Strengthening Forensic Science in the United States A Path Forward
National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators. **The Duchess of Malfi Litres Pain Management and the Opioid Epidemic**
Balancing Societal and Individual Benefits and Risks of Prescription Opioid

Use National Academies Press Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring. **Tacitus, Annals, 15.20-23, 33-45 Latin Text, Study Aids with Vocabulary, and Commentary Open Book Publishers** emperor Nero is etched into the Western imagination as one of ancient Rome's most infamous villains, and Tacitus' Annals have played a central role in shaping the mainstream historiographical understanding of this flamboyant autocrat. This section of the text plunges us straight into the moral cesspool that Rome had apparently become in the later years of Nero's reign, chronicling the emperor's fledgling stage career including his plans for a grand tour of Greece; his participation in a city-wide orgy climaxing in his publicly consummated 'marriage' to his toy boy Pythagoras; the great fire of AD 64, during which large parts of central Rome went up in flames; and the rising of Nero's 'grotesque' new palace, the so-called 'Golden House', from the ashes of the city. This building project stoked the rumours that the emperor himself was behind the conflagration, and Tacitus goes on to present us with Nero's gruesome efforts to quell these mutterings by scapegoating and executing members of an unpopular new cult then starting to spread through the Roman empire: Christianity. All this contrasts starkly with four chapters focusing on one of Nero's most principled opponents, the Stoic senator Thrasea Paetus, an audacious figure of moral fibre, who courageously refuses to bend to the forces of imperial corruption and hypocrisy. This course book offers a portion of the original Latin text, study aids with vocabulary, and a commentary. Designed to stretch and stimulate readers, Owen's and Gildenhard's incisive commentary will be of particular interest to students of Latin at both A2 and undergraduate level. It extends beyond detailed linguistic analysis and historical background to encourage critical engagement with Tacitus' prose and discussion of the most recent scholarly thought. **The Most Dangerous Game by Richard Connell or The Hounds of Zaroff | Alltime Bestseller Book From the Author of Books Like: The Sin of Monsieur Pettipon, and Other Humorous Tales / El malvado Zaroff / Delitto in mare / What Ho! Unobservables in Science and Philosophy 8. The Mad Lover About the Book: The Most Dangerous Game, also published as The Hounds of Zaroff, is a short story by Richard Connell first published in Collier's magazine on January 19, 1924. It features a big-game hunter from New York who falls off a yacht and swims to an isolated island in the Caribbean where he is hunted by a Cossack aristocrat. The story is an adaptation of the big-game hunting safaris in Africa and South America that were fashionable among wealthy Americans in the 1920s. Big-game hunter Sanger Rainsford and his friend, Whitney, are traveling to the Amazon rainforest for a jaguar hunt. After a discussion about how they are "the hunters" instead of "the hunted," Whitney goes to bed and Rainsford hears gunshots. He climbs onto the yacht's rail and accidentally falls overboard, swimming to Ship-Trap Island, which is notorious for shipwrecks. On the island, he finds a palatial chateau inhabited by two Cossacks: the owner, General Zaroff, and his gigantic deaf-mute servant, Ivan. Zaroff, another big-game hunter, knows of Rainsford from his published account of hunting snow leopards in Tibet. Over dinner, the middle-aged Zaroff explains that although he has been hunting animals since he was a boy, he has decided that killing big-game has become boring for him, so after escaping the Russian Revolution he moved to Ship-Trap Island and set it up to trick ships into wrecking themselves on the jagged rocks that surround it. He takes the survivors captive and hunts them for sport, giving them food, clothing, a knife, and a three-hour head start, and using only a small-caliber pistol for himself. Any captives who can elude Zaroff, Ivan, and a pack of hunting dogs for three days are set free. He reveals that he has won every hunt to date. Captives are offered a choice between being hunted or turned over to Ivan, who once served as official knouter for The Great White Czar. Rainsford denounces the hunt as barbarism, but Zaroff replies by claiming that "life is for the strong." Realizing he has no way out, Rainsford reluctantly agrees to be hunted. During his head start, Rainsford lays an intricate trail in the forest and then climbs a tree. Zaroff finds him easily, but decides to play with him as a cat would with a mouse, standing underneath the tree Rainsford is hiding in, smoking a cigarette, and then abruptly departing. After the failed attempt at eluding Zaroff, Rainsford builds a Malay man-catcher, a weighted log attached to a trigger. This contraption injures Zaroff's shoulder, causing him to return home for the night, but he shouts his respect for the trap before departing. The next day Rainsford creates a Burmese tiger pit, which kills one of Zaroff's hounds. He sacrifices his knife and ties it to a sapling to make another trap, which kills Ivan when he stumbles into it. To escape Zaroff and his approaching hounds, Rainsford dives off a cliff into the sea; Zaroff, disappointed at Rainsford's apparent suicide, returns home. Zaroff smokes a pipe by his fireplace, but two issues keep him from the peace of mind: the difficulty of replacing Ivan and the uncertainty of whether Rainsford perished in his dive. About the Author : Richard Edward Connell, Jr. was an American author and journalist, best known for his short story "The Most Dangerous Game." Connell was one of the best-known American short story writers of his time and his stories appeared in the Saturday Evening Post and Collier's Weekly. Connell had equal success as a journalist and screenwriter. He was nominated for an Academy Award in 1942 for best original story for the film Meet John Doe. **An Inspector Calls** A Christmas Carol Dickens, A Christmas Carol, tells the story of Ebenezer Scrooge, an elderly miser who is transformed into a caring

