## Pregnancy Discrimination and the Supreme Court A Closer Look at Young V. UPS and Related Cases

*In 2015, the Supreme Court issued a decision in Young v. United Parcel Service. In the case, a United Parcel Service (UPS) worker named Peggy Young challenged her employers refusal to grant her a light-duty work assignment while she was pregnant, claiming that UPSs actions violated the Pregnancy Discrimination Act (PDA). In a highly anticipated ruling, the Justices fashioned a new test for determining when an employers refusal to provide accommodations for a pregnant worker constitutes a violation of the PDA, and the Court sent the case back to the lower court for reconsideration in light of these new standards. This book begins with a discussion of the facts in the Young case, followed by an overview of the PDA. The book then provides an analysis of the Young case, its implications, and a potential legislative response. Furthermore, the book focuses on sex discrimination challenges based on: the equal protection guarantees of the Fourteenth and Fifth Amendments; the prohibition against employment discrimination contained in Title VII of the Civil Rights Act of 1964; and the prohibition against sex discrimination in education contained in Title IX of the Education Amendments of 1972.*

## Culture, Gender and Entrepreneurial Innovation (UM Press)

### Evidence from Malaysia

**The University of Malaya Press** The book examines three issues in entrepreneurship that are often overlooked yet powerful when taken together. The first is the way people learn gender roles and how this in turn affects their entrepreneurial behavior. The second are differences between two major population groups in Malaysia, the Malays and the Chinese, specifically in terms of their respective levels of societal masculinity. The third is entrepreneurial innovation. By combining these topics and examining how they apply to a sample of Malaysian women entrepreneurs, the author produces genuinely new, insightful and occasionally counter-intuitive findings such as Malay women entrepreneurs' lower level of uncertainty avoidance compared to Chinese women entrepreneurs. Another intriguing discovery is her radical overhaul of the construct of ego orientation, which gives a new angle on the old idea of entrepreneurs as people who are different from the rest of us. In all, the study poses some challenges to long-standing but infrequently tested ideas about the nature of entrepreneurs and their behavior.

## University-Industry Knowledge Interactions

## People, Tensions and Impact

**Springer Nature** *University-industry interaction combines several layers of actors, states and effects. People make choices, based on their individual characteristics, at different stages of a scientific career, in a highly internationalised profession. Tensions arise when university administrators and managers need to strike a balance among different promotion instruments, or when the university or public research organisation tries to solve the trade-offs between long- and short-term relationships, or among new management practices. Impacts are related to scientific agendas, the economic returns for firms or the societal benefits. This book adopts a people-tension-impact approach to identify key insights, by combining qualitative and quantitative research, established and novel methodologies, and different geographic settings. The chapters in this volume provide new perspectives on university-industry interactions related to gender biases, entrepreneurial involvement of PhD students and the role of international mobility. They also focus on how the positive impacts of university-industry interactions coexist with unresolved tensions linked to policy combinations, long-term contractual relationships, management practices and organisational strategies. ## Pelvic Pain in Women, An Issue of Obstetrics and Gynecology Clinics,

**Elsevier Health Sciences** This issue of *Obstetrics and Gynecology Clinics of North America* attempts to provide an overview of the more common causes of chronic pelvic pain in women. It brings together experts in various fields of gynecology, gastroenterology, physical therapy, and urogynecology in an attempt to discuss the wide variety of common clinical conditions that can manifest as pain. The intent is to enable the physician to consider not only the common gynecologic causes but also the common nongynecologic causes based on certain symptom profiles and targeted clinical examination. Should the physician not feel comfortable in treating the nongynecologic causes, it would enable them to target their referral to a more appropriate physician rather than the patient being referred back to a general primary care physician. It is our hope that it will enable the reader to see the pelvis not as an ovary or a uterus but as a whole system of interacting organs, muscles, and nerves. In addition, there is very little in the *Obstetrics and Gynecology* literature about the treatment of the pain component with opioid and nonopioid medications. As one of my colleagues frequently states, we can treat the pain but not necessarily alleviate the suffering. The overview of complementary and alternative medications and opioid use will hopefully be useful to the practicing physician as it provides an evidence-based approach to the use of these therapies specifically for chronic pelvic pain.

## Gender Equity: Challenges and Opportunities

## Proceedings of 2nd International Conference of Sardar Vallabhbhai National Institute of Technology

**Springer Nature** This book comprises the proceedings of the TEQIP III Sponsored 2nd International Conference on "Gender Equity: Challenges and Opportunities" (2nd ICOGECAO 2020 -Virtual Mode), held at Sardar Vallabhbhai National Institute of Technology, Surat, Gujarat, India, from 25 to 27 November 2020. ICOGECAO provided a platform for researchers from multiple countries to present their views about the challenges associated with gender equity. Gender equity is one of the seventeen Sustainable Development Goals (SDG 5) set up by the United Nations in 2015, to promote and empower all genders equally. The proceedings strongly support the ideas of gender neutrality and blow out the mind-set of limiting gender studies to only women rights. They offer a collection of articles that break the stereotypes and myths often wrongly associated with gender. The ideas in the presented papers highlight gender-based discriminations, ask important questions and share facts that encompass beyond the so-called boundary lines. The authors contributed on various topics including but not limited to violence, crime, discrimination, and abuse against women and LGBTQ+ community. The basic motive of the presented book is to incorporate ideas and contribute to the sensitization and education about the important yet often neglected issues of gender equality. Thus, this book proves to be an essential resource for educators and

researchers working in the field of gender studies. The work presents challenges caused due to COVID-19, social media, popular culture and work-life balance and explores empowerment through law, skills, technology and media. Some interesting case studies highlighted gender discrimination in science, sports and law. A variety of papers on literary texts were examined from a gender lens. The proceeding is divided into five subsections: 1. law, 2. literature, 3. management, 4. sociology and 5. social studies. The proceeding provides a wider perceptive and visuals about the scenarios which needs attention. The ideas presented will be helpful for achieving the sustainable development goal of gender equity to a greater extent.

