## Creation without Restraint Promoting Liberty and Rivalry in Innovation

*Oxford University Press* **Creation without Restraint: Promoting Liberty and Rivalry in Innovation** analyzes the current state of competition (antitrust) and intellectual property laws, and proposes realistic reforms that will encourage innovation. As with antitrust and a reform process that aligned injury requirements in lawsuits with the incentive to compete, this book proposes similar reforms for patent and copyright law, and considers both the uses and limitations of antitrust as a vehicle for intellectual property law reform.

# Restoring Consumer Sovereignty

# How Markets Manipulate Us and What the Law Can Do About It

*Oxford University Press* **In today's highly concentrated marketplaces, social and cultural values--such as the lifestyle connotations that manufacturers and sellers confer upon their goods--often shape consumers' prior beliefs and attitudes and affect the weight given to new information by consumers who make purchasing decisions in the marketplace. Such consumer goods present the largely unexplored problem of contemporary market regulatory theory according to which an increased amount of product differentiation has rendered everyday purchasing decisions such as the choice between an iPhone or a Samsung Galaxy Note as much a matter of personal identity rather than merely one of tangible product attributes. The basic challenge for market regulators and courts in such an environment is to make markets work effectively by providing a more efficient exchange of information about consumer preferences relating to tangible product features, functions, and quality. This book demonstrates that improved legal policy can assist consumers and increase market efficiency. It acknowledges that once particular beliefs held by consumers have become culturally or socially entrenched, they are very difficult to change. What is more, changing such beliefs is no longer simply a matter of educating people through the provision of additional information. Developing a novel framework through a detailed analysis of case law relating to consumer goods markets, this book delivers an accessible introduction to the law and economics of consumer decision-making, and a forceful critique of contemporary market regulatory policy.**

# Venture Capital and the Inventive Process

# VC Funds for Ideas-Led Growth

*Springer* **The inventive process is the most important driver of economic growth. Venture capital (VC) funds have contributed a small, but critical, part to the inventive process. VC funds boost the inventive process by selecting a small number of radical ideas out a large flow of ideas and invest in their testing, development and commercialization. They bring together capital from general savings, management capabilities and business experience. When successful, VC-backed companies can contribute substantially to the welfare of society. In this book, VC funds are discussed in the context of macroeconomics, industrial organization, financial intermediation and financial economics. The authors adopt a comprehensive overview to provide clearer insight into the role of VC funds in the capital market and the way they operate.**

# Competition Law's Innovation Factor

## The Relevant Market in Dynamic Contexts in the EU and the US

*Bloomsbury Publishing* **In recent years, market definition has come under attack as an analytical tool of competition law. Scholars have increasingly questioned its usefulness and feasibility. That criticism comes into sharper relief in dynamic, innovation-driven markets, which do not correspond to the static markets on which the concept of the relevant market was modelled. This book explores that controversy from a comparative legal perspective, taking into account both EU competition and US antitrust law. It examines the manifold ways in which courts and competition authorities in the EU and US have factored innovation-related considerations into market delineation, covering: innovative product markets, product differentiation, future markets, issues going beyond market definition proper - such as innovation competition, innovation markets and potential competition -, intellectual property rights, innovative aftermarkets and multi-sided platforms. This book finds that going forward, the role of market definition in dynamic contexts needs to focus on its function of market characterisation rather than on the assessment of market power.**

# TRIPS plus 20

## From Trade Rules to Market Principles

*Springer* **This book examines the impact and shortcomings of the TRIPS Agreement, which was signed in Marrakesh on 15 April 1994. Over the last 20 years, the framework conditions have changed fundamentally. New technologies have emerged, markets have expanded beyond national borders, some developing states have become global players, the terms of international competition have changed, and the intellectual property system faces increasing friction with public policies. The contributions to this book inquire into whether the TRIPS Agreement should still be seen only as part of an international trade regulation, or whether it needs to be understood - or even reconceptualized - as a framework regulation for the international protection of intellectual property. The purpose, therefore, is not to define the terms of an outright revision of the TRIPS Agreement but rather to discuss the framework conditions for an interpretative evolution that could make the Agreement better suited to the expectations and needs of today's global economy.**