This book focuses on defining the terms that people today are most likely to encounter when dealing with the law. The definitions are clear, concise, and easy-to-understand. Whether you are a lawyer, a law student, or a layperson, this handy reference will help you understand the precise meaning of any legal term. **The Upward Look Review and Herald Pub Assoc Dark Roots Open Road + Grove/Atlantic** “Heartbreakingly detailed . . . vibrant—and vital” prize-winning stories by an Australian contributor to The New Yorker (Entertainment Weekly). In this “coolly exact . . . sharp, evocative and often poetic” collection of award-winning short fiction, Cate Kennedy daringly travels to the deepest depths of the human psyche to explore the collision between simmering inner lives, the cold outside world, and the hidden motivations that propel us all to act (The New York Times Book Review). Kennedy captures entire lives, expertly documenting the risks and compromises made in both forging and escaping relationships. Her “17 standout stories” are populated by people on the brink: whether it’s a woman floundering with her own loss and emotional immobility as her lover lies in a coma; a neglected wife who cannot convince her husband of the truth about his two brutish, shamelessly libidinous friends; or a married woman who comes to realize that her too-tight wedding ring isn’t the only thing that’s stuck in her relationship (Elle). Each character must make a choice and none is without consequence—even the smallest decisions have the power to destroy or renew, to recover and relinquish. Devastating, evocative, richly comic, and “full of provocative messages, tantalizingly revealed”, Dark Roots deftly unveils the traumas that incite us to desperate measures and the coincidences that drive our lives (O, The Oprah Magazine). “With an effortless talent for the comic and the chilling, Cate Kennedy has crafted stories that are sly, seductive, and surprising. A standout debut” (Alicia Erian, author of Towelhead). **The International Baccalaureate An Experiment in International Education London : G. G. Harrap Leading, Managing and Developing People Kogan Page Publishers** Leading, Managing and Developing People is critical reading for all those studying the CIPD Level 7 Advanced module in Leading, Managing and Developing People as well as all HR and L&D practitioners. It provides extensive coverage of the aims, objectives and contribution of HRM such as the scope and nature of human resources, HR's role when organisations grow and how to ensure professionalism and ethical behaviour when managing people. This book also includes discussion of major contemporary themes in leading, managing and developing people including leadership development, flexibility, agile working and the psychological contract. This ensures that readers are fully prepared to lead, manage and develop staff in the new world of work. With rigorous academic underpinning and clear theoretical exploration, Leading, Managing and Developing People also includes practical advice on key activities including recruitment, job design, performance management, motivation and reward. Supported by online resources including an instructor's manual, lecture slides, international case studies, example essay questions and annotated web links, this is an indispensable guide for

