COVER DOWN YUH BUCKET

THE STORY OF STICKLICKING IN BARBADOS

CreateSpace "Cover Down Yuh Bucket is a credit to the persistence of those who have sought to recuperate aspects of

the lost cultural heritage of a people.... The size of this volume and the wide sweep of its comparative data speak to the enthusiasm which Mottley and his co-writers have brought to this enterprise." [Prof. Maureen Warner-Lewis]"What is special about us is our people and their achievements. Sticklicking is one of these achievements, and should have a prominent place in our consciousness." [Elombe]

WORLD REPORT ON VIOLENCE AND HEALTH

This report is part of WHO's response to the 49th World Health Assembly held in 1996 which adopted a resolution declaring violence a major and growing public health problem across the world. It is aimed largely at researchers and practitioners including health care workers, social workers, educators and law enforcement officials.

USES OF HERITAGE

Routledge Examining international case studies including USA, Asia, Australia and New Zealand, Laurajane Smith identifies and explores the use of heritage throughout the world. Challenging the idea that heritage value is self-evident, and that things must be preserved because they have an inherent importance, Smith forcefully demonstrates that heritage value is not inherent in physical objects or places, but rather that these objects and places are used to give tangibility to the values that underpin different communities and to assert and affirm these values. A practically grounded accessible examination of heritage as a cultural practice, The Uses of Heritage is global in its benefit to students and field professionals alike.

UNDERSTANDING MUSIC

PAST AND PRESENT

Music moves through time; it is not static. In order to appreciate music we must remember what sounds happened, and anticipate what sounds might come next. This book takes you on a journey of music from past to present, from the Middle Ages to the Baroque Period to the 20th century and beyond!

FISKE WORDPOWER

THE MOST EFFECTIVE SYSTEM FOR BUILDING A VOCABULARY THAT GETS RESULTS FAST

Sourcebooks, Inc. **The Exclusive Method You Can Use to Learn—Not Just Memorize—Essential Words** A powerful vocabulary expands your world of opportunity. Building your word power will help you write more effectively, communicate clearly, score higher on standardized tests like the SAT, ACT, or GRE, and be more confident and persuasive in everything you do. Using the exclusive Fiske method, you will not just memorize words, but truly learn their meanings and how to use them correctly. This knowledge will stay with you longer and be easier to recall—and it doesn't take any longer than less-effective memorization. How does it work? This book uses a simple three-part system: 1. **Patterns:** Words aren't arranged randomly or alphabetically, but in similar groups based on meaning and origin that make words easier to remember over time. 2. **Deeper Meanings, More Examples:** Full explanations—not just brief definitions—of what the words mean, plus multiple examples of the words in sentences. 3. **Quick Activities:** Frequent short quizzes help you test how much you've learned, while helping your brain internalize their meanings.

SEXUAL HARASSMENT OF WORKING WOMEN

A CASE OF SEX DISCRIMINATION

Yale University Press A comprehensive legal theory is needed to prevent the persistence of sexual harassment. Although requiring sexual favors as a quid pro quo for job retention or advancement clearly is unjust, the task of translating that obvious statement into legal theory is difficult. To do so, one must define sexual harassment and decide what the law's role in addressing harassment claims should be. In *Sexual Harassment of Working Women*, Catharine MacKinnon attempts all of this and more. In making a strong case that sexual harassment is sex discrimination and that a legal remedy should be available for it, the book proposes a new standard for evaluating all practices claimed to be discriminatory on the basis of sex. Although MacKinnon's "inequality" theory is flawed and its implications are not considered sufficiently, her formulation of it makes the book a significant contribution to the literature of sex discrimination. MacKinnon calls upon the law to eliminate not only sex discrimination but also most instances of sexism from society. She uses traditional theories in an admittedly strident manner, and relies upon both traditional and radical-feminist sources. The results of her effort are mixed. The book is at times fresh and challenging,

at times needlessly provocative. -- <https://www.jstor.org> (Sep. 30, 2016).

NURTURESHOCK

NEW THINKING ABOUT CHILDREN

Twelve In a world of modern, involved, caring parents, why are so many kids aggressive and cruel? Where is intelligence hidden in the brain, and why does that matter? Why do cross-racial friendships decrease in schools that are more integrated? If 98% of kids think lying is morally wrong, then why do 98% of kids lie? What's the single most important thing that helps infants learn language? NurtureShock is a groundbreaking collaboration between award-winning science journalists Po Bronson and Ashley Merryman. They argue that when it comes to children, we've mistaken good intentions for good ideas. With impeccable storytelling and razor-sharp analysis, they demonstrate that many of modern society's strategies for nurturing children are in fact backfiring--because key twists in the science have been overlooked. Nothing like a parenting manual, the authors' work is an insightful exploration of themes and issues that transcend children's (and adults') lives.

RECOGNITION IN MOZART'S OPERAS

Oxford University Press 'Recognition in Mozart's Operas' is a thoughtful treatise that uses both literary and musicological methods to illuminate some of Mozart's best-loved operas. Waldoff argues that, rather than offering the simple happy endings or tragic climaxes of 'easier' operas, many of Mozart's work features scenes of recognition-moments.

