Reglamento de distribución y utilización de combustibles gasosos RCG

Real Decreto 919-2006 de 28 de julio

Editorial Paraninfo

Seguridad Industrial

FC EDITORIAL En España, sobre todo desde nuestra incorporación a la Unión Europea, la Reglamentación de Seguridad Industrial ofrece una amplia y variada cantidad de normas técnico-legales que, sin duda, han supuesto un aumento importante de los niveles de seguridad en la actividad industrial, pero también una complejidad creciente para el personal especializado (jefes de mantenimiento, directores de ingeniería, y/o similares) que debe responsabilizarse de su aplicación y control. Con este libro lo que pretendemos es, precisamente, desbrozar y aclarar la citada normativa de aplicación, simplificándola, esquematizándola y poniendo a disposición de los lectores una información que, sin olvidar el necesario rigor que esta materia precisa, nos permita presentar la Reglamentación de Seguridad Industrial y su aplicación de la forma más sencilla posible. Los destinatarios de este libro no son solamente los responsables y el personal de mantenimiento, servicios generales y/o ingeniería de las industrias, sino también todos aquellos otros profesionales que, de una manera u otra, tienen la necesidad de conocer esta normativa, principalmente por razones de evaluación del cumplimiento legal, como pueden ser los técnicos de prevención y medio ambiente.

Seguridad Industrial : puesta en servicio, mantenimiento e inspección de equipos e instalaciones

ESIC

Instalaciones domésticas de gas

Ediciones Experiencia **El objeto de esta obra son las instalaciones domésticas de gas, que forman parte del Reglamento técnico de distribución y utilización de combustibles gaseosos y sus instrucciones técnicas complementarias (RD 919/2006, de 28 de julio). Dirigida principalmente a los profesionales de este tipo de instalaciones, el libro pretende ayudarles en la correcta aplicación de esta normativa, mediante una rápida información de los elementos legales y administrativos, relevantes en materia de seguridad, aplicables a todas las instalaciones de gas y, en particular a las domésticas, todo ello sin ánimo de sustituir el texto reglamentario publicado en el BOE, que es el único completo y el que da fe.**

Tecnología óptica

Universitat Politècnica de Catalunya. Iniciativa Digital Politècnica **Este libro está dirigido básicamente a los estudiantes de tecnología óptica. Su contenido y nivel lo hacen adecuado para los profesionales de óptica y optometría, puesto que se trata de la primera obra escrita enteramente en castellano que abarca desde los aspectos tecnológicos del diseño y la fabricación de monturas y lentes oftálmicas hasta los aspectos implicados en la adaptación de las prescripciones optométricas a los usuarios. El presente texto pretende ofrecer al lector una visión amplia de los medios ópticos que se utilizan para compensar las disfunciones visuales. El objetivo de la labor del óptico-optometrista es solucionar los problemas visuales. Tras el examen optométrico debe realizarse la prescripción, y para ello es necesario conocer en profundidad las características y prestaciones de los distintos medios de compensación óptica. Este libro pretende ser una herramienta útil para abordar las cuestiones que surgen en la adaptación de una prescripción optométrica, desde la elección de la montura como elemento de soporte de las lentes hasta el proceso de selección, montaje, y adaptación**

de los distintos tipos de lentes oftálmicas.

Memoria de la Dirección General de Instituciones Penitenciarias

Gestión del montaje y mantenimiento de instalaciones

Editorial Paraninfo Este libro desarrolla los contenidos del módulo profesional de Gestión del Montaje y del Mantenimiento de Instalaciones Eléctricas del Ciclo Formativo de grado superior con el que se obtiene el título de Técnico Superior en Sistemas Electrotécnicos y Automatizados (Real Decreto 1127/2010, de 10 de septiembre), perteneciente a la familia profesional de Electricidad y Electrónica. El texto se ha estructurado en 8 unidades, a lo largo de las cuales se desglosan los contenidos del módulo para mostrar los distintos procesos que intervienen en las tareas de mantenimiento e instalación, y describir las técnicas que pueden emplearse para su gestión. Además, las unidades contienen abundantes ilustraciones y fotografías a color, con el fin de complementar la exposición teórica y acercar la realidad del sector de la instalación y el mantenimiento eléctricos al alumno. Igualmente, se han incluido numerosas cuestiones resueltas, así como actividades orientadas a que este pueda aplicar y ampliar los conocimientos adquiridos. Todas las unidades concluyen con prácticas profesionales en las que el alumno deberá aplicar los conocimientos y las competencias adquiridas a situaciones propias de su futura actividad profesional.

IAEA Safety Glossary

International Atomic Energy Agency **The IAEA Safety Glossary defines and explains technical terms used in the IAEA Safety Standards and other safety related IAEA publications, and provides information on their usage. The 2018 Edition of the IAEA Safety Glossary is a new edition of the IAEA Safety Glossary, originally issued in 2007. It has been revised and updated to take into account new terminology and usage in safety standards issued between 2007 and 2018. The revisions and updates reflect developments in the technical areas of application of the safety standards and changes in regulatory approaches in Member States.**

Manual of Neonatal Care

Lippincott Williams & Wilkins **This edition of the Manual of Neonatal Care has been completely updated and extensively revised to reflect the changes in fetal, perinatal, and neonatal care that have occurred since the sixth edition. This portable text covers current and practical approaches to evaluation and management of conditions encountered in the**

fetus and the newborn, as practiced in high volume clinical services that include contemporary prenatal and postnatal care of infants with routine, as well as complex medical and surgical problems. Written by expert authors from the Harvard Program in Neonatology and other major neonatology programs across the United States, the manual's outline format gives readers rapid access to large amounts of valuable information quickly. The Children's Hospital Boston Neonatology Program at Harvard has grown to include 57 attending neonatologists and 18 fellows who care for more than 28,000 newborns delivered annually. The book also includes the popular appendices on topics such as common NICU medication guidelines, the effects of maternal drugs on the fetus, and the use of maternal medications during lactation. Plus, there are intubation/sedation guidelines and a guide to neonatal resuscitation on the inside covers that provide crucial information in a quick and easy format.

