Elsevier Science Limited **Bonded composite repairs are efficient and cost effective means of repairing cracks and corrosion grind-out cavity in metallic structures, and composite structures sustained impact and ballistic damages, especially in aircraft structures. This book grew out of the recent research conducted at the Boeing Company and the Defence Science and Technology Organisation (DSTO, Australia) over the past ten years. Consequently it is predominately a compilation of the work by the authors and their colleagues at these two organizations on the design and analysis of composite repairs. Composite Repair is entirely devoted to the design and analysis of bonded repairs, focusing on the mathematical techniques and analysis approaches that are critical to the successful implementation of bonded repairs. The topics addressed are presentated in a sufficiently self-explanatory manner, and serve as a state-of-the-art reference guide to engineers, scientists, researchers and practitioners interested in the underpinning design methodology and the modelling of composite repairs. The only book devoted entirely to the design and analysis of bonded repairs Focusing on mathematical techniques and analytical methodologies that are critical to the successful implementation of bonded repair A companion reference book to the United States Air Force (USAF) bonded repair guidelines (Guidelines for**

### **A GUIDE TO HISTORIC MARKERS, REVISED AND EXPANDED EDITION**

---

[UNM Press](#) Through New Mexico's Official Scenic Historic Markers we learn about the people, the geological features, and the historical events that have made the Land of Enchantment a place unlike any other. An index to our history, these markers tell an incredible story about our cultures and origins. This revised and expanded edition of Roadside New Mexico provides additional information about these sites and includes approximately one hundred new markers, sixty-five of which document the contribution of women to the history of New Mexico. Now structured alphabetically for easier identification, each essay also offers suggestions of similar Historic Markers to help readers explore each topic further. In addition, Pike includes entries on "Ghost Markers"—those sites missing from the road that still impart significant historical lessons. Roadside New Mexico delivers a useful companion for travelers who want to understand more about the landscapes and inhabitants of the state.

Springer IDT (Intelligent Decision Technologies) seeks an interchange of research on intelligent systems and intelligent technologies which enhance or improve decision making in industry, government and academia. The focus is interdisciplinary in nature, and includes research on all aspects of intelligent decision technologies, from fundamental development to the applied system. It constitutes a great honor and pleasure for us to publish the works and new research results of scholars from the First KES International Symposium on Intelligent Decision Technologies (KES IDT'09), hosted and organized by University of Hyogo in conjunction with KES International (Himeji, Japan, April, 2009). The symposium was concerned with theory, design, development, implementation, testing and evaluation of intelligent decision systems. Its topics included intelligent agents, fuzzy logic, multi-agent systems, artificial neural networks, genetic algorithms, expert systems, intelligent decision making support systems, information retrieval systems, geographic information systems, and knowledge management systems. These technologies have the potential to support decision making in many areas of management, international business, finance, accounting, marketing, healthcare, military applications, production, networks, traffic management, crisis response, and human interfaces.