both students and practitioners. **Linux Shell Scripting Cookbook Packt Publishing Ltd** This book is written in a Cookbook style and it offers learning through recipes with examples and illustrations. Each recipe contains step-by-step instructions about everything necessary to execute a particular task. The book is designed so that you can read it from start to end for beginners, or just open up any chapter and start following the recipes as a reference for advanced users. If you are a beginner or an intermediate user who wants to master the skill of quickly writing scripts to perform various tasks without reading the entire manual, this book is for you. You can start writing scripts and one-liners by simply looking at the similar recipe and its descriptions without any working knowledge of shell scripting or Linux. Intermediate/advanced users as well as system administrators/ developers and programmers can use this book as a reference when they face problems while coding. **Qualitative Research Methods in Public Relations and Marketing Communications Routledge** A practical, highly accessible guide for novice researchers conducting qualitative research in public relations and marketing communications, this book guides the reader through all aspects of the research process. **Oxford Guide to Effective Argument and Critical Thinking OUP Oxford** How do you approach an essay or discussion question? How do you review what claims others have made and offer counter-claims? And how do you weigh up the strengths and weaknesses of your own argument before putting together a persuasive conclusion? This accessible book takes you step by step through the art of argument, from thinking about what to write and how you might write it, to how you may strengthen your claims, and how to come to a strong conclusion. Engagingly written and featuring useful summaries at the end of each chapter, this new book offers easily transferable practical advice on assessing the arguments of others and putting forward effective arguments of your own. The book's strength lies in its clear guidance and the use of real-life arguments - both contemporary and historical - and real-life essay questions from a variety of disciplines across the humanities and social sciences. These interesting, relevant, and often entertaining, examples are used not to illustrate, but to make essential points about what can be learnt, what techniques can be borrowed, and what pitfalls to avoid in the area of analytical thinking and writing. The Oxford Guide to Effective Argument and Critical Thinking is sure to improve the written work of any student required to demonstrate the key skills of critical writing and thinking. It is equally as valuable for professionals needing these skills (e.g. journalists, lawyers, researchers, politicians) as well as for anyone who has a case to put forward and would like to do so convincingly. **The Coding Manual for Qualitative Researchers SAGE** The Second Edition of Johnny Saldaña's international bestseller provides an in-depth guide to the multiple approaches available for coding qualitative data. Fully up to date, it includes new chapters, more coding techniques and an additional glossary. Clear, practical and authoritative, the book: -describes how coding initiates qualitative data analysis - demonstrates the writing of analytic memos -discusses available analytic software - suggests how best to use The Coding Manual for Qualitative Researchers for particular studies. In total, 32 coding methods are profiled that can be applied to a range of research genres from grounded theory to phenomenology to narrative inquiry. For each approach, Saldaña discusses the method's origins, a description of

the method, practical applications, and a clearly illustrated example with analytic follow-up. A unique and invaluable reference for students, teachers, and practitioners of qualitative inquiry, this book is essential reading across the social sciences. **Developing reflective practice in legal education** **Reproducibility and Replicability in Science** **National Academies Press** One of the pathways by which the scientific community confirms the validity of a new scientific discovery is by repeating the research that produced it. When a scientific effort fails to independently confirm the computations or results of a previous study, some fear that it may be a symptom of a lack of rigor in science, while others argue that such an observed inconsistency can be an important precursor to new discovery. Concerns about reproducibility and replicability have been expressed in both scientific and popular media. As these concerns came to light, Congress requested that the National Academies of Sciences, Engineering, and Medicine conduct a study to assess the extent of issues related to reproducibility and replicability and to offer recommendations for improving rigor and transparency in scientific research. **Reproducibility and Replicability in Science** defines reproducibility and replicability and examines the factors that may lead to non-reproducibility and non-replicability in research. Unlike the typical expectation of reproducibility between two computations, expectations about replicability are more nuanced, and in some cases a lack of replicability can aid the process of scientific discovery. This report provides recommendations to researchers, academic institutions, journals, and funders on steps they can take to improve reproducibility and replicability in science.

Assessing Competence in Professional Performance across Disciplines and Professions **Springer** This book examines the challenges of cross-professional comparisons and proposes new forms of performance assessment to be used in professions education. It addresses how complex issues are learned and assessed across and within different disciplines and professions in order to move the process of "performance assessment for learning" to the next level. In order to be better equipped to cope with increasing complexity, change and diversity in professional education and performance assessment, administrators and educators will engage in crucial systems thinking. The main question discussed by the book is how the required competence in the performance of students can be assessed during their professional education at both undergraduate and graduate levels. To answer this question, the book identifies unresolved issues and clarifies conceptual elements for performance assessment. It reviews the development of constructs that cross disciplines and professions such as critical thinking, clinical reasoning, and problem solving. It discusses what it means to instruct and assess students within their own domain of study and across various roles in multiple contexts, but also what it means to instruct and assess students across domains of study in order to judge integration and transfer of learning outcomes. Finally, the book examines what it takes for administrators and educators to develop competence in assessment, such as reliably judging student work in relation to criteria from multiple sources. "... the co-editors of this volume, Marcia Mentkowski and Paul F. Wimmers, are associated with two institutions whose characters are so intimately associated with the insight that assessment must be integrated with curriculum and instructional program if it is to become a powerful influence on the educational process ..." Lee Shulman, Stanford

