France Since 1945

Oxford University Press, USA *The last fifty years have seen immense challenges for the French: constructing a new European order, building a modern economy, searching for a stable political system. It has also been a time of anxiety and doubt. The French have had to come to terms with the legacy of the German Occupation, the political and social implications of the influx of foreign immigrants, the destruction of traditional rural life, and the threat of Anglo American culture to French language and civilization. Robert Gildea's account examines French politics, society, and culture as well as France's role in the world from 1945 to 1995. He looks at France's attempt to recover national greatness after the Second World War; its attempt to deal with the fear of German resurgence by building the European Community; the Algerian war; and the later development of a neo-colonialism to preserve its influence in Africa and the Pacific. He traces the career of General de Gaulle, the revolution of 1968, and the trend towards both political consensus and political disillusionment. He also examines the rise and fall of the French intellectual, the changing cultural policy of the state, and the threat of feminism, regionalism, and multiculturalism to the ideal of the 'One and Indivisible Republic'.*

Audi Quattro Rally Car Enthusiasts' Manual

1980 to 1987 (includes Group 4 & Group B rally cars) *

An insight into the design, engineering and competition history of Audi's iconic rally car

Haynes Publishing UK The original rally Quattro debuted in 1980, and was based on the road car, but with a highly tuned 300bhp engine. In 1981, Audi Quattro works driver Michele Mouton became the first woman to win a World Championship rally. The Quattro

took the Manufacturers' Championship in 1982 and 1984, and the Drivers' Championship in 1983 and 1984 with Hannu Mikkola and Stig Blomqvist respectively. Audi implemented a continuous development programme for the Quattro, and the A1 and A2 were produced to meet the Group B regulations introduced in 1983, while the fearsome Sport Quattro S1 was introduced in 1984. The ultimate development - the S1 E2 - was introduced at the end of 1985, producing over 500bhp, and winning the 1985 San Remo rally in the hands of Walter Röhrl and the famous Pikes Peak hillclimb with Michele Mouton. The Audi Quattro Rally Car Manual looks at the design, evolution, anatomy and operation of the Quattro.

Good Omens

The Nice and Accurate Prophecies of Agnes Nutter, Witch

Harper Collins There is a distinct hint of Armageddon in the air. According to The Nice and Accurate Prophecies of Agnes Nutter, Witch (recorded, thankfully, in 1655, before she blew up her entire village and all its inhabitants, who had gathered to watch her burn), the world will end on a Saturday. Next Saturday, in fact. So the armies of Good and Evil are amassing, the Four Bikers of the Apocalypse

are revving up their mighty hogs and hitting the road, and the world's last two remaining witch-finders are getting ready to fight the good fight, armed with awkwardly antiquated instructions and stick pins. Atlantis is rising, frogs are falling, tempers are flaring. . . . Right. Everything appears to be going according to Divine Plan. Except that a somewhat fussy angel and a fast-living demon -- each of whom has lived among Earth's mortals for many millennia and has grown rather fond of the lifestyle -- are not particularly looking forward to the coming Rapture. If Crowley and Aziraphale are going to stop it from happening, they've got to find and kill the Antichrist (which is a shame, as he's a really nice kid). There's just one glitch: someone seems to have misplaced him. . . . First published in 1990, Neil Gaiman and Terry Pratchett's brilliantly dark and screamingly funny take on humankind's final judgment is back -- and just in time -- in a new hardcover edition (which includes an introduction by the authors, comments by each about the other, and answers to some still-burning questions about their wildly popular collaborative effort) that the devout and the damned alike will surely cherish until the end of all things.

The Big Healeys

With their sleek and powerful looks, the big Austin-Healeys have always made an impression. In this revealing book, the author explores the development of the 'Big' Healeys, as distinct from the smaller Austin-Healey Sprite, to produce a comprehensive and compelling account of one of the iconic British sports cars. After Donald Healey's sports car design impressed the managing director of Austin, Leonard Lord, at the 1952 London Motor Show, Healey was given the engineering back-up that he needed to produce the car in quantity. Teaming up with Jensen Motors to produce the bodywork, Austin provided the mechanical components at their Longbridge factory. The new car was known as the Austin-Healey 100, because it could achieve 100 mph. This book also follows the development of the Austin-Healey 100-Six and the Austin-Healey 3000, describing both the technical developments and the achievements of the cars in competitions and as record-breakers. Every enthusiast of the marque should have this comprehensive review of the design and manufacture of the Big Healeys on their bookshelf, which reveals previously untold stories to tell you the real story of these

magnificent vehicles and the men that made them possible. Gerry Coker, Austin-Healey Designer
