Child Protective Services

A Guide for Caseworkers

From the Preface: This manual, *Child Protective Services: A Guide for Caseworkers*, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and

administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based- including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

Making and Being

Embodiment, Collaboration, and Circulation in the Visual Arts

"Making and Being draws on the lived experience of Susan Jahoda and Caroline Woolard, visual arts educators who have developed a framework for teaching art with the collective BFAMDAPhD that emphasizes contemplation, collaboration, and political economy. The authors share ideas and pedagogical strategies that they ahve adapted to spaces of learning which reange widely, from self-organized workshops for professional artists to Foundations BFA and MFA thesis classes. This hands-on guide includes activities, worksheets, and assignments and is a critical resource for artists and art educator's today"--Page 4 of cover.

Thermoregulation and Human Performance

Physiological and Biological Aspects

Karger Medical and Scientific Publishers Over the last decades, our understanding of the relationship between thermoregulation, performance and fatigue has changed dramatically. New advances in technology and methodology permitted the study of rising and decreasing body temperature on metabolism and provided insights into the role the nervous system plays in determining human performance under thermally stressful situations. Further analysis of previous research has been necessary in addition to considering theories derived from complimentary areas of research such as evolutionary biology, anthropology and cellular and molecular biology. This publication provides different interpretations of recent research for a better understanding of the limitations of thermoregulation. In particular, it presents evidence for the human's ability to anticipate thermal limits and adjust their performance accordingly so that cellular homeostasis is preserved. Further, the book is featuring the inclusion of the effect of reduced body temperature on muscular performance and endurance which today is a popular method for providing avenues of reduced thermal strain and recovery from exercise. This publication will be an essential read for those working in thermal medicine, exercise physiology and human performance.

Urban and Regional Planning

Routledge This is the fourth edition of the classic text for students of urban and regional planning. It gives a historical overview of the developments and changes in the theory and practice of planning, throughout the entire twentieth century. This extensively revised edition follows the successful format of previous editions. Specific reference is made to the most important British developments in recent times, including the devolution of Scotland, Wales and Northern Ireland, the establishment of the Mayor of London and the dominant urban sustainability paradigm. Planning in Western Europe, since 1945, now incorporates new material on EU-wide issues as well as updated country specific sections. Planning in the United States since 1945, now discusses the continuing trends of urban dispersal and social polarisation, as well as initiatives in land use planning and transportation policies. The book looks at the nature of the planning process at the end of the twentieth century and looks forward to the twenty-first century.

Managing criminal investigations a handbook

Text-book of Pomology

Rotator Cuff Tear

Pathogenesis, Evaluation and Treatment

Springer This handbook provides detailed, state of the art information on simple and complex rotator cuff tears that will be of value in daily clinical practice. It covers all relevant aspects, including basic science, pathogenesis, clinical and instrumental evaluation, and treatment techniques. Drawing on the results of recent studies, the book will enable the reader to better understand how tears occur and what treatment should be employed in different circumstances. Rotator cuff tear has always attracted great interest because it may cause shoulder pain, loss of strength, simple or complex disabilities, and partial or total inability to work, reducing quality of life. The goals of cuff repair are to restore footprint anatomy with biomechanically secure, tension-free construction that promotes biological healing at the tendon-to-bone interface. Even today, there is cause for discussion about when and how to perform surgical repair and on what to do in cases of irreparable rupture. This book casts light on such issues. It is especially designed for shoulder surgeons and rehabilitation specialists and will also be of value for residents and shoulder fellows.

Perspectives in Biophysical Plant Ecophysiology

A Tribute to Park S. Nobel

UNAM Park S. Nobel pioneered the coupling of cellular physical chemistry with plant physiology, providing a sound physicochemical interpretation of the laws of diffusion to a rapidly expanding field of plant physiological ecology. His classical textbook is the only one of its kind to provide an extensive array of quantitative problems and solutions in the field of plant biophysics and ecophysiology, extending from the molecular to the ecological level. In this festschrift, former graduate students and postdocs, as well as colleagues of Prof. Nobel present a series of reviews that include

scales from sub-cellular to global, and topics that range from desert succulent biology to the physiology of alpine plants, encompassing basic research and applications in agronomy and conservation biology. This state-of-the-field survey provides current and useful information for professionals and graduate students, while illustrating the broad span of the influence that Nobel's career has had on modern ecophysiology.

