Language, Education and Nation-building Assimilation and Shift in Southeast Asia *Springer* This volume tracks the complex relationships between language, education and nation-building in

Southeast Asia, focusing on how language policies have been used by states and governments as instruments of control, assimilation and empowerment. Leading scholars have contributed chapters each representing one of the countries in the region. The Multilingual Edge of Education *Palgrave Macmillan* This book highlights the need to develop new educational perspectives in which multilingualism is valorised and strategically used in settings and contexts of instruction and learning. Situated in the current educational debate about multilingualism and ethno-linguistic minorities, chapter authors examine the polarised response to heightened linguistic diversity and how the debate is very much premised on binary views of monolingualism and multi- or bilingualism. Contributors argue that the diverse linguistic backgrounds of immigrant and minority students should be considered an asset, instead of being regarded as a barrier to teaching and learning. From its title through to its conclusion, this book underlines the current perspective of multilingualism as possessing cutting edge potential for transforming diverse classrooms into more inhabitable, more equitable and more efficiently organised spaces for learning. This book will be of interest to scholars and researchers in educational linguistics, applied linguistics, sociolinguistics, anthropological linguistics, pedagogics, educational studies, and educational anthropology. **Teaching Dual Language Learners What Early Childhood Educators Need to Know** *Paul H Brookes Publishing* "Teaching Dual Language Learners is a practical guide to help early childhood educators understand the needs of and provide instruction for young dual language learners in their classroom"-- **Narrative Structures in Burmese Folk Tales** *Cambria Press* **Funds of Knowledge Theorizing Practices in Households, Communities, and Classrooms** *Routledge* The concept of "funds of knowledge" is based on a simple premise: people are competent and have knowledge, and their life experiences have given them that knowledge. The claim in this book is that first-hand research experiences with families allow one to document this competence and knowledge, and that such engagement provides many possibilities for positive pedagogical actions. Drawing from both Vygotskian and neo-sociocultural perspectives in designing a methodology that views the everyday practices of language and action as constructing knowledge, the funds of knowledge approach facilitates a systematic and powerful way to represent communities in terms of the resources they possess and how to harness them for classroom teaching. This book accomplishes three objectives: It gives readers the basic methodology and techniques followed in the contributors' funds of knowledge research; it extends the boundaries of what these researchers have done; and it explores the applications to classroom practice that can result from teachers knowing the communities in which they work. In a time when national educational discourses focus on system reform and wholesale replicability across school sites, this book offers a counter-perspective stating that instruction must be linked to students' lives, and that details of effective pedagogy should be linked to

local histories and community contexts. This approach should not be confused with parent participation programs, although that is often a fortuitous consequence of the work described. It is also not an attempt to teach parents "how to do school" although that could certainly be an outcome if the parents so desired. Instead, the funds of knowledge approach attempts to accomplish something that may be even more challenging: to alter the perceptions of working-class or poor communities by viewing their households primarily in terms of their strengths and resources, their defining pedagogical characteristics. Funds of Knowledge: Theorizing Practices in Households, Communities, and Classrooms is a critically important volume for all teachers and teachers-to-be, and for researchers and graduate students of language, culture, and education.

In particular, the thesis explores how schooling takes place when a second language is used as a medium of instruction to teach subject content. The study is based on a corpus of 44 hours of video recordings from real-life classroom interaction at two Bangladeshi schools in two metropolitan cities. The age range of the students is 9 to 13 years. Using multimodal conversation analysis, the thesis analyzes the participants' practice - as it emerges through mundane classroom activities - and thereby examines participants' language use in the presence of an existing language policy. The findings show how everyday instructional activities are accomplished in classrooms, especially the pedagogical focus on clarifying subject content and vocabulary. It further highlights that the interrelation between classroom interaction and language policy is informed by the participants' use of embodied resources and the surrounding material ecology. The dissertation contributes to the growing literature on social interaction in bilingual classrooms and the wider field of bilingual and multilingual pedagogy. Den här avhandlingen undersöker tvåspråkig undervisning i

