Esopus Drawings

Esopus "Because I am essentially the only person working on each issue, the production of Esopus has been an intensely personal exercise. For these drawings, I've worked mostly from photographs depicting Esopus events, artists' projects from particular issues, behind-the-scenes glimpses of the printing and editorial process, and other instances related to the production of the publication. Each drawing took between two and five days to complete. Over the course of that time, I found myself becoming immersed in--and reliving on some level--a very specific moment in the history of Esopus."--Tod Lippy.

Telling Stories

Language, Narrative, and Social Life

Georgetown University Press Narratives are fundamental to our lives: we dream, plan, complain, endorse, entertain, teach, learn, and reminisce through telling stories. They provide hopes, enhance or mitigate disappointments, challenge or support moral order and test out theories of the world at both personal and communal levels. It is because of this deep embedding of narrative in everyday life that its study has become a wide research field including disciplines as diverse as linguistics, literary theory, folklore, clinical psychology, cognitive and developmental psychology, anthropology, sociology, and history. In Telling Stories leading scholars illustrate how narratives build bridges among language, identity, interaction, society, and culture; and they investigate various settings such as therapeutic and medical encounters, educational environments, politics, media, marketing, and public relations. They analyze a variety of topics from the narrative construction of self and identity to the telling of stories in different media and the roles that small and big life stories play in everyday social interactions and institutions. These new reflections on the theory and analysis of narrative offer the latest tools to researchers in the fields of discourse analysis and sociolinguistics.

Hearts of Darkness

Zebra Books In the first of a dazzling new romantic trilogy, one woman's courageous search plunges her into a millennia-old supernatural war--and an irresistible passion. . . Nurse Kayla Friday has dedicated her life to science and reason. But for her, Seattle is a place of eerie loss and fragmented, frightening memories. And now the only clue to her sister's murder reveals a secret battle between two ancient mythologies. . .and puts Kayla in the sights of lethally-sexy werewolf mercenary Hart. He'll do whatever it takes to obtain the key to the Gate of the Land of the Dead and free what's left of his soul. But seducing the determined Kayla is putting them at the mercy of powerful desires neither can control. And as the clock ticks down to hellish catastrophe, the untested bond between Kayla and Hart may lead to the ultimate sacrifice.

Practices of Speculation

Modeling, Embodiment, Figuration

transcript Verlag This volume offers innovative ways to think about speculation at a time when anticipation of catastrophe in an apocalyptic mode is the order of the day and shapes public discourse on a global scale. It maps an interdisciplinary field of investigation: the chapters interrogate hegemonic ways of shaping the present through investments in the future, while also looking at speculative practices that reveal transformative potential. The twelve contributions explore concrete instances of envisioning the open unknown and affirmative speculative potentials in history, literature, comics, computer games, mold research, ecosystem science and artistic practice.

Random Polynomials

Probability and Mathematical Statistics: A Series of Monographs and Textbooks

Academic Press Probability and Mathematical Statistics: A Series of Monographs and Textbooks: Random Polynomials focuses on a comprehensive treatment of random algebraic, orthogonal, and trigonometric polynomials. The publication first offers information on the basic definitions and properties of random algebraic polynomials and random matrices. Discussions focus on Newton's formula for random algebraic polynomials, random characteristic polynomials, measurability of the zeros of a random algebraic polynomial, and random power series and random algebraic polynomials. The text then elaborates on the number and expected number of real zeros of random algebraic polynomials; number and expected number of real zeros of other random polynomials; and variance of the number of real zeros of random algebraic polynomials. Topics include the expected number of real zeros of random orthogonal polynomials and the number and expected number of real zeros of trigonometric polynomials. The book takes a look at convergence and limit theorems for random polynomials and distribution of the zeros of random algebraic polynomials, including limit theorems for random algebraic polynomials and random companion matrices and distribution of the zeros of random algebraic polynomials. The publication is a dependable reference for probabilists, statisticians, physicists, engineers, and economists.