## Borderwork in Multicultural Australia

**Routledge** Refugees. Border protection. Ethnic gangs. Terrorism. History wars. Pauline Hanson. Australia's faith in multiculturalism has been shaken by fierce attacks from its enemies and a sense of crisis among its friends. Multiculturalism has become a political tool to win votes and generate community anxiety. What is left of the multicultural ideal? Bob Hodge and John O'Carroll take the pulse of multicultural Australia in the wake of September 11. They investigate the hot spots' of multiculturalism, showing how they cluster around fiercely defended boundaries and borders, both literal and symbolic. They tackle the issues of racism past and present, and show how injustice impacts on many communities in Australia, including Aboriginals as well as more recent migrant groups. The authors argue that despite appearances, multiculturalism is alive and well in Australia, and a commitment to tolerance and diversity characterises daily life. In fact, Australia's multiculture is the best kind of borderwork against terrorism, racism and injustice. ## Combating Sexual Harassment at Work

**International Labour Organisation** Sexual harassment is overwhelmingly a problem of women workers. It has nothing to do with normal interaction between the sexes: it denotes scorn of another person, and is used to establish or prove power over others. Sexual harassment produces feelings of revulsion, violation, disgust, anger and powerlessness. Good managers know that it is in the long-term interest of the enterprise to ensure that their employees are treated with respect. While effective legal remedies are necessary, it is also important to ensure that the problem ceases, or better still, never starts. Thus, preventive measures are especially important. This issue of the *Conditions of Work Digest* is essential reading for employers, personnel managers, trade unionists and all those in governmental and non-governmental circles who are committed to justice and dignity at work.

The fundamental legal principles presented will serve as an excellent foundation for proper decision making and protocol in a fire service organization. The real-life case studies and relevant examples taken from today's headlines are valuable tools in the study of fire and EMS law. ## Sports Law in Russia

**Kluwer Law International B.V.** Derived from the renowned multi-volume *International Encyclopaedia of Laws*, this practical analysis of sports law in Russia deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a

growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to sports law at this specific level. Lawyers representing parties with interests in Russia will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.

## Social and Psychological Problems of Women

### Prevention and Crisis Intervention

**Taylor & Francis** "This book in its diversity of topics reflects the re-emergence of concern with women's issues in the last decade and the vigor and pioneering quality of scholarship in the area. Such extensive, albeit uneven, development says something about the state of our society as well, for organized scholarship is a form of problem solving, part of the process of working through issues that come to the attention of observers of and commentators on the social world. Be we can go further. By recognizing that the contemporary women's movement is not new, but is in keeping with a stream of feminism at least 150 years old, we can encourage the current rekindling of interest and consciousness to reflect contemporary events as well." -- xiii (foreword).

### Alcohol and Drug Problems in Women

**Springer Science & Business Media** Over the last decade the world has experienced a growing interest in problems associated with the nonmedical use of drugs. This interest has corresponded to a real growth in the extent, diversity, and social impact of the use of alcohol and drugs in many societies. As a result, the amount of research and writing on the subject of drug problems has greatly increased, and it has become very difficult for one individual to keep up with all the relevant literature. There is thus an acute need in the field for critical reviews that assess current developments, and the present series is intended to fill this need. The series is not to be an "annual review" in the usual sense. The aim is not to cover all the work reported during the preceding year in relation to a fixed selection of topics. Rather, it is to present each year evaluative papers on topics in which enough recent progress has been made to alter the general scope in a particular area. Owing to the multidisciplinary nature of problems of drug use and dependence, the papers published in each volume will be drawn from several disciplines. However, some volumes may be devoted to one particular problem, with individual reviews and papers examining various aspects of it. The composition of the editorial board and the international advisory board reflects these objectives. The editors are members of the senior scientific staff of the Addiction Research Foundation of Ontario.

### Beyond Consent

### Seeking Justice in Research

**Oxford University Press** Patients with cancer and AIDS now clamor for access to clinical trials. Federal policies governing research that once emphasized protecting subjects from dangerous research now promote access to clinical research. Have claims about justice and access to the benefits of research eclipsed concerns about consent and protection from risks? How can we make good and fair decisions about the selection of subjects and other questions of justice in research? *Beyond Consent* examines the concept of justice and its application to human subject research through the different lenses of important research populations: children, the vulnerable sick, captive and convenient populations, women, people of color, and subjects in international settings. To set the stage for this examination, an introductory chapter addresses the evolution of research policies. After a look at specific subject populations, the authors discuss the concept of justice for research with human subjects in the future and analyze justice throughout the research enterprise.