## Competition Policy and Intellectual Property in Today's Global Economy

*Cambridge University Press* **The fast-evolving relationship between the promotion of welfare-enhancing competition and the balanced protection of intellectual property (IP) rights has attracted the attention of policymakers, analysts and scholars. This interest is inevitable in an environment that lays ever greater emphasis on the management of knowledge and innovation and on mechanisms to ensure that the public derives the expected social and economic benefits from this innovation and the spread of knowledge. This book looks at the positive linkage between IP and competition in jurisdictions around the world, surveying developments and policy issues from an international and comparative perspective. It includes analysis of key doctrinal and policy issues by leading academics and practitioners from around the globe and a cutting-edge survey of related developments across both developed and developing economies. It also situates current policy developments at the national level in the context of multilateral developments, at WIPO, WTO and elsewhere.**

# Competition Law and Policy in Latin America

## Recent Developments

*Kluwer Law International B.V.* The Latin American countries, both individually and as a community, are poised to become increasingly important in the international recognition and enforcement of competition law. Recent policy developments in the region are particularly instructive on cross-border mergers and international cartel investigations. Although this book's focus is on Latin America, its in-depth exploration of areas such as information exchange among competition authorities, compliance, settlements and remedies are of great value and interest to competition lawyers and policymakers worldwide. Including numerous recent cases and best practice indicators, the contributors' competition authority officials, practitioners, academics and economists cover such topics and issues as the following: • antitrust compliance programs; • competition advocacy; • bid rigging in public procurement; • predatory pricing; • use of indirect evidence in investigations; • shareholders' damages claims; • relation between antitrust and intellectual property; and • merger control. There are country-specific chapters on particular developments in Argentina, Brazil, Chile, Colombia, Ecuador, El Salvador, Mexico and Paraguay. Highlighting the importance of international competition regulatory cooperation, this insightful book offers both practical guidance and food for thought to lawyers at national competition authorities, corporate counsel, and other competition law practitioners and academics.

## The Oxford Handbook of International Antitrust Economics

*Oxford Handbooks* More than any other area of regulation, antitrust economics shapes law and policy in the United States, the Americas, Europe, and Asia. In a number of different areas of antitrust, advances in theory and empirical work have caused a fundamental reevaluation and shift of some of the assumptions behind antitrust policy. This reevaluation has profound implications for the future of the field. The Oxford Handbook of International Antitrust Economics has collected chapters from many of the leading figures in antitrust. In doing so, this two volume Handbook provides an important reference guide for scholars, teachers, and practitioners. However, it is more than a merely reference guide. Rather, it has a number of different goals. First, it takes stock of the current state of scholarship across a number of different antitrust topics. In doing so, it

relies primarily upon the economics scholarship. In some situations, though, there is also coverage of legal scholarship, case law developments, and legal policies. The second goal of the Handbook is to provide some ideas about future directions of antitrust scholarship and policy. Antitrust economics has evolved over the last 60 years. It has both shaped policy and been shaped by policy. The Oxford Handbook of International Antitrust Economics will serve as a policy and research guide of next steps to consider when shaping the future of the field of antitrust.

## The Cambridge Handbook of Antitrust, Intellectual Property, and High Tech

*Cambridge University Press* This Cambridge Handbook, edited by Roger D. Blair and D. Daniel Sokol, brings together a group of world-renowned professors in the fields of law and economics to assess the theory and practice of antitrust, intellectual property, and high tech. With the increased globalization of antitrust, a better understanding of how law and economics shape this interface will help academics, policymakers, and practitioners to understand the existing state of academic literature, its limits, and its relevance to real-world antitrust. The book will be an essential resource for anyone seeking to understand academic and policy considerations shaping the world of antitrust, intellectual property, and high tech.

conducting critical economic analysis of rules in the field of business law. This book is a valuable contribution to the reflection on the place and meaning of value creation and accountability as goals for business law. It will be of great value to academics interested in business law, competition law, comparative law and legal theory, students studying law, business and economics, and to policy makers and regulators.

