## Physics

## Principles with Applications

**Addison-Wesley** Elegant, engaging, exacting, and concise, *Giancoli's Physics: Principles with Applications*, Seventh Edition, helps you view the world through eyes that know physics. Giancoli's text is a trusted classic, known for its elegant writing, clear presentation, and quality of content. Using concrete observations and experiences you can relate to, the text features an approach that reflects how science is actually practiced: it starts with the specifics, then moves to the great generalizations and the more formal aspects of a topic to show you why we believe what we believe. Written with the goal of giving you a thorough understanding of the basic concepts of physics in all its aspects, the text uses interesting applications to biology, medicine, architecture, and digital technology to show you how useful physics is to your everyday life and in your future profession.

## Raiding, Trading, and Feasting

## The Political Economy of Philippine Chiefdoms

**University of Hawaii Press** As early as the first millennium A.D., the Philippine archipelago formed the easternmost edge of a vast network of Chinese, Southeast Asian, Indian, and Arab traders. Items procured through maritime trade became key symbols of social prestige and political power for the Philippine chiefly elite. *Raiding, Trading, and Feasting* presents the first comprehensive analysis of how participation in this trade related to broader changes in the political economy of these Philippine island societies. By combining archaeological evidence with historical sources, Laura Junker is able to offer a more nuanced examination of the nature and evolution of Philippine maritime trading chiefdoms. Most importantly, she demonstrates that it is the dynamic interplay between investment in the maritime luxury goods trade and other evolving aspects of local political economies, rather than foreign contacts, that led to the cyclical coalescence of larger and more complex chiefdoms at various times in Philippine history. A broad spectrum of historical and ethnographic sources, ranging from tenth-century Chinese tributary trade records to turn-of-the-century accounts of chiefly "feasts of merit," highlights both the diversity and commonality in evolving chiefly economic strategies within the larger political landscape of the archipelago. The political ascendance of individual polities, the emergence of more complex forms of social ranking, and long-term changes in chiefly economies are materially documented through a synthesis of archaeological research at sites dating from the Metal Age (late first millennium B.C.) to the colonial period. The author draws on her archaeological fieldwork in the Tanjay River basin to investigate the long-term dynamics of chiefly political economy in a single region. Reaching beyond the Philippine archipelago, this study contributes to the larger anthropological debate concerning ecological and cultural factors that shape political economy in chiefdoms and early states. It attempts to address the question of why Philippine polities, like early historic kingdoms elsewhere in Southeast Asia, have a segmentary political structure in which political leaders are dependent on prestige goods exchanges, personal charisma, and ritual pageantry to maintain highly personalized power bases. *Raiding, Trading, and Feasting* is a volume of impressive scholarship and substantial scope unmatched in the anthropological and historical literature. It will be welcomed by Pacific and Asian historians and anthropologists and those interested in the theoretical issues of chiefdoms.

## Among the Maasai

## A Memoir

**She Writes Press** In 1999, Juliet Cutler leaves the United States to teach at the first school for Maasai girls in East Africa. Captivated by the stories of young Maasai women determined to get an education in the midst of a culture caught between the past and the future, she seeks to empower and support her students as they struggle to define their own fates. Cutler soon learns that behind their shy smiles and timid facades, her Maasai students are much stronger than they appear. For them, adolescence requires navigating a risky world of forced marriages, rape, and genital cutting, all in the midst of a culture grappling with globalization. In the face of these challenges, these young women believe education offers hope, and so, against all odds, they set off alone—traveling hundreds of miles and even forsaking their families—simply to go to school. Twenty years of involvement with this school and its students reveal to Cutler the important impacts of education across time, as well as the challenges inherent in tackling issues of human rights and extreme poverty across vastly different cultures. Working alongside local educators, Cutler emerges transformed by the community she finds in Tanzania and by witnessing the life-changing impact of education on her students. Proceeds from the sale of this book support education for at-risk Maasai girls.

## Internal Combustion Engines

## Performance, Fuel Economy and Emissions

**Woodhead Publishing** This book presents the papers from the *Internal Combustion Engines: Performance, fuel economy and emissions* held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new

engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

## Why I Didn't Say Anything

**Insomniac Press** In 1996, Sheldon Kennedy rocked the insular world of Canadian hockey by announcing that his former minor-league coach, Graham James -- the *Hockey News* 1989 Man of the Year -- had sexually abused him more than 300 times. The media portrayed Kennedy as a hero for breaking the code of silence in professional hockey and bringing James to justice. The heroic myth intensified in 1998 when Kennedy announced that he was going to in-line skate from Newfoundland to British Columbia to raise awareness of sexual abuse. The skate raised over \$1 million for Canadian Red Cross sexual abuse programs, and Kennedy settled in Calgary with his wife and young daughter. Anyone who has followed hockey in the last ten years is familiar with the story of ex-NHL player Sheldon Kennedy. As one of the most promising hockey talents to emerge from the Canadian minor leagues in the last two decades, Kennedy was destined for hockey greatness. But after he was drafted by the Detroit Red Wings in 1988, he attracted more attention for his off-ice antics than for his contributions to the score sheet. Plagued by rumours of drug and alcohol abuse and a string of injuries, Kennedy drifted from team to team. The happy ending promised by the headlines never materialized. Still haunted by the demons of sexual abuse, Kennedy's life spiralled out of control. Now he has finally come forward to tell his story, and the story of coach Graham James, who is out of prison and currently coaching hockey in Europe.
