This lack of integration means that it is more costly for Bangladesh and India to trade with each other than for either of them to trade with Europe. As a result, bilateral trade represents only about 10 percent of Bangladesh's trade and a mere 1 percent of India's trade. Connecting to Thrive: Challenges and Opportunities of Transport Integration in Eastern South Asia presents a collection of innovative technical analyses that show what is needed to achieve seamless connectivity in the region. The report explores the extent to which the Bangladesh-Bhutan-India-Nepal Motor Vehicles Agreement (MVA) supports the cross-border operation of road transport services and identifies the gaps in the agreement that need to be addressed to improve its effectiveness. It assesses the potential shift of freight traffic to new routes and modes in eastern India and Bangladesh once the MVA is implemented and the potential impact of the MVA on wages, employment, and income in Bangladesh and India. It explores how the local impacts of a regional corridor could be enhanced in rural areas by improving access to markets along the corridors and how women's participation in export-oriented agriculture value chains could be improved to allow women to take advantage of improved regional connectivity. Connecting to Thrive will be of interest to policy makers, private sector practitioners, and academics with an interest in regional connectivity in eastern South Asia.* **Priorities for investment in the railways third report of session 2009-10, Vol. 2: Oral and written evidence** The Stationery Office *Incorporating HC 1056, session 2008-09* **Electricity Fiber-Wireless Convergence in Next-Generation Communication Networks Systems, Architectures, and Management** Springer *This book investigates new enabling technologies for Fi-Wi convergence.