skolor i Bangladesh, med särskilt fokus på hur ett andraspråk, engelska, används för att undervisa ämnesinnehållet. Studien är baserad på videoinspelningar av klassrumsinteraktioner i två skolor i Bangladesh belägna i två storstäder. Åldern på de deltagande eleverna är 9 till 13 år, och den totala inspelningstiden är 44 timmar. I avhandlingen analyseras deltagarnas - både lärares och elevers - pedagogiska interaktion in situ, det vill säga så som de uttrycks i de faktiska klassrumssituationerna. Med hjälp av multimodal konversationsanalys undersöks vilka strategier deltagarna använder för att utföra klassrumsarbete mot bakgrund av skolans språkpolicy om att enbart kommunicera på engelska. Resultatet visar hur den faktiska undervisningen går till i klassrummen, och särskilt det pedagogiska fokuset på att förtydliga ämnesinnehållet och utöka ordförrådet. Avhandlingen bidrar till forskningen om social interaktion i tvåspråkiga klassrum och till den växande kunskapen om två- och flerspråkig pedagogik.

Myanmar's Education Reforms A pathway to social justice? UCL Press This book reviews the state of education in Myanmar over the past decade and a half as the country is undergoing profound albeit incomplete transformation. Set within the context of Myanmar's peace process and the wider reforms since 2012, Marie Lall's analysis of education policy and practice serves as a case study on how the reform programme has evolved. Drawing on over 15 years of field research carried out across Myanmar, the book offers a cohesive inquiry into government and non-government education sectors, the reform process, and how the transition has played out across schools, universities and wider society. It casts scrutiny on changes in basic education, the alternative monastic education, higher education and teacher education, and engages with issues of ethnic education and the debate on the role of language and the local curriculum as part of the

peace process. In so doing, it gives voice to those most affected by the changing landscape of Myanmar's education and wider reform process: the students and parents of all ethnic backgrounds, teachers, teacher trainees and university staff that are rarely heard. **Developing Reading and Writing in Second-language Learners Lessons from the Report of the National Literacy Panel on Language-Minority Children and Youth** *Taylor & Francis*

Essential Shifts for English Learners' Success *Corwin* It was a dark and stormy night in Santa Barbara. January 19, 2017. The next day's

inauguration drumroll played on the evening news. Huddled around a table were nine Corwin authors and their publisher, who together have devoted their careers to equity in education. They couldn't change the weather,

they couldn't heal a fractured country, but they did have the power to put their collective wisdom about EL education upon the page to ensure our multilingual learners reach their highest potential. Proudly, we introduce

you now to the fruit of that effort: **Breaking Down the Wall: Essential Shifts for English Learners' Success**. In this first-of-a-kind collaboration, teachers and leaders, whether in small towns or large urban centers, finally have

both the research and the practical strategies to take those first steps toward excellence in educating our culturally and linguistically diverse children. It's a book to be celebrated because it means we can throw away

the dark glasses of deficit-based approaches and see children who come to school speaking a different home language for what they really are:

learners with tremendous assets. The authors' contributions are arranged in nine chapters that become nine tenets for teachers and administrators

to use as calls to actions in their own efforts to realize our English learners' potential: 1. From Deficit-Based to Asset-Based 2. From Compliance to Excellence 3. From Watering Down to Challenging 4. From Isolation to Collaboration 5. From Silence to Conversation 6. From Language to

Language, Literacy, and Content 7. From Assessment of Learning to Assessment for and as Learning 8. From Monolingualism to Multilingualism 9. From Nobody Cares to Everyone/Every Community Cares Read this book;

the chapters speak to one another, a melodic echo of expertise, classroom vignettes, and steps to take. To shift the status quo is neither fast nor easy, but there is a clear process, and it's laid out here in **Breaking Down the Wall**. To distill it into a single line would go something like this: if we

can assume mutual ownership, if we can connect instruction to all

Despite their linguistic, cognitive, and social potential, many ELs—who account for more than 9 percent of enrollment in grades K-12 in U.S. schools—are struggling to meet the requirements for academic success, and their prospects for success in postsecondary education and in the workforce are jeopardized as a result. Promoting the Educational Success of Children and Youth Learning English: Promising Futures examines how evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health policies and related practices that can result in better educational outcomes. This report makes recommendations for policy, practice, and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12. **Burmese Phrase Book Tuberculosis Programs The U.S. Foreign Language Deficit Strategies for Maintaining a Competitive Edge in a Globalized World** *Springer* This volume explores why Americans are among the least likely in the world to speak another language and how this U.S. foreign language deficit negatively impacts national and economic security, business and

