### HOLES

---

*Yearling* #1 NEW YORK TIMES BESTSELLER • NEWBERY MEDAL WINNER • NATIONAL BOOK AWARD WINNER Dig deep in this award-winning, modern classic that will remind readers that adventure is right around the corner--or just under your feet! Stanley Yelnats is under a curse. A curse that began with his no-good-dirty-rotten-pig-stealing-great-great-grandfather and has since followed generations of Yelnatses. Now Stanley has been unjustly sent to a boys' detention center, Camp Green Lake, where the boys build character by spending all day, every day digging holes exactly five feet wide and five feet deep. There is no lake at Camp Green Lake. But there are an awful lot of holes. It doesn't take long for Stanley to realize there's more than character improvement going on at Camp Green Lake. The boys are digging holes because the warden is looking for something. But what could be buried under a dried-up lake? Stanley tries to dig up the truth in this inventive and darkly humorous tale of crime and punishment—and redemption. "A smart jigsaw puzzle of a novel." —New York Times \*Includes a double bonus: an excerpt from Small Steps, the follow-up to Holes, as well as an excerpt from the New York Times bestseller Fuzzy Mud.

### HOLE IN THE SKY

---

*Simon and Schuster* In 2028, a deadly Flu virus ravages the earth. Only one in two thousand survive the virus, and these "Survivors" are rarely left unaffected. By 2038, only 38 million people remain on Earth. Most of them live in small communities, ever fearful of outsiders who might bring the deadly Flu. Ceej Kane lives with his uncle and his Survivor sister Harryette in an abandoned hotel on the rim of the Grand Canyon. His quiet, boring life suddenly becomes a desperate adventure when Uncle and Harryette disappear. Searching for them, Ceej and his only friend, Tim, are attacked by the Kinka, a renegade band of half-mad Survivors who spread the Flu to make more of their own. Worse yet, it appears that Harryette has joined them. Fleeing deep into the Canyon, a narrow land of ghosts and ancient secrets, Ceej and Tim meet Bella, a mysterious Hopi girl. She has been searching the canyon for the Sipapuni, a mystical portal that the Hopi believe leads to another world. Tim thinks Bella is crazy, but Ceej is not so sure. Maybe there is a way out of this Flu-ravaged world. But first they must find out what happened to Uncle, and they must save Harryette from the Kinka -- if she wants to be saved. As with his earlier novels, Mr. Was and Stone Cold, acclaimed author Pete Hautman pushes the boundaries of young adult fiction. Combining action, science fiction, and spirituality, Hole in the Sky is the rarest of novels: a thrilling page-turner that will make you think.

### MORE TALES IN THE HISTORY OF NEUROSCIENCE

---

*MIT Press* Essays on great figures and important issues, advances and blind alleys—from trepanation to the discovery of grandmother cells—in the history of brain sciences. Neuroscientist Charles Gross has been interested in the history of his field since his days as an undergraduate. A Hole in the Head is the second collection of essays in which he illuminates the study of the brain with fascinating episodes from the past. This volume's tales range from the history of trepanation (drilling a hole in the skull) to neurosurgery as painted by Hieronymus Bosch to the discovery that bats navigate using echolocation. The emphasis is on blind alleys and errors as well as triumphs and discoveries, with ancient practices connected to recent developments and controversies. Gross first reaches back into the beginnings of neuroscience, then takes up the interaction of art and neuroscience, exploring, among other things, Rembrandt's "Anatomy Lesson" paintings, and finally, examines discoveries by scientists whose work was scorned in their own time but proven correct in later eras.

### THE HOLE

---

*New Directions Publishing* Winner of the Akutagawa Prize, *The Hole* is by turns reminiscent of Lewis Carroll, David Lynch, and *My Neighbor Totoro*, but is singularly unsettling. Asa's husband is transferring jobs, and his new office is located near his family's home in the countryside. During an exceptionally hot summer, the young married couple move in, and Asa does her best to quickly adjust to their new rural lives, to their remoteness, to the constant presence of her in-laws and the incessant buzz of cicadas. While her husband is consumed with his job, Asa is left to explore her surroundings on her own: she makes trips to the supermarket, halfheartedly looks for work, and tries to find interesting ways of killing time. One day, while running an errand for her mother-in-law, she comes across a strange creature, follows it to the embankment of a river, and ends up falling into a hole—a hole that seems to have been made specifically for her. This is the first in a series of bizarre experiences that drive Asa deeper into the mysteries of this rural landscape filled with eccentric characters and unidentifiable creatures, leading her to question her role in this world, and eventually, her sanity.

