International Economic Actors and Human Rights *Routledge* In noting that the actions of entities other than states in the economic arena can and often do have a profound effect on human rights, this book poses the question as to how international human rights law can and should address that situation. This book takes three very different categories of international actor – the World Trade Organization, the international financial institutions (World Bank and IMF) and multinational enterprises – and analyses the interaction of each category with human rights, in each case analysing the interaction of the different fields of law and seeking to identify a role for international human rights law. Adam McBeth concludes that each of the selected international economic actors can and should be considered to operate within a holistic system of international law, including human rights obligations, but that changes in the operations and the accountability mechanisms for each actor are necessary for the practical implementation of that approach. While written from a human rights perspective, the underlying theme of the book is one of engagement and harmonisation rather than condemnation. It provides valuable insight for those who approach this topic from a background of international trade law, commercial law or general international law, just as much as those who have a human rights background. International Economic Actors and Human Rights will be of great interest to those studying or working in any field of international economic law, as well as human rights scholars and practitioners.

Power, Politics, Law: International Law and State Behaviour During International Crises *BRILL* This volume addresses the question as to where international law fits into the making and implementation of foreign policy during an international crisis in which a State is considering and / or may actually use force. Empirical literature on the law-State behaviour relationship during international crises has not been able to answer this question adequately. The limitations of existing empirical literature are identified as stemming from the limitations of existing positivist, realist and functionalist theoretical explanations of the law-State behaviour relationship. These theoretical approaches, which underpin existing empirical literature on international crises, assume that international law matches what is referred to in this book as its 'rule-book' image. This is the notion of international law as a finite set of objective, politically neutral, rules that can be applied so as to distinguish objectively between legal and illegal action. The rule-book image of international law does not match reality, but the assumption that it is true underpins both theoretical literature and references to international law in political rhetoric. The rule-book image and the reality of international law have been reconciled within the theory of International law as Ideology (ILI) as developed by Shirley Scott. This book hypothesises that an ILI perspective offers a better explanation of the law-State behaviour relationship during international crises than rival explanations grounded in positivism, realism or functionalism. Four case studies of State behaviour—of the US, the Soviet Union and the PRC during the Korean War (1950-1953), of the US and UK during the Suez crisis (1956), of the US and the Soviet Union during the Cuban Missile Crisis (1962) and of the US and an alliance of Latin American States during the Dominican Republic crisis (1965)—are used to test the hypothesis. The findings confirm the greater explanatory efficacy of ILI and demonstrate that the significance of international law to foreign policy decision-making during international crises is more than that of deterring the use of force as is assumed by rival theoretical approaches grounded in the rule-book image of international law. International law is shown to serve as a vehicle for inter-State competition during international crises.

The Institutional Veil in Public International Law International Organisations and the Law of Treaties *Bloomsbury Publishing* This book deals with the nature of international organisations and the tension between their legal nature and the system of classic, state-based international law. This tension is important in theory and practice, particularly when organisations are brought under the rule of international law and have to be conceptualised as legal subjects, for example in the context of accountability. The position of organisations is complicated by what the author terms 'the institutional veil', comparable to the corporate veil found in corporate law. The book focuses on the law of treaties, as this pre-eminently 'horizontal' branch of international law brings out the problem particularly clearly. The first part of the book addresses the legal phenomenon of international organisations, their legal features as independent concepts, the history of international organisations and of legal thought in respect of them, and the development of contemporary law on international organisations. The second part deals with the practice of international organisations and treaty-making. It discusses treaty-making practice within organisations, judicial practice in interpretation of organisations' constitutive treaties, and the practice of treaty-making by organisations. The third and final part analyses the process by which international organisations have been brought under the rule of the written law of treaties, offering a practical application of the conceptual framework as previously set out. Part three is at the same time an analytic overview of the drafting history of the 1986 Vienna Convention on the Law of Treaties between States and International Organizations or between International Organizations. This is a profound and penetrating examination of the character of international organisations and their place in international law, and will be an important source for anyone interested in the future role of organisations in the international legal system.

