Government Executive Daily Graphic Issue 149606 December 8 2005 *Graphic Communications Group* **PC World Samsung Rising The Inside Story of the South Korean Giant That Set Out to Beat Apple and Conquer Tech** *Currency* An explosive exposé of Samsung that “reads like a dynastic thriller, rolling through three generations of family intrigue, embezzlement, bribery, corruption, prostitution, and other bad behavior” (The Wall Street Journal). LONGLISTED FOR THE FINANCIAL TIMES AND MCKINSEY BUSINESS BOOK OF THE YEAR AWARD Based on years of reporting on Samsung for The Economist, The Wall Street Journal, and Time, from his base in South Korea, and his countless sources inside and outside the company, Geoffrey Cain offers a penetrating look behind the curtains of the biggest company nobody in America knows. Seen for decades in tech circles as a fast follower rather than an innovation leader, Samsung today has grown to become a market leader in the United States and around the globe. They have captured one quarter of the smartphone market and have been pushing the envelope on every front. Forty years ago, Samsung was a rickety Korean agricultural conglomerate that produced sugar, paper, and fertilizer, located in a backward country with a third-world economy. With the rise of the PC revolution, though, Chairman Lee Byung-chul began a bold experiment: to make Samsung a major supplier of computer chips. The multimillion- dollar plan was incredibly risky. But Lee, wowed by a young Steve Jobs, who sat down with the chairman to offer his advice, became obsessed with creating a tech empire. And in Samsung Rising, we follow Samsung behind the scenes as the company fights its way to the top of tech. It is one of Apple’s chief suppliers of technology critical to the iPhone, and its own Galaxy phone outsells the iPhone. Today, Samsung employs over 300,000 people (compared to Apple’s 80,000 and Google’s 48,000). The company’s revenues have grown more than forty times from that of 1987 and make up more than 20

percent of South Korea's exports. Yet their disastrous recall of the Galaxy Note 7, with numerous reports of phones spontaneously bursting into flames, reveals the dangers of the company's headlong attempt to overtake Apple at any cost. A sweeping insider account, *Samsung Rising* shows how a determined and fearless Asian competitor has become a force to be reckoned with.

Astro-Imaging Projects for Amateur Astronomers A Maker's Guide *Springer* This is the must-have guide for all amateur astronomers who double as makers, doers, tinkerers, problem-solvers, and inventors. In a world where an amateur astronomy habit can easily run into the many thousands of dollars, it is still possible for practitioners to get high-quality results and equipment on a budget by utilizing DIY techniques. Surprisingly, it's not that hard to modify existing equipment to get new and improved usability from older or outdated technology, creating an end result that can outshine the pricey higher-end tools. All it takes is some elbow grease, a creative and open mind and the help of Chung's hard-won knowledge on building and modifying telescopes and cameras. With this book, it is possible for readers to improve their craft, making their equipment more user friendly. The tools are at hand, and the advice on how to do it is here. Readers will discover a comprehensive presentation of astronomical projects that any amateur on any budget can replicate - projects that utilize leading edge technology and techniques sure to invigorate the experts and elevate the less experienced. As the "maker" community continues to expand, it has wonderful things to offer amateur astronomers with a willingness to get their hands dirty. Tweaking observing and imaging equipment so that it serves a custom purpose can take your observing options to the next level, while being fun to boot.

Soil Enzymology in the Recycling of Organic Wastes and Environmental Restoration *Springer Science & Business Media* Soil enzymes play a fundamental role in many soil processes such as the mineralization of organic matter, the synthesis of humic substances, the degradation of xenobiotics or the mechanisms involved in the biocontrol of plant pathogens. Their direct link with soil microorganisms gives them a key role as biomonitors of the evolution of soil quality or in the monitoring of the application of organic amendments to degraded soils. As a consequence of the importance of soil enzymes on soil processes, there is an increasing interest in their study, as well as in the application of molecular techniques as diagnostic tools.

The 9th Symbol Rose is a princess, a Cinder, and half-human. She is the last one born of her kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. ". . . And we will all dance at the Grand Ball," her sisters would always say. But the Human servants are keeping a secret that could prevent the Cinders from reaching their Happily Ever After....Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object and exclaiming, "Oh dear! Oh dear! I shall be too late!"

Cuny Janssen: Whatever Works *Snoeck Publishing Company* Twenty years ago I set out to photograph children all around the world. My first trip was to the south of India. I started in the province of Tamil Nadu, first living in a Church Women Centre in the city of Chennai, then in Mugaiyur, a small village. For six months I took pictures and had conversations with roommates, guides, and members of the families who had taken me in as a guest. I had very many questions, as did they. After children, the main subject was always love. Everything I heard from them and saw around me there filled me with both surprise and doubt, but above all with admiration. I admired their courage and faith. Their arranged marriages were a fascinating mystery to me. One way to understand arranged marriages was to make portraits. I photographed women and men various ages, engaged or planned couples and married couples.
