North Africa? Adopting a clear global perspective, this textbook is an essential introduction to the challenges of the international business environment. The book begins by setting the global context and evaluating the idea of international industries, the world economy, and the threats and opportunities of global markets. The authors then identify the core issues faced by businesses and the dynamic socio-cultural, technological, political, legal, and ecological environments in which they operate. Case studies are sourced from almost every continent in the world, including a wealth of examples from the emerging markets of Africa, South America, and Asia. In addition, each chapter provides a range of learning tools designed to test and develop the reader's understanding. Questions and assignment tasks ensure students can apply their knowledge to real-world scenarios, while full colour diagrams throughout the book illustrate business environment theory and comparative examples with particular clarity. This unique combination of accessible theory, diverse case studies, and reflection points will prepare the reader for academic success and develop the professional skills required to excel in their future global business career. New to this edition New assignment tasks at the end of every chapter provide real-world scenarios to develop employability skills and apply understanding. New questions in the mini case studies and counterpoint boxes encourage critical thinking and reflection throughout the book. A wealth of new and updated case studies from around the world illustrate the challenges faced by contemporary organizations in regions as diverse as Africa, Europe, Asia, and the United States. Updated to reflect developments in the financial, political, legal, and technological environments since the publication of the previous edition, including the Arab Spring, economic sanctions on Russia, and changes in the global banking sector.

Google and the Law

Empirical Approaches to Legal Aspects of Knowledge-Economy Business Models

Springer Science & Business Media Google's has proved to be one of the most successful business models in today's knowledge economy. Its services and applications have become part of our day-to-day life. However, Google has repeatedly been accused of acting outside the law in the development of services such as Adwords, Googlebooks or YouTube. One of the main purposes of this book is to assess whether those accusations are well-founded. But more important than that, this book provides a deeper reflection: are current legal systems adapted to business models such as that of Google or are they conceived for an industrial economy? Do the various lawsuits involving Google show an evolution of the existing legal framework that might favour the flourishing of other knowledge-economy businesses? Or do they simply reflect that Google has gone too far? What lessons can other knowledge-based businesses learn from all the disputes in which Google has been or is involved? This book is valuable reading for legal practitioners and academics in the field of information technologies and intellectual property law, economists interested in knowledge-economy business models and sociologists interested in internet and social networks. Dr. Aurelio Lopez-Tarruella is Senior Lecturer in Private International Law at the University of Alicante, Spain.

Law, Business, and Society

"Our primary goal is to provoke student thought. To that end, we place heavy emphasis on analysis. We consider the questions we ask more important than the answers to those questions. We introduce the student to existing policy in the various substantive areas to encourage understanding and retention, as well as careful thought about the desirability of those policies. Our book takes a strong public policy orientation. Attention in Unit I to political economy and ethics is a necessary foundation on which the student can build a logical understanding of the regulatory process. Thereafter, those business and society themes persist throughout the book. In virtually every chapter, we look beyond the law itself to other social and environmental forces. For example, in the antitrust chapters, economic philosophy is of great importance. Antitrust is explored as a matter of national social policy. We argue that antitrust has a good deal to do with the direction of American life generally. Law is at the heart of the fair employment practices section, but we also present material from management, sociology, history, and popular culture to treat fair employment as an issue of public policy rather than as a series of narrower technical legal disputes. The law is studied in the economic, social, and political context from which it springs. These multidimensional approaches characterize most chapters as we attempt to examine the various topics as a whole and in context. At the same time, the law remains the core of the book. Broadly, our adjustments for this twelfth edition were designed to refresh the book and achieve increased reader interest, but more specifically this edition is directed to the nation's ongoing debate about how much government we need in our lives, particularly in our business lives. International issues also receive extensive attention, as well as critics of business values and the American legal system. Although the general structure and philosophy of the book are unchanged, we have made significant revisions including many new questions and several new law cases. Law cases are long enough to clearly express the essence of the decision while challenging the reader's intellect"--

