Understanding Libby

A Mother's Journey with Childhood Paranoid Schizophrenia

Award-winning author Charity Marie was a successful children's author, personal injury Paralegal, Realtor, and mother of two special-needs children. All of that shattered in December 2017 after rushing her eleven-year-old daughter, Liberty, to a local ER due to visual hallucinations. After more than a decade of bizarre behavior, this one event began an ongoing battle for a diagnosis and effective treatment of Liberty's early-onset paranoid schizophrenia. The Understanding Libby series is an in-depth, unflinching, and raw look at the effects of schizophrenia on a victim and her family. This second book in the three-book series continues the story of their journey and continues to be a from-the-trenches example for parents, families, caregivers, and mental health providers of children suffering from mental illness. Never before has such an ambitious attempt been made to shine a light into the dark world of schizophrenia. Book 2 is a series of blog posts written during 2018 as Charity's first-person account of her and her daughter's experiences continuing to seek treatment for a series of baffling and complex mental health symptoms as Charity makes life-altering decisions about Liberty's care. It also contains additional resources and information that will help parents and families with similar struggles, regardless of the mental illness. Join Charity as she maneuvers through an increasingly complex world of medical treatment, mental health facilities, insurance denials, disability, special education, and governmental bureaucracy not to mention feelings of grief and devastating loss, at every turn, while trying to stay positive, find answers, and keep her daughter from killing herself or losing her mind.

The Development of Disability Rights Under International Law

From Charity to Human Rights

Routledge The adoption of the Convention on the Rights of People with Disabilities (CPRD) by the United Nations in 2006 is the first comprehensive and binding treaty on the rights of people with disabilities. It establishes the right of people with disabilities to equality, dignity, autonomy, full participation, as well as the right to live in the community, and the right to supported decision-making and inclusive education. Prior to the CRPD, international law had provided only limited protections to people with disabilities. This book analyses the development of disability rights as an international human rights movement. Focusing on the United States and countries in Asia, Africa, the Middle East the book examines the status of people with disabilities under international law prior to the adoption of the CPRD, and follows the development of human rights protections through the convention's drafting process. Arlene Kanter argues that by including both new applications and entirely new approaches to human rights treaty enforcement, the CRPD is significant not only to people with disabilities but also to the general development of international human rights, by offering new human rights protections for all people. Taking a comparative perspective, the book explores how the success of the CRPD in achieving protections depends on the extent to which individual countries enforce domestic laws and policies, and the changing public attitudes towards people with disabilities. This book will be of excellent use and interest to researchers and students of human rights law, discrimination, and disability studies.

Compulsory Mental Health Interventions and the CRPD

Minding Equality

Bloomsbury Publishing This book delineates the scope of permissible compulsory mental health interventions under the Convention on the Rights of Persons with Disabilities (CRPD). The initial impetus for this study was provided by a conflict between two competing positions within the current debate over the future of coercive psychiatry. According to one position, defended by the CRPD Committee, among others, compulsory mental health care necessarily violates the prohibition of discrimination. According to the competing position, supported by the vast majority of states, compulsion is sometimes necessary to protect health and life and, if coupled with appropriate legal safeguards, it is lawful under such circumstances. This book disputes both positions and argues that the scope of permissible compulsory care can be identified using proportionality reasoning. Drawing on the work of Robert Alexy, it develops a framework for proportionality assessments within the context of non-discrimination. The framework can assist decision-makers to design principled and evidence-based mental health care regimes. This book thus provides a new way forward for states parties looking to reform their mental health care regimes and to improve compliance with the CRPD. It will appeal to academics and practitioners engaged in mental health reform in the post-CRPD era.

Frontiers of Justice

Disability, Nationality, Species Membership

Harvard University Press Theories of social justice, addressing the world and its problems, must respond to the real and changing dilemmas of the day. A brilliant work of practical philosophy, *Frontiers of Justice* is dedicated to this proposition. Taking up three urgent problems of social justice--those with physical and mental disabilities, all citizens of the world, and nonhuman animals--neglected by current theories and thus harder to tackle in practical terms and everyday life, Martha Nussbaum seeks a theory of social justice that can guide us to a richer, more responsive approach to social cooperation.

Restoring Voice to People with Cognitive Disabilities

Cambridge University Press The right to make decisions is important for every individual. It allows us to express ourselves, discover our likes and dislikes, and lead our lives in the way we desire. People with cognitive disability have historically been denied this right in many different ways - sometimes informally by family members or carers, and other times formally by a courtroom or other legal authority. This book provides a discussion of the importance of decision-making and the ways in which it is currently denied to people with cognitive disability. It identifies the human right to equal recognition before the law as the key to ensuring the equal right to decision-making of people with cognitive disabilities. Looking to the future, it also provides a roadmap to achieve such equality.

Social Work with People with Learning Difficulties

Learning Matters This book is part of the highly successful **Transforming Social Work Practice** series and is written specifically to support students on the social work degree. Full of practical activities, case studies and opportunities for students to critically reflect and explore theory and practice. Current practice in the field was driven by the government White

