THE PROMISE OF ADOLESCENCE

REALIZING OPPORTUNITY FOR ALL YOUTH

National Academies Press *Adolescence* "beginning with the onset of puberty and ending in the mid-20s" is a critical period of development during which key areas of the brain mature and develop. These changes in brain structure, function, and connectivity mark adolescence as a period of opportunity to discover new vistas, to form relationships with peers and adults, and to explore one's developing identity. It is also a period of resilience that can ameliorate childhood setbacks and set the stage for a thriving trajectory over the life course. Because adolescents comprise nearly one-fourth of the entire U.S. population, the nation needs policies and practices that will better leverage these developmental opportunities to harness the promise of adolescence "rather than focusing myopically on containing its risks. This report examines the neurobiological and socio-behavioral science of adolescent development and outlines how this knowledge can be applied, both to promote adolescent well-being, resilience, and development, and to rectify structural barriers and inequalities in opportunity, enabling all adolescents to flourish.

THE RENAISSANCE (EBOOK)

Lorenz Educational Press *"The Renaissance" (1300–1500)* provides an overview of the years from the Late Middle Ages through the Renaissance. Special emphasis is given to the natural and political disasters that ravaged 14th-century Europe, as well as the unprecedented intellectual, cultural, and artistic flourishing of the 15th and 16th centuries. The Black Death, The Hundred Years' War, the invention of the printing press, the birth of humanism, and the life of Leonardo da Vinci are among

the dramatic events vividly documented in this richly illustrated text. Challenging map exercises and provocative review questions encourage meaningful reflection and historical analysis. Tests and answer keys are included.

THE LATE MIDDLE AGES

A.D. 1300-1500

Milliken Publishing Company "The Late Middle Ages" (1300–1500) provides an overview of natural and political disasters that ravaged Europe during the 14th and 15th centuries. The Black Death, the Hundred Years' War, and the rise of weak monarchies are among the dramatic events vividly documented in this richly illustrated text. Challenging review questions encourage meaningful reflection and historical analysis. A unit test and answer key are included.

TRANSFORMING THE WORKFORCE FOR CHILDREN BIRTH THROUGH AGE 8

A UNIFYING FOUNDATION

National Academies Press *Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.*

DISABILITY ACROSS THE DEVELOPMENTAL LIFE SPAN

FOR THE REHABILITATION COUNSELOR

Springer Publishing Company *This is the only text to provide comprehensive coverage of human growth and development, a requirement mandated by the Council of Rehabilitation Education (CORE) for a master's degree in rehabilitation counseling and for Licensed Professional Counselor certification. Written by an eminent leader in the field of disability studies, this book reflects a significant change in perceptions of individuals with disabilities from being defined foremost by*

their disability to being viewed as normal individuals with a disability. It provides an understanding of traditional human growth and development that will enhance the practice of disability counseling by enabling an understanding of a client's childhood and prior life experiences. The book begins with a focus on developmental theories and tasks, followed by a discussion of cultural and ethical considerations in human development. It considers the major theories of human development as they relate to people with and without disabilities, and career theories with a focus on the concept of choice. The book addresses specific developmental stages including a description of developmental tasks, risks, disability applications, specific disabilities common to a particular stage, and cultural and ethical issues, all supported by case examples. Key Features: Fulfills the required CORE mandated course on human growth and development and the disability experience Addresses disability across the lifespan in relation to developmental stages Authored by highly a respected expert in disability studies

BIOLOGICAL-PSYCHOSOCIAL INTERACTIONS IN EARLY ADOLESCENCE

Routledge First published in 1987, *Biological-Psychosocial Interactions in Early Adolescence* explores the mutually - influential relations between biological and psychosocial variables as the basis for development in the early portions of the adolescent period and, in fact, across the entire life span. The volume introduces key conceptual and methodological issues that are raised by the study of biological-psychosocial interrelations. It provides key foundations for the research conducted in major laboratories in USA back in 1980s. It also provides the results from these laboratories and their progress at that time. This book will be an essential read for scholars and researchers of psychology, behavioural science, and sociology.

