The early chapters provide an overview of sports law in general terms and explore its impact on race, politics, religion, and everyday affairs. Later chapters address hot button issues such as gender equity, drug testing, and discrimination. Written from a sport management perspective, rather than from a lawyer's, this text covers all the major areas presented in sports law today including: cases relating to torts, contracts, intellectual property, and agents. Business Associations

A Systems Approach

Aspen Publishing Business Associations: A Systems Approach is the first Business Associations casebook organized by function (decision-making, finance, investor litigation, investment transfer, etc.) instead of by entity type (partnerships, corporations, LLCs, etc.). Functional organization avoids repetition and makes full coverage of corporations, partnerships, LLCs, and limited partnerships possible in a four-, or even three-, credit course. The systems approach is the basis for several successful casebooks in other fields, most notably LoPucki, Warren and Lawless's Secured Transactions: A Systems Approach. The approach focuses on the actions of the lawyers, businesspeople, and government administrators who apply law rather than merely on abstract law. Business Associations: A Systems Approach provides hundreds of realistic, fact-rich problems in legal practice settings. Students apply their new knowledge of law and how the systems work to advise hypothetical clients. The cases are recent, heavily edited, and rarely longer than five pages. Professors and students will benefit from: Full coverage of agency, corporations, partnerships, LLCs, limited partnerships and the role of legal entities in society Tables, figures, photos, and one cartoon Fundamental documents for Facebook and a hypothetical LLC (BKG Catalina) and operating agreement, which are also integrated into the text and problems Cleanly edited, easy-to-read cases Recent cases that illustrate modern business practices and reflect current law Organization by function, which reduces the repetition required in organization by entity type Modular organization, allowing the chapters to be taught in any order An approach that any kind of entity could be made to work like any other. Other books teach what kinds of entities to use in what situations. Fact-rich, realistic problems in practice settings An introductory assignment that provides an overview of the course Clear and direct examples and explanations, free of jargon and idioms that cause difficulty for students from other cultures. Great for LL.M.s, MJSs and foreign J.D.s! A detailed glossary

Secured Credit

A Systems Approach

Aspen Publishers 'The systems approach we employ in this book looks at more than just law. Law is one of many elements that together constitute the secured credit system. To teach the law without teaching the system in which it is embedded would deprive the law of much of its meaning and make it more difficult to understand.' - Lynn LoPucki and Elizabeth Warren Fully incorporating the new Article 9 of the UCC, this substantially revised edition of the groundbreaking text continues to simplify the conceptually complex policies of the secured credit system with an innovative systems approach. By exploring secured transactions and investment securities in a series of assignments and problems, students are empowered to focus on secured transactions as one aspect of a larger system - thus facilitating learning and comprehension of the material. What makes this casebook stand out from the rest? Expert authorship - renowned authors Lynn LoPucki and Elizabeth Warren draw on their years of legal scholarship and teaching excellence to refine and extend their systems approach Uses the author's unique and innovative systems approach - treating secured credit as a system with subsystems that work together to accomplish the system's principal goal A combination of traditional application and open-ended theoretical problems are presented in the order of difficulty - with the most difficult problems focusing on an actual practice setting to enhance student learning Each assignment is appropriate for a 50-60 minute class, contains carefully-selected problems that involve students in case strategy and planning, and includes all the information needed to answer the problems New To The Third Edition: Incorporates the new Article 9 (Secured Transactions) of the UCC throughout the entire text Updated cases and problems reflect recent legal trends and developments A thoroughly revised Teacher's Manual in every chapter

Contracts

A Modern Coursebook

Aspen Publishing *Contracts: A Modern Coursebook, Second Edition* by Ben Templin is an innovative coursebook unlike any other on the market. The book takes a hybrid approach between a “traditional” casebook and a problems-based casebook, incorporating a more thorough discussion of the law followed by cases then problems. Featuring a unique design that engages the reader and incorporates professional skills and experiential-type learning, *Contracts: A Modern Coursebook* is a revolutionary, classroom-tested book. Rather than playing “hide the ball,” professors using this book will be able to say, “Here’s the ball. Let’s play catch.” New to the Second Edition: Now Over 500 Questions and Problems, nearly doubling the number of questions and answers for professors to use to assess students. A new section—Questions for Review—tests students’ understanding of the law before they try the more difficult analytic problems. Enhanced analytic problems—updated based on feedback from professors and students. New cases with tighter editing to adjust the mix between classic and contemporary cases for greater balance, and to focus on the core lesson. More flowcharts and tables, providing additional visual learning aids to help students synthesize concepts. More examples and case illustrations to keep students engaged and to stimulate critical thinking. Design enhancements, including a redesign of “Rule Boxes” that makes parsing the rule statements easier for students. A new numbering system to more easily track “Learning Outcomes” to “Explanations” to “Case Law” to “Assessments.” Professors and students will benefit from: Learning Objectives: Unlike traditional casebooks, every chapter begins with three to seven precise learning goals. Millennials respond positively when learning objectives are stated at the beginning of a lesson. The defined learning objectives for each chapter help professors comply with ABA requirements to establish learning outcomes that consist of “clear and concise statements of knowledge that students are expected to acquire.” Clear and Concise Explanations of the Law: Much like a hornbook, every chapter provides clear and concise explanations of the law. Overarching rules are identified and highlighted visually. An analytical framework is provided to help students parse the rule. Examples and Case Illustrations explain the parameters and application of the rule. Test Yourself questions are embedded exercises within the explanation section to let students assess their understanding of the rules. Case Law—Developing Critical Reasoning Skills: Since students learn the law before reading the cases, the focus of case analysis is on the reasoning that the court applies. By posing direct questions and giving students prompts to respond to as they read the case, students build critical reasoning skills, and, as a result, are better prepared for class. Problem Solving and Analysis—Built-in Formative Assessment: At the end of each chapter, the Problem Solving and Analysis section provides students the opportunity to build critical thinking skills (the highest level of Bloom’s Taxonomy of Educational Objectives) through a series of thought-provoking hypotheticals based on real-world scenarios. The rich set of questions builds accountability and addresses the challenge of providing in-semester formative feedback to large classes to help professors comply with ABA formative assessment standards. Contemporary Layout and Design: The contemporary book design is optimized to improve readability, heighten student engagement, and increase retention. Concise and Compact: Shorter than competing casebooks, the casebook can be used in 4-credit, 5-credit, or 6-credit courses. Classroom Tested: *Contracts: A Modern Coursebook* has been classroom tested over three years. More than 400 students have used the text for both the first year contracts course and as a supplement for a third year remedies course. Students have been overwhelmingly enthusiastic about the content, format, and approach.