The Social Psychology of English as a Global Language

Attitudes, Awareness and Identity in the Japanese Context

Springer Science & Business Media This ground-breaking work is a detailed account of an innovative and in-depth study of the attitudes of in excess of 500 Japanese learners towards a number of standard and non-standard as well as native and non-native varieties of English speech. The research conducted refines the investigation of learner attitudes by employing a range of pioneering techniques of attitude measurement. These methods are largely incorporated from the strong traditions that exist in the fields of social psychology and second language acquisition and utilize both direct and indirect techniques of attitude measurement. The author locates the findings in the context of the wealth of literature on native speaker evaluations of languages and language varieties. The study is unique in that the results provide clear evidence of both attitude change and high levels of linguistic awareness among the informants of social and geographical diversity within the English language. These findings are analyzed in detail in relation to the global spread of English as well as in terms of the pedagogical implications for the choice of linguistic model employed in English language classrooms both inside and outside Japan. The issues examined are of particular interest to educators, researchers and students in the fields of applied linguistics, TESOL, second language acquisition, social psychology of language and sociolinguistics. The pedagogical and language policy implications of the findings obtained make essential reading for those with a specific focus on the role of the English language and English language teaching, both in Japan and beyond.

Will Europe Work?

Integration, Employment and the

Social Order

Routledge In the post war years European integration was driven by nation states attempting to stimulate economic growth and social cohesion through European trade and cooperation. The results were prosperous, and unified Western European societies were based on full employment and redistributive welfare states. However, in today's Europe - a Europe subject to increasing international competition fuelled by both economic and cultural globalization - the European social model needs to be re-examined, yet its emphasis on cohesion remains crucial for the future of Europe as a unified polity. Investigating this issue in depth, this outstanding collection is divided into three key sections. These parts: * ask how recent developments have changed the old European model of employment and social protection, and outline a possible new European social model * focus on the questions of European identity and European borders, with special emphasis on cultural divisions such as ethnicity * concentrate on institutions such as citizenship and language, and reflect on sociology's ability to address European integration and the new European social order. Will Europe Work? brings together some of the leading names in European sociology to look at the construction of this new European social order through changing patterns of employment and Welfare and changing definitions of citizenship and identity.

Key Principles of Public Sector Reforms

Commonwealth Case Studies

Commonwealth Secretariat Key Principles of Public Sector Reforms contains case studies from Cameroon, Ghana, Grenada, India, Kenya, Rwanda, St Vincent and the Grenadines, Saint Lucia, Seychelles, South Africa, Tanzania and Trinidad and Tobago on the policy reforms, strategies and methodologies that support national priorities and greater policy coherence for sustained development and growth.

Softball Skills & Drills

Human Kinetics Looking for the ultimate book to help you learn and master softball's essential skills? Look no further than the guide that has helped develop the game's top players and most successful teams. This new edition of Softball Skills & Drills is completely updated with more skills, more drills and strategies, and more of the stellar instruction that have made it the top-selling title on the sport. Judi Garman, one of the winningest coaches in NCAA history, teams with Cal State Fullerton's Michelle Gromacki to share their secrets to developing and mastering every aspect of the game. With step-by-step instruction, full-color photo sequences, technique tips, and unique insight into the game, you'll learn every fundamental

skill: •Hitting •Bunting •Slap Hitting •Baserunning •Sliding •Fielding •Throwing •Pitching •Catching And with over 230 of the game's best drills, coverage of team offense and defense, pitch selection, pitch recognition, and in-game strategies, Softball Skills and Drills is simply the most comprehensive and practical guide on the sport. Whether striving to become a complete player or preparing your team for another championship run, Softball Skills &Drills is the one book you cannot be without.