Exponential Organizations

Why new organizations are ten times better, faster, and cheaper than yours (and what to do about it)

Diversion Books Frost & Sullivan's 2014 Growth, Innovation, and Leadership Book of the Year "**EXPONENTIAL ORGANIZATIONS** should be required reading for anyone interested in the ways exponential technologies are reinventing best practices in business." —Ray Kurzweil, Director of Engineering at Google In business, performance is key. In performance, how you organize can be the key to growth. In the past five years, the business world has seen

the birth of a new breed of company—the Exponential Organization—that has revolutionized how a company can accelerate its growth by using technology. An ExO can eliminate the incremental, linear way traditional companies get bigger, leveraging assets like community, big data, algorithms, and new technology into achieving performance benchmarks ten times better than its peers. Three luminaries of the business world—Salim Ismail, Yuri van Geest, and Mike Malone—have researched this phenomenon and documented ten characteristics of Exponential Organizations. Here, in **EXPONENTIAL ORGANIZATIONS**, they walk the reader through how any company, from a startup to a multinational, can become an ExO, streamline its performance, and grow to the next level. "EXPONENTIAL ORGANIZATIONS is the most pivotal book in its class. Salim examines the future of organizations and offers readers his insights on the concept of Exponential Organizations, because he himself embodies the strategy, structure, culture, processes, and systems of this new breed of company." —John Hagel, The Center for the Edge Chosen by Benjamin Netanyahu, Prime Minister of Israel, to be one of Bloomberg's Best Books of 2015

Blanco y negro Architects' Data

Wiley-Blackwell **This is an essential aid in the initial design and planning of a project. The relevant building type is located by a comprehensive index and cross reference system, a condensed commentary covers user requirements, planning criteria, basic dimensions and other considerations of function, siting aspect etc. A system of references based on an extensive bibliography supports the text. In every section plans, sections, site layouts, design details and graphs illustrated key aspects of a building type's design. Most illustrations are dimensioned or scaled - the metric system of measurement is used throughout, and the equivalent in feet/inches can easily be read either off a graphic scale on the page or from the built-in conversion table. The illustrations are international in origin and include both well know and less famous designers. Architects Data is primarily a handbook of building types rather than of construction techniques and details. However its treatment of components (such as doors and windows) and of spaces for building services is extremely thorough, since consideration of this data is an essential element of the planning**

process. The opening pages of basic data on man and his buildings cover critical subjects such as scale, drawing practice, noise, light and space for the same reason. Particular attention has also been paid to the implications of energy conservation, means of escape from fire and the needs of the elderly and the disabled.

Natural Ventilation for Infection Control in Health-care Settings

World Health Organization **This guideline defines ventilation and then natural ventilation. It explores the design requirements for natural ventilation in the context of infection control, describing the basic principles of design, construction, operation and maintenance for an effective natural ventilation system to control infection in health-care settings.**

A History of Limb Amputation

Springer Science & Business Media **This book opens with a unique historical review of natural amputations due to congenital absence, disease, frostbite, animal trauma, and to punishment and ritual. The advent of surgical amputation and its difficulties form a major part of the book, summarising the evolution of the control of haemorrhage and infection, pain relief, techniques, instrumentation, complications, prostheses, results and case histories. Alternative procedures, increasingly important in the last two centuries, are also debated.**

Road Traffic Injury Prevention Training Manual

World Health Organization **Road traffic collisions kill about 1.2 million people around the world every year but they are largely neglected as a health and development issue, perhaps because they are still viewed by many as being beyond**

human control. Efforts to prevent road traffic injuries are hampered by a lack of human capacity. Policy-makers, researchers and practitioners need information on effective prevention measure and on how to develop, implement and evaluate such interventions. There is a need to train more specialists in road traffic injury prevention in order to address the growing problem of road traffic injuries at international levels.

Mini Nutritional Assessment (MNA)

Research and Practice in the Elderly

Karger Medical and Scientific Publishers **This book is the first of a new series which will present the proceedings of the newly established Nestlé Nutrition Workshop Series: Clinical & Performance Programme aimed at adult nutrition. Undernutrition is a common phenomenon in elderly people, and malnutrition reaches significant levels in those being in hospital, nursing homes or home care programs. Consequences of malnutrition often go unrecognised owing to the lack of specific validated instruments to assess nutritional status in frail elderly persons. The Mini Nutritional Assessment (MNA) provides a single, rapid assessment of nutritional status in the elderly of different degrees of independence, allowing the prevalence of protein-energy malnutrition to be determined and to evaluate the efficacy of nutritional intervention and strategies. Easy, quick and economical to perform, it enables staff to check the nutritional status of elderly people when they enter hospitals or institutions and to monitor changes occurring during their stay. Moreover, the MNA is predictive of the cost of care and length of stay in hospital. This publication will be of immense assistance to heads of geriatric teaching units, teachers in nutrition, clinicians general practitioners and dieticians, enabling them to better detect, recognise and start treatment of malnutrition in the elderly.**
