ACADEMY OF LEARNING: YOUR COMPLETE PRESCHOOL LESSON PLAN RESOURCE - VOLUME 2

MOVING WITH WORDS & ACTIONS

PHYSICAL LITERACY FOR PRESCHOOL AND PRIMARY CHILDREN

Human Kinetics The earlier that children develop a love for physical activity, the better able they are to acquire the healthy habits that will serve them well throughout their lives. Moving With Words & Actions is designed to help them develop that critical physical literacy. Moving With Words & Actions offers early childhood and physical education teachers more than 70 lesson plans that can be used immediately or can be used as models for creating additional lessons. The plans reinforce both physical literacy and language literacy; they use words related to children's academic learning and understanding of their immediate environment to entice them to move. The lesson plans • Use an interdisciplinary approach, integrating academic concepts from language arts, math, science, health and nutrition, community awareness, and environmental awareness • Are highly adaptable for various settings, including those working with individualized education programs and 504 accommodation plans as well as those teaching in limited spaces • Offer great noncompetitive activities that are perfect for use by recess, lunchtime, and before- and after-school specialists • Have been field tested according to best practices to ensure age appropriateness Each lesson plan includes three learning tasks that help children apply a variety of action words and movement concepts to the moderate- to vigorous-intensity physical activities prescribed in the tasks. Most tasks are easy to implement, requiring no equipment or specialized setting. What's more, all lesson plans address SHAPE America's National Standards and Grade-Level Outcomes for K-12 Physical Education, so preschool children will have a head start on their kindergarten learning. This SHAPE America book, based on the authors' classic Movement-Based Learning, has been completely revamped with new lessons and new material to reflect current research, address the new standards and outcomes, and emphasize physical literacy. Part I offers expert guidance in selecting age-appropriate content, creating and implementing lesson plans, making the most of every lesson, and assessing your students' learning and progress. In part I, you'll explore the importance of words in young children's lives and learn what constitutes an appropriate learning task and how that understanding should inform your teaching. These chapters also highlight two primary instructional strategies for this age group, identify five teaching practices to help student teachers create preservice lessons, and outline three assessment techniques for teachers in early-childhood settings. Part II supplies the lesson plans themselves, categorized by these units: • Healthy Bodies (examining body parts and the ways they move, and increasing awareness of healthy nutrition) • Our Community (enhancing children's understanding of community helpers in familiar roles) • Living Creatures (helping children appreciate animals by imitating their movements, behaviors, and characteristics) • Science and Math (using action rhymes, riddles, and games to learn math and science concepts) • Language Arts (expanding on children's language arts and movement vocabularies with alphabet challenges, action poems, movement riddles, and more) Moving With Words & Actions will help you plan lessons with confidence, use sound instructional strategies, and assess your students effectively as they learn how their bodies function, move, and grow in healthy ways. Children will enjoy the movement activities, which are fun in and of themselves; but, more importantly, they will be taking a solid first step toward becoming physically literate learners who will gain the knowledge, skills, and confidence they need to move with competence in multiple environments and lead active lives.

CHILDREN, HOME AND SCHOOL

REGULATION, AUTONOMY OR CONNECTION?

Routledge In contemporary western societies, there are increasing emphases on children being the responsibility of their parents, contained within the home, and on their compartmentalisation into separate and protected organised educational settings. Thus 'home' and 'school' form a crucial part of children's lives and experiences. This book explores the key institutional settings of home and school, and other educationally linked organised spaces, in children's lives, and the relationships between these. It presents in-depth discussions concerning new research findings from a range of national contexts and focuses on various aspects of children's, and sometimes adult's, own understandings and activities in home and school, and after school settings, and the relationship between these. The contributors assess children from a variety of backgrounds and circumstances and consider how these children see and position themselves as autonomous within, connected to or regulated by home and school. Discussion of the impact of policy and practice developments on the everyday lives of these children is also included.