Climate Smart Agriculture Sourcebook

Food & Agriculture Org "Climate-smart agriculture, forestry and fisheries (CSA), contributes to the achievement of sustainable development goals. It integrates the three dimensions of sustainable development (economic, social and environmental) by jointly addressing food security and climate challenges. It is composed of three main pillars: sustainably increasing agricultural productivity and incomes; adapting and building resilience to climate change; reducing and/or removing greenhouse gases emissions, where possible. The purpose of the sourcebook is to further elaborate the concept of CSA and demonstrate its potential, as well as limitations. It aims to help decision makers at a number of levels (including political administrators and natural resource managers) to understand the different options that are available for planning, policies and investments and the practices that are suitable for making different agricultural sectors, landscapes and food systems more climate-smart. This sourcebook is a reference tool for planners, practitioners and policy makers working in agriculture, forestry and fisheries at national and subnational levels." -- Back cover.

"Let Us Die that We May Live"

Greek Homilies on Christian Martyrs from Asia Minor, Palestine, and Syria (c. AD 350-AD 450)

Psychology Press This title offers an approachable, surprising, and not always reverent insight into the life of the Early Church. It reveals the full importance of the martyr homily in terms of style, treatment of its subject, and social and liturgical issues.

Nanostructured Silicon-based Powders and Composites

CRC Press In recent years an increasing interest has been devoted to nanostructured composites. This attention is largely due to exciting possible applications ranging from new catalysts to the preparation of nanocomposites ceramics, with significant improvements in their properties. This book provides a comprehensive survey of French contributions t

Metaphor and Metonymy across Time and Cultures

Perspectives on the Sociohistorical Linguistics of Figurative Language

Walter de Gruyter GmbH & Co KG This volume offers new insights into figurative language and its pervasive role as a factor of linguistic change. The case studies included in this book explore some of the different ways new metaphoric and metonymic expressions emerge and spread among speech communities, and how these changes can be related to the need to encode ongoing social and cultural processes in the language. They cover a wide series of languages and historical stages.

Worker Absenteeism and Sick Pay

Cambridge University Press Absenteeism is the single most important cause of lost labour time, yet it has received much less scholarly attention than more dramatic forms of industrial disruption, such as strikes. Arguing that any explanation of absence rates must take into account the interests of both employers and employees, this book constructs a model of the markets for absence and sick pay. These are not independent since sick pay affects workers' incentives to be absent, and absences affect employers' willingness to pay sick pay. The book reviews the available empirical evidence relating to both markets, stressing the importance of careful identification of the effect of the price of absence on demand, since this is a crucial quantity for firms' policies. It concludes by discussing the implications of the model for human resources management, and for the role of the state in sick pay provision.

Comparison of Solvents for Cleaning Metal Surfaces

The Stig

The Untold Story

Random House Who is The Stig? Where did he come from? Why does he never speak? To answer these questions, award-winning biographer Simon du Beaumarche spent a year chasing The Stig and talking to those closest to him, including Jeremy Clarkson, Richard Hammond, James May and leading figures from Formula 1, music, movies and the military. What he discovered is an explosive story of intrigue, influence and a sensational conspiracy that seeks to hide the truth about one of the 21st century's greatest icons. Get behind the visor of the man, the myth, the driver, the legend, THE STIG. This book contains adult humour and some themes that may be unsuitable for children.

Gardening at Longmeadow

Random House Monty Don made a triumphant return to our screens as presenter of Gardeners' World. A firm favourite with viewers, Monty's infectious enthusiasm for plants, attention to the finer details of gardening technique and easy charm have seen the ratings soar. Here Monty invites us into the garden at Longmeadow, to show us how he created this beautiful garden, and how we can do the same in our own. Following the cycle of the seasons, Gardening at Longmeadow will introduce readers to the garden from the earliest snowdrops of January through the first splashes of colour in the Spring Garden, the electric summer displays of the Jewel Garden, the autumn harvest in the orchard, and on to a Christmas feast sourced from the vegetable gardens. Describing the magic of each area at different times of the year, Monty will explain the basics of what to do when and how to get the most from each plant. He'll talk through the essential techniques and more complex processes, accompanied by easy-to-follow, step-by-step photography. Longmeadow is a gardeners' garden, but this will be a book for gardening enthusiasts of all skill levels who have been inspired by what they've seen, and who would like to achieve something similar for themselves.