Lou Scheimer: Creating the Filmation Generation

TwoMorrows Publishing Hailed as one of the fathers of Saturday morning television, Lou Scheimer was the co-founder of Filmation Studios, which for over 25 years provided animated excitement for TV and film. Always at the forefront, Scheimer's company created the first DC cartoons with Superman, Batman, and Aquaman, ruled the song charts with The Archies, kept Trekkie hope alive with the Emmy-winning Star Trek: The Animated Series, taught morals with Fat Albert and the Cosby Kids, and swung into high adventure with Tarzan, The Lone Ranger, and Zorro. Forays into live-action included Shazam! and The Secrets of Isis, plus groundbreaking special effects work on Jason of Star Command and others. And in the 1980s, Filmation single-handedly caused the syndication explosion with He-Man and the Masters of the Universe and its successors. Now, Lou Scheimer tells the entire story to best-selling author Andy Mangels, including how his father decked Adolf Hitler, memories of the comics of the Golden Age, schooling with Andy Warhol, and what it meant to lead the last all-American animation company through nearly thirty years of innovation and fun! Profusely illustrated with photos, model sheets, storyboards, presentation art, looks at rare and unproduced series, and more — plus stories from top animation insiders about Scheimer and Filmation's past, and rare Filmation art by Bruce Timm, Adam Hughes, Alex Ross, Phil Jimenez, Frank Cho, Gene Ha, and Mike McKone — this book shows the Filmation Generation the story behind the stories!

Brain-Friendly Strategies for the Inclusion Classroom

ASCD Many teachers in regular classrooms feel unprepared to teach students with learning disabilities. Fortunately, brain research has confirmed that strategies benefiting learners with special challenges are suited for engaging and stimulating all learners. In this book, neurologist and classroom teacher Judy Willis explains that we can best help students by putting in place strategies, accommodations, and interventions that provide developmentally and academically appropriate challenges to suit the needs, gifts, and goals of each student. Brain-Friendly Strategies for the Inclusion Classroom will help teachers

- * Understand how the brain learns and the technologies that reveal this process.
- * Implement strategies that are compatible with students' individual learning styles and honor their multiple intelligences.
- * Improve the focus of students with attention disorders and help them gain the confidence and skills they need to develop goal-oriented behaviors.
- * Create an enriching learning environment by incorporating student-centered activities, discovery and hands-on learning experiences, cross-curricular learning, and multisensory lessons.
- * Implement strategic review, study, and test preparation strategies that will allow students to retain information and connect it with future learning.
- * Build safe, supportive classroom communities and raise class awareness and empathy for students with learning disabilities. It's time for teachers to lower the barriers, not the bar. Using strategies that align with research on how people's brains function, teachers can engage all students as individuals and help them reach their maximum potential with joy and confidence.

A Revolution to Increase Your Income, Improve Your Relationships and Expand Your Influence

With Walt Whitman in Camden

Southern Illinois University Press Absorbing as biography, invaluable as reference, this latest volume in the distinguished series that began publication in 1906 continues Traubel's minute, detailed, day-by-day account of America's greatest poet. William White, editor of the Walt Whitman Review and coeditor of The Collected Writings of Walt Whitman, assumed the editorial chores when Gertrude Traubel was unable to continue the project. Traubel wrote of the work that had absorbed so much of her life: "Vitality, contemporaneity—these Whitman characteristics—bring him to you not just an old man reliving a memorable career, but—like most seers—looking at events before him with flashes of prophetic insight." Volume 6 presents the period from September 15, 1889, to July 6, 1890, with virtual transcripts of the conversations of Whitman with Traubel. Whitman's thoughts and opinions, reminiscences, his goings and comings, letters he received and wrote, and hundreds of other matters as well as important details of his life in his home on Mickle Street in Camden. This series is indispensable for an understanding of and insight into the life and opinions of Walt Whitman. Horace Traubel fulfilled Whitman's charge "to speak for me when I am dead," in a manner without precedent.