Shipping Conferences under EC Antitrust Law

Criticism of a Legal Paradox

Bloomsbury Publishing Liner conferences are among the oldest surviving cartels in the world. Created in the 1870s they have existed since on all the world's shipping routes. With the approval or tacit acquiescence of governments everywhere, they fix freight rates, control capacity and share markets. The United Nations Code of Conduct for Liner Conferences (1974) granted them global recognition and prompted the European Community to recommend Member States to join the Convention on the Liner Code (1979) and to grant them the most generous and extraordinary block exemption from EC antitrust rules ever (1986). The European Commission's administration of the block exemption has clarified some of its aspects and, to a certain extent, limited its scope; but until very recently, it has not questioned the appropriateness of the exceptionally lenient treatment of liner shipping cartels in the European Union. After a report by the OECD Secretariat (2002) recommending abolition of antitrust immunity for shipping cartels in member countries, the European Commission launched a review of the block exemption (2003) which has led to its repeal (2006). This book studies first the origins, the early history and the regulation of liner conferences in the world and in the European Community, focusing in particular on the Regulation which granted a block exemption to liner conferences. Then, it examines one by one the four conditions for a block exemption to be granted under EC law, and concludes that none of them is fulfilled by shipping cartels. Finally, it proposes some alternative scenarios and solutions for the adequate enforcement of antitrust law in the maritime sector once the block exemption has been repealed.

Cross-Border Mergers and Acquisitions

The Case of Merger Control v. Merger Deregulation

Edward Elgar Publishing This book provides the reader with an overview of the origin of corporations and the history of mergers and acquisitions. It demystifies the dynamics of mergers and identifies the unique impediments facing cross-border mergers and acquisitions, with great attention to the pre-merger control laws and regulations, in several regions (US, EU, and Middle East). Most importantly, it discusses and assesses merger deregulation and other key reforming proposals.

ICBLP 2019

Proceedings of the 1st International Conference on Business, Law And Pedagogy, ICBLP 2019, 13-15 February 2019, Sidoarjo, Indonesia

European Alliance for Innovation We are delighted to introduce the proceedings of the First edition of the 2019 European Alliance for Innovation (EAI) The International conference on business, law, and pedagogy (ICBLP 2019). The International conference on business, law, and pedagogy accepts the papers in the three thematic areas with multiple research approaches and methodologies. The conference provides a platform for wide-ranging issues, which captures contemporary developments in business, law and pedagogy within which a wide range of networking opportunities can be nurtured for the advancement of future research and global collaboration. This approach is now vital in research endeavours as business, law and pedagogy practices are increasingly prone to an era of cross-fertilization through meaningful multi-disciplinary collaborations We strongly believe that ICBLP conference provides a good forum for all researcher, developers and practitioners to discuss all science and technology aspects that are relevant to smart grids. We also expect that the future ICBLP 2019 conference will be as successful and stimulating, as indicated by the contributions presented in this volume.

Law Librarianship in the Twenty-First Century

Scarecrow Press Law Librarianship in the 21st Century, a text for library and information science courses on law librarianship, introduces students to the rapidly evolving world of law librarianship. With no prior knowledge of the law required, students using this book will find practical answers to such questions as: What is law librarianship? How do you become a law librarian? How does law librarianship interrelate with the legal world? Individual chapters provide a concise treatment of such specialized topics as the history of law librarianship, international law, and government documents. Standard topics are dealt with as they apply to the law library, including collection development, public services, technical processing, administration, technology, and consortia. The textbook also includes an explanation of the common acronyms and special terminology needed to work in a law library. This new edition updates the text throughout and adds two new chapters.

