In entertaining and sharp prose, historian Sharan Newman explores theories of world destruction from ancient times up to the present day- theories which reveal as much about human nature as they do about the predominant historical, scientific, and religious beliefs of the time. Readers will find answers to the following end-of-times questions: ?Did the Mayans really say the world will end in December 2012? ?How have the signs in the New Testament Book of Revelations been interpreted over the years? ?How did ancient Egyptians, Norse, and Chinese think the world would end? ?When did Nostradamus predict that the last days would come? ?Does the I Ching reference 2012? ?Why didn't the world end in Y2K? ?Are meteors, global warming, super-volcanoes, and the threat of nuclear war signs that the end is near? **Crazy Over You** *Entangled: Select Otherworld* She's on the sheriff's most wanted list. This book examines systemic reforms that incorporate new technology to improve any teacher education program. While there are books that address the integration of technology into teaching curricula, very few address the process for teacher education faculty and the systemic reform of a teacher education program. Integrating Information Technology into the Teacher Education Curriculum: Process and Products of Change provides practical examples and suggestions for teacher education departments striving to integrate new technologies into their curriculum. It will help in the effort to motivate faculty to make utilizing new technology a natural strategy for the teachers they are educating. It describes the creation of Design Teams at Brigham Young University's McKay School of Education (funded by a PT3 grant) and how these teams worked to successfully reconfigure the school's teacher preparation curricula. Integrating Information Technology into the Teacher Education Curriculum examines: how to compose and create a curriculum design team—including both teacher education and content-specific methods instructors training and collaboration opportunities that focus on the infusion of technology how to facilitate alignment among a university, cooperating school districts, the State Office of Education, and other available teacher preparation programs specific case examples of the redevelopment of teacher education courses by the instructors who teach them the process of changing a technology course required by the teacher education program the process of extending grant activities to the university's partner school districts and the State Office of Education From the editors: Preparing tomorrow's teachers to use technology in schools is a complex endeavor requiring the infusion of technology into curriculum and instructional practices at all levels of the pre-service program. In many early teacher education programs, prospective teachers took a computer literacy class separate from content methods classes and rarely engaged in real collaboration on how schoolteachers could integrate technology into authentic learning experiences. By focusing merely on how to use computers, technology training failed by not addressing how to teach students more effectively using a variety of technological tools. What teachers need to know most is how to teach content more effectively. Technology integration should cause teachers to develop different perspectives through rethinking teaching and learning. Teaching with technology causes teachers to confront their established beliefs about instruction and their traditional roles as classroom teachers. **Blood Memory** Penguin Targeted for assassination after doing a story on an attempt by the Arapaho and Cheyenne tribes to file a claim on their ancestral lands, Denver reporter Catherine McLeod uncovers a conspiracy involving her ex-husband's wealthy family and state politicians. **Tough Fronts The Impact of Street Culture on Schooling** Routledge Tough Fronts takes the difficult issues in urban education head on by putting street-savvy students at the forefront of the discussion on how to best make successful changes for inner city schools. Individual chapters discuss scholarly depictions of black America, the social complexity of the teacher-student relationship, individual success stories of 'at-risk' programs, popular images of urban students, and implications for education policy. With close attention to the voices of individual students, this engaging book gives vitality and legitimacy to arguments for school changes that have been lacking in previous discussions. **Veterinary Hematology Atlas of Common**

We use them to communicate, research, process, record, and for entertainment. They influence the way we interact in the world, the way we live. Digital technologies also offer the potential to transform the nature of the learning process in mathematics. The learning environment, the types of tasks learners can engage with, and the nature of that engagement differs from working in other environments. The Internet, for instance, presents greater scope for child-centered, inquiry-based learning. Dynamic geometry software and GoogleEarth offer interactive ways of exploring shape, position and space that is not possible with the pencil-and-paper medium. This book provides insights into how mathematical understanding emerged for primary-aged children (5-13 years) when they investigated mathematical tasks through digital media. It considers learning theories that are frequently used in mathematics education, and situates a contemporary interpretive approach within those perspectives. A key purpose was to provide some practical tasks for teachers/teacher educators to incorporate digital technologies into their mathematics programmes, tasks that have been used successfully for learning. This is a significant reference book for primary-school teacher education and a valuable resource for all schools teaching at that age. **Total Feng Shui Bring Health, Wealth, and Happiness Into Your Life** *Chronicle Books* Accompanied by a definitive reference on feng shui vocabulary and concepts, a thorough, accessible guide introduces the fundamental principles of feng shui and explains how to apply them at home, outdoors, and in the workplace. Claire Reed always believed in helping others, but it wasn't until she began working with Women Strike for Peace, an early antinuclear proliferation organization, that she saw she could actually change the world. She went on to work with one of the icons of modern feminism, Bella Abzug, and with civil rights groups. Her story is the story of an era when women could, at last, shed the feminine mystique and become the woman they had buried inside themselves. **Death Waits in the Dark** *Blackstone Publishing* It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life. **Touchy Subjects** *Pioneer Drama Service, Inc.* In this sparkling collection of nineteen stories, the bestselling author of *Slammerkin* returns to contemporary affairs, exposing the private dilemmas that result from some of our most public controversies. When Mom was gone, she suddenly became my responsibility. The best years of my life were spent being a caretaker to someone else...with no one to take care of me. So I moved to Paris for my study-abroad program and ended up staying, getting a French Literature degree, studying the classics while sipping the best wine I'd ever had. My sister never makes the best decisions, always makes messes to clean up, and it's finally time for me to have my own life. But when she comes to Paris for a visit...she brings trouble with her. She gets herself into a bad situation, and of course, I come to her rescue...like I always do. Now we're in a labor camp in the middle of nowhere, surrounded by endless snow and mountains, processing drugs for a group of men that never show their faces. There's no chance of escape in this wilderness. Except for my guard. He's not a saint, but he's the only man that's kind to me. He knows I want to escape, but he never reports me. When I've had a hard day, he brings me extra things to make my life easier. He tells me not to run because I'll never make it...but he brings me little hidden tools...as if he's giving me the means. Like he wants me to be free.
