#### **SUPPORTING INTEGRATION OF REFUGEE YOUTH**

---

McGill-Queen's Press - MQUP The global refugee crisis is staggering in scope. The United Nations Refugee Agency reported that 79.5 million people were displaced worldwide in 2019, and over half of all displaced persons were under eighteen. As the number of children and teenagers seeking asylum continues to grow, the impact of displacement on a young person's well-being and development over the long term requires further study. In *Finding Safe Harbour* Emily Pelley investigates the current response to refugee youth in Canada by highlighting how Halifax, Nova Scotia, as a mid-sized urban centre, has mobilized services and resources to support young people seeking refuge. Opening with a broad contextual introduction to the global crisis of displacement and the impact of violence and armed conflict on young people, Pelley focuses on the reciprocal adaptation that is required for the long-term integration of displaced youth into the receiving society. A concise and illuminating study on refugee resettlement, *Finding Safe Harbour* concludes with an in-depth discussion of how cities can optimize resilience resources through meaningful engagement with refugee youth.

### **UNIVERSITIES, STAKEHOLDERS AND SOCIAL MISSION**

---

#### **BUILDING COOPERATION THROUGH ACTION RESEARCH**

---

Taylor & Francis Today's universities are confronted with questions about the increasing scale of corporatisation and commercialisation, as well as their decreasing activity in the field of the social mission, i.e., engagement in the real problems of ordinary people, local communities and society at large. As a remedy for this problem, this book proposes using action research as a means of shaping collaboration between universities and their stakeholders, taking into account related benefits, opportunities and challenges. In this context, we understand action research somewhat more broadly, as universities' conducting useful research that becomes a domain of their social mission. The core message of this volume is the development of a cooperation process in which the university leaves its "ivory tower," builds relationships with its stakeholders and, as a result, engages more effectively in social life. In this book, readers will find an original perspective on action research, the application of which enables mutual benefits for universities and their stakeholders. It presents the authors' original model of cooperation based on the AR approach and concrete examples of successful cooperation between universities and their stakeholders. Step by step, it illustrates how to initiate cooperation, conduct useful scientific research and together with stakeholders bring about changes in social life. This book will be of value to university

managers, academics, students of social, management and economic sciences, as well as managers and specialists employed in organisations from various sectors that may be interested in cooperation with universities.

### **EVALUATING QUALITATIVE RESEARCH**

---

Oxford University Press Qualitative researchers read journal articles, serve on masters' and doctoral committees, make careful decisions on whether conference proposals, manuscripts, or large-scale grant applications should be accepted or rejected; yet, best practices on how to do this work thoroughly and efficiently have gained little attention over the last few decades. *Evaluating Qualitative Research* provides expert insight and advice on how to evaluate the merit of qualitative research in the academic community. As one of the first works of literature to address this gap in the exploration of theory, practice, and reflection that comes with the evaluation of qualitative research, author Jeasik Cho constructs a typology of evaluation by examining actual information collected from a variety of websites and relevant journals. By analyzing a host of journals' established review guidelines and assessment apparatuses, Cho presents readers with the core criteria that stands out amongst these tools. As a result, readers will be able to confidently agree upon the standards for how to best evaluate qualitative research not only for their work but for the community at large.

## **BEYOND THE TYRANNY OF TESTING**

### **RELATIONAL EVALUATION IN EDUCATION**

---

Oxford University Press Measurement-based assessment has dominated our educational systems at the expense of the learning and the well-being of students and teachers. In this book, Gergen and Gill propose a radical alternative to this broken system, which is based instead on an inspirational conception of schools as sites of collective meaning-making and a relational orientation to evaluation. The authors acknowledge that it is within the process of relating that the world comes to be meaningful for us, and equally, learning and well-being are embedded in relational process, which testing and grades undermine. Providing detailed illustrations using cases from pioneering schools around the globe at both the primary and secondary level, this book demonstrates how a relational orientation to evaluation in education can enhance learning processes, foster students' engagement, vitalize relationships, and elevate the evaluation of teaching and the school as a whole. Featuring collaborative learning, dialogic pedagogy, and flexible curricula, relational evaluation truly speaks to the demands of a rapidly changing world.

But what is the future of religion in America, and what role will Millennials play in that? The results of three years of scholarly inquiry, this collection of essays looks at the Emerging Church and Millennial religious responses and seeks to define and explore both phenomena, always on the lookout for their intersection. Bringing together a diverse collection of scholars in theology, sociology, history and comparative religion, this book highlights the importance of both the Emerging Church and the Millennial generation's future for religion.

### **INCORPORATING ENGAGED RESEARCH IN SOCIAL DEVELOPMENT**

---

---

#### **EXEMPLARS AND GUIDELINES FOR SOCIAL WORK AND HUMAN SERVICES**

---

*Universe* In a wide-ranging presentation derived from teaching experiences and research projects, seasoned professors, Wassie Kebede and Alice Butterfield, examine engaged research that links social work, human services, and social development with the intent of instigating action for social change. Drs. Kebede and Butterfield begin by introducing others to an overview of engaged research and models of social change, and then examine development issues in Ethiopia in view of engaged research. After offering their context of engaged research as a prototype for extrapolating development policies that can be studied, compared, and contrasted with those in other countries, Kebede and Butterfield present the results from the engaged research of former PhD students, now faculty at various universities in Ethiopia. The book provides a glimpse into the professors' own experiences and an emphasis on the importance of involving faculty and students in engaged research through coursework. *Incorporating Engaged Research in Social Development* is a comprehensive

study that offers academic insight and research results in order to promote social development and change. Readers are encouraged to use this book for teaching and implementing engaged research in higher education. Guidelines for teaching undergraduate and graduate courses are included.

## **UNCONVENTIONAL METHODOLOGY IN ORGANIZATION AND MANAGEMENT RESEARCH**

---

---

Oxford University Press Most researchers in organization and management studies stick to two or three traditional research methods like surveys and interviews. Sticking with the familiar is seen as a safe bet, and innovation is discouraged by academic incentives and rewards. But research participants are now suffering from 'survey fatigue', and using the same old methods runs the risk of generating the same old findings. This book describes twelve unconventional methodologies in organization and management research. These include unconventional research settings and data sources, unconventional research designs and data collection methods, unconventional analytic approaches, and designs and methods that exploit new technology developments. The aim is to encourage dialogue and experimentation with regard to the development of innovative, unconventional approaches to organization and management research. Several commentators have criticized the way in which research methods have become more formulaic, and have argued for greater diversity in research approaches. The methodological perspective that we adopt shapes our interpretation of the information that we gather. Different methods generate different kinds of information, leading to different ways of understanding the phenomena that we are investigating. Our methods influence our styles of theorizing, ways of thinking and reasoning, and forms of writing and reporting research. This book will be of value to academic researchers in organization and management studies, Doctoral candidates, and Masters students on MBA and similar programmes.