Business Interests and the Environmental Crisis

SAGE Publications India A major contribution to understand how the environmental crisis is viewed globally and responded to by policy This book highlights the manner in which key aspects in policy discourse—commodity, pricing, ownership, and regulation—have borrowed economic and trade principles to address the environmental crisis and to what effect. The book addresses a fundamental issue in environment: if nature is no longer available as a limitless resource, how has the policy discourse on the environmental crisis come to view it, value it, and live with it? Analysing policy instruments across sectors that respond to local ecological conflicts and challenges, the book offers a conceptual understanding of how natural elements are transformed into mobile, tradable commodities through the use of market-based instruments.

How to Write a Master's Thesis

It is chock full of detailed explanations, examples, and supplemental materials that have been used successfully in advising students in completing their master's theses.

Business Law

Barrons Educational Series Titles in Barron's Business Review series are widely used as classroom supplements to college textbooks and often serve as a main textbook in business brush-up programs. Business Law focuses on the importance of legal theory in the everyday business world, explaining such subjects as tort responsibility, government regulations, contracts, environmental law, product liability, consumer protection, and international law, among many other topics. Also discussed in detail are the legal aspects of partnerships, franchises, and corporations, as well as special topics that include business crimes, property as a legal concept, intellectual property, and similar pertinent topics. A study aid labeled Key Terms appears at the beginning of each chapter, and You Should Remember summaries are strategically interspersed throughout the text.

Business Law

The Ethical, Global, and Digital Environment

"This is the 18th Edition (and the 24th overall edition) of a business law text that first appeared in 1935. Throughout its more than 80 years of existence, this book has been a leader and an innovator in the fields of business law and the legal environment of business. One reason for the book's success is its clear and comprehensive treatment of the standard topics that form the traditional business law curriculum. Another reason is its responsiveness to changes in these traditional subjects and to new views about that curriculum. In 1976, this textbook was the first to inject regulatory materials into a business law textbook, defining the "legal environment" approach to business law. Over the years, this textbook has also pioneered by introducing materials on business ethics, corporate social responsibility, global legal issues, and the law of an increasingly digital world. The 18th Edition continues to emphasize change by integrating these four areas into its pedagogy"--

The Business Environment

Themes and Issues in a Globalizing World

Oxford University Press Designed specifically for students new to the study of business, this book explores the global range of environments within which business operates. Wetherly and Otter encourage critical thinking via a unique 'themes and issues' approach, which reflects the integrated, dynamic reality of businesses today.

Commonwealth Caribbean Business Law

Routledge Now in its third edition, *Commonwealth Caribbean Business Law* continues to break away from the traditional English approach of treating business law primarily as the law of contract and agency. Taking a panoramic view, it explores the foundation of various legal systems before examining areas of legal liability that affect business activities. These include areas such as contract law, tort law, criminal law, agency and internet law which present significant challenges confronting the business sector. The book primarily targets the development of business law principles in several Caribbean Commonwealth jurisdictions but, where appropriate, also embraces the jurisprudence of other Commonwealth nations, such as the United Kingdom, Canada and Australia. It also explores the United States as a non-Commonwealth jurisdiction, given the increasing importance in the Caribbean of judicial pronouncements relating to internet law from this territory. Using excerpts from key judgments, the book allows students, particularly those with a non-legal background, to understand key legal principles for business as presented by the judiciary and draws parallels between legal theory and business practice.

E-book Platforms for Libraries

American Library Association E-book vendors continue to experiment: adjustments to business models, consolidation of content, and mergers with competitors mean constant change. What's good for innovation can equal confusion when it comes to choosing an e-book platform for your library. Making a sound purchasing decision requires research and close consideration of trade-offs, and Roncevic's new issue of *Library Technology Reports* will get you started. Based on surveys of e-book vendors with an established presence in academic, public, and/or K-12 library markets, this report includes Background and business model descriptions for 51 leading e-book vendors Four tables comparing content, technical specifications, functionality, and business models An at-a-glance overview of platforms, including vendor website URLs Bulleted checklists of factors to consider, and questions to ask vendors An examination of the blurring channels of publisher, aggregator, and distributor platforms, with advice to help you avoid content overlap
