ANNA SOKOLOW

THE REBELLIOUS SPIRIT

Routledge A pioneer choreographer in modern American dance, Anna Sokolow has led a bewildering, active international life. Her meticulous biographer Larry Warren once looked up Anna Sokolow in a few reference books and found that she was born in three different years and that her parents were from Poland except when they were in Russia, and found many other inaccuracies. Drawing on material from nearly 100 interviews, Larry Warren has created a fascinating account and assessment of the life and work of Anna Sokolow,

whose nomadic career was divided between New York, Mexico, and Israel. Setting her work on more than 70 dance companies, Anna Sokolow not only pioneered the development of a personal approach to movement, which has become part of the language of contemporary dance, but also created such masterpieces as *Rooms*, dealing with loneliness and alienation, and *Dreams*, which concerns the inner torment of victims of the Nazi Holocaust.

AUTOMOTIVE MACHINING

A GUIDE TO BORING, DECKING, HONING & MORE

CarTech Inc Machining is an essential part of high-performance engine building and stock rebuilding, as well as certain servicing procedures. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced. Classic and older engines typically require extensive machining and almost every major component of engine, including block, heads, intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian, editor of *Engine Building Professional*, walks you through each important machining procedure. A stock 300-hp engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. The author also shows you how to inspect, measure, and evaluate components so you can provide astute guidance and make the best machine work choices. Machining procedures included are cylinder boring, align boring/honing, decking, valveseat cutting, cam tunnel boring, and a multitude of other services. In addition, multi-angle valve jobs, setting the valveseats, altering rocker arm ratio, re-conditioning connecting rods, and machining and matching valvetrain components are also covered. Whether you're an enthusiast engine builder or prospective machining student who wants to pursue a career as an automotive machinist, this book will provide insight and in-depth instruction for performing the most common and important machining procedures.

AUTO REPAIR FOR DUMMIES

John Wiley & Sons **Auto Repair For Dummies, 2nd Edition (9781119543619)** was previously published as **Auto Repair For Dummies, 2nd Edition (9780764599026)**. While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
