BUILDING BRIDGES

BIBLICAL COUNSELING ACTIVITIES FOR CHILDREN AND TEENS

New Growth Press Knowing how to approach children and teens in counseling can be a challenge. Learning to enter into their world and draw them out can sometimes feel impossible. But with Julie Lowe's Building Bridges—a practical workbook of expressive activities to do with kids and teens in counseling—you will find the biblical tools you're looking for. There are thoughtful, biblically wise, and creative ways we can engage young people. The responsibility lies on us as adults to work hard at drawing kids out. Thankfully, there are helpful, practical ways to speak the gospel into their lives, and by building bridges with young people, we can build bridges with them to the Lord. With over fifteen years of counseling experience and by working as a registered play therapist supervisor, Julie Lowe understands there is a need to speak truth and hope into the lives of children and teens in a hands-on, meaningful way. That's why the activities in Building Bridges can be used over and over in multiple contexts. This workbook walks men and women through the rationale for expressive activities, provides examples, and then shows counselors how to do it themselves. By pointing to the Lord through expressive mediums, counselors and youth workers will be able to reach kids and teens in a unique, biblical way.

ELECTRONICS FOR KIDS

PLAY WITH SIMPLE CIRCUITS AND EXPERIMENT WITH ELECTRICITY!

No Starch Press Why do the lights in a house turn on when you flip a switch? How does a remote-controlled car move? And what makes lights on TVs and microwaves blink? The technology around you may seem like magic, but most of it wouldn't run without electricity. Electronics for Kids demystifies electricity with a collection of awesome hands-on projects. In Part 1, you'll learn how current, voltage, and circuits work by making a battery out of a lemon, turning a metal bolt into an electromagnet, and transforming a paper cup and some magnets into a spinning motor. In Part 2, you'll make even more cool stuff as you: -Solder a blinking LED circuit with resistors, capacitors, and relays -Turn a circuit into a touch sensor using your finger as a resistor -Build an alarm clock triggered by the sunrise -Create a musical instrument that makes sci-fi soundsThen, in Part 3, you'll learn about digital electronics—things like logic gates and memory circuits—as you make a secret code checker and an electronic coin flipper. Finally, you'll use everything you've learned to make the LED Reaction Game—test your reaction time as you try to catch a blinking light!With its clear explanations and assortment of hands-on projects, Electronics for Kids will have you building your own circuits in no time.

BE THE PARENT, PLEASE

STOP BANNING SEESAWS AND START BANNING SNAPCHAT: STRATEGIES FOR SOLVING THE REAL PARENTING PROBLEMS

Templeton Foundation Press The tech giants of silicon valley design their products to hook even the most sophisticated adults. Imagine then, the influence these devices have on the developing minds of young people. Touted as tools of the future that

kids must master to ensure a job in the new economy, they are in reality the culprits, stealing our children's attention, making them anxious, agitated, and depressed. What's worse, schools across the country are going digital under the assumption that a tablet with a wi-fi connection is what's lacking in our education system. Add to that the legion of dangers invited by unregulated access to the internet, and it becomes clear that our screen-saturated culture is eroding some of the most important aspects of childhood. In Be the Parent, Please, former New York Post and Wall Street Journal writer Naomi Schaefer Riley draws from her experience as a mother of three and delves into the latest research on the harmful effects that excessive technology usage has on a child's intellectual, social, and moral formation. Throughout each chapter, she backs up her discussion with "tough mommy tips"—realistic advice for parents who want to take back control from tech. With the alluring array of gadgets, apps, and utopian promises expanding by the day, engulfing more and more of our lives, Be the Parent, Please is both a wakeup call and an indispensable guide for parents who care about the healthy development of their children.

SUFFER THE CHILDREN: THE CASE AGAINST LABELING AND MEDICATING AND AN EFFECTIVE ALTERNATIVE

W. W. Norton & Company A persuasive rejection of mainstream child psychiatry that guides parents to understand their child's behavioral problems without stigmatizing diagnoses. With more than four million American children diagnosed with ADHD and other psychiatric disorders, taking a child to a psychiatrist is as common as taking them to soccer practice. But, disturbingly, a great number of children experience dangerous emotional and physical side effects from psychotropic medications. Where can parents who are eager to avoid shaming labels and drugs turn when their child exhibits disturbing behavior? Suffer the Children presents a much-needed alternative: child-focused family therapy. A family therapist for over twenty years, Marilyn Wedge shares the stories of her patients. Wedge presents creative strategies that flow from viewing children's symptoms not as biologically determined "disorders" but as responses to relationships in their lives that can be altered with the help of a therapist. Instructive, illuminating, and uplifting, Suffer the Children radically reframes how we as parents, as health professionals, and as a society can respond to problems of childhood in a considerate and respectful fashion.