University **Persepolis The Story of an Iranian Childhood Random House Wise**, often funny, sometimes heartbreaking, Persepolis tells the story of Marjane Satrapi's life in Tehran from the ages of six to fourteen, years that saw the overthrow of the Shah's regime, the triumph of the Islamic Revolution and the devastating effects of war with Iraq. The intelligent and outspoken child of radical Marxists, and the great-granddaughter of Iran's last emperor, Satrapi bears witness to a childhood uniquely entwined with the history of her country. Persepolis paints an unforgettable portrait of daily life in Iran and of the bewildering contradictions between home life and public life. Amidst the tragedy, Marjane's child's eye view adds immediacy and humour, and her story of a childhood at once outrageous and ordinary, beset by the unthinkable and yet buffered by an extraordinary and loving family, is immensely moving. It is also very beautiful; Satrapi's drawings have the power of the very best woodcuts. **In Cold Blood Modern Library** Selected by the Modern Library as one of the 100 best nonfiction books of all time From the Modern Library's new set of beautifully repackaged hardcover classics by Truman Capote—also available are *Breakfast at Tiffany's* and *Other Voices, Other Rooms* (in one volume), *Portraits and Observations*, and *The Complete Stories* Truman Capote's masterpiece, *In Cold Blood*, created a sensation when it was first published, serially, in *The New Yorker* in 1965. The intensively researched, atmospheric narrative of the lives of the Clutter family of Holcomb, Kansas, and of the two men, Richard Eugene Hickock and Perry Edward Smith, who brutally killed them on the night of November 15, 1959, is the seminal work of the "new journalism." Perry Smith is one of the great dark characters of American literature, full of contradictory emotions. "I thought he was a very nice gentleman," he says of Herb Clutter. "Soft-spoken. I thought so right up to the moment I cut his throat." Told in chapters that alternate between the Clutter household and the approach of Smith and Hickock in their black Chevrolet, then between the investigation of the case and the killers' flight, Capote's account is so detailed that the reader comes to feel almost like a participant in the events. **WJEC Eduqas GCSE (9-1) Religious Studies Hodder Education** Bring out the best in every student, enabling them to develop in-depth subject knowledge with this accessible and engaging Student's Book, created for the 2016 specification by a team of subject specialists and the leading Religious Studies publisher. - Helps students of all abilities fulfil their potential and increase their understanding through clear, detailed explanations of the key content and concepts - Motivates students to build and cement their knowledge and skills using a range of imaginative, innovative activities that support learning and revision - Provides a variety of quotes from sources of authority that students can draw on to enhance their responses and extend their learning - Encourages students to make links between the world religions and philosophical and ethical issues so they develop a holistic view of religion in modern Britain - Prepares students for examination with a rich bank of exam-style questions, guidance on how to improve responses and student-friendly assessment criteria - Enables you to teach unfamiliar topics and systematic studies confidently with clear explanations of Christian, Catholic Christian, Islamic and Judaic beliefs and practices, verified by faith organisations WJEC Eduqas GCSE RS

It is also no secret that these nineteenth-century gynecologists performed experimental caesarean sections, ovariectomies, and obstetric fistula repairs primarily on poor and powerless women. Medical Bondage breaks new ground by exploring how and why physicians denied these women their full humanity yet valued them as “medical superbodies” highly suited for medical experimentation. In Medical Bondage, Cooper Owens examines a wide range of scientific literature and less formal communications in which gynecologists created and disseminated medical fictions about their patients, such as their belief that black enslaved women could withstand pain better than white “ladies.” Even as they were advancing medicine, these doctors were legitimizing, for decades to come, groundless theories related to whiteness and blackness, men and women, and the inferiority of other races or nationalities. Medical Bondage moves between southern plantations and northern urban centers to reveal how nineteenth-century American ideas about race, health, and status influenced doctor-patient relationships in sites of healing like slave cabins, medical colleges, and hospitals. It also retells the story of black enslaved women and of Irish immigrant women from the perspective of these exploited groups and thus restores for us a picture of their lives. **Assessment of Authentic Performance in School**