PSYCHOLOGY

Cengage Learning Straightforward and written in a friendly style, James S. Nairne's *PSYCHOLOGY, Sixth Edition*, uses a proven problem-solving approach to help you discover how to apply psychology to your everyday life. Dr. Nairne introduces topics by focusing on the why behind psychological processes before introducing what they are and how they work. You'll learn that our brains are filled with psychological tools that control everything from emotion to memory, and that each helps us adapt and solve important everyday problems. Nairne describes these tools, shows you how they're used, and focuses on specific situations in which they are applied. Emphasizing critical thinking and active learning, *PSYCHOLOGY, Sixth Edition*, provides current, comprehensive, and practical coverage that you can immediately put to good use. PERCEPTION AND COGNITION: INTERACTIONS IN THE AGING BRAIN

Frontiers Media SA *Healthy ageing can lead to declines in both perceptual and cognitive functions. Impaired perception, such as that resulting from hearing loss or reduced visual or tactile resolution, increases demands on 'higher-level' cognitive functions to cope or compensate. It is possible, for example, to use focused attention to overcome perceptual limitations. Unfortunately, cognitive functions also decline in old age. This can mean that perceptual impairments are exacerbated by cognitive decline, and vice versa, but also means that interventions aimed at one type of decline can lead to improvements in the other. Just as improved cognition can ameliorate perceptual deficits, improving the stimulus can help offset cognitive deficits. For example, making directions and routes easy to follow can help compensate for declines in navigation abilities. In this Topic, we bring together papers from both auditory and visual researchers that address the interaction between perception and cognition in the ageing brain. Many of the studies demonstrate that a broadening of representations or increased reliance on gist underlie perceptual and cognitive age-related declines. There is also clear evidence that impaired perception is associated with poor cognition although, encouragingly, it can also be seen that good perception is associated with better cognition. Compensatory cognitive strategies were less successful in improving perception than might be expected. We also present papers which highlight important methodological considerations that are required when studying the older brain.*

PSYCHOLOGICAL PERSPECTIVES ON EXPERTISE

Frontiers Media SA *Experts are persons who are very knowledgeable about or skillful in a particular area. The aim of this Research Topic is to advance knowledge in the understanding of the phenomenon of expertise by putting together different lines of research that directly or indirectly study expertise. Herbert Simon's expertise studies initiated two lines of research. One is interested in elucidating the cognitive processes underlying expertise, and the other investigates how expertise develops. These lines of research started with studies comparing experts and novices in chess, and then they extended to numerous areas of expertise such as music, medical diagnosis, sports, arts and sciences. In the field of judgment and decision making researchers investigate the quality of judgments and decisions of experts in different professions (e.g., clinical psychologists, medical practitioners, judges, meteorologists, stock brokers). Those lines of research explicitly investigate the topic of expertise, but there are other research areas that make a substantial contribution to understanding expertise. Scholars in language acquisition and in face perception, for example, investigate cognitive processes and development of expertise in areas in which almost everyone becomes an expert. Furthermore, skill acquisition research informs in detail about short term cognitive changes that may be important to understand how expertise develops. We are interested in original research that advances knowledge in the understanding of decision making, cognitive processes and development of expertise in sports, intellectual games, arts, scientific disciplines and professions, as well as expertise in cognitive abilities such as perception, memory, attention, language and imagery. We are also interested in theoretical articles in any of these areas, articles that describe computational or mathematical models of expertise, and articles offering a framework that would guide expertise research. Articles that offer integrative approaches of some of the areas described above are strongly encouraged. The goal of this Research Topic is to produce a hallmark piece of work in the field of expertise, which complements and does not overlap with the "Neural implementations of expertise" Research Topic in Frontiers in Human Neuroscience.*

DISABILITY ACROSS THE DEVELOPMENTAL LIFESPAN, SECOND EDITION

AN INTRODUCTION FOR THE HELPING PROFESSIONS

Springer Publishing Company This is the only text to examine the experience of disability in relation to theories of human growth and development. It provides a foundational and comprehensive examination of disability that encompasses the intellectual, psychiatric, physical, and social arenas. The second edition is updated to underscore its versatility as an introductory text about the developmental tasks of people with disabilities for all the helping professions. Reorganized to illuminate the book's interdisciplinary focus, it includes new demographics, new case studies and first-person accounts, discussions on cultural aspects of disabilities, family concerns, and more. The text delivers practice guidelines for each of the conventional life stages and describes the developmental tasks of individuals with disabilities (IWDs). It emphasizes the positive trend in the perception of IWDs as normal and underscores the fact that IWDs have the same motivations, emotions, and goals as those without disabilities. Learning activities, suggestions for writing exercises, and websites for further study reinforce learning, as do graphs and charts illustrating trends and demographics. **NEW TO THE SECOND EDITION:** Introductory chapter on

understanding disability Demographic updates throughout New case studies and first-person accounts Expanded discussions about cultural considerations, intersectionality, and family considerations Updated Instructor's Manual and an Instructor's Test Bank KEY FEATURES: Examines the conventional stages of human growth and development from the perspective of individuals with disabilities Integrates disability concepts with developmental theories and stages of the lifespan Addresses common ethical issues to illuminate the real-world implications faced by individuals with disabilities and their families Includes learning activities, suggestions for writing exercises, and websites for further study Purchase includes digital access for use on most mobile devices or computers.