HUMAN INTERFACE AND THE MANAGEMENT OF INFORMATION. INTERACTING WITH INFORMATION

CONTEMPORARY FAMILIES AT THE NEXUS OF RESEARCH AND PRACTICE

Taylor & Francis Contemporary Families at the Nexus of Research and Practice integrates current research with clinical theory to establish the most up-to-date, evidence-supported treatment options for unique contemporary families. Each chapter begins with a case study and genogram. A research section that explains family experiences outlined in the case study follows. Finally, a treatment section presents clinical theory and provides an evidence-supported practice. Together, each chapter demonstrates how theory gets translated into practice. Family forms discussed include families of divorce, stepfamilies, families of addiction, impoverished families, families of incarceration, families of cyberbullying, and

families of murder victims. Whether you're a professional or a student, this book will provide both relevant research findings and explicit instruction and case material to augment your practice.

RAISING ABLE

eBookIt.com Give your children the gift of self-esteem, self-confidence and skills to succeed in life. Learn to empower children to make good decisions when they become teenagers and they're 60 miles away, going 60 miles an hour. Start when they are young by learning the Raising Able Family Management System based on: - family meetings, family chores, family dinner; - the triple e - encouragement, entitlement, empowerment; and - natural and logical consequences. Parents will be calmer and happier and be able to retire from being the house servant. Children will learn skills, time management, and responsibility. They will experience being part of a team and greater self-esteem and self-confidence. Chores counteract entitlement because it's impossible to feel entitled when youngsters clean toilets, sweep floors and rake leaves. Chores cure boredom immediately because there's always more work to be done in a home. This easy-to-read book offers time-tested advice by the mother of four children who has taught many parents the Raising Able Family Management System. The system is useful for typical children AND for special needs children. ADD recommend the Raising Able Family Management system for use with young people with ADD and ADHD.

Its all about getting work done, at home as it is in the workplace. It can be managed as a team so mom doesnt have to carry a disproportional share of it.

MARRIAGES, FAMILIES, AND RELATIONSHIPS: MAKING CHOICES IN A DIVERSE SOCIETY

Cengage Learning This best-selling text on marriages, families, and relationships combines a rigorous scholarly and applied approach with a theme especially relevant

to today's dynamic global environment: making choices in a diverse society. The authors use an engaging narrative to create a highly readable text that offers insightful perspectives on the diversity of our modern society, including different ethnic traditions and family forms. The balanced presentation discusses a variety of theoretical perspectives (e.g., family ecology, structure-functional, interaction-constructionist, family systems, biosocial), emphasizing both social structure and the importance of individual agency, choice, and decision-making. Students are encouraged to question assumptions and reconcile conflicting ideas and values as they make informed choices in their own lives. You'll also find specifics about each state's laws, including what factors courts consider when they rule on custody arrangements and what happens when one parent wants to move away with the children.

WHAT EVERY LIBRARIAN SHOULD KNOW ABOUT ELECTRONIC PRIVACY

Greenwood Publishing Group Library computer users are often novices and may not be aware that even seemingly innocuous information supplied to Web sites can be mined by government agencies, unscrupulous businesses, and criminals. Even the donated computers that libraries accept and pass on to otherwcan reveal confidential information like social security numbers. The recent discovery that online service providers have been supplying vast quantities of data to government agencies without the public's knowledge dramatically brought this threat to light. This book will help you, as a librarian, understand the threats and pitfalls of electronic privacy and develop a solid plan to protect the privacy of your patrons.

IMAGINATION AND PLAY IN THE ELECTRONIC AGE

Harvard University Press Television, video games, and computers are easily accessible to twenty-first-century children, but what impact do they have on creativity and imagination? In this book, two wise and long-admired observers of children's make-believe look at the cognitive and moral potential--and concern--

created by electronic media.

RESET YOUR CHILD'S BRAIN

A FOUR-WEEK PLAN TO END MELTDOWNS, RAISE GRADES, AND BOOST SOCIAL SKILLS BY REVERSING THE EFFECTS OF ELECTRONIC SCREEN-TIME

New World Library Increasing numbers of parents grapple with children who are acting out without obvious reason. Revved up and irritable, many of these children are diagnosed with ADHD, bipolar illness, autism, or other disorders but don't respond well to treatment. They are then medicated, often with poor results and unwanted side effects. Based on emerging scientific research and extensive clinical experience, integrative child psychiatrist Dr. Victoria Dunckley has pioneered a four-week program to treat the frequent underlying cause, Electronic Screen Syndrome (ESS). Dr. Dunckley has found that everyday use of interactive screen devices — such as computers, video games, smartphones, and tablets — can easily overstimulate a child's nervous system, triggering a variety of stubborn symptoms. In contrast, she's discovered that a strict, extended electronic fast single-handedly improves mood, focus, sleep, and behavior, regardless of the child's diagnosis. It also reduces the need for medication and renders other treatments more effective. Offered now in this book, this simple intervention can produce a life-changing shift in brain function and help your child get back on track — all without cost or medication. While no one in today's connected world can completely shun electronic stimuli, Dr. Dunckley provides hope for parents who feel that their child has been misdiagnosed or inappropriately medicated, by presenting an alternative explanation for their child's difficulties and a concrete plan for treating them.