## Research Handbook on Intellectual Property Exhaustion and Parallel Imports

*Edward Elgar Publishing* From the Americas to the European Union, Asia-Pacific and Africa, countries around the world are facing increased pressure to clarify the application of intellectual property exhaustion. This wide-ranging Research Handbook explores the questions that pose themselves as a result. Should exhaustion apply at the national, regional, or international level? Should parallel imports be considered lawful imports? Should copyright, patent, and trademark laws follow the same

regime? Should countries attempt to harmonize their approaches? To what extent should living matters and self-replicating technologies be subject to the principle of exhaustion? To what extent have the rise of digital goods and the “Internet of things” redefined the concept of exhaustion in cyberspace? The Handbook offers insights to the challenges surrounding these questions and highlights how one answer does not fit all.

## The Opening of American Law

## Neoclassical Legal Thought, 1870-1970

*Oxford University Press, USA* **Two late Victorian ideas disrupted American legal thought: the Darwinian theory of evolution and marginalist economics. The legal thought that emerged can be called 'neoclassical', because it embodied ideas that were radically new while retaining many elements of what had gone before. Although Darwinian social science was developed earlier, in most legal disciplines outside of criminal law and race theory marginalist approaches came to dominate. This book carries these themes through a variety of legal subjects in both public and private law.**

## International Antitrust Law & Policy: Fordham Competition Law 2012

*Juris Publishing, Inc.* **This volume contains articles and panel discussions delivered during the Thirty-Ninth Annual Fordham Competition Law Institute Conference on International Antitrust Law & Policy. About the Proceedings: Every October the Fordham Competition Law Institute brings together leading figures from governmental organizations, leading international law firms and corporations and academia to examine and analyze the most important issues in international antitrust and trade policy of the United States, the EU and the world. This work is the most definitive and comprehensive annual analysis of international antitrust law and policy available anywhere. The chapters are revised and updated before publication, where necessary. As a result, the reader receives up-to-date practical tips and important analyses of difficult policy issues. The annual volumes are an indispensable guide through the sea of international antitrust law. The Fordham Competition Law Proceedings are acknowledged as simply the most definitive US/EC annual analyses of**

antitrust/competition law published. Each annual edition sets out to explore and analyze the areas of antitrust/competition law that have had the most impact in that year. Recent "hot topics" include antitrust enforcement in Asia, Latin America; competition enforcement in the areas of telecommunications, media and information technology. All of the chapters raise questions of policy or discuss new developments and assess their significance and impact on antitrust and trade policy.

## User Generated Law

## Re-Constructing Intellectual Property Law in a Knowledge Society

*Edward Elgar Publishing* **Engaging and innovative, User Generated Law offers a new perspective on the study of intellectual property law. Shifting research away from the study of statutory law, contributions from leading scholars explore why and how self-regulation of intellectual property rights in a knowledge society emerges and develops. Analysing examples of self-regulation in the intellectual property law based industries, this book**

evaluates to what extent user generated law is an accurate model for explaining and understanding this process.

## The Luxury Economy and Intellectual Property

### Critical Reflections

*Oxford University Press* Intellectual property law plays a pivotal role in ensuring that luxury goods companies can recoup their investments in the creation and dissemination of their copyrighted works, trademarked logos, and patented designs. In 2011, global sales for luxury goods reached about \$250 billion, and consumers in East and Southeast Asia accounted for more than 50 percent of that figure. The rapid expansion of the market has prompted some retailers to wield intellectual property against the influx of imitators and counterfeiters. *The Luxury Economy and Intellectual Property* comprehensively explores the rise of the luxury goods economy and the growing role of intellectual property in creating, sustaining, and regulating this economy. Leading scholars across various disciplines critically consider the industry, its foundational intellectual property laws, and the public interest and social concerns arising from the intersection of economics and law. Topics covered include defining the concept of luxury, the social life of luxury goods, concerns about distributive justice in a world flooded by luxury goods and knockoffs, the globalization of luxury goods, and the economic, social, and political ramifications of the meteoric rise of the Asian luxury goods market.