Money Doctors

The Experience of International Financial Advising 1850-2000

Routledge The book brings together internationally respected specialists from economics, history and political science such as Harold James, Louis Pauly and Kenneth Mouré. First providing a short history of money doctors, the book then goes on to cover such themes as: *the IMF and policy advice *the Russian experience *contemporary money doctors. The book shows that there is still a long way to go before international financial advice develops into something that is truly helpful in the long term.

A Model for Assessing the Relative Humaneness of Pest Animal Control Methods

Tires and Tracks

Spirituality and Ageing

Jessica Kingsley Publishers Spirituality and Ageing presents the experience of ageing as an opportunity for spiritual reflection and affirmation of life. The contributors are religious and spiritual leaders and ethical thinkers from a range of different backgrounds. They define 'spirituality' not just as a religious concept but as the fulfilment of the universal human need for purpose, values and relationships - a sense of wholeness in life. This spiritual dimension helps people face the emotional and psychological challenges of growing older, such as memory loss, dementia, bereavement and fear of death. Existing systems of social care often focus on the material and physical needs of older people; this collection proposes that the spiritual needs of older people are as vital a consideration for their welfare. Through their spirituality, older people can attain a fuller appreciation and understanding of life, which can also inform and enrich the lives of others. Spirituality and Ageing will be an invaluable resource to carers looking for a holistic and more reflective approach to work with older people.

Vygotsky and Research

Routledge This book provides readers with an overview of the implications for research of the theoretical work which acknowledges a debt to the writings of L.S. Vygotsky. A concise introduction to Vygotsky's original thesis and discussions on his approach to research methods is given; this is followed by an exploration of the

research practices which have arisen in fields developed on the basis of his original thesis. These include: Socio-cultural studies with a focus on mediated action; Distributed Cognition, Situated Cognition and Activity Theory. To aid understanding, chapters devoted to each area will provide excellent accounts of specific studies which illustrate the underlying methodological principles and the specific methods which are being deployed. In each case assumptions and limitations are discussed. The book concludes with some proposals for future developments at both methodological and conceptual levels.

The Round Table. Northcote's Conversations. Characteristics

The Grammar of English-Afrikaans Code Switching

A Feature Checking Account

This dissertation focuses on structural aspects of code switching between South African English and Afrikaans. Specifically, the main aim is to investigate the merit of an account of intrasentential code switching in terms of feature checking theory, a theory associated with minimalist syntax. The hypothesis is that feature checking theory and its related principles and operations provides an adequate framework within which to characterise and explain structural aspects of English-Afrikaans intrasentential code switching. A number of word order differences between English and Afrikaans, specifically involving verb position, are analysed within the framework of feature checking theory, where the movement of lexical items is proposed to be driven by the need to check strong uninterpretable features associated with functional heads. The constructions include constructions with adverbs, focalisation and topicalisation constructions, embedded that and wh clauses, and yes-no questions. On the basis of the feature checking analyses, predictions are made regarding the well-formedness of constructions of these types in which code switching between English and Afrikaans occurs. The predictions are tested on the basis of data elicited from 30 fluent English-Afrikaans bilingual participants by means of (i) judgments of the relative well-formedness of visually-presented sentence pairs, (ii) judgments of the relative well-formedness of auditorily-presented utterance pairs, (iii) sentence construction, (iv) video clip description, and (v) magnitude estimation of the relative well-formedness of visually-presented sentence sets. The results indicate support for some of the predictions, but uniform support for the hypothesis is not evident. Further linguistic factors playing a role in participants' performance are discussed. This dissertation is of interest to scholars in the field of bilingualism, particularly those interested in the application of syntactic theory to bilingual phenomena, and in experimental techniques tapping bilingual processing.

