How can I construct the voice of a historical narrator with authenticity? How should I depict a physically atypical character? Few books on the market address the problems and opportunities present in these and other questions, yet they are the ones that most writers grapple with on a daily basis. *Danger on the Page: A Fiction Writer's Guide to Sex, Violence, Dead Narrators, and Other Challenges* identifies and explores some of the more common and intractable situational challenges of fiction writing, with chapters grouped into the general subject areas such as scenes, characters, points of view, and settings. Shawver delves into the pitfalls and opportunities of writing about sex, violence, sports, and love; he examines writing from the perspective of a different race, gender, or species; he interrogates conventional beliefs about the use of brand names, the description of architecture, and the portrayal of nature. Throughout, he gives dozens of examples from both literary and commercial fiction so readers can borrow (or reject) other writers' techniques and explore the myriad challenges of fiction writing on their own. A lively and witty approach to a diverse range of specific writing issues, Shawver's book will appeal especially to intermediate-level writers seeking to bring their craft to the next level. **Confessions of a Guidette** *Simon and Schuster* A loud, wild, cuddly and in-your-face party girl with sky-high hair and a spray tan, the pint-size Snooki has emerged as the breakout star of the wildly successful *Jersey Shore*. March 2, 1999 Free Radicals in Biology** *Elsevier* *Free Radicals in Biology, Volume V* covers the mechanisms for the generation of free radicals. This volume contains eight chapters that discuss the biology and chemistry of oxy-radicals in mitochondria and the radical-mediated metabolism of xenobiotics. The opening chapter describes the mechanisms of free radical production in enzymatically promoted lipid peroxidation, generally in microsomes or microsomal lipids. The subsequent chapters explore the biochemistry and biology of plant and animal lipooxygenases; the production of superoxide and hydrogen peroxide in mitochondria; and the biological role of these species in mitochondria and related systems. The discussions then shift to the effects of superoxide production in white blood cells, with an emphasis on an evaluation of the oxygen-dependent reactions of the important phagocytic cells, the monocytes, and the polymorphonuclear leukocytes. This volume further covers the formation and the role of oxy-radicals in the red blood cell, which is a very useful system for studying the protection of biological tissue against radical-mediated damage. A chapter presents a comprehensive review of the production of free radicals during the metabolism of xenobiotics. The last chapters provide an overview of the enzymology, biological functions, and free radical chemistry of glutathione peroxidase. These chapters also examine a number of gerontological principles and the effect of antioxidants in aging. Chemists, biologists, and physicists will find this book of great value. **Nursetest Medical-Surgical Nursing Everyone's Guide To Online Dating How to Find Love and Friendship on the Internet** *How To Books* Whether you're looking for love or a special friendship, online dating is a simple yet effective way to improve your social life.
