THE LITTLE BOOK OF TRIKES

Veloce Publishing Ltd Motor trikes have been around since the dawn of motoring, with many starting out as utility vehicles or prototypes of cars. But trikes haven't died out or become mere relics of motoring history – companies all over the world still produce them today, and many will convert a motorcycle into a trike. Trikes are not only huge fun, but can also be a lifestyle choice. They are as diverse as the people who ride them, and this book illustrates the vast range of machines available. The reader will discover a plethora of trike designs and layouts from the late 19th century to the present day. Some influential designs include Piaggio's three wheeled vehicles, the Morgan three wheeler, and the Harley-Davidson Servicar. PRINCIPLES OF ENGINEERING THERMODYNAMICS, SI EDITION

Cengage Learning Master the fundamentals of thermodynamics and learn how to apply these skills in engineering practice today with Reisel's *PRINCIPLES OF ENGINEERING THERMODYNAMICS, SI, 2nd Edition*. This edition's informal writing style helps make abstract concepts easier to understand. In addition to mastering fundamental principles and applications, you explore the impact of different system parameters on the performance of devices and processes. For example, you study how changing outlet pressure in a turbine changes the power produced or how the power requirement of a compressor varies with inlet temperature. This unique approach strengthens your understanding of how different components of thermodynamics interrelate, while demonstrating how you will use thermodynamics in your engineering career. You also learn to develop computer-based models of devices, processes and cycles as well as practice using internet-based programs and computer apps to find thermodynamic data, exactly like today's practicing engineers. A HOUSE TO REMEMBER

10 RILLINGTON PLACE

Mereo Books, mereobook, mereobooks What happened at 10 Rillington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In *A House To Remember*, she explains why.

GLOBAL STATUS REPORT ON ROAD SAFETY 2018

World Health Organization The Global Status Report on Road Safety 2018, launched by WHO in December 2018, highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years. The burden is disproportionately borne by pedestrians, cyclists and motorcyclists, in particular those living in developing countries. The report suggests that the price paid for mobility is too high, especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives.

ENGINEERING FLUID MECHANICS

This comprehensive introduction to the field of fluid mechanics does not restrict its emphasis to a particular discipline. The first part of the book introduces basic principles such as pressure variation, the momentum principle, and energy equations. The second part uses these principles in general applications. This edition presents expanded coverage of civil engineering topics. It continues to follow the control-volume approach established in earlier editions. It also includes almost all steps in the derivations, along with complete word descriptions, and rigorous and clear derivation of equations.