Stabilization Clauses in International Investment Law A Sustainable Development Approach *Springer* This book analyzes the tension between the host state's commitment to provide regulatory stability for foreign investors – which is a tool for attracting FDI and generating economic growth – and its evolving non-economic commitments towards its citizens with regard to environmental protection and social welfare. The main thesis is that the 'stabilization clause/regulatory power antinomy,' as it appears in many cases, contradicts the content and rationale of sustainable development, a concept that is increasingly prevalent in national and international law and which aims at the integration and balancing of economic, environmental, and social development. To reconcile this antinomy at the decision-making and dispute settlement levels, the book employs a 'constructive sustainable development approach,' which is based on the integration and reconciliation imperatives of the concept of sustainable development as well as on the application of principles of law such as non-discrimination, public purpose, due process, proportionality, and more generally, good governance and rule of law. It subsequently re-conceptualizes stabilization clauses in terms of their design (ex-ante) and interpretation (ex-post), yielding stability to the benefit of foreign investors, while also mitigating their negative effects on the host state's power to regulate.

International Investment Law and the Right to Regulate A human rights perspective *Routledge* The book considers the ways in which the international investment law regime intersects with the human rights regime, and the potential for clashes between the two legal orders. Within the human rights regime states may be obligated to regulate, including a duty to adopt regulation aiming at improving social standards and conditions of living for their population. Yet, states are increasingly confronted with the consequences of such regulation in investment disputes, where investors seek to challenge regulatory interferences for example in expropriation claims. Regulatory measures may for instance interfere with the investment by imposing conditions on investors or negatively affecting the value of the investment. As a consequence, investors increasingly seek to challenge regulatory measures in international investment arbitration on the basis of a bilateral investment treaty. This book sets out the nature and the scope of the right to regulate in current international investment law. The book examines bilateral investment treaties and ICSID arbitrations looking at the indicative parameters that are granted weight in practice in expropriation claims delimiting compensable from non-compensable regulation. The book places the potential clash between the right to regulate and international investment law within a theoretical framework which describes the stability-flexibility dilemma currently inherent within international law. Lone Wandahl Mouyal goes on to set out methods which could be employed by both BIT-negotiators and adjudicators of investment disputes, allowing states to exercise their right to regulate while at the same time providing investors with legal certainty. The book serves as a valuable tool, an added perspective, for academics as well as for practitioners dealing with aspects of international investment law.

Reciprocity in International Law Its impact and function *Routledge* In international relations, reciprocity describes an environment in which States support one another for short- or long-term advantage through the balancing of rights, duties and interests. This book examines reciprocity in the context of international law. It considers the role reciprocity plays in the creation and development of international law as well as in the interpretation and application of international law. The book illuminates the reciprocal framework of international law and international relations by examining the role reciprocity plays in different types of States' obligations, including bilateral, bilateralisable multilateral, non-bilateralisable multilateral and obligations erga omnes. The book examines how reciprocity is intertwined with the principle of equality, as the rights and obligations of States are equal irrespective of size and economic or military strength, and the beneficial effects of reciprocity in creating stability and cooperation amongst States.

Competition Law, Technology Transfer and the TRIPS Agreement Implications for Developing Countries *Edward Elgar Publishing* The book deals with a difficult subject with an assured touch and will be a valuable text for postgraduate students, policy-makers and practitioners. *European Intellectual Property Review* This is the first ever book that addresses the important issue of the competition law, intellectual property and trade interface in a developing world context. The book's unique contribution is a set of comparative case studies on this complex interface. D. Daniel Sokol, University of Florida Levin College of Law, US The book investigates competition law and international technology transfer in the light of the TRIPS Agreement and the experience of both developed and developing countries. On that basis, it draws relevant implications for developing countries. Tu Thanh Nguyen argues that technology transfer-related competition law should be globalized appropriately for the needs of local contexts, while intellectual property rights (IPR) are globalized. The book reveals that developing countries, according to the TRIPS Agreement, have the right to use domestic competition law to promote access to

technology in order to protect national interests and consumer welfare. However, competition law is antitrust. It is neither anti-IPR nor anti-trade. The author finds that developing countries with limited competition law resources should set realistic priorities for the control of technology transfer-related anti-competitive practices. They can reasonably apply and adapt relevant regulations, decisions and judgments from developed country jurisdictions to their own circumstances. *Competition Law, Technology Transfer and the TRIPs Agreement* is a timely resource for postgraduate students, practitioners, and scholars in international competition law, IPR, and technology transfer. Policymakers in the field of technology transfer-related competition law/policy, especially in developing countries, will also find this book invaluable.
