John Wiley & Sons Expert advice in a back-to-basics handbook on how to beat the market-the classic way In *Investment Psychology Explained* Martin J. Pring, one of the most respected independent investment advisors in the world, argues that in the revisionist '90s there are no quick, magical paths to market success. You'll see, with the help of numerous illustrative examples, what goes into making an effective investor-and how you can work toward achieving that successful profile.

## Jesse Livermore's Methods of Trading in Stocks

[Colchis Books](#) Livermore started trading in securities when he was fourteen years old. He made his first thousand when a mere boy. He has practiced every device known to the active speculator, studied every speculative theory, and dealt in about every active security listed on the New York Stock Exchange. He has piled up gigantic fortunes from his commitments, lost them, digested, started all over again—and piled up new fortunes. He has changed his market position in the twinkling of an eye—sold out thousands of shares of long stock, and gone short of thousands of shares more on a decision which required reading only the one word, "but," in a lengthy ticker statement. If his later experiences were not enough to catch the public fancy, Livermore would have won it by his greatest feat of all: beating the bucket shops. Beating the cheaters, in fact, was Livermore's pet plan after things had gone against him and he was forced to start anew on a small-lot basis.

## Hav

[New York Review of Books](#) A New York Review Books Original *Hav* is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century *Hav* is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

## Red Notice

### A True Story of High Finance, Murder, and One Man's Fight for Justice

[Simon and Schuster](#) *Freezing Order*, the follow-up to *Red Notice*, is available now! "[Red Notice] does for investing in Russia and the former Soviet Union what *Liar's Poker* did for our understanding of Salomon Brothers, Wall Street, and the mortgage-backed securities business in the 1980s. Browder's business saga meshes well with the story of corruption and murder in Vladimir Putin's Russia, making *Red Notice* an early candidate for any list of the year's best books" (*Fortune*). "Part John Grisham-like thriller, part business and political memoir." —*The New York Times* This is a story about an accidental activist. Bill Browder started out his adult life as the Wall Street maverick whose instincts led him to Russia just after the breakup of the Soviet Union, where he made his fortune. Along the way he exposed corruption, and when he did, he barely escaped with his life. His Russian lawyer Sergei Magnitsky wasn't so lucky: he ended up in jail, where he was tortured to death. That changed Browder forever. He saw the murderous heart of the Putin regime and has spent the last half decade on a campaign to expose it. Because of that, he became Putin's number one enemy, especially after Browder succeeded in having a law passed in the United States—The Magnitsky Act—that punishes a list of Russians implicated in the lawyer's murder. Putin famously retaliated with a law that bans Americans from adopting Russian orphans. A financial caper, a crime thriller, and a political crusade, *Red Notice* is the story of one man taking on overpowering odds to change the world, and also the story of how, without intending to, he found meaning in his life.

## Conradology

### A celebration of the work of Joseph Conrad

[Comma Press](#) A merchant sailor works for a decade, captaining a yacht up and down the coasts of Malaysia, in the hope that his crooked employer will stay true to a promise... Years after a pandemic sweeps across Europe, wiping out its all-white population, a pilgrim returns to his Polish birthplace in search of the only other non-white kid he knew at school... An inscrutable hotelier loses his composure when a secret passage is discovered in his hotel, leading to a mysterious room and a previously hidden existence... Born in what is now Ukraine to Polish parents, naturalised as a British citizen, and schooled on the high seas of international commerce, Joseph Conrad was a true citizen of the world. His novels bore witness to the dehumanising repercussions of empire, explored a world in which state-sponsored terrorism ruined individuals' lives, and pioneered complex narrative structures and subjective points-of-view in what was to become the first wave of literary modernism. To mark his 160th birthday, 14 authors and critics from Britain, Poland and elsewhere have come together to celebrate his legacy with new pieces of fiction and non-fiction. Conrad felt that the writer's task was to offer 'that glimpse of truth for which you have forgotten to ask.' In an age of increasing isolationism, these celebrations remind you of the value of such glimpses.

## The Death of Wealth

### The Economic Fall of the West

[Advin Books](#) *The Economic Fall of the West Question: what is the next economic game changer? Answer: The Death of Wealth.* Market guru Clem Chambers dissects the global economy and the state of the financial markets and lays out the evidence for the death of wealth. *Financial meltdown* *The Death of Wealth* flags up the milestones on the route towards impending financial disaster. From the first tentative signs of recovery in the UK and US stock markets at the start of 2012, to the temporary drawing back from the edge of the Fiscal Cliff at the end, the book chronicles the trials and tribulations of the markets throughout the year. Collecting together articles and essays throughout the last twelve months along with extensive new analysis for 2013, *The Death of Wealth* allows us to look at these tumultuous events collectively and draw a strong conclusion about what the future holds. A tumultuous year for the global economy 2012 started with the US economy showing signs of recovery, and European financial markets recovering some of the ground lost during the euro crisis. It ended with Obama's re-election and the deal that delayed the plunge off the fiscal cliff by a few months. In between, the eurozone crisis continued, but none of the affected countries actually left the eurozone; quantitative easing tried to turn things around with the consequences of these "unorthodox" actions yet unknown; and the equity markets after the mid-year correction became strongly bullish. Predicting the economic fall of the west *The Death of Wealth* takes you through the events of 2012 month by month, with charts showing the movements of the FTSE 100, the NASDAQ COMPX and the SSE COMPX throughout the year. With an introduction by renowned market commentator and stock tipster Tom Winnifrith and a summary by trading technical analyst Zak Mir, this collection chronicles the rocky road trip the financial systems of the world have been on, and predicts the ultimate destination: the death of wealth as we know it.

### Studies in Stock Speculation

### With Additional Material by Richard D. Wyckoff and Other Authors

*Rollo Tape (Richard D. Wyckoff) examines the intermediate and long swings of the stock market in this 1909-1911 sequel to "Studies in Tape Reading." The approach is based on the idea of interpreting the trend of the market by analyzing the action of prices obtained from a daily newspaper and recorded on charts. Studies in Stock Speculation contains 27 chapters in which Wyckoff describes how to analyze the market trend, interpret line and figure charts, rank and classify stocks, understand the logic of speculation, and select profitable investments. He also gives an overview of several general methods of trading, stages of the big swings, judging reactions, and more. Supplemental articles and graphs provide expanded breadth and detail for many topics of the main text. Some of the titles include: "A Method of Forecasting the Stock Market" (ranking stocks based on price and earnings); "A Specialist in Panics" and its sequel; "A Sign of Bull Moves"; "A Stop Order Method" of mechanical trading; and "The Composite Man." 27 chapters, 13 additional articles, reader inquiries, supplemental graphs of market averages and individual stocks, notes, a period glossary, and index.*