ORGANIC PHOTORECEPTORS FOR IMAGING SYSTEMS

CRC Press This reference covers in detail the preparation and application of current and emerging organic materials used as xerographic photoreceptors, emphasizing the photo-electric properties of organic solids and evaluating their potential use in xerography.;Reviewing the development of xerography and the steps in the xerographic process, this volume: summarizes the properties, advantages and disadvantages of various classes of materials used as photoreceptors; describes the methods of characterizing the sensitometry of xerographic photoreceptors; examines the physics and chemistry of photogeneration and charge transport processes; and elucidates the sensitometry of different classes of organic materials.;Organic Photoreceptors for Imaging Systems is intended for imaging scientists,

optical engineers and physicists, organic chemists, materials scientists and students in these disciplines.

A HAND-BOOK OF THE ENGLISH LANGUAGE

FOR THE USE OF STUDENTS OF THE UNIVERSITIES AND HIGHER CLASSES OF SCHOOLS

OBSERVING THE OBSERVER

THE STATE OF ISLAMIC STUDIES IN AMERICAN UNIVERSITIES

International Institute of Islamic Thought (IIIT) THE collection of papers in this volume documents the study of Islam in American Universities. Over the last few decades the United States has seen significant growth in the study of Islam and Islamic societies in institutions of higher learning fueled primarily by events including economic relations of the U.S. with Muslim countries, migration of Muslims into the country, conversion of Americans to Islam, U.S. interests in Arab oil resources, involvement of Muslims in the American public square, and the tragic events of 9/11. Although there is increasing recognition that the study of Islam and the role of Muslims is strategically essential in a climate of global integration, multiculturalism, and political turmoil, nevertheless, the state of Islamic Studies in America is far from satisfactory. The issue needs to be addressed, particularly as the need for intelligent debate and understanding is continuously stifled by what some have termed an “Islam industry” run primarily by fly-by journalists, think tank pundits, and cut-and-paste “experts.”

THE PRACTICE OF EVERYDAY LIFE

AFTER CONFUCIUS

STUDIES IN EARLY CHINESE PHILOSOPHY

University of Hawaii Press After Confucius is a collection of eight studies of Chinese philosophy from the time of Confucius to the formation of the empire in the second and third centuries B.C.E. As detailed in a masterful introduction, each essay serves as a concrete example of “thick description”—an approach invented by philosopher Gilbert Ryle—which aims to reveal the logic that informs an observable exchange among members of a community or society. To grasp the significance of such exchanges, it is necessary to investigate the networks of meaning on which they rely. Paul R. Goldin argues that the character of ancient Chinese philosophy can be appreciated only if we recognize the cultural codes underlying the circulation of ideas in that world. Thick description is the best preliminary method to determine how Chinese thinkers conceived of their own enterprise. Who were the ancient Chinese philosophers? What was their intended audience? What were they arguing about? How did they respond to earlier thinkers, and to each other? Why did those in power wish to hear from them, and what did they claim to offer in return for patronage? Goldin addresses these questions as he looks at several topics, including rhetorical conventions of

Chinese philosophical literature; the value of recently excavated manuscripts for the interpretation of the more familiar, received literature; and the duty of translators to convey the world of concerns of the original texts. Each of the cases investigated in this wide-ranging volume exemplifies the central conviction behind Goldin's plea for thick description: We do not do justice to classical Chinese philosophy unless we engage squarely the complex and ancient culture that engendered it. An electronic version of this book is freely available thanks to the support of libraries working with Knowledge Unlatched, a collaborative initiative designed to make high-quality books open access for the public good. FLAVOURS AND FRAGRANCES

CHEMISTRY, BIOPROCESSING AND SUSTAINABILITY

Springer Science & Business Media This book is an introduction to the world of aroma chemicals, essential oils, fragrances and flavour compositions for the food, cosmetics and pharmaceutical industry. Present technology, the future use of resources and biotechnological approaches for the production of the respective chemical compounds are described. The book has an integrated and interdisciplinary approach on future industrial production and the issues related to this topic.

COPPER ALLOYS

EARLY APPLICATIONS AND CURRENT PERFORMANCE - ENHANCING PROCESSES

BoD - Books on Demand Copper has been used for thousands of years. In the centuries, both handicraft and industry have taken advantage of its easy castability and remarkable ductility combined with good mechanical and corrosion resistance. Although its mechanical properties are now well known, the simple f.c.c. structure still makes copper a model material for basic studies of deformation and damage mechanism in metals. On the other hand, its increasing use in many industrial sectors stimulates the development of high-performance and high-efficiency copper-based alloys. After an introduction to classification and casting, this book presents modern techniques and trends in

processing copper alloys, such as the developing of lead-free alloys and the role of severe plastic deformation in improving its tensile and fatigue strength. Finally, in a specific section, archaeometallurgy techniques are applied to ancient copper alloys. The book is addressed to engineering professionals, manufacturers and materials scientists.

THE CONTINENTAL ARMY

Washington, D.C. : Center of Military History, United States Army A narrative analysis of the complex evolution of the Continental Army, with the lineages of the 177 individual units that comprised the Army, and fourteen charts depicting regimental organization.

A CENTURY OF ARTISTS BOOKS

ABRAMS Published to accompany the 1994 exhibition at The Museum of Modern Art, New York, this book constitutes the most extensive survey of modern illustrated books to be offered in many years. Work by artists from Pierre Bonnard to Barbara Kruger and writers from Guillaume Apollinaire to Susan Sontag. An important reference for collectors and connoisseurs. Includes notable works by Marc Chagall, Henri Matisse, and Pablo Picasso.