ELECTRONIC HEARTH

CREATING AN AMERICAN TELEVISION CULTURE

Oxford University Press We all talk about the "tube" or "box," as if television were simply another appliance like the refrigerator or toaster oven. But Cecilia Tichi

argues that TV is actually an environment--a pervasive screen-world that saturates almost every aspect of modern life. In *Electronic Hearth*, she looks at how that environment evolved, and how it, in turn, has shaped the American experience. Tichi explores almost fifty years of writing about television--in novels, cartoons, journalism, advertising, and critical books and articles--to define the role of television in the American consciousness. She examines early TV advertising to show how the industry tried to position the new device as not just a gadget but a prestigious new piece of furniture, a highly prized addition to the home. The television set, she writes, has emerged as a new electronic hearth--the center of family activity. John Updike described this "primitive appeal of the hearth" in *Roger's Version*: "Television is--its irresistible charm--a fire. Entering an empty room, we turn it on, and a talking face flares into being." Sitting in front of the TV, Americans exist in a safety zone, free from the hostility and violence of the outside world. She also discusses long-standing suspicions of TV viewing: its often solitary, almost autoerotic character, its supposed numbing of the minds and imagination of children, and assertions that watching television drugs the minds of Americans. Television has been seen as treacherous territory for public figures, from generals to presidents, where satire and broadcast journalism often deflate their authority. And the print culture of journalism and book publishing has waged a decades-long war of survival against it--only to see new TV generations embrace both the box and the book as a part of their cultural world. In today's culture, she writes, we have become "teleconscious"--seeing, for example, real life being certified through television ("as seen on TV"), and television constantly ratified through its universal presence in art, movies, music, comic strips, fabric prints, and even references to TV on TV. Ranging far beyond the bounds of the broadcast industry, Tichi provides a history of contemporary American culture, a culture defined by the television environment. Intensively researched and insightfully written, *The Electronic Hearth* offers a new understanding of a critical, but much-maligned, aspect of modern life.

CHILDREN'S MUSEUMS AS A NEW INFORMAL LEARNING ENVIRONMENT IN CHINA

PRACTICE, IMPACT AND IMPLICATIONS

Routledge Based on solid theoretical and empirical analyses, this book provides a

first and fresh introduction to the recent development of children's museums in China, along with their educational and social impacts as an informal learning environment for children, families, and society in general. To understand the benefits of children's museums and in providing stimulating, informal education to children, the book looks into the origin and historical development of these institutions and how they have been influenced by informal learning theory, museum education, and early childhood education while providing case studies of children's museums in China and the learning that takes place in them. This research analyses the process of informal learning and provides guidance on ways of elevating children's cognitive and noncognitive development in the informal space. Different stakeholders of children's museums, including parents and educators, practitioners and designers, researchers of informal education, early childhood education, and policy makers will benefit from the insights provided in this book.

VIRTUAL STORYTELLING. USING VIRTUAL REALITY TECHNOLOGIES FOR STORYTELLING

THIRD INTERNATIONAL CONFERENCE, VS 2005, STRASBOURG, FRANCE, NOVEMBER 30-DECEMBER 2, 2005, PROCEEDINGS

Springer Science & Business Media The 1st International Conference on Virtual Storytelling took place on September 27-28, 2001, in Avignon (France) in the prestigious Popes' Palace. Despite the tragic events of September 11 that led to some last-minute cancellations, nearly 100 people from 14 different countries attended the 4 invited lectures given by international experts, the 13 scientific talks and the 6 scientific demonstrations. Virtual Storytelling 2003 was held on November 20-21, 2003, in Toulouse (France) in the Modern and Contemporary Art Museum "Les Abattoirs." One hundred people from 17 different countries attended the conference composed of 3 invited lectures, 16 scientific talks and 11 posters/demonstrations. Since autumn 2003, there has been strong collaboration between the two major virtual/digital storytelling conference series in Europe: Virtual Storytelling and TIDSE (Technologies for Interactive Digital Storytelling and Entertainment). Thus the conference chairs of TIDSE and Virtual Storytelling decided to establish a 2 year turnover for both conferences and to join the respective organizers in the committees. For the third edition of Virtual Storytelling, the Organization Committee chose to extend the conference to 3 days so that more

research work and applications could be presented, to renew the Scientific and Application Board, to open the conference to new research or artistic communities, and to call for the submission of full papers and no longer only abstracts so as to make a higher-level selection.