## Research Handbook on Methods and Models of Competition Law

*Edward Elgar Publishing* This comprehensive Handbook illuminates the objectives and economics behind competition law. It takes a global comparative approach to explore competition law and policy in a range of jurisdictions with differing political economies, legal systems and stages of development. A set of expert international contributors examine the operation and enforcement of competition law around the world in order to globalize discussions surrounding the foundational issues of this topic. In doing so, they not only reveal the range of approaches to competition law, but also identify certain basic economic concepts and types of anticompetitive conduct that are at the core of competition law.

# The Right to Do Wrong

## Morality and the Limits of Law

The law sometimes permits what ordinary morality, or widely-shared notions of right and wrong, reproaches. *Rights to Do Grave Wrong* explores the relationship between law and common morality to clarify law's reliance on society's broad presumption that people will exercise their rights responsibly. More concretely, he argues that certain legal rights rest on tacit sociological assumptions as to who will exercise them, under what circumstances, and how frequently. Further, he argues that we depend on stigma and shame to reduce and circumscribe the law's use. Some examples: though reneging on a debt is considered wrong, the law allows you to declare personal bankruptcy; international law allows museums to retain some masterworks looted from their rightful owners; in many countries abortion is permitted as a means of birth control. Using these examples and more, Osiel presents a "social scientific" analysis of law's interaction with social mores and the extent to which they limit our exercising rights to do wrong. The paradox he intends to elucidate is when and why it is appropriate for societies to champion *de jure* entitlements even as they successfully limit their *de facto* usage.--

## Modern Things on Trial

## Islam's Global and Material

## Reformation in the Age of Rida, 1865–1935

*Columbia University Press* In cities awakening to global exchange under European imperial rule, Muslims encountered all sorts of strange and wonderful new things—synthetic toothbrushes, toilet paper, telegraphs, railways, gramophones, brimmed hats, tailored pants, and lottery tickets. The passage of these goods across cultural frontiers spurred passionate debates. Realizing that these goods were changing religious practices and values, proponents and critics wondered what to outlaw and what to permit. In this book, Leor Halevi tells the story of the Islamic trials of technological and commercial innovations of the late nineteenth and early twentieth centuries. He focuses on the communications of an entrepreneurial Syrian interpreter of the shari'a named Rashid Rida, who became a renowned reformer by responding to the demand for authoritative and authentic religious advice. Upon migrating to Egypt, Rida

founded an Islamic magazine, *The Lighthouse*, which cultivated an educated, prosperous readership within and beyond the British Empire. To an audience eager to know if their scriptures sanctioned particular interactions with particular objects, he preached the message that by rediscovering Islam's foundational spirit, the global community of Muslims would thrive and realize modernity's religious and secular promises. Through analysis of Rida's international correspondence, Halevi argues that religious entanglements with new commodities and technologies were the driving forces behind local and global projects to reform the Islamic legal tradition. Shedding light on culture, commerce, and consumption in Cairo and other colonial cities, *Modern Things on Trial* is a groundbreaking account of Islam's material transformation in a globalizing era.

## The Global Limits of Competition Law

*Stanford University Press* Over the last three decades, the field of antitrust law has grown increasingly prominent, and more than one hundred countries have enacted competition law statutes. As competition law expands to jurisdictions with very different economic, social, cultural, and institutional backgrounds, the debates over its usefulness have similarly evolved. This book, the first in a new series on global competition law, critically assesses the importance of competition law, its development and modern practice, and the global limits that have emerged. This volume will be a key resource to both scholars and practitioners interested in antitrust, competition law, economics, business strategy, and administrative sciences.

## Patent Remedies and Complex Products

### Toward a Global Consensus

*Cambridge University Press* Through a collaboration among twenty legal scholars from North America, Europe and Asia, this book presents an international consensus on the use of patent remedies for complex products such as smartphones, computer networks, and the Internet of Things. This title is also available as Open Access on Cambridge Core.