career prospects. Stein-Smith exposes how individuals are disadvantaged through their inability to effectively navigate the global workplace and multicultural communities, how their career options are limited by the foreign language deficit, and even how their ability to enjoy travel abroad and cultural pursuits is diminished. Through exploring the impact of the U.S. foreign language deficit, the author speaks to the stakeholders and partners in the campaign for foreign languages, offering guidance on what can and should be done to address it. She examines the next steps needed to develop specific career pathways that will meet the current and future needs of government, business, and industry, and empower foreign language learners through curriculum and career preparation.

Books The *Around the World Cookbook* is a great opportunity to sample some of the world's favourite dishes. This chapter-by-chapter tour of the world includes over 350 authentic and flavoursome recipes in their own diversity.' **Teaching Language in Context** Language is at the heart of the learning process. We learn through language. Our knowledge about the world is constructed in language-the worlds of home and the community, the worlds of school subjects, the worlds of literature, the worlds of the workplace, and so on. It is through language that we interact with others and build our identities. Teachers' explanations, classroom discussions, assessment of student achievement, and students' understanding, composition, and evaluation of texts are all mediated through language. In this book, we will be exploring how an explicit understanding of how language works enables students to make informed choices in their use and understanding of texts. As educators, our job is to make sure that all students have a good command of the language needed to succeed in school and beyond. In order to do this, teachers need to know about language and how it works. This book is intended as an introduction to the language that students encounter in the various curriculum areas as they move through the years of schooling, and it will enable teachers to: plan units of work that are sensitive to the language demands placed on students; design activities with a language focus; select texts for reading at an appropriate level; analyse texts to identify relevant language and visual features; create teaching materials that integrate an awareness of language; help students to access meanings created through a variety of media (written, spoken, visual, multimodal); provide explicit support in developing students' writing and composing; assess students' written work; extend students' ability to articulate what they are learning. New to

this Edition Substantial revision and extension of all chapters. **New Chapter 10** addressing inquiry genres and mixed genres. **Section on the language challenges of middle and senior secondary.** Additional activities. **Language development from the early years through to late secondary.** Increased emphasis on the multimodal nature of contemporary texts. **Improved text design and visuals now in full colour.** **Rooted in Strength Using Translanguaging to Grow Multilingual Readers and Writers** *Scholastic Professional* **Espinosa and Ascenzi-Moreno demonstrate how our emergent bilingual students who speak two or more languages in their daily lives-- thrive when they are able to use "translanguaging" to tap the power of their entire linguistic and sociocultural repertoires. Additionally, the authors present rich and thoughtful literacy practices that propel emergent bilinguals into reading and writing success. The core of this approach is honoring and leveraging the language and cultural resources emergent bilinguals bring to school-- and rooting instruction in their strengths. Knowing more than one language is, indeed, a gift to the classroom! Includes a foreword by Ofelia Garcia. English/Chinese The OPD Second Canadian Edition English/Chinese is an illustrated, theme-based dictionary for second-language learners. This four-colour dictionary defines words through pictures, and presents each new word in context. The OPD English/Chinese, along with the monolingual workbooks and many other components, can be used as a reference book or as text for high school or adult ESL students at the beginner level. For years, the first monolingual Canadian edition of the OPD has been the industry leader among picture dictionaries. The second edition expands on the topics covered, providing more depth of vocabulary in the areas that matter most to students and offers Chinese speakers the additional advantage of having words and phrases defined in their native language. The illustrations have been completely updated in a more realistic style that is visually appealing to adult learners. The second edition also contains two new features: Introductory Pages and Story Pages. The Introductory Pages have been added to the beginning of each theme to give lower-level students a basic overview of key vocabulary words, and to give a starting point for discussion and an introduction to the theme for more advanced students. The Story Pages consist of a two-page spread at the end of each theme to help students use the words in context and practise their reading skills. The OPD English/Chinese is designed for use both in and out of the classroom. Speaking exercises are presented throughout the OPD to allow students to practise new vocabulary in pairs or small groups, while the pronunciation guide in the index allows students to check their pronunciation when they are studying on their own.**