Mathematics Routledge This book is the result of a conference sponsored by the Educational Testing Service and the University of Wisconsin's National Center for Research in Mathematical Sciences Education. The purpose of the conference was to facilitate the work of a group of scholars whose interests included the assessment of higher-order understandings and processes in foundation-level (pre-high school) mathematics. Discussions focused on such issues as the purposes of assessment, guidelines for producing and scoring "real-life" assessment activities, and the meanings of such terms as "deeper and higher-order understanding," "cognitive objectives," and "authentic mathematical activities." Assessment was viewed as a critical component of complex, dynamic, and continually adapting educational systems. During the time that the chapters in this book were being written, sweeping changes in mathematics education were being initiated in response to powerful recent advances in technology, cognitive psychology, and mathematics, as well as to numerous public demands for educational reform. These changes have already resulted in significant reappraisals of what it means to understand mathematics, of the nature of mathematics teaching and learning, and of the real-life situations in which mathematics is useful. The challenge was to pursue assessment-related initiatives that are systematically valid, in the sense that they work to complement and enhance other improvements in the educational system rather than act as an impediment to badly needed curriculum reforms. To address these issues, most chapters in this book focus on clarifying and articulating the goals of assessment and instruction, and they stress the content of assessment above its mode of delivery. Computer- or portfolio-based assessments are interpreted as means to ends, not as ends in themselves. Assessment is conceived as an ongoing documentation process, seamless with instruction, whose quality hinges upon its ability to provide complete and appropriate information as needed to inform priorities in instructional decision making. This book tackles some of the most complicated issues related to assessment, and it offers fresh perspectives from leaders in the field--with the hope that the ultimate consumer in the instruction/assessment enterprise, the individual student, will reclaim his or her potential for self-directed mathematics learning.

The Trial Process Law, Tactics, and Ethics Testing in American Schools Asking the Right Questions : Summary Human Factors Considerations of Undergrounds in Insurgencies Second Edition Createspace Independent Publishing Platform From the preface: "The 1966 'Human Factors' edition focused on the contemporary threat of Maoist insurgencies, particularly in Southeast Asia, and also drew extensively on World War II resistance movements in Europe. Much of this information is still relevant and has been retained and integrated. In the post-Cold War world, the most important insurgencies tend to be ethnic and religious. Long-simmering conflicts, sometimes with roots in colonial policies, have become prominent; examples include the Liberation Tigers of Tamil Eelam (LTTE) in Sri Lanka, Euskadi Ta Askatasuna (Basque Homeland and Freedom or ETA) in Spain, the Hutu-Tutsi genocides, the Ushtria ◊lirimtare e Kosov◊s (Kosovo Liberation Army, or KLA), and the Provisional Irish Republican Army (PIRA). Battle lines in these conflicts are often drawn along ethnic lines, even when land or politics are the immediate issues in contention. The other important new category is extremist religious movements, most prominently Islamic groups, including regional insurgent

movements like Hizbollah and Harakat al-Muqawamah al'Islamiyyah (Islamic Resistance Movement, or HAMAS) and global movements like Al Qaeda. These present a different profile of ideology, organizational forms, and psychology than either Cold War Maoists or post-colonial ethnic insurgencies (although the Palestinian cause could be considered a post-colonial issue). Globalization has also changed underground operations in numerous ways. Insurgencies, enabled by low-cost transportation, Internet based communications, and other information technologies, can more easily recruit, communicate, and operate across borders. It is correspondingly much more difficult to contain an insurgency in a region. Global media has led to development of new tactics, in particular new types of terrorism, designed to capture worldwide attention. Compared with what was available in the 1960s, there are orders of magnitude more academic research available relevant to this study's topics. We were able to draw on more recent work in psychology, political science, economics, sociology, organizational studies, and communications studies. Readers of this edition will, over the course of eleven chapters, get a wide exposure to basic concepts from a number of disciplines".

Selling Manhattan Pan Macmillan One of those rare books that is immediately enjoyable yet will repay many re-readings' Poetry Review Carol Ann Duffy's highly praised second collection, for which she was given the Somerset Maughan Award, showcases the Poet Laureate's skill even at the very start of her career. Within are poems that reveal the full range of her interests: from the dramatic monologues, to meditations on death and art, to poems of protest and poems of love. Throughout it all, though, is a resounding determination to give voices to those who are usually voiceless, and always apparent is her inimitable wit, wisdom and imagination. At once tender and sharp, moving and humourous, *Selling Manhattan* has dazzled both readers and critics ever since it was first published in 1987.