'Hello, I've discovered a hole in my apartment... it moves around ... yes ... if you could come and look at it ...bring it down to you, you say ... how ... hello!'.The protagonist has discovered a hole and tries to find an explanation. He seeks expert advice. But not everything can be explained. Perhaps he will just have to accept that it's there.THE HOLE has simple, expressive drawings by pen and computer. The hole is punched right through the book, so it exists in real life.Praise:'... a stylish and surreal picture book... line drawings combined with a minimal use of colour lends the book a stylish and elegant appearance. With few details, attention is drawn towards the simple points on each page, making the story quick to read and easy to understand for readers young and old. At the same time it raises a whole host of questions, both concrete and abstract, and invites several perusals. It is fortunate that the pages are sturdy - this is a book that will quickly become well-thumbed.' - Dagbladet About the AuthorØyvind Torseter is an artist. Øyvind Torseter won the Bologna Ragazzi Award 2008 with his picture book AVSTIKKERE (DETOURS), and has received several other prizes and nominations as well for his illustrations. But we suspect that THE HOLE will be his great international break-through. No online pdf can do justice to this fabulous story, as the physical hole going straight through the book cannot be visible on a screen. Still, you will get an idea of the philosophical implications raised in this book when looking at the illustrations.

#### A NOVEL

*Simon and Schuster* Winner of the Shirley Jackson Award. "A Korean take on Misery." —Time Magazine, "Top 10 Thrillers to Read This Summer" In this tense, gripping novel by a rising star of Korean literature, Oghi has woken from a coma after causing a devastating car accident that took his wife's life and left him paralyzed and badly disfigured. His caretaker is his mother-in-law, a widow grieving the loss of her only child. Oghi is neglected and left alone in his bed. His world shrinks to the room he lies in and his memories of his troubled relationship with his wife, a sensitive, intelligent woman who found all of her life goals thwarted except for one: cultivating the garden in front of their house. But soon Oghi notices his mother-in-law in the abandoned garden, uprooting what his wife had worked so hard to plant and obsessively digging larger and larger holes. When asked, she answers only that she is finishing what her daughter started. A bestseller in Korea, award-winning author Hye-young Pyun's *The Hole* is a superbly crafted and deeply unnerving novel about the horrors of isolation and neglect in all of its banal and brutal forms. As Oghi desperately searches for a way to escape, he discovers the difficult truth about his wife and the toll their life together took on her. "A masterwork of suspense, and a profound meditation on grief, solitude, and secrecy. At once unsettling and richly moving, *The Hole* is vital novel, a gift from a wildly inventive writer." —Laura van den Berg, author of *I Hold a Wolf by the Ears*

### TRISTAN STRONG PUNCHES A HOLE IN THE SKY (VOLUME 1)

---

---

*Disney Electronic Content* Best-selling author Rick Riordan presents Kwame Mbalia's epic fantasy, a middle grade *American Gods* set in a richly-imagined world populated with African American folk heroes and West African gods. Seventh grader Tristan Strong feels anything but strong ever since he failed to save his best friend when they were in a bus accident together. All he has left of Eddie is the journal his friend wrote stories in. Tristan is dreading the month he's going to spend on his grandparents' farm in Alabama, where he's being sent to heal from the tragedy. But on his first night there, a sticky creature shows up in his bedroom and steals Eddie's notebook. Tristan chases after it--is that a doll?--and a tug-of-war ensues between them underneath a Bottle Tree. In a last attempt to wrestle the journal out of the creature's hands, Tristan punches the tree, accidentally ripping open a chasm into the MidPass, a volatile place with a burning sea, haunted bone ships, and iron monsters that are hunting the inhabitants of this world. Tristan finds himself in the middle of a battle that has left black American folk heroes John Henry and Brer Rabbit exhausted. In order to get back home, Tristan and these new allies will need to entice the god Anansi, the Weaver, to come out of hiding and seal the hole in the sky. But bartering with the trickster Anansi always comes at a price. Can Tristan save this world before he loses more of the things he loves?

### ASYMPTOTIC SAFETY AND BLACK HOLES

---

---

*Springer Science & Business Media* One of the open challenges in fundamental physics is to combine Einstein's theory of general relativity with the principles of quantum mechancis. In this thesis, the question is raised whether metric quantum gravity could be fundamental in the spirit of Steven Weinberg's seminal asymptotic safety conjecture, and if so, what are the consequences for the physics of small, possibly Planck-size black holes? To address the first question, new techniques are provided which allow, for the first time, a self-consistent study of high-order polynomial actions including up to 34 powers in the Ricci scalar. These novel insights are then exploited to explain quantum gravity effects in black holes, including their horizon and causal structure, conformal scaling, evaporation, and the thermodynamics of quantum space-time. Results indicate upper limits on black hole temperature, and the existence of small black holes based on asymptotic safety for gravity and thermodynamical arguments.