Cultures of Comics Work

Springer This anthology explores tensions between the individualistic artistic ideals and the collective industrial realities of contemporary cultural production with eighteen all-new chapters presenting pioneering empirical research on the complexities and controversies of comics work. Art Spiegelman. Alan Moore. Osamu Tezuka. Neil Gaiman. Names such as these have become synonymous with the medium of comics. Meanwhile, the large numbers of people without whose collective action no comic book would ever exist in the first place are routinely overlooked. Cultures of Comics Work unveils this hidden, global industrial labor of writers, illustrators, graphic designers, letterers, editors, printers, typesetters, publicists, publishers, distributors, translators, retailers, and countless others both directly

and indirectly involved in the creative production of what is commonly thought of as the comic book. Drawing upon diverse theoretical and methodological perspectives, an international and interdisciplinary cohort of cutting-edge researchers and practitioners intervenes in debates about cultural work and paves innovative directions for comics scholarship.

Emma's Turtle

Undeterred, Turtle is grateful to "have the whole world here in my backyard," and plans to escape again tomorrow, this time to China.

Shooting Incident Reconstruction

Academic Press Forensic scientists, law enforcement, and crime scene investigators are often tasked with reconstruction of events based on crime scene evidence, and the subsequent analysis of that evidence. The use and misuse of firearms to perpetrate crimes from theft to murder necessitates numerous invitations to reconstruct shooting incidents. The discharge of firearms and the behavior of projectiles create many forms of physical evidence that, through proper testing and interpretation by a skilled forensic scientist, can establish what did and what did not occur. This book is generated from the authors' numerous years of conducting courses and seminars on the subject of shooting incident reconstruction. It seeks to thoroughly address matters from simple to complex in providing the reader an explanation of the factors surrounding ballistics, trajectory, and shooting scenes. The ultimate objectives of this unique book are to assist investigators, crime scene analysts, pathologists, ballistics experts, and lawyers to understand the terminology, science, and factors involved in reconstructing shooting incident events to solve forensic cases. The book will cover the full range of related topics including the range from which a firearm was discharged, the sequence of shots in a multiple discharge shooting incident, the position of a firearm at the moment of discharge, the position of a victim at the moment of impact, the probable flight path of a projectile, the manner in which a firearm was discharged and much more. Written by the most well-respected shooting scene and ballistics experts in the world Contains over 200 full-color diagrams and photographs that support and illustrate key concepts Case studies illustrate real-world application of technical concepts

Tombs, Temples and Their Orientations

A New Perspective on Mediterranean Prehistory

Oxbow Books Limited This study of archaeoastronomy looks at more than 2,500 communal tombs and sanctuaries from around the Mediterranean. After a brief discussion of Hoskin's aims and the methodology for his fieldwork, individual chapters focus on evidence from particular regions: Malta, Gozo, the Balearics, Iberia, southern France, Corsica and Sardinia, Sicily and Pantelleria, Tunisia, Algeria and Morocco. The author concludes that in most of these regions the monuments faced sunrise, or more generally the sun when it was rising or climbing in the sky. Along the Mediterranean coast of France, however, there is a reverse sunset custom; in North Africa tombs faced downhill and in a Minoan cemetery on Crete all the tombs faced moonrise and look towards a mountain on whose peak was a sanctuary probably sacred to a lunar god. 264p, b/w figs and photos throughout, tables (Ocarina Books 2001) ` adorned with dozens of beautiful photographs, technical diagrams, and an extraordinary Corpus Mensurarum.....a living masterpiece in the field of archaeoastronomy ' - Juan Antonio Belmonte, Instituto de Astrofísica de Canarias `

Neural Approaches to Conversational AI: Question Answering, Task-Oriented Dialogues and Social Chatbots