Landmark Cases in the Law of Contract Bloomsbury Publishing *Landmark Cases in the Law of Contract* offers twelve original essays by leading contract scholars. As with the essays in the companion volume, *Landmark Cases in the Law of Restitution* (Hart, 2006) each essay takes as its focus a particular leading case, and analyses that case in its historical or theoretical context. The cases range from the early eighteenth- to the late twentieth-centuries, and deal with an array of contractual doctrines. Some of the essays call for their case to be stripped of its landmark status, whilst others argue that it has more to offer than we have previously appreciated. The particular historical context of these landmark cases, as revealed by the authors, often shows that our current assumptions about the case and what it stands for are either mistaken, or require radical modification. The book also explores several common themes which are fundamental to the development of the law of contract: for instance, the influence of commercial expectations, appeals to 'reason' and the significance of particular judicial ideologies and techniques.

The Bondwoman's Narrative Grand Central Publishing Possibly the first novel written by a black woman slave, this work is both a historically important literary event and a gripping autobiographical story in its own right.

The Hacker Crackdown, Law and Disorder on the Electronic Frontier Tredition Classics This book is part of the TREDITION CLASSICS. It contains classical literature works from over two thousand years. Most of these titles have been out of print and off the bookstore shelves for

decades. The book series is intended to preserve the cultural legacy and to promote the timeless works of classical literature. Readers of a TREDITION CLASSICS book support the mission to save many of the amazing works of world literature from oblivion. With this series, tredition intends to make thousands of international literature classics available in printed format again - worldwide.

The Fingerprint Sourcebook CreateSpace The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

Electronic Communication Across the Curriculum National Council of Teachers This collection of 24 essays explores what happens when proponents of writing across the curriculum (WAC) use the latest computer-mediated tools and techniques--including e-mail, asynchronous learning networks, MOOs, and the World Wide Web--to expand and enrich their teaching practices, especially the teaching of writing. Produced in 415 BC during the Peloponnesian War, it is often considered a commentary on the capture of the Aegean island of Melos and the subsequent slaughter and subjugation of its populace by the Athenians earlier that year (see History of Milos). 415 BC was also the year of the scandalous desecration of the hermai and the Athenians' second expedition to Sicily, events which may also have influenced the author. The Trojan Women was the third tragedy of a trilogy dealing with the Trojan War. The first tragedy, Alexandros, was about the recognition of the Trojan prince Paris who had been abandoned in infancy by his parents and rediscovered in adulthood. The second tragedy, Palamedes, dealt with Greek mistreatment of their fellow Greek Palamedes. This trilogy was presented at the Dionysia along with the comedic satyr play Sisyphos. The plots of this trilogy were not connected in the way that Aeschylus' Oresteia was connected. Euripides did not favor such connected trilogies. Euripides won second prize at the City Dionysia for his effort, losing to the obscure tragedian Xenocles. The four Trojan women of the play are the same that appear in the final book of the Iliad lamenting over the corpse of Hector. Taking place near the same time is Hecuba, another play by Euripides. **Blackstone's Guide to the Protection from Harassment Act 1997 Wm Gaunt & Sons** Covers many types of public order and personal dispute situations such as industrial strikes, neighbourhood disputes, investigative reporters and bullying at work. Includes a copy of the Act. **Library Publishing Toolkit IDS Project Press** Both public and academic libraries are invested in the creation and distribution of information and digital content. They have morphed from keepers of content into content creators and curators, and seek best practices and efficient workflows with emerging publishing platforms and services. The Library Publishing Toolkit looks at the broad and varied landscape of library publishing through discussions, case studies, and shared resources. From supporting writers and authors in the public library setting to hosting open access journals and books, this collection examines opportunities for libraries to leverage their position and resources to create and provide access to content. **The Cambridge Handbook of Literary Authorship Cambridge University Press** This Handbook surveys the state of the art in literary authorship studies. Its 27 original contributions by eminent scholars offer a multi-layered account of authorship as a defining element of literature and culture. Covering a vast chronological range, Part I considers the history of authorship from cuneiform writing to contemporary digital publishing; it discusses authorship in ancient Egypt, Greece, Rome, early Jewish cultures, medieval, Renaissance, modern, postmodern and Chinese literature. The second part focuses on the place of authorship in literary theory, and on challenges to theorizing literary authorship, such as gender and sexuality, postcolonial and indigenous contexts for writing. Finally, Part III investigates practical perspectives on the topic, with a focus on attribution, anonymity and pseudonymity, plagiarism and forgery, copyright and literary property, censorship, publishing and marketing and

institutional contexts.
