## CONCEPTS AND CASES IN NURSING ETHICS - THIRD EDITION

---

Broadview Press *Concepts and Cases in Nursing Ethics* is a case-based exploration of the core principles of health care ethics applied to nursing. The book is a collaboration between philosopher-ethicist Michael Yeo and nurse-ethicist and educators Anne Moorhouse, Pamela Khan, and Patricia Rodney. It thus combines philosophical and ethical analysis with extensive knowledge and experience in nursing and health care. The book is organized around six main concepts in health care ethics: beneficence, autonomy, truthfulness, confidentiality, justice, and integrity. A chapter is devoted to the elucidation of each of these concepts. In each chapter, historical background and conceptual analysis are supplemented by case studies that exemplify issues and show how the concept applies in health care and nursing practice. In this new edition, the conceptual analysis throughout has been updated and reworked in view of changes in the health care system. In addition, there is a new chapter specifically devoted to recent developments affecting nursing and other health professions. Previous case studies have been modified and new ones added to address current and emerging issues. Although the text focuses mainly on the social and political situation of nursing, the analysis has relevance also for medicine and the allied health professions, and indeed for anyone working in the health system.

## APPLIED ETHICS FOR ENTREPRENEURIAL SUCCESS: RECOMMENDATIONS FOR THE DEVELOPING WORLD

---

## 2018 GRIFFITHS SCHOOL OF MANAGEMENT ANNUAL CONFERENCE (GSMAC) ON BUSINESS, ENTREPRENEURSHIP AND ETHICS

---

Springer This proceedings volume examines the impact of ethics on business and entrepreneurship predominantly from the Romanian perspective. Featuring selected contributions from the 2018 Griffiths School of Management Annual Conference (GMSAC) on Business, Entrepreneurship and Ethics, this book investigates the impact of different social phenomena have upon the understanding and applicability of entrepreneurship and ethics, providing lessons for emerging economies. In emerging economies, entrepreneurship is often times associated with a negative image and entrepreneurs are seen in an unfavorable light. This is due in part to the fact that from a superficial perspective, entrepreneurial behavior does not always amalgamate well with ethical behavior. Entrepreneurship is often perceived as "success at all costs" with little regard to the interest of stakeholder and, sometimes, even the law. On the other hand, ethics are often viewed as metaphysical, having little to do with business, organizational and financial success. In actuality, ethical decisions are a significant part of an organization and ethical behaviors impact organizational culture. Beyond the moral aspects associated with business ethics, companies that practice ethical demeanor are more profitable because investors, employees and consumers seek out companies that engage in fair practices. Featuring contributions on topics such as medical ethics, business education, consumer behavior and governance, this book provides invaluable research and tools for students, professors, practitioners and policy makers in the field s of business, management, public administration and sociology.

## PALLIATIVE CARE NURSING

---

### QUALITY CARE TO THE END OF LIFE, FIFTH EDITION

---

Springer Publishing Company "This 5th edition is an important achievement; it is a symbol of commitment to the field of palliative nursing, where we have been and where we are going." - Betty Rolling Ferrell, PhD, MA, FAAN, FPCN, CHPN From the Foreword The aging population has only grown since the first edition of this comprehensive and seminal publication nearly 20 years ago. Based on the need to humanize rather than medicalize the illness experience for patients, this text delves into palliative care beyond the specific diseases affecting the patient. Instead, content focuses on the whole person and family. Palliative patients struggle with chronic, debilitating, and painful conditions, and grapple with the fact that life as they knew it has already passed away. Families and friends reciprocally suffer, not knowing how to help and therefore become the secondary victims of the disease. This is not the challenge of a lone nurse, or a single physician, therapist, or social worker. Rather, palliative and hospice care requires the expertise and unique roles of an interprofessional team to help the patient and family strengthen their resilience, continue to find meaning and purpose in life, and cure what can be cured. Palliative Care Nursing, Fifth Edition, delivers advanced empirical, aesthetic, ethical and personal knowledge. This new edition brings an increased focus on outcomes, benchmarking progress, and goals of care. It expounds upon the importance of the cross-disciplinary collaboration introduced in the previous edition. Every chapter in Sections I, II, and III includes content written by a non-nursing member of the interprofessional team. Based on best-evidence and clinical practice guidelines, this text presents comprehensive, targeted interventions responsive to the needs of palliative and hospice patients and family. Each chapter contains compassionate, timely, appropriate, and cost-effective care for diverse populations across the illness trajectory. Key Features The expanded new edition offers current, comprehensive, one-stop source of highly-relevant clinical information on palliative care Life-span approach: age-appropriate nursing considerations (e.g. geriatric, pediatric and family) Includes disease-specific and symptom-specific nursing management chapters Promotes a holistic and interdisciplinary approach to palliative care Offers important legal, ethical and cultural considerations related to death and dying Case Studies with Case Study Conclusion in each clinical chapter New to The Fifth Edition: An expanded chapter on Palliative Care incorporates most up to date scope and standards, information on Basic and Advanced HPNA certification, self-reflection and self-care for nurses. A chapter on Interprofessional Collaboration Instructor Resources: Power points and Test bank