Foundations and Trends(r) in I This monograph is the first survey of neural approaches to conversational AI that targets Natural Language Processing and Information Retrieval audiences. It provides a comprehensive survey of the neural approaches to conversational AI that have been developed in the last few years, covering QA, task-oriented and social bots with a unified view of optimal decision making. The authors draw connections between modern neural approaches and traditional approaches, allowing readers to better understand why and how the research has evolved and to shed light on how they can move forward. They also present state-of-the-art approaches to training dialogue agents using both supervised and reinforcement learning. Finally, the authors sketch out the landscape of conversational systems developed in the research community and released in industry, demonstrating via case studies the progress that has been made and the challenges that are still being faced. Neural Approaches to Conversational AI is a valuable resource for students, researchers, and software developers. It provides a unified view, as well as a detailed presentation of the important ideas and insights needed to understand and create modern dialogue agents that will be instrumental to making world knowledge and services accessible to millions of users in ways that seem natural and intuitive.

The Viking World

Filling a gap in the literature for an academically oriented volume on the Viking period, this unique book is a one-stop authoritative introduction to all the latest research in the field. Bringing together today's leading scholars, both established seniors and younger, cutting-edge academics, Stefan Brink and Neil Price have constructed the first single work to gather innovative research from a spectrum of disciplines (including archaeology, history, philology, comparative religion, numismatics and cultural geography) to create the most comprehensive Viking Age book of its kind ever attempted. Consisting of longer articles providing overviews of important themes, supported by shorter papers focusing on material of particular interest, this comprehensive volume covers such wide-ranging topics as social institutions, spatial issues, the Viking Age economy, warfare, beliefs, language, voyages, and links with medieval and Christian Europe. This original work, specifically oriented towards a university audience and the educated public, will have a self-evident place as an undergraduate course book and will be a standard work of reference for all those in the field.

Made in Israel

9-11 and the Jewish Plot Against America

THE EVILS OF 9-11 REVISITED 10 years ago, on the brilliantly sunny morning of Sept. 11, 2001 mass murderers the sickest and most evil psychopaths among the human race unleashed a reign of terror that would ultimately kill nearly 3,000 innocent citizens. As Americans watched these horrors unfold on their television sets, they were subjected to an occult, magical rite that would severely traumatize them and forever transform our nation. As sirens wailed, fires burned, people screamed and television newsmen riddled their viewers with alarm, those who orchestrated this sacrificial slaughter reveled in the paranoia and carnage. As blame for these attacks was quickly placed on Osama bin Laden and 19 Muslim hijackers, the actual plotters Talmudic exterminators and their neo-con political sycophants peered from the shadows as horrified jumpers leaped to their deaths from the World Trade Center towers and splattered on New York City's streets. Shortly thereafter, these two 110-story skyscrapers were swallowed directly into the Earth by energy sources as powerful as the Sun. Ground Zero, in its original interpretation as the spot of a nuclear explosion, had been born. The monstrous aberrations responsible for these crimes against humanity mutilated and desecrated our security. Certainly 9-11 was an inside job, but it was also an outside job as well. The ravenous dogs that assaulted USS Liberty crewmembers in 1967 now unleashed without a trace of conscience their cesspool of bloodlust on America's own homeland. On that fateful morning, pandemonium ran rampant through every neighborhood. People wondered rightly so if WW III had begun? After the Pentagon our military nerve center was purportedly rendered ineffective against this onslaught, what target would be next? Television sets cast incantations and demented spells over every viewer that sat transfixed, frozen with fright. In a state of primal fear, these cabbalistic sorcerers and propagandists actually took possession of the victimized masses. At this precise moment, brainwashing, trauma programming and psychic driving would reach its height of effectiveness. More sirens, flames, controlled demolitions, hellish smoke, terror alerts on every channel and mounting death counts. The world had changed, and we could never return to where we once were. Like vermin-infected rodents carrying toxic poison in their DNA, the 9-11 architects created this Pearl Harbor grand illusion to lay a foundation for even more lies, i.e. wars in Afghanistan and Iraq where killing-field corpses would be stacked by the thousands. 9-11 Evil . . . 10 years ago the spiritually malignant blackness of this Made in Israel false-flag attack stole our family's lives and savaged our country's collective mindset. They are destroyers, vipers of an inhuman species, and we will never forget what they've done to us.