Paper 'Valuing People' (2001) which declared some radical aims for services with people with learning difficulties. Now somewhat compromised by the local authority austerity measures, the goals set by 'Valuing People' are nevertheless still important. This third edition seeks to confirm and strengthen social work values and principles so that the progress and successes achieved by 'Valuing People' can continue. Case studies and activities draw out the key points and reinforce learning. Summaries of contemporary research are included, as are suggestions for further reading and coverage of current government guidance and policy documents. By examining the varied roles that a social worker might undertake in this field, the authors portray a positive picture of working with people with learning difficulties: the achievements and satisfaction, and the learning and understanding that can be gained. They also highlight the need for recognition of vulnerability, the risk of isolation, oppression and abuse, and the continuing political struggle to establish and protect the rights of the individual. Paul Williams has over 40 years' experience of working with people with learning difficulties. He was a founder member of the organisation 'Values into Action' which campaigned for rights, inclusion and community-based services for people with learning difficulties. He is co-author of books on self-advocacy and anti-oppressive practice. A former lecturer in social work at the University of Reading, he is now retired. Michelle Evans has 14 years of practice in all areas of sensory need, including Deaf/deafness, visual impairment and Deafblindness. She has a first class honours degree in social work and has worked as a care manager in adult services and a social worker in children's services. She has a particular interest in methods of social research which contribute to raising sensory awareness in social work/ care management. She lectures social work students at London South Bank University and develops and delivers sensory awareness training to practitioners and managers.

Social Rights and the Constitutional Moment

Learning from Chile and International Experiences

Bloomsbury Publishing Chile's constitutional moment began as a popular demand in late 2019. This collection seizes the opportunity of this unique moment to unpack the context, difficulties, opportunities, and merits to enhance the status of environmental and social rights (health, housing, education and social security) in a country's constitution. Learning from Chilean and international experiences from the Global South and North, and drawing on the analysis of both academics and practitioners, the book provides rigorous answers to the fundamental questions raised by the construction of a new constitutional bill of rights that embraces climate and social justice. With an international and comparative perspective, chapters look at issues such as political economy, the judicial enforceability of social rights, implications of the privatisation of public services, and the importance of active participation of most vulnerable groups in a constitutional drafting process. Ahead of the referendum on a new constitution for Chile in the second half of 2022, this collection is timely and relevant and will have direct impact on how best to legislate effectively for social rights in Chile and beyond.

From Privileges to Rights

People Labeled with Psychiatric Disabilities Speak for Themselves

The right of people with disabilities to live independently and be included in the community

Council of Europe Recognising the right to live in the community is about enabling people to live their lives to their fullest within society and access the public sphere. A precondition for anyone to enjoy all their human rights, this right is taken for granted by the majority of the population, but is often denied to persons with disabilities, who are instead placed in segregated institutions or in settings which isolate them from the rest of the community. This Issue Paper describes the challenges faced by Council of Europe member states in complying with this right. It traces the right of people with disabilities to live independently and be included in the community to its origins in the most fundamental human rights standards both within the Council of Europe and United Nations systems. The paper draws on Article 19 of the UN Convention on the Rights of Persons with Disabilities to identify the various forms that violations of this right can take, and provides guidance for community-based responses governed by choice, in order to achieve inclusion and participation. The paper shows the link between the right to live in the community and other rights, notably the right to equal recognition before the law (legal capacity). The Issue Paper ends with a sample of indicators and guidance questions to assess the transition from violation to implementation of the right to live in the community. The Commissioner's recommendations on the right to live independently and be included in the community are published at the beginning of the document.

Mental Disability And the European Convention on Human Rights

Martinus Nijhoff Publishers Mental disability has come of age as a subject of concern under the European Convention on Human Rights. It was only in 1979 that the first significant decision of the ECHR was decided on the subject, and after that, cases were relatively few for many years. It is only recently that this has begun to change. This volume provides an account of where the law currently stands and speculation as to how it may develop. The initial chapters deal with substantive aspects of Convention rights (including issues of detention in institutions, conditions within institutions, medical treatment, problems associated with guardianship and others). The final two chapters move to discuss the practicalities of litigation. The book concludes with a number of appendices (primarily the primary international legal materials of relevance to mental disability rights under the ECHR, and the relevant recommendations and principles from the Council of Europe). It is hoped that this volume, in addition to shedding light on where the law currently stands, will offer practical guidance to lawyers concerning the mechanics of representing people with mental disabilities.

The Right to Be Protected from Committing Suicide

Bloomsbury Publishing This book argues that suicidal people have the right to receive treatment and for reasonable steps to be taken that they are protected from killing themselves. Those suffering threats to life from mental health issues deserve the same protection as those who face threats to life from ill health or violence from others. The book explores the ethical and legal case for giving those beset with suicidal thoughts the treatment they need and for reasonable steps to be taken to prevent them attempting suicide. Debates around suicide tend to be dominated by cases involving those with terminal medical conditions seeking assisted dying. But of those wishing to die, it is far more common to find middle aged men and young people oppressed by mental health and personal problems. Too often the woeful failure in the funding of mental health services in the UK means that suicidal people are denied the support and help they desperately need. This ground-breaking book makes the legal and ethical case for recognising that the state and public authorities have a duty to provide and implement an effective suicide prevention strategy.

Comprising extracts from statutes, cases and scholarly articles alongside expert author commentary and guidance, Medical Law and Ethics signposts students to all the key issues and principles in medical law. International Disability Law

A Practical Approach to the United Nations Convention on the Rights of Persons with Disabilities

Routledge This book provides a concise guide to international disability law. It analyses the case law of the CRPD Committee and other international human rights treaty bodies, and provides commentaries on more than 50 leading cases. The author elaborates on the obligations of States Parties under the CRPD and other international treaties, while also spelling out the rights of persons with disabilities, and the different mechanisms that exist at both domestic and international levels for ensuring that those rights are respected, protected and promoted. The author also delineates the traditional differentiation between civil and political rights on the one hand, and economic, social and cultural rights on the other. He demonstrates, through analysis of the evolving case law, how the gap between these two sets of rights is gradually closing. The result is a powerful tool for political decisionmakers, academics, legal practitioners, law students, persons with disabilities and their representative organisations, human rights activists and general readers.
