Million Cars for Billion People** [One Point Six Technology Pvt Ltd](#) **Can one car transform a nation? The Ford Model T did do so a century ago when it replaced the horse, brought about a revolution in agriculture, became a stimulus to urbanization that eventually changed the landscape of America. Though the Maruti 800, the Tata Indica, the Hyundai Santro and the Maruti Alto, became engines of growth for India, these cars neither drove away the cow nor changed the way Indians travelled. Tata's Nano was expected to change all that and become the ultimate people's car, capturing the imagination of the middle class across nations and cultures. In spite of its petite dimensions, the Nano was meant to stand tall. Yet it did not. What caused it to fail and fall from grace despite being lauded as the 'right product at the right time' and 'the most significant new car since the Ford Model T was introduced 100 years ago'? But is it really all over or is there still hope for India's 'little wonder'? What will the people's cars of tomorrow be like? A Million Cars for a Billion People delves into the questions, concerns and doubts, as well as the many misconceptions and myths, that have gathered momentum over the years about India's automotive history and the industry's mission to create a true 'people's car'. The very first cars that came to India; the early beginnings of the industry; the nascent history of the automobile across nations like Germany, France, US, the UK, Italy, Japan and South Korea, is narrated with authority and charm, from the viewpoint of the quest for the ultimate people's car. The long-term effects of these foods on human health and ecology are still unknown, and public concern has been steadily intensifying. This new book from the Council for Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and public health advocates. Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, of lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it. The Book of L** [Springer Science & Business Media](#) **This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong**

spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant. Slave Stealers True Accounts of Slave Rescues: Then and Now Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, Incidents in the Life of a Slave Girl, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all. Fairies Afield Book Excerpt: ... But she said nothing of the sort of mystery connected with the powder; some instinct prevented her doing so. Nor did she tell that but a little of it remained, or that their stock of rose-leaves would soon be exhausted."Who knows what may happen before that?" she reflected, and the words of Linde's dream-visitor recurred to her, "Three times, and then ask the robin." Dame Barbara was quite satisfied and greatly delighted."Here," she said, fumbling for her substantial purse, "a groat for two ounces of it, did you say? No, a half-groat only? My dear, you'll have to raise your prices if the perfume is so excellent! Well to begin with, give me the four ounces straight away, and here's a half-groat over and above what it all comes to--dried leaves and fresh ones and flowers, all together--just the tiny silver piece for luck, you know..."