# Licensing Royalty Rates, 2017 Edition (IL)

*Wolters Kluwer* This valuable reference presents the -going- royalty rate for virtually any product, including over 1,500 products and services in ten lucrative categories--art, celebrity, character and entertainment, collegiate, corporate, designer, event, sports, nonprofit and music. The essential reference for both beginning and more experienced licensing professionals. By Gregory J. Battersby, Charles W. Grimes Knowing the -going- royalty rate for virtually any product is as simple as reaching for the newly published Licensing Royalty Rates, 2017 Edition . Setting a royalty rate too high can scare away potential licensees, while accepting a lower rate can cost licensors hundreds of thousands of dollars. Licensing Royalty Rates, 2017 Edition provides all the information you need to calculate the right rate every time. The data in Licensing Royalty Rates is compiled using information from the U.S. Patent and Trademark Office. After careful review by a blue-ribbon panel of expert licensing consultants uniquely qualified to know what the appropriate rate range is for specific properties in each licensing category, the information is organized into four time-saving sections that give researchers fast access to comprehensive statistical and analytical data: Royalty rate listing alphabetically by licensed product --provides a detailed alphabetical listing of products and their suggested rate range across all product categories. Royalty rate listing by international trademark class--lets you quickly identify subtle royalty rate differences between similar products within specific international trademark classes. Checklist of licensed products and services--offers a quick-reference to products with a high potential for licensing. Comprehensive list of licensed products and services--presents a detailed list of all surveyed products and services within a trademark class for preparing intent-to-use trademark applications. This detailed information gives both beginning and more experienced licensing professionals the confidence needed to negotiate the maximum allowable rate regardless of the product, the market and the parameters of the specific deal itself.

## Tin House: Theft (Tin House Magazine)

*Tin House Books* Tin House's Theft Issue spends some time in the larcenous land of literature with stolen stories, embezzled essays, and pick-pocketed poetry. "Talent borrows, genius steals" is usually attributed to Oscar Wilde, and occasionally Pablo Picasso. There is, however, no record of

either one actually saying or writing this. T. S. Eliot, on the other hand, wrote, "Immature poets imitate; mature poets steal; bad poets deface what they take, and good poets make it into something better, or at least something different." Theft and appropriation have always been artistic engines, and in this issue of *Tin House*, those engines run hot . . .

## Competition Policy and the Control of Buyer Power

### A Global Issue

*Edward Elgar Publishing* **This book provides a comprehensive overview of the economic and competition policy issues that buyer power creates. Drawing on economic analysis and cases from around the world, it explains why conventional seller side standards and analyses do not provide an adequate framework for responding to the problems that buyer power can create. Based on evidence that abuse of buyer power is a serious problem for the competitive process, the book evaluates the potential for competition law to deal directly with the problems of abuse either through conventional competition law or special rules aimed at abusive conduct. The author also examines controls over buying groups and mergers as potentially more useful responses to risks created by undue buyer power.**

## Intellectual Property and the Common Law

*Cambridge University Press* **Leading scholars of intellectual property and information policy examine what the common law can contribute to discussions about intellectual property's scope, structure and function.**

## The Interplay Between Competition Law and Intellectual Property

### An International Perspective

*Kluwer Law International B.V.* **Although competition law and intellectual property are often interwoven, until this book there has been little guidance on how they work together in practice. As the intersection between the two fields continues to grow worldwide, both in case law and**

in regulation, the book's markets-based approach, focusing on sectors such as pharmaceuticals, IT, telecoms, energy and agriculture in eleven of the world's most active jurisdictions, provides a much-needed in-depth understanding of how this interplay reveals itself among the different legal systems. Written by a range of authors including judges, regulators, academics, economists and practitioners in both fields, the book provides an international comparative perspective as well as detailed analysis of specific cases, policies and proposals for change. Among the issues and topics covered are the following: - free movement of goods and the protection of intellectual property rights; - standard essential patents & injunction in patent cases; - intellectual property rights between technological development and consumer protection; - geo-blocking; - online platforms and antitrust; - excessive prices. In this context, special attention is paid throughout to the increasing dialogue among Competition Authorities and between Judges and Competition Authorities around the world. As matchless remedy for the lack of uniformity heretofore, the book's investigation of the nexus between competition law and intellectual property in different sectors and in various countries takes a giant step towards a more-balanced approach and more-levelled regulation and practices. It will be warmly appreciated by policy makers, decision makers, regulators, practitioners and academics in both competition law and intellectual property fields
