USER UNFRIENDLY

CONSUMER STRUGGLES WITH PERSONAL TECHNOLOGIES, FROM CLOCKS AND SEWING MACHINES TO CARS AND COMPUTERS

JHU Press We've all been there. Seduced by the sleek designs and smart capabilities of the newest gadgets, we end up stumped by their complicated set-up instructions and exasperating error messages. In this fascinating history, Joseph J. Corn maps two centuries of consumer frustration and struggle with personal technologies. Aggravation with the new machines people adopt and live with is as old as the industrial revolution. Clocks, sewing machines, cameras, lawn mowers, bicycles, electric lights, cars, and computers: all can empower and exhilarate, but they can also exact a form of servitude. Adopters puzzle over which type and model to buy and then how to operate the device, diagnose its troubles, and meet its insatiable appetite for accessories, replacement parts, or upgrades. It intrigues Corn that we put up with the frustrations our technology thrusts upon us, battling with the unfamiliar and climbing the steep learning curves. It is this ongoing struggle, more than the uses to which we ultimately put our machines, that animates this quizzical study. Having extensively researched owner's manuals, computer user-group newsletters, and how-to literature, Corn brings a fresh, consumer-oriented approach to the history of technology. User Unfriendly will be valuable to historians of technology, students of American culture, and anyone interested in our modern dependency on machines and gadgets.

to help organizations monitor their environments across computers, network, and storage infrastructures while maintaining efficient and effective service levels across their applications. Provides intermediate and advanced coverage of all aspects of Systems Center 2012 Operations Manager, including designing, planning, deploying, managing, maintaining, and scripting Operations Manager Offers a hands-on approach by providing many real-world scenarios to show you how to use the tool in various contexts Anchors conceptual explanations in practical application Mastering System Center 2012 Operations Manager clearly shows you how this powerful server management tool can best be used to serve your organization's needs.

CHRYSLER'S TURBINE CAR

THE RISE AND FALL OF DETROIT'S COOLEST CREATION

Chicago Review Press Offering a behind-the-scenes look into the world of automotive research and development in the 1960s, this engaging narrative traces the birth of Chrysler's alternative "jet" car and reveals the story behind its sudden and mysterious demise. Relying on extensive research and firsthand accounts from surviving members of the turbine car program—including the metallurgist who created the exotic metals for the engine and the test driver who drove it at Chrysler's proving grounds—this chronicle documents the bold development of an automobile with a jet turbine engine. In addition to running well on virtually any flammable liquid—including kerosene, vodka, heating oil, and Chanel N°5 perfume—the pioneering engines had one fifth the number of moving parts and required less maintenance than conventional engines. Despite the fleet's amazing performance over millions of miles by test drivers, Chrysler pulled the plug on the project and crushed almost all of the cars. The reasons behind the surprising end to the jet car fleet are finally explained here.

THE TYPEWRITER REVOLUTION: A TYPIST'S COMPANION FOR THE 21ST CENTURY

The Countryman Press The connoisseur's guide to the typewriter, entertaining and practical What do thousands of kids, makers, poets, artists, steampunks, hipsters, activists, and musicians have in common? They love typewriters—the magical, mechanical contraptions that are enjoying a surprising second life in the 21st century, striking a blow for self-reliance, privacy, and coherence against dependency, surveillance, and disintegration. The Typewriter Revolution documents the movement and provides practical advice on how to choose a typewriter, how to care for it, and what to do with it—from National Novel Writing Month to letter-writing socials, from type-ins to typewritten blogs, from custom-painted typewriters to typewriter tattoos. It celebrates the unique quality of everything typewriter, fully-illustrated with vintage photographs, postcards, manuals, and more.

COMPUTERS IN MECHANICAL ENGINEERING, CIME.

MANUAL OF SIMULATION IN HEALTHCARE

Oxford University Press, USA Medical simulation is a relatively new science that is achieving respectability among healthcare educators worldwide. Simulation and skills centres have become established to integrate simulation into mainstream education in all medical, nursing, and paramedical fields. Borrowing from the experience and methodologies of industries that are using simulation, medical educators are grappling with the problem of rapidly acquiring the skills and techniques required to implement simulation programmes into established curricula. This book assists both novice and experienced workers in the field to learn from established practitioners in medical simulation. Simulation has been used to enhance the educational experience in a diverse range of fields; therefore a wide variety of disciplines are represented. The book begins with a section on the logistics of establishing a simulation and skills centre and the inherent problems with funding, equipment, staffing and course development, and promotion. Section two deals with simulators and related training devices that are required to equip a stand-alone or institution-based centre. The features, strengths, and weaknesses of training devices are presented to help the reader find the appropriate simulator to fulfil their training requirements. There is a guide to producing scenarios and medical props that can enhance the training experience. The third section covers adult education and it reviews the steps required to develop courses that comply with 'best practice' in medical education. Teaching skills, facilitating problem-based learning groups and debriefing techniques are especially important to multidisciplinary skills centres that find themselves becoming a centre for medical education. The manual concludes with guides for the major specialties that use simulation, including military, paediatrics, CPR and medical response teams, obstetrics, and anesthesia.

LAUDATO SI'

ON THE CARE OF THE COMMON HOME

Le vie della Cristianità Laudato Si 'is Pope Francis' second encyclical which focuses on the theme of the environment. In fact, the Holy Father in his encyclical urges all men and women of good will, the rulers and all the powerful on earth to reflect deeply on the theme of the environment and the care of our planet. This is our common home, we must take care of it and love it - the Holy Father tells us - because its end is also ours.
