Kurt Adler, former conductor and chorus master of the Metropolitan Opera, provides a comprehensive guide to musical accompanying and coaching, based in his extensive experience, which will be helpful, if not indispensable, to music teachers, students, coaches, accompanists, orchestral and choral conductors, and performing vocal and instrumental artists. The first part of the book gives the historical and technical background of the subject and explains in detail the mechanics of string instruments, piano, celeste, organ, harmonium, and voice. The next section offers a thorough guide to the singing diction of five languages— Italian, Latin, French, German, and English. The author continues with a discussion of the elements of musical style, describing, with the use of ample musical illustrations, tempo, rhythm, dynamics, phrasing and articulation, and ornamentation. This section closes with an analysis of the German lied style and the French art song style. Mr. Adler goes on to synthesize the various elements of accompanying and coaching. He stresses the importance of psychological and spiritual rapport between accompanists and artist and shows ways of achieving this.

He explains the differences and similarities among opera, oratorio, and song coaching. In a section on program arranging, he offers advice about planning concerts of various kinds, citing examples of programs given by outstanding artists. He writes about particular aspects of accompanying — self accompanying, the difference between piano accompanying and soloistic piano playing, and accompanying for singers, instrumentalists, and dancers. In conclusion, he describes the qualities of an ideal accompanist and the rewards derived from excellence in performance. University and college music departments, schools of music, choral groups, voice teachers, singers, pianists, and other musicians will find the book of inestimable value, either as a text or as a reference work. It will be especially helpful to pianists who aspire to become accompanists. *The Art of Accompanying and Coaching* Springer Science & Business Media

In Training for Catastrophe, author Lindsay Thomas shows how our security regime reimagines plausibility to focus on unlikely and even unreal events rather than probable ones. With an in-depth focus on preparedness (a pivotal, emergent national security paradigm since 9/11) she explores how fiction shapes national security. Thomas finds fiction at work in unexpected settings, from policy documents and workplace training manuals to comics and video games. Through these texts—as well as plenty of science fiction—she examines the philosophy of preparedness, interrogating the roots of why it asks us to treat explicitly fictional events as real. Thomas connects this philosophical underpinning to how preparedness plays out in contemporary politics, emphasizing how it uses aesthetic elements like realism, genre, character, and plot to train people both to regard some disasters as*

normal and to ignore others. Training for Catastrophe makes an important case for how these documents elicit consent and compliance. Thomas draws from a huge archive of texts—including a Centers for Disease Control comic about a zombie apocalypse, the work of Audre Lorde, and the political thrillers of former national security advisor Richard Clarke—to ask difficult questions about the uses and values of fiction. A major statement on how national security intrudes into questions of art and life, *Training for Catastrophe* is a timely intervention into how we confront disasters.

The Routledge Companion to Dramaturgy *Routledge*
Dramaturgy, in its many forms, is a fundamental and indispensable element of contemporary theatre. In its earliest definition, the word itself means a comprehensive theory of "play making." Although it initially grew out of theatre, contemporary dramaturgy has made enormous advances in recent years, and it now permeates all kinds of narrative forms and structures: from opera to performance art; from dance and multimedia to filmmaking and robotics. In our global, mediated context of multinational group collaborations that dissolve traditional divisions of roles as well as unbend previously intransigent rules of time and space, the dramaturg is also the ultimate globalist: intercultural mediator, information and research manager, media content analyst, interdisciplinary negotiator, social media strategist. This collection focuses on contemporary dramaturgical practice, bringing together contributions not only from academics but also from prominent working dramaturgs. The inclusion of both means a strong level of engagement with current issues in dramaturgy, from the impact of social media to the ongoing centrality of interdisciplinary and intermedial processes. The contributions survey the field through eight main lenses: world dramaturgy and global perspective dramaturgy as function, verb and skill dramaturgical leadership and season planning production dramaturgy in translation adaptation and new play development interdisciplinary

dramaturgy play analysis in postdramatic and new media dramaturgy social media and audience outreach. Magda Romanska is Visiting Associate Professor of Slavic Languages and Literatures at Harvard University, Associate Professor of Theatre and Dramaturgy at Emerson College, and Dramaturg for Boston Lyric Opera. Her books include *The Post-Traumatic Theatre of Grotowski and Kantor* (2012), *Boguslaw Schaeffer: An Anthology* (2012), and *Comedy: An Anthology of Theory and Criticism* (2014). *Routledge International Handbook of Research Methods in Digital Humanities* *Routledge* This book draws on both traditional and emerging fields of study to consider what a grounded definition of quantitative and qualitative research in the Digital Humanities (DH) might mean; which areas DH can fruitfully draw on in order to foster and develop that understanding; where we can see those methods applied; and what the future directions of research methods in Digital Humanities might look like. Schuster and Dunn map a wide-ranging DH research methodology by drawing on both 'traditional' fields of DH study such as text, historical sources, museums and manuscripts, and innovative areas in research production, such as knowledge and technology, digital culture and society and history of network technologies. Featuring global contributions from scholars in the United Kingdom, the United States, Europe and Australia, this book draws together a range of disciplinary perspectives to explore the exciting developments offered by this fast-evolving field. *Routledge International Handbook of Research Methods in Digital Humanities* is essential reading for anyone who teaches, researches or studies Digital Humanities or related subjects. *Reverse Acronyms, Initialisms and Abbreviations Dictionary: a Companion Volume to Acronyms, Initialisms and Abbreviations Dictionary A Companion to Motion Pictures and Public Value* *John Wiley & Sons* A singular collection of original essays exploring the varied intersections of motion pictures and public value *A Companion to Motion Pictures and Public Value* presents a cross-disciplinary investigation of the past, present, and possible future contributions of the moving image to the public good.