ANIMAL PRODUCTION AND ANIMAL SCIENCE WORLDWIDE

WAAP BOOK OF THE YEAR 2007

Wageningen Academic Publishers This World Association for Animal Production (WAAP) Book of the Year series, now in its fourth volume, grows each year in its popularity. The authors are selected for their expertise in a specific field of the animal science. It is intended to constantly update animal scientists, industry representatives, animal breeders and extension service personnel with all the aspects considered relevant in each specific field of animal science. The book offers an updated and complete picture of the animal industry and of livestock science worldwide. We maintain the book's successful four section structure for easy access to the information. The first section of the book deals with livestock industry and possible application of research developments in the various continents. The following section reports updates about development of research in the various disciplines in the entire animal science field. The third section contains interesting articles on 'free subjects', of broad interest. We were told by readers of the previous volumes that this is the most popular section for the variety of actual and interesting topics for readers. The final section shows, like every year, detailed statistics of extraordinary importance in the animal industry. This book is generally recognized as one of the very few practical resources of comprehensive statistical information related to animal industry and it is considered by most important libraries to be a key instrument to offer their readers high-quality, updated relevant information on global animal science developments.

PLANT BIOMASS CONVERSION

John Wiley & Sons A whole host of motivations are driving the development of the "renewables" industry—ranging from the desire to develop sustainable energy resources to the reduction of dangerous greenhouse gases that contribute to global warming. All energy utilized on the earth is ultimately derived from the sun through photosynthesis—the only truly renewable commodity. As concerns regarding increasing energy prices, global warming and renewable resources continue to grow, so has scientific discovery into agricultural biomass conversion. Plant Biomass Conversion addresses both the development of plant biomass and conversion technology, in addition to issues surrounding biomass conversion, such as the affect on water resources and soil sustainability. This book also offers a brief overview of the current status of the industry and examples of production plants being used in current biomass conversion efforts.

THE TOXIC CLASSROOM

AND WHAT CAN BE DONE ABOUT IT

Routledge *The Toxic Classroom offers a wide-ranging look at education today and explores in detail the pressures children experience as a result of constant change, digital technology and political interference. Beginning with what it is like to be a child in the classroom, the book goes on to provide a detailed analysis of the curriculum, assessment and accountability, school structures, educating for global citizenship and the plethora of social issues schools are now expected to solve. Written from the perspective of a successful headteacher with over 30 years' teaching experience, the book considers what needs to be done to put things right and outlines a more equitable and effective school system. Each chapter outlines the steps schools can implement immediately and the longer-term policy changes that are needed de-toxify the classroom and facilitate a genuine love of learning. Offering a challenging yet compelling argument for putting education back into the hands of teachers, this book will be of great interest both to the general reader and to those working within education such as teachers and professionals who wish to improve the ways in which children learn and develop.*

THE CURIOUS AUTOBIOGRAPHY OF ELAINE JAKES

Archway Publishing *Witty, warm and wacky—a spiritual journey of self-discovery “The Curious Autobiography of Elaine Jakes offers us slices of classic Americana lovingly transformed by the spirit of Welsh storytelling. It is the spiritual odyssey of a woman finding her way back to faith. Her journey is touching, amusing, and at times hilarious.” —Rev. Timothy Vaverek, S.T.D., Christian Writer “Witty, wacky, zany—this is a postmodern romp which astonishes with moments of spiritual wisdom and provocative piety.” —David Lyle Jeffrey, Distinguished Professor of Literature and the Humanities, Baylor University, Author, Houses of the Interpreter and People of the Book In The Curious Autobiography of Elaine Jakes, author H.R. Jakes offers a fictionalized account of Elaine’s life, telling a variety of stories that involve a romantic ride in an old-fashioned car, a frightening cheese plate, a magic sword, and a cross-dressing monkey. Her story is not one, but many as she humorously reveals time and again how connected her own narrative is to that of her Welsh forebears. During the journey, Elaine, a school teacher in the vivacious and eccentric community of New Hope, Pennsylvania, gains not only an appreciation of the world but also of her heritage, herself, and God.*
