The Thinking Crisis

The Disconnection of Teaching and Learning in Today's Schools

iUniverse The objectives of The Thinking Crisis are: to examine the reasons for the decline in the quality of student writing by what is taught—and learned—in high school; to demonstrate the consequences of this decline by examining current student writing in college; to compare this writing with student writing of twenty years ago; to suggest ways in which this "disconnection" between what a teacher teaches and what a student needs to learn can be ameliorated. We believe that this book is unique in its approach to problems that we see in student writing today in that it neither advocates nor rejects the present pedagogy in the schools; but it argues that this pedagogy be properly implemented. While many of the ideas advanced today for improving writing are sound, they are often misinterpreted and poorly taught. We also argue that the lowering of the level of student reading by the general abandonment of classic texts in the curriculum has contributed to the decline in thinking, reading and writing.

The End of the Job Description

Shifting From a Job-Focus To a Performance-Focus

Springer 'That's not my job.' If you don't want your employees to say that, why do you start your relationship by giving them a narrow task and competency focused description of their job? We need people to fulfil many different roles at work yes the need to do their job, but they also need to contribute positive energy, collaborate, and take personal responsibility for innovation and personal development. How do they fit into a traditional job description? It is futile persevering with the job description borne out of the scientific management movement one hundred years ago. The world of work is vastly different to the assembly lines of the Ford Motor Company of the early twentieth-century. Building on the phenomenal success of *The End of the Performance Review*, Baker examines four essential 'Non-Job' roles that all employees must fulfil and shows how to create meaningful role descriptions that can help you recruit better people and enable them to deliver better results.
