KINGDOM OF TWILIGHT

MacLehose Press A "powerful and original" (The Times) historical saga that follows the quest for identity, redemption and home in the wake of World War II. One night in autumn 1944, a gunshot echoes through the alleyways of a small town in occupied Poland. An SS officer is shot dead by a young Polish Jew, Margarita Ejenstain. In retaliation, his commander orders the execution of thirty-seven Poles--one for every year of the dead man's life. First hidden by a sympathetic German couple, Margarita

must then flee the brutal advance of the Soviet army with her newborn baby. So begins a thrilling panorama of intermingled destinies and events that reverberate from that single act of defiance. *Kingdom of Twilight* follows the lives of Jewish refugees and a German family resettled from Bukovina, as well as a former SS officer, chronicling the geographical and psychological dislocation generated by war. A quest for identity and truth takes them from refugee camps to Lübeck, Berlin, Tel Aviv, and New York, as they try to make sense of a changed world, and of their place in it. Hypnotically lyrical and intensely moving, Steven Uhly's epic novel is a finely nuanced yet shattering exploration of universal themes: love, hatred, doubt, survival, guilt, humanity, and redemption.

AUGIE'S QUEST

ONE MAN'S JOURNEY FROM SUCCESS TO SIGNIFICANCE

Bloomsbury Publishing USA What happens to "orphan" diseases that aren't big enough profit centers for the pharmaceutical industry or get caught in the web of government funding and academic research? Augie Nieto found out in the spring of 2005: At forty-seven years old he was diagnosed with ALS. Devastated, Augie struggled with depression and attempted suicide. When he awoke from a coma, with friends and family surrounding him, his sense of faith and mission were renewed. Fast-forward one year: Augie and his wife, Lynne, were profiled as "Real Heroes" on the Today show. Their determination to beat the disease had already led to major overhauls in the way ALS research was conducted. In partnership with the Muscular Dystrophy Association, Augie had set up a foundation and lab to coordinate and oversee ALS research and testing across the globe. By centralizing operations and championing an entrepreneurial approach to medical research, Augie and his team accomplished remarkable results in less than two years. Part inspiration, part business innovation, Augie's Quest illustrates how one person can make a meaningful difference. Praise for Augie Nieto: George H. W. Bush, former U.S. president: "Your contributions to the fitness industry are well known, and your dedication an inspiration." Lance Armstrong, seven-time "Le Tour de France" champion: "I think it says a lot about Augie, the fact that everybody came together regardless of whether or not it's for competing gyms or competing companies that make equipment. They all say, this is one of our own; this is a guy who's committed his life to our industry and has been dealt a serious blow. We're going to be there for

him, we're going to say, we're here for you and we're part of the Quest." Arnold Schwarzenegger, governor of California: "Your success has been incredible. But you are so much more than just a successful businessman. You are the greatest husband, a great father, and a terrific friend. So,

HOW HARD CAN IT BE?

A NOVEL

"Allison Pearson's brilliant debut novel, I Don't Know How She Does It, was a New York Times bestseller with four million copies sold around the world. Called "the definitive social comedy of working motherhood" (The Washington Post) and "a hysterical look--in both the laughing and crying senses of the world--at the life of Supermom" (The New York Times), I Don't Know How She Does It introduced Kate Reddy, a woman as sharp as she was funny. As Oprah Winfrey put it, Kate's story became "the national anthem for working mothers." Seven years later, Kate Reddy is facing her 50th birthday. Her children have turned into impossible teenagers; her mother and in-laws are in precarious health; and her husband is having a midlife crisis that leaves her desperate to restart her career after years away from the workplace. Once again, Kate is scrambling to keep all the balls in the air in a juggling act that an early review from the U.K. Express hailed as "sparkling, funny, and poignant...a triumphant return for Pearson." Will Kate reclaim her rightful place at the very hedge fund she founded, or will she strangle in her new "shaping" underwear? Will she rekindle an old flame, or will her house burn to the ground when a rowdy mob shows up for her daughter's surprise (to her parents) Christmas party? Surely it will all work out in the end. After all, how hard can it be?"--

PROFESSIONAL ACADEMIC WRITING IN THE HUMANITIES AND SOCIAL SCIENCES

SIU Press In Professional Academic Writing in the Humanities and Social Sciences, Susan Peck MacDonald tackles important and often controversial contemporary questions regarding the rhetoric of inquiry, the social construction of knowledge, and the professionalization of the academy. MacDonald argues that the academy has devoted more effort to analyzing theory and method than to analyzing its own texts. Professional texts need further attention because they not only create but are also shaped by the knowledge that is special to each discipline. Her assumption is that knowledge-making is the distinctive activity of the academy at the professional level; for that reason, it is important to examine differences in the ways the professional texts of subdisciplinary communities focus on and consolidate knowledge within their fields. Throughout the book, MacDonald stresses her conviction that academics need to do a better job of explaining their text-making axioms, clarifying their expectations of students at all levels, and monitoring their own professional practices. MacDonald's proposals for both textual and sentence-level analysis will help academic professionals better understand how they might improve communication within their professional communities and with their students.

EPI-PALEO RX

THE PRESCRIPTION FOR DISEASE REVERSAL AND OPTIMAL HEALTH

Neurosurgeon and wildly controversial Paleo blogger Dr. Jack Kruse gives us his first

book, *Epi-paleo Rx: The Prescription for Disease Reversal and Optimal Health*. Kruse, who used his findings to lose 140 pounds and pack on muscle, takes the reader through his prescriptions for obesity, diabetes, heart disease, osteoporosis, autoimmunity, brain health, and aging. The material weaves together surprises from our Ice Age origins with the new science of epigenetics, or the effect of diet and environment on gene expression. A champion of “biohacking,” the art of tinkering with one’s own biology, Kruse pounces on his own profession’s ineptness when it comes to chronic conditions and urges readers to take health care into their own hands. He discusses which labs to order and why, why your doctor is obligated to write you a prescription you don’t need, the vital roles daylight and darkness play in metabolism, and the optimal diet for different stages of health and different times of year. Perhaps Kruse’s more fascinating contributions to Paleo literature are his findings on cold therapy—the effect of cold environments, immersion in cold water, and ice pack therapy on disease reversal, pain, and optimal living. Kruse explains how our origins as cold-adapted mammals hold the key to disease reversal, using a shocking biohack to prove his theory. The *Epi-paleo Rx* is the result of Kruse’s abundant research and clinical application in his practice as a neurosurgeon. Kruse questions conventional wisdom about human metabolism and chronic disease, arguing science has incomplete information when it comes to insulin resistance, diabetes, obesity, and their related illnesses. By examining the human body through the prism of our early beginnings and the science of epigenetics, we find each of us already possesses the “owner’s manual” to reverse disease and live optimally.