Assessing and Restoring Natural Resources In Post-Conflict Peacebuilding

Routledge When a country emerges from violent conflict, the management of the environment and natural resources has important implications for short-term peacebuilding and long-term stability, particularly if natural resources were a factor in the conflict, play a major role in the national economy, or broadly support livelihoods. Only recently, however, have the assessment, harnessing, and restoration of the natural resource base become essential components of postconflict peacebuilding. This book, by thirty-five authors, examines the experiences of more than twenty countries and territories in assessing post-conflict environmental damage and natural resource degradation and their implications for human health, livelihoods, and security. The book also illustrates how an understanding of both the risks and opportunities associated with natural resources can help decision makers manage natural resources in ways that create jobs, sustain livelihoods, and contribute to economic recovery and reconciliation, without creating new grievances or significant environmental degradation. Finally, the book offers lessons from the remediation of environmental hot spots, restoration of damaged ecosystems, and reconstruction of the environmental services and infrastructure necessary for a sustainable peace. Assessing and Restoring Natural Resources in Post-Conflict Peacebuilding is part of a global initiative to identify and analyze lessons in post-conflict peacebuilding and natural resource management. The project has generated six books of case studies and analyses, with contributions by practitioners, policy makers, and researchers. Other books address highvalue resources, land, water, livelihoods, and governance.

Reading the Old Norse-Icelandic “Maríu saga” in Its Manuscript Contexts

Walter de Gruyter GmbH & Co KG Maríu saga, the Old Norse-Icelandic life of the Virgin Mary, survives in nineteen manuscripts. While the 1871 edition of the saga provides two versions based on multiple manuscripts and prints significant variants in the notes, it does not preserve the literary and social contexts of those manuscripts. In the extant manuscripts Maríu saga rarely exists in the codex by itself. This study restores the saga to its manuscript contexts in order to better understand the meaning of the text within its manuscript matrix, why it was copied in the specific manuscripts it was, and how it was read and used by the different communities that preserved the manuscripts.

Horror, The Film Reader

Routledge Horror, The Film Reader brings together key articles to provide a comprehensive resource for students of horror cinema. Mark Jancovich's introduction traces the development of horror film from The Cabinet of Dr. Caligari to The Blair Witch Project, and outlines the main critical debates. Combining classic and recent articles, each section explores a central issue of horror film, and features an editor's introduction outlining the context of debates.

After Capitalism

Economic Democracy in Action

A grassroots movement for economic democracy based on cooperatives and local economies is quickly growing throughout the planet. After Capitalism, inspired by P.R. Sarkar's Progressive Utilization Theory (Prout), offers a compelling vision of an equitable, sustainable model which economically empowers individuals and communities. Filled with successful examples from six continents as well as many resources, activities and tools for activists, After Capitalism will fill you with hope and the conviction that a new, democratic economy is indeed possible. Includes a conversation with Noam Chomsky and contributions by Frei Betto, Johan Galtung, Leonardo Boff, Sohail Inayatullah, Marcos Arruda, Ravi Batra and others. "An ambitious and stimulating attempt to connect spiritual principles with the pragmatic work of building a better world." - Gar Alperovitz, author of America Beyond Capitalism "A broad ecological, social, political, and spiritual awareness informs this vision of a new economic future. Its vivid real-world examples and clear, accessible language demonstrate that a more beautiful world is within our grasp." - Charles Eisenstein, author of Sacred Economics "With grace and intelligence, Dada Maheshvarananda illuminates paths of personal enlightenment and global transformation. In an epoch when global capitalism ravages our planet and destroys communities, his perspective is a refreshing account of cooperative forms of life that provide alternatives to a world of greed and injustice." - George Katsiaficas, activist and author of Asia's Unknown Uprisings

Twelve Years a Slave

Prabhat Prakashan "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt
