A MANUAL OF MODERN SCHOLASTIC PHILOSOPHY

VOLUME II: NATURAL THEOLOGY, LOGIC, ETHICS, HISTORY OF PHILOSOPHY

BoD - Books on Demand Cardinal Mercier's Manual of Modern Scholastic Philosophy is a standard work, prepared at the Higher Institute of Philosophy, Louvain, mainly for the use of clerical students in Catholic Seminaries. Though undoubtedly elementary, it contains a clear, simple, and methodological exposition of the principles and problems of every department of philosophy, and its appeal is not to any particular class, but broadly human and universal. Volume II contains sections on natural theology, logic, ethics and outlines of the history of philosophy.

GEOLOGY AND RELIGION

A HISTORY OF HARMONY AND HOSTILITY

Geological Society of London The book discusses this long-standing relationship from a historical point of view, which in the past has been sometimes indifferent, sometimes fruitful and sometimes full of conflict. The relationship continues well into the present. While Christian fundamentalists attack evolution and related palaeontological findings as well as the geological evidence of the age of the Earth, mainstream theologians strive for a fruitful dialogue between science and religion. Much of what is written and discussed today can only be understood, when the historical perspective is added. This book considers the following topics: the development of geology from mythological approaches towards the European Enlightenment, Biblical or Geological Flood and the age of the Earth, geology within 'religious' organizations, biographical case studies of geological clerics and religious geologists, religion and evolution, historical aspects of creationism and its motives.

SCHOOL-BASED AUDIOLOGY

Plural Publishing School-Based Audiology takes the reader through the history of audiology in the schools, focusing on legislation that has shaped the face of school-based audiology as it is practiced throughout the United States. Core concepts involving academic achievement in students who are deaf/hard-of-hearing, classroom acoustics, hearing screening programs, hearing loss prevention programs, diagnostic evaluation protocols, hearing aid and FM system verification procedures, and classroom amplification are covered throughout the chapters. Concepts regarding collaboration with other school-based professionals and classroom accommodations and modifications are outlined and provide examples for real-life application. Each chapter of this textbook concludes with a list of vocabulary words and terms used in the educational environment. Practice management concepts not typically discussed in textbooks on this topic are presented, including minimum competencies, third-party billing, program outcome evaluation, mentoring, and preceptoring. Recently qualified and even seasoned audiologists will appreciate attention given to recent advances in areas like cochlear implants, auditory processing disorders, and auditory dys-synchrony as they relate to managing students with hearing loss. The varied and ever-changing roles of audiologists in the educational setting are described and highlighted with vignettes, or short personal statements describing real practitioners' degree and training information, work settings, job description within their school districts, and day-to-day responsibilities. These personal accounts allow the AuD student an "inside look" at what audiologists do in the schools. Students are able to experience through these readings how different, exciting, and even challenging

school-based positions can be. Instructors using this textbook will be able to supplement their lectures with the information described here, and will appreciate the structured approach wherein concepts contained in the chapters progressively advance in tune with the reader's knowledge. Instructors' goals will be met, as well as KASA requirements, because this textbook provides students the necessary knowledge needed to serve in an educational audiology position.
