Hi-Fi

The History of High-End Audio Design

Phaidon Press A beyond-cool look at the world of high-end audio design for passionate collectors, obsessive audiophiles, and design fans At a time when sales of vinyl records have hit a 25-year high, and analog technologies are providing the kind of extraordinary audio experiences that our increasingly digital world has started to remove, Hi-Fi is essential reading. This unique book explores just how, when, and why the world fell in love with the look, feel, and sound of top-of-the-line audio equipment. Hi-Fi traces this fascinating evolution from the 1950s to today (and tomorrow), taking readers right up to the current renaissance of all things analog and the emergence of cutting-edge designs for die-hard audiophiles.

World Guide to Foundations

Walter de Gruyter As a crucial source of grants, studies, research, and other not-for-profit services, the world's growing roster of foundations each year dispenses literally billions of dollars on causes ranging from eradicating AIDS to monitoring human rights abuses to promoting free speech on the Internet. Whether you're looking for the phone number of the Ford Foundation, or a list of scientific foundations in Switzerland, you'll find everything you need to know in this first edition of the World Guide to Foundations. It brings together over 21,750 foundations on six continents and some 112 countries, from Albania to Zimbabwe. Entries are arranged alphabetically by country and typically include: -- The foundation's name and abbreviation -- Address, phone and fax numbers, and e-mail address -- Year of origin -- Key personnel, including chairman, managing director, and donors -- Financial resources and annual income and expenses -- Type of foundation and its aims -- Publications Offering additional points of entry are indexes by foundation name and over 199 different subject areas, such as education, peace studies, or consumer protection. A German-English concordance for subject areas is also provided.

The Material Point Method for Geotechnical Engineering

A Practical Guide

CRC Press This practical guide provides the best introduction to large deformation material point method (MPM) simulations for geotechnical engineering. It provides the basic theory, discusses the different numerical features used in large deformation simulations, and presents a number of applications -- providing references, examples and guidance when using MPM for practical applications. MPM covers problems in static and dynamic situations within a common framework. It also opens new frontiers in geotechnical modelling and numerical analysis. It represents a powerful tool for exploring large deformation behaviours of soils, structures and fluids, and their interactions, such as internal and external erosion, and post-liquefaction analysis; for instance the post-failure liquid-like behaviours of landslides, penetration problems such as CPT and pile installation, and scouring problems related to underwater pipelines. In the recent years, MPM has developed enough for its practical use in industry, apart from the increasing interest in the academic world.

Nutrition and Functional Foods for Healthy Aging

[Academic Press](#) **Nutrition and Functional Foods for Healthy Aging** aims to equip anyone studying geriatric nutrition or working with aging adults with the latest scientific reviews of critical topics. The major objective of this book is to review, in detail, the health problems of the aged and how normal food, lifestyle, or nutritional and dietary supplements can help treat them. Nutrient requirements for optimum health and function of aging physiological systems are often quite distinct from those required for young people. The special nutrition problems of the aged are intensively researched and tested, especially as the elderly become a larger percentage of the population. Many chronic diseases and cancers are found with higher frequency in the aged, and it is also widely known that many elderly people use foods and nutrients well above the recommended daily allowance, which can be detrimental to optimal health. Explains the evidence supporting nutritional interventions relevant to age-related diseases Reviews the macro- and micro-nutrient requirements of aging adults and their variables Describes how alcohol, drugs, and caffeine can impact deficiencies, also exploring functional food and dietary supplements that can be used for prevention and treatment

Milwaukee County Zoo

[Arcadia Publishing](#) From the inception of the Milwaukee County Zoo at West Park in 1892, the citizens of Milwaukee have worked diligently to make it one of the finest zoos in the country. Their tireless effort and faith were rewarded. The zoo experienced many firsts, including the first polar bear born in captivity in North America, and was home to Samson, one of the largest gorillas in captivity. Throughout its history, the zoo also gained fame for innovative exhibit design. The zoo has flourished through the cooperation of Milwaukee County and the Zoological Society of Milwaukee. This

public-private relationship has existed successfully since 1910.

Neuroglia in Neurodegenerative Diseases

Springer Nature This book provides a comprehensive overview of the role of neuroglia in neurodegenerative diseases. Neuroglia are the most abundant cells in the nervous system and consist of several distinct cell types, such as astrocytes, oligodendrocytes, and microglia. Accumulating evidence suggests that neuroglia participate in the neurodegenerative process, and as such are essential players in a variety of diseases, including Alzheimer's, Parkinson's, and Huntington's. Intended for researchers and students, the book presents recent advances concerning the biology of neuroglia as well as their interaction with neurons during disease progression. In addition, to highlight the function of neuroglia in different types of neurodegenerative disease, it also discusses their mechanisms and effects on protecting or damaging neurons.

Disorders of the Scapula and Their Role in Shoulder Injury

A Clinical Guide to Evaluation and Management

Springer This unique book - the first of its kind exclusive on disorders of the scapula - is a concise but comprehensive summary of the evidence that will enable clinicians to understand the scapula from its functions to its dysfunctions and includes clinical guidelines and pearls to improve the clinician's competencies for the treatment of shoulder disorders. Organized logically, the book opens with a review of the baseline mechanics and pathomechanics of the scapula, proceeds to evaluation, then describes in detail the association of the scapula with specific shoulder problems, including rotator cuff disease, labral injuries, glenohumeral and multidirectional instability, clavicle fractures, acromioclavicular joint separation, and shoulder arthrosis. Subsequent chapters cover scapular muscle detachment, neurological injuries and winging, scapular fractures and snapping scapula, in addition to basic and complex rehabilitation strategies. Each chapter includes a summary section with clinical pearls. In the past, in-depth research and expertise regarding the scapula was minimal, but a widening interest has resulted in a volume of literature that makes it possible and imperative that it be collected in a single volume. Disorders of the Scapula and Their Role in Shoulder Injury will be an excellent resource for orthopedic and trauma surgeons, residents and fellows.

Radiopharmaceuticals Boost Nuclear Medicine

MDPI This is the fourth Special Issue in Pharmaceuticals within the last six years dealing with aspects of radiopharmaceutical sciences. It demonstrates the significant interest and increasing relevance to ameliorate nuclear medicine imaging with PET or SPECT, and also radiotherapeutical procedures. Numerous targets and mechanisms have been identified and have been under investigation over the previous years, covering many fields of medical and clinical research. This development is well illustrated by the articles in the present issue, including 13 original research papers and one review, covering a broad range of actual research topics in the field of radiopharmaceutical sciences.
