Solaris 8 Advanced System Administrator's Guide

Prentice Hall Professional As the son of two Jungian therapists, the young Micah Toub got a double dose of insight, ranging from the flaky to the profound. Dreamwork, archetypes, conflict resolution, the mind-body connection--Toub's childhood was a virtual laboratory of psychology. Enriched with excerpts from Carl Jung's own memoir, and informed by readings and conversations with Jungian gurus and unbelievers alike, Growing Up Jung examines the pros and cons of Jungian philosophy while tackling the question: is it possible for the spawn of two shrinks to reach adulthood mentally unscathed?

Oracle Solaris 11 System Administration

Pearson Education Oracle® Solaris 11 System Administration covers every skill required to effectively install and administer the Oracle® Solaris 11.1 operating system in production environments. It features dozens of step-by-step "learn by example" procedures, demonstrating how to apply complex solutions in real-world data center environments. Author Bill Calkins has administered and taught Oracle Solaris and its predecessors for more than twenty years. He also helped develop the newest Oracle Certified Associate (OCA) and Oracle Certified Professional (OCP) exams, which raise the bar for Solaris certification. This guide covers every new 1Z0-821 exam topic in detail and also covers many 1Z0-822 exam topics. Calkins also reviews the changes that system administrators will face when upgrading to Solaris 11.1 and presents new ways to perform familiar tasks on both SPARC and x86 hardware. You'll learn how to Install the Solaris 11 Operating Environment with Live Media or Text Interactive installers Install, manage, and update software with the Image Packaging System and IPS repositories Understand, customize, and troubleshoot SPARC and x86 boot processes from system power-up to loading the OS (including coverage of ILOM, OpenBoot, and GRUB 2) Administer and create services through the service management facility (SMF) Configure system messaging using SMF notifications, syslog and rsyslog Configure and administer ZFS storage pools, including ZFS on the boot drive, local disks, LUNs, and a SAN Configure and manage ZFS file systems: encryption, redundancy, snapshots, clones, network sharing, monitoring, device replacement, and legacy UFS migration Create, migrate, contain, and administer zones, including solaris10 branded and immutable zones Use RBAC to create custom rights profiles and grant special privileges Manage and monitor system process scheduler (including FSS process schedulers and proc tools) Configure Solaris networking and network services, including Reactive and Fixed Network Configurations, VNICs, and Virtual Networking A companion website (unixid.com/solaris11book.html) includes new 1Z0-821 and 1Z0-822 study strategies and self-assessment exams.

Sun Certified System Administrator for Solaris 10 Study Guide (Exams CX-310-200 & CX-310-202)

McGraw Hill Professional Primarily Written for those who want to earn the Sun Certified System Administrator (SCSA) certification for Solaris 10, this guide presents full coverage of the official objectives for both the required exams: CX-310-200 and CX-310-202. In spite of the laser sharp focus on the exam objectives, this is not a cram style book. Written in a classroom-based teaching style, this book presents material in a sequential fashion: topics and chapters build upon the previously covered topics and chapters. There is no hopping from topic to topic. An introductory chapter for beginners and a cohesive, concise, yet comprehensive presentation of the material makes it a self contained book that requires no prior experience in Solaris or UNIX. Even after passing the exam, you will find yourself coming back to use this book as an on-the-job reference. Full coverage of exam topics includes: Basic and advanced Solaris 10 installation Managing file systems and core dumps Performing user and security administration Managing network printers and system processes Performing system backups and restores and managing storage volumes Managing naming services Managing role based access control and system messaging Understanding fundamentals of TCP/IP networking and managing network services The book features complete details on all exam objectives, 250+ practice questions, step-by-step exercises, on-the-job elements, a two-minute drill at the end of each chapter that reviews the key points in the chapter, and chapter self-tests. The CD contains MasterExam practice exam software with all new questions, a Searchable electronic book, and a second practice exam (with free online registration).

Solaris International Developer's Guide

Prentice Hall Sun's authoritative guide to developing software for international markets.-- Learn how to internationalize software so it can support users worldwide with minimal additional development effort.-- Understand the important linguistic and cultural differences that will make-or-break your software's success in international markets.-- Review internationalization techniques and capabilities built into Solaris, CDE and Motif -- and how to build internationalized Internet applications. This book can help developers broaden the markets for their products, by providing consistent techniques for internationalizing software -- techniques that do not require extensive redevelopment for each new market. This book introduces internationalization: an approach to designing and producing generalized software that can then easily be adapted to local markets. It shows how one executable can often be made to run anywhere in the world, and still reflect local linguistic and cultural conventions. It covers a wide range of topics, including: establishing locale environments, encoding character sets, displaying localized text, messaging for program translation, handling language input, and localizing software once it has been internationalized. It presents thorough coverage of internationalization techniques for CDE, Motif and X11. It also covers global Internet applications using Web browsers, HTML, MIME, and NFS. Finally, it discusses preparation of international d