#### FROM FLIGHT ATTENDANT TO SILICON VALLEY CEO

A resource for anyone who has ever dreamed of building their own business, from an entrepreneur who started from scratch, aimed high, and reimagined an industry. *A Hole in the Clouds* is the true story of how an unemployed flight attendant from the Philippines transformed herself into the CEO of the go-to travel agency for Intel, Apple, Syntex, Kleiner Perkins, and more. When Maryles Casto left her father's sugar plantation in the Philippines and moved to the United States as a new bride, she brought with her a love for travel and the stellar customer-service experience she'd gained as a flight attendant for Philippine Airlines. She never imagined she'd be building a business from the ground up in an unfamiliar country. But when her husband went back to school, she needed to find a job. After a disappointing attempt at door-to-door sales, Maryles landed a job at a local travel agency and dedicated herself to learning everything she could. She took her knowledge to her next employer, along with her characteristic determination, energy, focus, and grit. By the time she left to start her own travel agency, Maryles was the only agent Silicon Valley giant Andy Grove trusted to handle his travel plans. In this book, Maryles shares how she built her business from a \$1500 startup to a \$200 million company, with the respect of Silicon Valley's pioneers. She talks about the advice she received from Andy Grove, Robert Noyce, and Steve Jobs, and she has the notable distinction of possibly being the only contractor to hang up on Steve Jobs without losing his business. Beyond that, she offers invaluable lessons about how she shaped her business and what it took to thrive in an industry threatened by extinction.

## A BLACK HOLE IS NOT A HOLE

---

*Charlesbridge Publishing* Budding astronomers and scientists will love this humorous introduction to the extremely complex concept of black holes. With space facts and answers about the galaxies (ours, and others) A Black Hole is NOT a Hole takes readers on a ride that will stretch their minds around the phenomenon known as a black hole. In lively and text, the book starts off with a thorough explanation of gravity and the role it plays in the formation of black holes. Paintings by Michael Carroll, coupled with real telescopic images, help readers visualize the facts and ideas presented in the text, such as how light bends, and what a supernova looks like. Back matter includes a timeline which sums up important findings discussed throughout, while the glossary and index provide a quick point of reference for readers. Children and adults alike will learn a ton of spacey facts in this far-out book that's sure to excite even the youngest of astrophiles.

## NEW DEVELOPMENTS IN BLACK HOLE RESEARCH

---

*Nova Publishers* A black hole is a point of extreme mass in space-time with a radius, or event horizon, inside of which all electromagnetic radiation (including light) is trapped by gravity. A black hole is an extremely compact object, collapsed by gravity which has overcome electric and nuclear forces. It is believed that stars appreciably larger than the Sun, once they have exhausted all their nuclear fuel, collapse to form black holes: they are "black" because no light escapes their intense gravity. Material attracted to a black hole, though, gains enormous energy and can radiate part of it before being swallowed up. Some astronomers believe that enormously massive black holes exist in the centre of our galaxy and of other galaxies. This book brings together leading research from throughout the world.

## BLACK HOLE EVAPORATION IN SEMI-CLASSICAL APPROACH

---

*Shintaro Sawayama* We consider how the mass of the black hole decreases by the Hawking radiation in the Vaidya spacetime, using the concept of dynamical horizon equation, proposed by Ashtekar and Krishnan. Using the formula for the change of the dynamical horizon, we derive an equation for the mass incorporating the Hawking radiation. It is shown that the final state is the Minkowski spacetime in our particular model. We finally solved the equation which describes how black hole mass decreases. The back-reaction problem of the Hawking radiation has not been solved by the conventional method by solving the Einstein equation. While we can solve this problem using the following three ideas. First idea is to use the dynamical horizon equation which only needs information of the horizon surface. Then we calculate usual field equation as the integration equation. Second we taken negative energy into account near the black hole horizon. Using the negative energy we can enlarge the dynamical horizon to the timelike case. Third, we use the Vaidya metric. Usually the Einstein equation and the dynamical horizon equation are not compatible. However, using the Vaidya metric as a background we can use the dynamical horizon equation in place of the Einstein equation.

## THE DEMISE OF LOCAL JOURNALISM AND POLITICAL ENGAGEMENT

---

*Cambridge University Press* In recent decades, turnout in US presidential elections has soared, education levels have hit historic highs, and the internet has made information more accessible than ever. Yet over that same period, Americans have grown less engaged with local politics and elections. Drawing on detailed analysis of fifteen years of reporting in over 200 local newspapers, along with election returns, surveys, and interviews with journalists, this study shows that the demise of local journalism has played a key role in the decline of civic engagement. As struggling newspapers have slashed staff, they have dramatically cut their coverage of mayors, city halls, school boards, county commissions, and virtually every aspect of local government. In turn, fewer Americans now know who their local elected officials are, and turnout in local elections has plummeted. To reverse this trend and preserve democratic accountability in our communities, the local news industry must be reinvigorated - and soon.
