Did we mention it is a great gift, GET TWO! Car Guys vs. Bean Counters The Battle for the Soul of American Business

Penguin A legend in the car industry reveals the philosophy that's starting to turn General Motors around. In 2001, General Motors hired Bob Lutz out of retirement with a mandate to save the company by making great cars again. He launched a war against penny pinching, office politics, turf wars, and risk avoidance. After declaring bankruptcy during the recession of 2008, GM is back on track thanks to its embrace of Lutz's philosophy. When Lutz got into the auto business in the early sixties, CEOs knew that if you captured the public's imagination with great cars, the money would follow. The car guys held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put their faith in analysis, determined to eliminate the "waste" and "personality worship" of the bygone creative leaders. Management got too smart for its own good. With the bean counters firmly in charge, carmakers (and much of American industry) lost their single-minded focus on product excellence. Decline followed. Lutz's commonsense lessons (with a generous helping of fascinating anecdotes) will inspire readers at any company facing the bean counter analysis-paralysis menace. Classic Convertibles

The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated

Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now

puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs. How To Build a Cheap Sports Car [Achtung-Panzer!](#) The Development of Armoured Forces, Their Tactics and Operational Potential [Arms & Armour](#) This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris. Johnson** This historic resource survey documents the career and buildings of Rochester, New York's most innovative mid-twentieth century architect, James H. Johnson (1932-2016). In a career spanning nearly 60 years, Johnson designed hundreds of buildings in the greater Rochester area. He is known locally as the designer of the Antell-Whitman House (better known as the "Mushroom House"), Liberty Pole, and Temple Sinai, but his other works are not generally well known, nor is the sheer number of buildings he designed appreciated either by the general public or the architectural community. Johnson's lengthy and prolific career has left the Rochester region with a tremendous legacy of innovative, unusual buildings. Having developed an

early fascination with construction, Johnson always retained his interest in participating in the fabrication of his buildings, and was often found on building sites, particularly when he supervised and took a hands-on role in the construction of his series of earth-formed buildings in the late 1960s. Inspired by nature, geometry, history, and certain architectural predecessors, notably Bruce Goff, Johnson quietly demonstrated his determination to pursue novel approaches to design and construction in both highly visible public projects and in private, personal projects for clients who wanted a house intimately tied to nature, often away from public view. From his earliest projects to some of his last, he thought expansively about integrating architecture with other art forms, and regularly collaborated with artists working in other fields, incorporating their artistic visions into his own. While his expertise with large-scale construction brought him around the world on a few occasions, he spent almost all of his long career working in the Rochester area, where his daring, expressive designs remain some of the boldest and most creative contributions to the region's architectural heritage.
